SUNDAY, MARCH 30,

## THE SMARTEST FASHIONS OF WELL-DRESSED FOLK

### THE RAINBOW WEDDING

**T**HIS page offers a suggestion for the prospective bride who is planning a large wedding. Borrow the colors from the rainbow and appropriate them to your use. Have your attendants attired in the hues of the spectrum, selecting the pastel tints. The lovely, colorful effect produced by this blending of tones will be most artistic.

The bridal robe is one of the latest models. It is of white satin and alençon lace. Over an underbodice of lace the satin is arranged in soft folds, which disappear beneath a crushed girde. The draped skirt is caught up in front, revealing an underskirt of lace terminating in a square-cut train. Tulle is used for the girde, which is held to the gown with three strands of pearls and clusters of orange blossoms.

Pale-blue chiffon, over satin of the same tint, is used for the maid-of-honor's costume. Wreaths of pink roses are embroidered on the underskirt, of which a fascinating glimpse is caught through the slashed overskirt. A deep, pointed girde of blue satin extends well into the bodice of white chiffon. A three-quarter-length coat of cream lace completes this smart gown. Her hat is of leghorn, with a ruffled crown of lace over pale blue. A cockade of black-and-white ostrich plumage is poised at the side.

The bridesmaids' costumes are of chiffon, draped over a foundation of satin embroidered with pink roses at the hem. Yellow, pink and violet are the colors selected, and chic little taffeta jackets are worn over the bodices of white chiffon and lace. Strands of pink gauze roses are festooned below the hips. Bouquets of pink roses complete the stunning effect of these toilettes. Leghorn hats, faced with chiffon to match the gown, with tam-o'-shanter crowns of taffeta and trimmings of pink roses, are worn by the dainty maids.

The frock of the flower-girl is of white chiffon, made in the popular French fashion. Roses embroidered with blue adorn the collar and cuffs. The bodice and yoke are smocked with fine silk, producing a charming effect. Her small basket hat of milan straw is trimmed with ribbon, having a picot edge and small, compact clusters of forget-me-nots. The basket is filled with daisies and forget-me-nots.

This collection of attractive costumes emphasizes the salient features of the spring modes and will, no doubt, win your admiration.

The "rainbow wedding" may solve the question which is perplexing many a fair maiden who desires her wedding to be the loveliest ever given.

*Elizabeth Criss Paul*

## BLOOD TAX IS TORY PARTY SLOGAN

Political Kaleidoscope Showing New Lines and Figures Also Shows New Issue.

Mad Race for Military Armament Would Please France; German Nightmare Seen.

(Special to THE TRIBUNE by International News Service.)

(By PHILIP EVERETT.)

LONDON, March 29.—Once more the Tory party have turned their political kaleidoscope and when you look into it you find it showing new lines and figures. Gone is every trace of the tariff reform program which came so near capturing the party vessel and throwing its makeshift leader overboard into the foaming sea of strife and turmoil. Gone is the cry of food tax or no food tax and its place has come a well-coined cry for blood tax—conscription. The preliminary skirmishes were inaugurated by visions of German aerial monsters in the heavens above, which made John Bull's island the laughing stock of the whole continent outside of France. There the cry for conscription in England had a pleasant sound in the ears of the patriots, aroused to a sense of a very real and tangible danger by the Kaiser's clamor for new legions.

There is nothing which France would rather see than England drawn into the mad race for military armaments, for the British fleet being undoubtedly strong enough to prevent a German invasion into England, a new-born English standing army well drilled and equipped might easily be spared at home and sent across the channel to fight at the side of the French against the Prussians as the soldiers of Wellington fought shoulder to shoulder with the Prussians under Blucher almost exactly a century ago, during the last decisive hours of the battle of Waterloo.

FRENCH PRESS ALLY.

And so in their new policy in favor of conscription the Tories have found a new ally in the French press, an ally whose usefulness is rather weakened, to be sure, by the fact that very few Englishmen read or are able to read the French papers, but whose arguments nevertheless come in handy when translated and served for Tory readers as perfectly unbiased judgments of what is England's first duty to herself.

And one must admit that the French press has not been stary and dodging but campaign arguments and heavy ammunition to the British jingoes. Great French papers have been writing columns on how the Tory Germans are leading the English liberal government by the nose. It was to be believed "Le Temps" and the "Echo de Paris" it is the German ambassador in England, who, during the last months at least, has been boss of the whole show. The whole movement in favor of a friendly understanding between this country and Germany has been stage managed by him in command of the whole German colony in London with its legions of clerks, teachers and waiters who have been marshalled and conducted around to create public opinion at public meetings.

FOREIGN OFFICE FREE.

Fortunately, these same papers say, the British foreign office is not under the thumb of the temporary stupid liberal government. Even if it was broken out between Germany and France as a result of the Agadir crisis, the "Figaro" is clumsy enough to say, two British army corps would have been sent over to fight by the side of the French, but really the ideal situation will be only with a Tory government in power.

And here we have the gist of the whole agitation for conscription. "Le Figaro" inadvertently let the cat out of the bag. England must not reach a friendly understanding with Germany, and England must have a big standing army, not to be able to defend her own country, but to make up the deficit in numbers of the French army as compared with that of Germany. This is clear to anybody who has read the French papers since M. Poincaré became president of France.

UNREST FELT.

There is unrest in the air again, and 1913 promises to be troubled by strikes as was 1912. Especially is this evident in the railroad world. Time and again during the last two months we have been on the verge of a partial railroad strike which would have been very costly to the general public. The big English railroad companies have learned nothing from the past. The wages of the men are miserable when compared with the cost of living, and the men, less foolish than the companies that employ them, have learned a lesson from experience. Their eyes have been opened to the value of collective action. The new National Union of Railwaymen, with its 200,000 members, and its steadily increasing fund of half a million sterling which it has accumulated, which is not easy to suppress will remain dormant very much longer unless the companies are wise enough voluntarily to improve the conditions of their employees. And it makes the matter more serious still is the fact that there seems prospect of an offensive and defensive alliance between the railwaymen and the other transport workers, who are again spilling for a fight.

THE GREAT STRIKE IS NOT PRECIPITATED BY SOME ACCIDENTAL QUARREL before that time, England will certainly be in the throes of another great railroad strike by November, and then the government will find it harder than ever to act as arbitrators with the hope of success. The men have not forgotten how much the government hampered itself in regard to the Railway bill by previous pledges to the railroad companies.

RESIDENTS UNHAPPY.

It is not to be concealed that the residents of the British West Indies have not been happy as they ought to be in enjoying the privilege of being under English rule. Nothing in

## THOSE WHO HAVE POSED FOR CAMERA MAN

DUCHESS OF MARLBOROUGH

HON. DIANA LISTER

### INTRODUCTIONS

Godfrey Isaacs is the brother of that brilliant lawyer, Sir Rufus Isaacs, the attorney general of Great Britain. He has also proved to be a very capable business man as he has placed the Marconi company in a very different position financially from what he found it. He was the subject of a good deal of outspoken criticism from Mr. Massey whose strong line of action was the subject of so much comment at the sitting of the commission. Mr. Isaacs is contesting the Mid-Essex division in the Liberal interest. The Marconi works at Chelmsford are in the center of a division which he hopes to represent. He is the son of the late Joseph Isaacs, a well-known London merchant.

Hon. Diana Lister's engagement to Percy Wyndham was one of the most interesting announcements of last week. Miss Lister is the daughter of Lord Ribblesdale, known to his many friends as "the Ancestor." Mr. Wyndham, who is in the Coldstream, is the only son of George Wyndham and Lady Grosvenor and is a stepbrother of the Duke of Westminster and Lady Beauchamp.

The marriage will unite two families who have many interesting associations, both political and social. A new portrait catches her grace, the Duchess of Marlborough, in a characteristic attitude.

Miss Daphne Fitzgeorge is the daughter of the late Colonel Fitzgeorge. Miss Fitzgeorge is a clever amateur actress and singer, a well-known figure at Prince's skating club, and is very popular in society. Her sister, Miss, married Robert Balfour recently.

Miss A. M. Champneys is the daughter of Basil Champneys, the well-known architect, whose first novel, "Bride Elect," has just been published.

### PAID PENSIONS TO 'DEAD ONES'

Granted 1814, and Paid for Nearly 100 Years, War Office Suspects Fraud.

(Special to THE TRIBUNE by International News Service.)

LONDON, March 29.—A strange case of fraud on the war office is reported in the report of the comptroller and auditor general on the army appropriation account for 1911-12.

Two pensions granted in 1814 were paid for nearly 100 years, and no suspicion was raised until 1905, when, "in view of the advanced age of the pensioners," the cases were reported for special investigation, the result being the discovery that the pensioners had been impersonated for many years.

The army funds, states the report, were defrauded of about \$2295.

It is explained that in 1814 compensation was raised until 1905, when, "in view of the advanced age of the pensioners," the cases were reported for special investigation, the result being the discovery that the pensioners had been impersonated for many years.

Steps to be taken to secure better documentary evidence of identity and to prevent impersonation of pensioners are now under consideration.

Frank Wilson, now on his way to Canada on the steamship Ascania, was standing miserably on the pavement in Edgmore road wondering how he could earn a few coppers for a meal when the accident happened.

The dog's owner was very fond of her pet, and in kindness interested herself upon the production of proper forms of declaration and receipts duly attested by the notaries public in the United States, and it was not until the special inquiries were made that it was discovered that one of the pensioners died about 1873 and the other about 1890.

Steps to be taken to secure better documentary evidence of identity and to prevent impersonation of pensioners are now under consideration.

### BEFRIENDS LAD FOR BEFRIENDING HER DOG

(Special to THE TRIBUNE by International News Service.)

LONDON, March 29.—Because he had compassion on a poor dog that had been run over by a motor-bus and carried home to its owner—a lady living in the West End of London—an unfortunate young man's life is entirely changed.

Frank Wilson, now on his way to Canada on the steamship Ascania, was standing miserably on the pavement in Edgmore road wondering how he could earn a few coppers for a meal when the accident happened.

The dog's owner was very fond of her pet, and in kindness interested herself upon the production of proper forms of declaration and receipts duly attested by the notaries public in the United States, and it was not until the special inquiries were made that it was discovered that one of the pensioners died about 1873 and the other about 1890.

### ELEPHANT EATS BISCUIT AND \$100 BANKNOTES

(Special to THE TRIBUNE by International News Service.)

LONDON, March 29.—Banknotes to the value of \$100, belonging to a visitor, have been eaten by a menagerie elephant at Ux.

While feeding the elephant with biscuits, Mr. Savery, of the Nag Head hotel, placed a biscuit in the side pocket of his coat, in which was also a letter containing \$100 in notes.

The elephant, in his search, put the tip of his trunk in the pocket and took out both biscuit and letter, and transferring them to his mouth, swallowed the lot.

### CANADA, THE NEW ELDORADO, CALLS

Englishmen Migrate by Scores, Lured by Prosperity of Pioneers.

(Special to THE TRIBUNE by International News Service.)

LONDON, March 29.—High up among the hills of Oxfordshire, between the villages of Combe and Stonesfield, there is a little place called, by a freakish fancy, Paradise. In some respects it is not inaptly named. The country is extremely beautiful; the land fruitful. But the inhabitants are leaving it—leaving Paradise, not singly, but in scores out of their scanty hundreds for a golden vision in the West.

Next April a party of nearly fifty people will leave Combe and Stonesfield for Canada, more than five per cent of the population. From Charlbury, a rather larger village in the vicinity, another fifty are going at the same time. Whole families have emigrated; fathers going first, have sent home for their wives and children, and brothers have sent for brothers. Nearly 150 people have left the two smaller villages out of a combined population of 600.

Young Combe and young Stonesfield, abroad are doing remarkably well. The tales of their doings fire the blood of the stay-at-homes. There is the first of the Woodleigh boys, who went out last spring and in the course of a year have made home nearly \$500. Two brothers are joining him this spring and one more next year. The climate in the West seems to work strange transformations of character too. One man who was noted for hard work at home, set off nine months ago, and to the joy of his wife, besides sending home \$250 a week regularly, has now forwarded \$250 for her passage and to buy warm clothing.

From the Black Head Inn at Combe the whole family is migrating. Six years ago the eldest son was the pioneer of emigration from the village. In Canada he has married and has a house of his own, for which he has been offered \$500. His father followed him a year ago, and in the twelve months saved nearly \$500. He has returned to fetch his wife and children, his son-in-law and all his family.

In rural Oxfordshire meantime field after field that once was arable land is being laid down in grass. There is an insufficiency of labor. Last summer the women had to go into the fields for harvest, and the schools were closed so that the children could assist in picking potatoes.

It was recently reported that from the village of Doveholes, Derbyshire, 50 out of a population of 1000 had left for Canada.

## GERMANS FACE INTERNAL TROUBLE

Rivalry in Armament Cause of Political Rupture; Socialists Profit.

Message of New French President Displeases Military Advocates.

(Special to THE TRIBUNE by International News Service.)

(By FREDERICK WERNER.)

BERLIN, March 29.—It cannot truthfully be said that Easter found Germans taking a very rosy view of the political situation, domestic or foreign.

In regard to the latter, everybody realizes that with M. Poincaré a new spirit has taken possession of the Palais Elysee. Not only is he far more popular with the French people than any of his recent predecessors, but from the very first he made it clear that he will use every means to increase his popularity. His first message made the impression of not being a very wise one, its mentioning the "cruel trials of 1870-71" was hardly considered proper in an official document and his attempt to establish some connection between France's preparedness for war and civilization was rather clumsy. His following acts, the sending of Delcasse to St. Petersburg and his agitation for a strengthening of the French army did not surprise anyone here, though perhaps they did not create the deep impression which the president of France probably hoped for. As French attempts at reading the German soul generally do, this also failed. Germans are not apt to mix up cases and persons, who, as a matter of fact, care very little what French statesman is sent to the czar's court. Germany fears neither Delcasse nor President Poincaré, but Germans endeavor to understand and judge the actions of the president of France, particularly when he is a man who evidently intends to make the fullest use of his power as chief executive.

DEPLORE RIVALRY.

When Germans, I am thinking of the great intelligent part of the German people—deplore the turn affairs have taken in France, it is simply because they think that two great cultured nations ought to be able to find worthier tasks than a senseless rivalry in matters which have absolutely nothing to do with culture or civilization.

It is not the turn of the tide in France which causes Germany to feel some apprehension in regard to the international situation. In this respect, the German people in Berlin there is a certain optimism in regard to the immediate visible problems. The Balkan question is to be solved without further complications, but the general relations between the great powers are not satisfactory, and the case which the powers have shown in avoiding open rupture during the last months is considered not so much to prove that an equilibrium of interest has been reached as to prove that for the present no power stands to gain anything out of a conflict.

The belief here is that Europe is on the eve of extreme competition in land armaments into which other powers besides France and Germany must be drawn. The proposed French measures are being represented as greater than is entailed by the German measures and if that conviction gains much more ground no one can see how Germany is going to end. Delcasse is probably going to use his influence with the czar to prompt Russia to make sacrifices similar to France, and if Russia does the ponderous ball will set in motion, which must end either in war or the final triumph of Germany attempting to feed the military moloch.

SEEMS USELESS.

The pity of it all is, that the course we are about to enter upon seems so absolutely unnecessary to all but the pronounced militarists. No one could any longer imagine France going to war to get revenge for 1870-71 and with the Balkan question settled, it would be very hard to find any reasonable cause of war between the Triple Alliance and the Triple Entente. The excuse given here that the rise of the Balkan States has somewhat disturbed Europe's military balance does not convince anyone of the necessity for greater armaments. The only plausible explanation to be found seems to be that the military obsession has too strong a hold upon the continental chancelleries to be shaken off by any political changes. Militarism seems to have become an end in itself, which no longer feels the need to justify itself by arguments of policy. And in this lies the danger which the German people fear.

ARMY LEAGUE IN FIGHT.

The powerful German Army League, which, as revealed by the Socialist paper Vorwarts, has grown to such power as to constitute a state within a state, is fighting behind the scenes to forward the new armament competition with France. Their latest maneuver is directed against the stubborn "Junker" party, which is composed of landowners who are favorable to an increase of the army but object to a super-tax on their incomes, which is the means proposed for raising the money.

Now the official German press announces that the raising of the army and the army increase will be incorporated and introduced into the Reichstag as one bill; so if the Junkers vote against the super-tax they will be the means of the army increases being rejected. Behind all is the threat of a dissolution of the Reichstag in case the army bill is rejected.

BUT IT IS THE general opinion that in the coming elections the middle classes will combine with the workers and vote Socialist in order to defeat the army bill. Both classes are taxed to the utmost already.

RUSSIA IN TROUBLE.

Russia continues to have domestic troubles of her own but only very little of what is really going on in the czar's empire is permitted to leak out, and it is as a rule only indirectly that we are able to get a glimpse of the real state of affairs.

Officially Russia assures the world that she is making good headway towards her goal of becoming a truly constitutional state and that political persecution has ceased.

Official Russian statistics, however, have just informed the Duma that the prison population in Russia has increased from 85,000 in 1905 to 130,000 in 1911.

VIEWS AND REVIEWS OF WHAT WORLD IS DOING

PRESIDENT'S ATTITUDE TOWARD CHINA MEETS GENERAL APPROVAL

New Administration Sounds Knell of 'Dollar Diplomacy'

THE administration's position toward the Chinese loan has aroused interest, both at home and abroad. President Wilson's attitude, the rise to power of the Democrats and the changes this has made on the situation, have been commented on by a while many agree that his attitude may be the real American policy. It is also widely predicted that commerce will suffer. Avoidance of foreign entanglements seems weighed in balance against the interests of trade.

"The position taken," says the Washington Post, "is a reversal of the policy of the government, and is substantially an abandonment of 'dollar diplomacy,' at any rate so far as the Orient is concerned. American bankers must take their own chances in loaning money to the new Chinese republic, without any implied assurance from the United States that it will assist in collecting the loan by exerting influence upon China. The trade of the Orient is relatively a small matter, in which only a few persons are concerned. What it may be in the future is another story. When the time comes for expansion in that direction, the average American will deem himself able to hold his own with foreign competitors."

But whether the pocket nerve of the average American be touched or not by this new announcement, it is true that there is no desire in this country to assume any new political responsibilities abroad. There is no sentiment in favor of extending the already distasteful Monroe doctrine to embrace China, even in the shape of friendly tutelage.

That Wilson's attitude is right, in that it refuses to force a loan on China, under humiliating conditions, is the opinion of the Chicago News, which says:

"President Wilson and Secretary Bryan have acted with wisdom born of knowledge in declining to support the sextuple group in its efforts to force a loan upon China under humiliating and otherwise injurious to that nation. Further, the action at Washington should have the effect of throwing open to all Americans valuable opportunities for engaging in industrial and commercial enterprises in the great oriental country. The unwise policy of the preceding administration was well calculated to reserve those opportunities for the use of a few capitalists."

"The business men of the United States may well congratulate themselves on the fact that their government is no longer using its tools of diplomacy in China for the exclusive benefit of one small body of big capitalists."

The New York Tribune holds that the nation, after forcing a way for its bankers to participate in reversing its action, and leading bankers to decline participation, thus showing inconsistency.

"President Wilson has all the facts at his command," says the Tribune, "and doubtless has considered whether this country was free to change its attitude without seriously impairing its prestige abroad. His judgment seems to accord with the view of the bankers themselves as to their responsibilities to their associates."

"The American public will be glad to be free of the whole affair, glad to cultivate the friendship of China in surer ways than by participating in an obnoxious supervision of her affairs."

Pullitzer's New York World declares Wilson has overthrown Dollar Diplomacy. The World says:

"President Wilson, announcing

HOW TO ACT WHEN CYCLONE APPROACHES

THERE is timeliness in the St. Louis Globe-Democrat's advice to those who may be thrown by the way of cyclones. Admitting it is a thankless, fruitless task, the Globe-Democrat offers its warning, and includes a deal of information on the subject of cyclones. Says the St. Louis Journal:

"People will continue meeting cyclones, or trying to run away from them, in their own ways. One seems to be enough of an instinct to command one's self. Dwellers in houses without cellars, which are a multitude for number, should, however, make such advance study of the nature and movement of these disastrous storms as to be able to aim at having something like a comprehensive plan of action decided upon in advance. To aid them, science has lately made, or has seemed to make, one important addition to the arsenal of our knowledge of cyclones."

Thinking people, with or without a personal experience, must have doubted the wisdom of closing all the doors and windows of a house when a cyclone is seen approaching. Tightly closed houses are but toys when standing directly in the path of a twister. And now science has told us why. The funnel-shaped cloud, sucking up all the air it comes in contact with, will, when it envelops such a house, create a complete vacuum around it. Then, the air inside of the closed house, seeking an outlet, bursts out of its walls, whether or not the house is set strongly enough on its foundations to resist the impact of the wind. The moral is: don't close your houses against a cyclone. The theory is reasonable in that it is to be expected that this season, as in all past ones, the impulse to shut out the approaching danger can not be overcome."

PENNY BANKS REGULATED BY ACT OF PARLIAMENT

The organization of penny banks in the Dominion of Canada is regulated by act of Parliament. Little published information is to be had in regard to those already established throughout the Dominion. The first one supplied by the Penny Bank of Toronto, which during the 12 months ending June 30, 1911 (the latest fiscal period for which such data are available) deposits from \$142,931 to \$142,936, or more than 22 per cent. During that year branches were opened in all the principal cities in Collingwood, Stratford, Carleton Place, North Bay, Paris, Woodstock, Ottawa, and in the largest cities of the Dominion, making 159 branches in operation, of which 75 were in Toronto.

Depositors have great interest, and it is understood that the Government pays to the bank 8 1/2 per cent on these special deposits. There is of course no profit in the business, but certain banks in each town offer their services for charitable reasons, for prestige or in the hope that the business of banking in these small places may eventually become a larger one.

Deposits are made each Monday morning by the students with the teachers, and an employee of the bank goes to the schools to receive the money so collected. In order that withdrawals can be made, the bank is kept open Wednesday afternoons until 5 o'clock. The depositor signs a check for the amount, and the bank issues a check for the amount. The bank has a pass book in which deposits are entered by the teacher. The bank or pass books are supplied by the school board and paid for by the school funds. The bank is managed by John O. Foster, Ottawa.

DOMINION GOVERNMENT TO PROHIBIT EXPORT

WINNIPEG, March 28.—It seems unlikely that the Dominion Government will prohibit the export of nickel from Canada except in great quantities. The nickel industry in this country has been a source of much trouble, and the Government has been reluctant to take any action. The nickel industry in this country has been a source of much trouble, and the Government has been reluctant to take any action. The nickel industry in this country has been a source of much trouble, and the Government has been reluctant to take any action.

ALL EUROPE IS "SEEING RED."

THE war in the Balkans is making all Europe see red and the powers, big and little, are mounting in hot haste more and more arms in preparation for conflict. Of course the conflict may not come, but the European nations believe in being prepared, especially as the spoils of the Balkan war are about to be distributed. Germany is adding one-third to its military budget, an addition of from \$250,000,000 to \$300,000,000 annually, a burden, says the St. Louis Globe-Democrat, that "looks to many conservative Germans as the straw which may break the camel's back."

France is increasing its term of military service by one-third "in the interests of peace," comments the Boston Globe sarcastically, thus adding 210,000 men to its peace footing. Great Britain is building warships for the air and sea, and even little Belgium is polishing its armor. Why all this fuss? The Chicago Record-Herald, which wonders why a tacit agreement could not be reached to maintain the present war-footing, answers the question in part thusly:

The disappearance of the Turk from Europe and the formation of the Balkan alliance are supposed to have alarmed Germany and, even more, her partner, Austria. Tension supremacy is threatened by Slav advance. While all this great war preparation is going on, and the rulers in Europe are preaching patriotism and "sacrifice" to the people, the Boston Globe wonders if "the many millions of men who will have to fight the battles and then foot the bill are equally anxious for the sacrifice?"

JUDGE PAYS \$1.10 AND PUTS MAN TO SHAME

MILWAUKEE, March 28.—Judge Blenski put a man to shame quickly in the civil court, when the case of Caroline Back against Oswald Michels came up before him. The judge, who paid \$1.10 as pay for five hours' work she claimed to have done in cleaning at the Backs, told the woman that she had not done work worth that, and he dismissed the case. The woman, who had been told that she had been paid \$1.10, was told that she had not done work worth that, and he dismissed the case.

GETS \$2850 FOR FOOT LOST 15 YEARS AGO

TACOMA, Wash., March 28.—For an accident that happened more than 15 years ago, John Chervenak was given a verdict in the Federal Court against the Northern Pacific Railroad Company for \$2850.

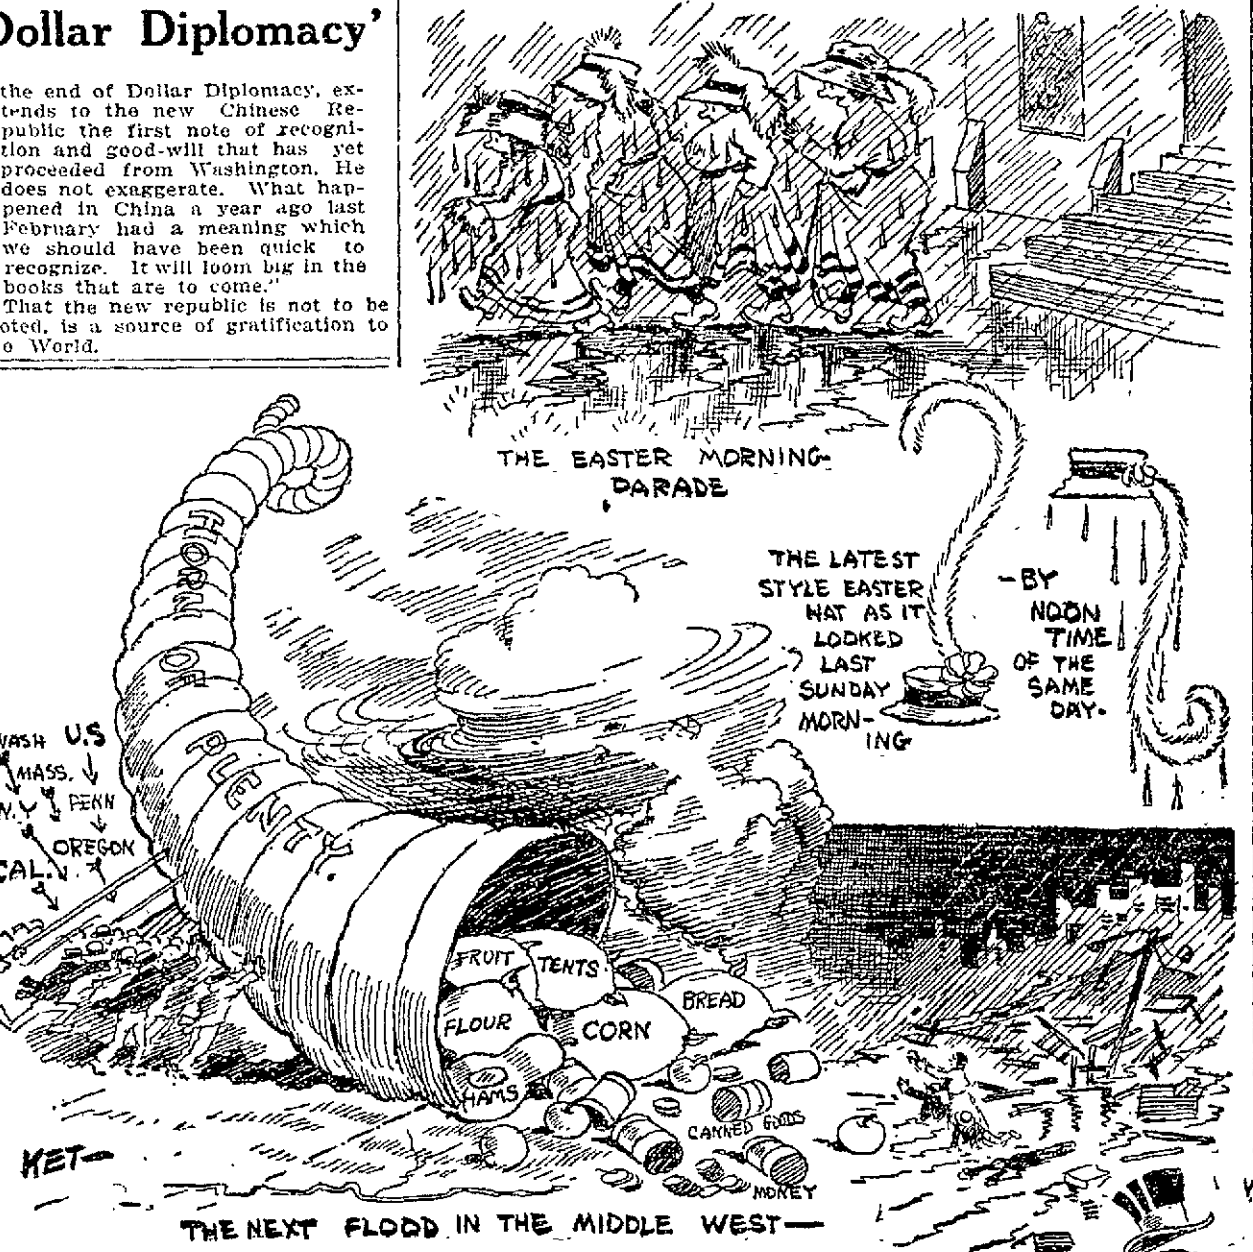

He was going home in Roslyn, Wash., in September, 1897, when 5 years of age. He came to a street blocked by Northern Pacific cars and, while attempting to go through, the brake was released and his foot cut off when the cars shifted. Suit for damages was brought less than three years ago.

LABOR DEPARTMENT IS WELL NAMED

THE Department of Labor is well named, think a number of editors for it will certainly have plenty of work on its hands. The Boston Globe, which declares that the "labor of the country, both organized and unorganized, will be deeply interested" in the new department, outlines the duties of the new department:

All the work now done by the bureau of immigration and naturalization, including control of the immigration service at large, and the supervision of the work of court clerks in naturalization matters; the gathering and publication of information regarding labor in various countries and labor controversies, as well as the work of the recently established children's bureau, will be taken from the Department of Commerce and Labor and turned over to the new department. This will leave to the other department the matters relating more intimately to commerce.

SKETCHED COMMENT

EFFICIENCY IS OFFICE TEST

Texas to Relieve School Superintendents of Other Duties.

Should the county superintendent of schools be a judge, a sheriff, a political officer, or just an educator who knows his business and gives his whole attention to the schools? He is or has been all of these in different parts of the United States. In Texas it is the county judge who serves in many of the counties. The most cursory investigation of every man was the pursuit of happiness. And the Telegram continues in this strain:

This is admirable so far as it goes; but what, after all, is "happiness"? It is a subjective state. The most cursory investigation will demonstrate that happiness, like every other attribute of the mortal, is relative. Two persons may be placed exactly the same, in so far as environment is concerned, and yet possess precisely the same prospects, the same privileges, and the one will be extravagantly happy, the other will be just as extravagantly discontented.

Happiness, it would appear, is possible for everybody, provided it be intelligently cultivated; and this is probably the end sought by optimists like Marx.

That literary character has a worthy mission to perform, if he will be able, through educational methods, to increase the measure of happiness and in equal proportion lighten the burdens of his fellows.

The difficulty with most persons in this hysterical age is that they do not recognize happiness when they meet it face to face. The experience is so blithe and lightome that it has gone almost before one is aware, so that the consciousness of happiness is aroused by the pang at its passing. The "happiness" of yesterday sometimes descends into the bauble of today, to be cast aside as worthless and outworn.

Thus the individual equation cuts largely into happiness. How else, then, can one account for the fact that the country boy, on his first visit to town, can reap the joys of the universe on an outburst of five cents for a hunk of gingerbread and a mug of cider, while the city boy would instantly and contemptuously reject such a proffer?

For whistling the "Belgrade Belle" all day.

A flourmill was burned down in Adriatic yesterday. Our convey men saw it from the hill behind Kadik. Moreover, they heard that the city will surrender in three days and will all turn to Serbia within the week!

In the lack of direct information we copy news item from our foreign colleagues, the Budapest Journal. The Austrian minister in Belgrade, Mr. Lajth, has been assassinated (for the fourth time). As human soldiers, we deplore this persistent folly on the part of our compatriots.

SERVIANS JOKE AS GUNS ROAR

WHILE the siege runs roared around Adrianople, the Kadik Gazette was published daily by some witty Servians with the besieging army. The spirit shown in the little war sheet indicates in part, at least, why the Servians have been so successful in war. The London Daily News furnishes the following translations from the Kadik Gazette:

Our extended allies (the Bulgarians) are not so good as we are. Tomorrow Adrianople will be taken. Faithful to our policy of non-intervention, we register this well known and famous fact, conscious that a good thing cannot occur too often. Serbia will not abandon Bulgaria, even though the city fall 40 times a day.

In spite of our efforts to spread the truth, gathered at first hand from competent sources, a silly rumor is afloat that on Wednesday evening Sergeant M— sat on the tin stove, supposing the fire to be extinguished. Another rumor is to be disseminated by the European press.

Our experts find that the racking cough with which Colonel D— vitch entertains his roommates at night could with good effect be directed against the Turkish batteries.

Milan Preditch, who has had three bullets extracted, finds that he could do with some more and reports himself fit for service. Bravo, Milan!

Wladimir Kitchik is still in a high fever, less from the bit of shrapnel in his arm than from his bed neighbors.

CANDOR IS KEYNOTE OF VICE INVESTIGATION

Questioners Get Down to 'Brass Tacks'

"CANDOR" has been the keynote of recent vice investigations, according to the Portland Telegram, which declares, despite the fact the investigators have "gotter down to brass tacks" that "we need light." It adds:

We need in course of time to begin to think beyond the bare necessities of existence for these women. There must come a day when the compensation for service will be fixed upon the basis of that which the service contributes to the fortune of those who command it. That is the only just basis and it is not so visionary as it was at one time considered, to assume that justice will ultimately prevail.

The New York Times fears that the truth is "hard to obtain" and that the Illinois legislative committee investigating the relation between low wages and low morals "may accomplish few immediate practical results." However the

Times said much good in the "quickened" social conscience which "is no longer content to shrug its shoulders about the 'old-fashioned' and extract comfort from the doctrine of the inevitability of human frailty. Out of such inquiries as this one and the debates that will spring from it will come publicity for the social ills that beset us, better living conditions, better opportunities for harmless amusement some of those who go annually to the social scrap heap may be saved."

The Chicago News, in discussing vice and the minimum wage legislation, says: "At the same time it is to be hoped that the agitation for minimum wage laws for women should be widely extended and that no State in adopting this radical policy should immediately clamp on a minimum wage that is injurious to the movement. The movement must be carried forward with reasonable restraint or it will work harm instead of benefit."

HONORING MEMORY OF GREAT EXPLORER

ONE hundred years ago this month Dr. David Livingstone, missionary and explorer, was born in a small town in Scotland. His centenary, although appealing more intimately to England, is of interest to all of the world. He opened up the heart of Africa, to European occupation and improvement, says the Boston Globe, which continues:

Study of a modern map of Africa will disclose the domination of European powers, not only in the Northern section, but in parts that Dr. Livingstone, as a benevolent traveler, explored in the 50s and 60s of the last century. Today the British nation is far richer in territory than it possibly could have been if Liv-

TURKEY AND MURDER OF KING OF GREECE

THAT the assassination of King George of Greece was the result of a Turkish plot, is strongly hinted at in editorials of the week. Assassination is a favorite weapon of the Turk, according to the New York World, and George had gone into a region which was a Turkish plot to assassinate him.

If it can be proved that the Ottoman government was in any way responsible for the killing of the Greek king, it would be a serious blow to the prestige of the Ottoman Empire. The assassination of monarchs is no longer recognized as one of the legitimate activities of warfare.

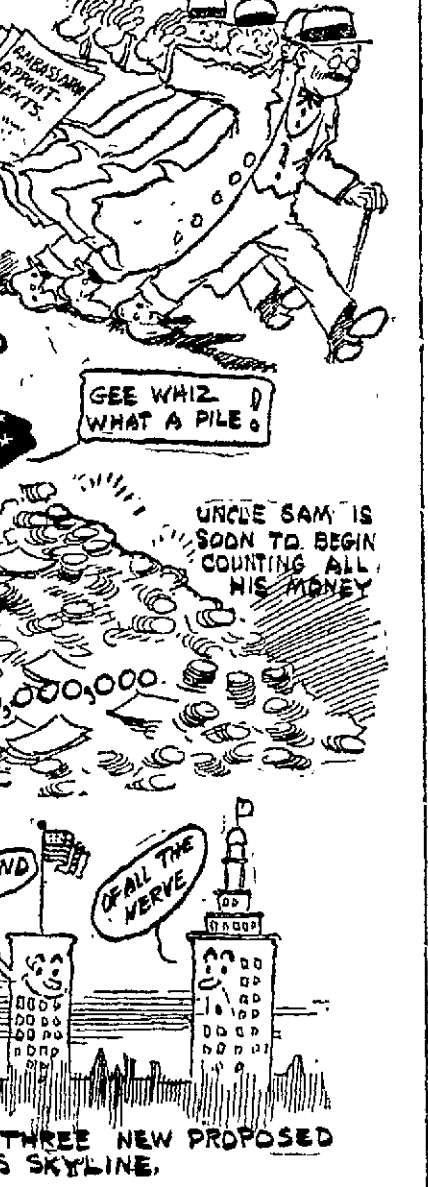

The New York Times says nothing of political import in the murder. Says the Times:

The assassination of the King of Greece appears to be without any special significance. The assassin, according to such information as has been obtained, is a man of that low type to which the murderers of conspicuous men nearly always belong. It is not conceivable that he believed in the cause, or that the conditions of Greece by his deed. It would seem that he possessed that mania which impels a certain class of individuals to seek notoriety by any means within their power.

There will be no cessation of hostilities even if Turkish officials conspired against the life of the king, says the St. Louis Globe-Democrat in these words:

That the death of the king of Greece can stop the progress of the war of the allies against the Ottoman Empire can not, however, have suggested itself to the hard-headed minds of the Turkish cabinet ministers. The war will go on, and in all probability with an increased fury, so far as the participation of Greece is concerned. Prince Constantine, who, being the eldest son of the dead monarch, is a claimant to the throne, will succeed to the throne, is now a man in the prime of life, a seasoned soldier and one who has been leading the Greek army in a series of operations around Salonika. And at other points where land forces have been engaged against the Turks. He is said to be a soldier of dash and brilliancy, and one much nearer to the heart of the troops than was his father, who has just been killed.

WHO SAID WOODROW IS TROUBLED WITH OFFICE SEEKERS?

TARIFF REVISION IS LARGE TASK

"THERE is nothing unusual and nothing necessarily alarming in the idea of undertaking tariff revision," says the Buffalo News, while the Chicago Record-Herald sees something very alarming in the proposed proceedings. The Chicago paper declares that tariff is sufficient and the proposition of the lawmakers to include in their deliberations the currency and banking systems should be dropped. "Decidedly," it adds, "the tariff task is quite sufficient for the special session, although it is hardly necessary to say that the monetary problem is one of first importance and unquestioned urgency."

Yes, tariff revision is quite a chore, bristling with "difficulties and discords," according to the Record-Herald, which adds that as "the new administration is pledged to prudent, business-like and reasonable revision," much "time and money" will be consumed.

Tariff revision only should be discussed at the special session, agrees the Portland Telegram, for "it is accomplished in the spirit which the people demand and expect, there will be neither time nor occasion for the consideration of any other important subject." The Telegram has not an "overabundance of faith" in the character of Democratic tariff revision, for when the Payne-Aldrich bill was under discussion it was discovered that "every little Democrat had an interest all his own."

Yes, there is trouble ahead, agrees the Washington Post, for the policy of free trade in agricultural products "would cut prices 25 cents a bushel, throwing our market open to our rivals, while their still would be safeguarded by a tariff wall. The American farmer and the United States treasury, as regards both of which congress professes to be so very important, would be the first to feel the staggering effect of making a clear gift of a priceless market privilege."

"It might be well to go somewhat slow with the tariff," adds the Post, although the Boston Globe held that the Democrats "should enact a good tariff act."

There has been printed a mass of editorial praise for the dead monarch. His democracy and courage comes to us for appreciation from all sides. As the New York Tribune says:

It would be easy to say much of the murdered monarch without transgressing the proverbial rule with respect to the dead. There is much that is good to be said of him and little that his best friends would wish to have left unsaid. Hereditary monarch election is a rather unattractive and, either because of that fact or because—more probably—of his native disposition, he bore himself for half a century as simply the first citizen of a democracy. No republican president has ever more unassuming or more sympathetic toward his fellows. In spirit as well as in title he was not King of Greece but King of the Hellenes—the chief magistrate of the people and not the tyrant of the land. In any case the Army and Navy would regard his murder with horror and would give sympathy to the bereaved country. In his was his engaging character and his career, and the intimate ties between Greece and America, those sentiments today are swelled to the fullest measure.

PROSPERITY CONTINUES.

Greece will feel no setback according to the Chicago News.

With its vigorous new king and that remarkably able statesman, Premier Venizelos, in charge of its destinies, Greece could continue to prosper by reason of its greater achievements and those of the Balkan federation. The opening of a new era for Greater Greece, a nation of enlarged boundaries reinvigorated patriotism, is merely accidental or the despicable crime of the assassin.

Moffatt, another English missionary, and commenced his life work.

It was his discovery of Lake Ngami which led to his determination to ascertain something of the interior of the Dark Continent. He explored from the lake east and west, reaching both the Atlantic and Indian oceans. A prodigious feat considering the character of the country.

One of the most dramatic incidents in his career was his meeting with Stanley—who had been sent to locate him at Ujiji. The latter, although a Welshman, found financial backing in the United States, and after Livingstone's death carried out, in a measure, the work that his illustrious contemporary inaugurated.

## SUZETTE COMMENTS ON SOCIETY, ITS MEMBERS AND WHAT THEY ARE DOING

**T**HE American woman in social life is making an absorbing study for the rest of the world. She is unique and original when she is simply herself and does not try to imitate women of the smart sets of other lands. The women of our smart sets spend a good deal of money, but their amusements are for the most part along exceedingly simple, well-bred lines. It is quite as a student of American conditions writes:

"An English person is amazed at the way American women spend. There is no mistake about that. One drops in to the well-known hotels or restaurants and finds ladies lunching or dining together in twos or in dozens. It is quite surprising to the Britisher to see the way women in the States constantly lunch and dine alone together, their men being either too tired or too busy to join them. These good ladies order the most recherche little repasts; they rarely drink anything but iced water, and they seldom smoke—that is a vice, or virtue, pertaining more particularly to European shores. Occasionally an American woman takes a cocktail before dinner, composed of one or more spirits, in which an olive or a cherry reposes; but she rarely orders wine or spirit at the meal itself. Cocktails before meals are unknown in England; but we drink with our food. At table America appears a land of teetotalers."

It is wonderful the home the American woman is able to develop with everything against her in the way of domestic science. It is safe to say that in no other country in the world could such homes be developed. Servants are born into a class in other countries, and they stay there. We would never wish that this should be the case here, but as it is not, it is interesting to note how women rise to emergencies and meet situations with firmness and courage. Our English friend is right in painting this picture of us:

"In America it is different. Direc-

how hard she works, and yet how happy she looks. The wives of Brother Jonathan are marvels in many ways, especially in the middle classes, whose purses will not let them employ first-class domestics.

"There are, of course, many charming and delightful homes in America, homes full of love and refinement; nevertheless, the strain on the housewives is so great that visitors can but sympathize with them and cease to wonder they give in sometimes in despair and take refuge in nerves and rest cures, followed by boarding-houses, apartment houses, (flats) and hotels. The servant question is bad enough in England, but it is ten times worse in the States.

"The American woman has a difficult task to run her home with the material at hand, and she deserves all praise for the admirable way she does it."

### TAKES ANOTHER VIEW OF SMART SET.

That is one view of the society of our smart set. The other comes from Herbert Hugh Bancroft, of the old Bancroft family of San Francisco. Everybody is reading his new book, "Retrospection," and the society phases which he scores are the theme of general conversation.

Mr. Bancroft says: "Can it be good society where there is no lady and no gentleman? What is a gentleman and what is a lady? Not good looks, nor fashionable clothes, nor fine houses. To be a lady she must have a kind heart, a charitable disposition and she must be absolutely truthful."

Mr. Bancroft goes on to say: "Confining ourselves to the United States, where there is folly enough for all the world, we find some six thousand towns and cities, each with its society of the several grades, as 'society,' 'the best society,' 'good society,' and 'not in society,' each grade having its leader, or one who considers herself such—for it is usually a woman, or may be several women, each one of whom is sure she is it.

MRS. BRUCE MAIDEN, AN ATTRACTIVE SOCIETY MATRON WHO IS A FREQUENT HOSTESS AT DELIGHTFUL AFFAIRS.

their own hill of eminence. Let one cross the line of her quondam into the domain of another, she is a distinguished visitor, in a larger city she is a stranger, in New York or Newport she is a nobody; should she have the temerity, even though she quenced it over no mean city at home, to cross the water to London or Paris, she is a lost soul in purgatory. For what are the highest in New York society before the American peeresses in London, or the American peeresses before the English peeresses, or the English peeresses before the queen, or the queen before sisters of celestial fame?"

There is food for much thought in the following sentence:

"Two or more women with wealth enough to entertain and wit enough to attract can declare themselves high society and exclude all who might not advantage their scheme. Exclusion leads to envy and envy to adulation and endless snobbery."

Mr. Bancroft discusses in unmeasured terms "society" as one sees it in San Francisco, and his book has become the talk of the hour.

### MRS. LOWENBERG IS SUCCESSFUL HOSTESS.

Easter week has been notable for the elaborate entertainments which have marked the passing of the days. Prominent among them have been Mrs. Lowenberg's entertainment at the Fairmont, Mrs. Rosenfeld's lunch

Requa's "at home" at Piedmont, and the Easter dance of the Friday Night Club.

Mrs. Lowenberg has long been known as one of the most delightful entertainers across the bay. She is very well-bred and very clever, since she is one of the best writers on the coast, and she is exceedingly sweet and generous. Mrs. Lowenberg has with her this spring Mr. and Mrs. Abraham Lincoln Brown, the latter her daughter, a most cultured and charming young matron. The Browns have been abroad since their marriage, and they made many friends in the larger continental cities. They are being heartily welcomed back to San Francisco by a wide circle of friends. Mrs. Lowenberg entertained on Thursday at the Fairmont in honor of Mrs. Jacob Skiff, who is the wife of the director-general of the Panama exposition, and who is a most charming woman. Eighty guests enjoyed the hospitality of the hostess, and they were seated at tables most beautifully and effectively decorated. They carried wonderful schemes of American Beauty roses, arranged in the low effects so very successful this spring.

Among Mrs. Lowenberg's guests were Mrs. Hearst and Mrs. William Randolph Hearst, both of whom were exquisitely groomed. Among the guests also were many representatives from the Woman's Board of the Panama-Pacific exposition, making a gathering of guests most interesting in many ways. Mrs. Lowenberg's

carefully planned "at home" was the most important date of the week across the bay.

### FRIDAY NIGHT CLUB'S DANCE IS IMPORTANT.

The Easter dance of the Friday Night Club represented the most important dance of the winter for the young people on our side of the bay. The Friday Night Club has existed for so long now that it has much social prestige and the patronesses have shown unusual skill and cleverness in meeting conditions and in guiding the affairs of the club.

The Friday Night dances are the jargon given on our side of the bay, and they are much more interesting

than usual this winter, since they are given at the Hotel Oakland. The ballroom represented a gay scene on Friday evening and a most elaborate supper was served in one of the upper banquet rooms of the hotel. Early in the evening a shade of sadness was cast upon the party by the hurried call for Tom Vetch, who was told to hasten home, as his mother was very ill. She had been out in the automobile earlier in the afternoon and was apparently much better.

Later in the evening the word was quietly whispered that Mrs. Vetch had passed away, and for those who knew her well the joy of the dance was gone.

Among the well-known young guests at the recent Friday Night dance were: The Misses Pussy Creed, Myra Hall, Anne Spring, Madeline Clay, Lilla Lovell, Phyllis Lovell, Helen Acker, Gertrude Adams, Dorothy Capwell, Pearl Cawston, Florence Henshaw, Letty Barry, Irene Farrell, Elizabeth Orrick, Helen Goodall, Marie Tyson, Cleo Posey, Dorothy Taft, Bina Moseley, Margaret Moseley, Anita Crellin, Katherine Crellin, Elizabeth Latham, Elsie Everson.

Among the prominent young men present were: Guy Earl Jr., Dalliba Thomson, Charles Sonntag, Oliver Hamlin, Thomas Hogan Jr., Robert Sharon, Frank Edoff, Curtis Hagdon, Ralph Gorrell, Dudley Valentine, Clarence Moseley, George Je Golla, Walter Schilling, Walter Leimert, Dan Volkmann, Joseph Rosborough, Dr. Philip Abbott.

Among the young married people at the dance were: Mr. and Mrs. John Donovan, Mr. and Mrs. William Volkman, Mr. and Mrs. Lester

Greene, Mr. and Mrs. Harry Chickering, Mr. and Mrs. Robert Newell, Mr. and Mrs. Stuart Hawley, Mr. and Mrs. Traylor Bell, Mr. and Mrs. Willard Williamson, Mr. and Mrs. Maurice Walsh, Dr. and Mrs. John Louis Lohse.

There will be one more party, which will bring the successful series for this season to a close.

### MRS. JOHN A. DARLING HONORS COUNTRY.

Easter week has been marked by many social dates across the bay and even where the company has been small in numbers the preparations have been elaborate.

Mrs. John A. Darling gave a luncheon on Friday, making her guest of honor the Countess del Castelmenardo, whom she met abroad.

Mrs. Darling is exceedingly fond of blue, but it is the color most difficult to use in decorations. However, she solved the problem in quite a wonderful fashion and her table was beautiful.

The center piece was worked out with blue hyacinths and blue tulle and there were sprays of forget-me-nots interlaced in the tulle. Mrs. Darling's famous old blue china service was used. Among the beautiful gowns at the luncheon were those worn by Mrs. Hearst, Mrs. Sydney Smith, Mrs. Arthur Murray and Mrs. Alexander Loughborough.

The Countess Castelmenardo is a great grand niece of President Van Buren. She is very tall and handsome, with white hair and the superb bearing which marks the true lady of high degree. She has been extensively entertained by well-known people in California, among them by Mrs. Hearst and by Mrs. L. Eugene Lee.

### MRS. FREDERICK SHARON LUNCHEON HOSTESS.

Mrs. Frederick Sharon was also a luncheon hostess of Friday, entertaining at the Palace for Mrs. Richard Lounsberry (Edith Haggin), who has arrived from the East and is visiting the Sharons.

There will probably be much entertaining for Mrs. Lounsberry, who is a cousin of Mrs. Sharon, Mrs. Gordon Blanding, Dr. Harry Tevis and William F. Tevis.

### PROMINENT PEOPLE WILL BE GUESTS.

Many prominent people are to be visitors in the city across the bay this spring, so social events are even now being planned in their honor. Hon. and Mrs. Nicholas Longworth are in Southern California and are spending some time at Hotel del Coronado. Later they are coming to San Francisco, where they have many friends, among the latter Mrs. Eleanor Martin.

Ambassador and Mrs. Larz Anderson will arrive in San Francisco on Monday, coming here from Japan. They will be in California a few days before leaving in their private car for Washington. Mr. Anderson has been our ambassador to Japan and will return to his station again.

Mrs. Anderson, who is a great favorite in society circles both in Washington and Boston, is a very clever writer and much interested in art also. She is a relative of Mrs. Dixwell Hewitt and of Miss Eleanor Davenport.

### SOCIETY LEADERS ENTERTAIN MUCH.

Among others who have been entertaining extensively across the bay are Mrs. Templeton Crocker and Mrs. H. M. A. Miller.

Mr. and Mrs. Crocker entertained on Thursday evening at a dinner at the St. Francis in honor of the Malcolm Whitmans (Jennie Crocker). The dinner was a "welcome home," and hosts and guests adjourned later to the opera.

Mr. and Mrs. H. M. A. Miller gave a dinner at the Fairmont last week, entertaining for Lieutenant and Mrs. Hammond (Birdie Toot), who have lately come to the Presidio.

Mrs. H. M. A. Miller also joined her mother, Mrs. M. P. Jones, in giving a large bridge luncheon at the Francisco Club on Wednesday. There were forty guests, seated at four tables.

## A Beautiful Complexion

May Be Yours in TEN DAYS

Nadinola CREAM

The Complexion Beautifier

Used and Endorsed By Thousands

NADINOLA Cream cleanses, softens, whitens, freckles, pimples, liver spots, etc. Extreme cases in twenty days.

Rids the pores and tissues of impurities, leaves the skin clear, soft, healthy. Directions and guarantee in package. By toilet counters of mail. Two sizes, 50c. and \$1. NATIONAL TOILET COMPANY, Inc. Sold by The Owl Drug Company and other toilet counters.

MISS LEONA MERCHANT, ONE OF THE POPULAR GIRLS OF THE YOUNGER SET IN LOCAL SOCIETY, WHO IS GIFTED MUSICALLY.—Scharz photo.

tion is not sufficient. The servant is incapable, and the mistress has to constantly turn her hand to household duties herself. She must know how to cook dinner, make everything, down to the minutest detail, then fly upstairs hot and tired, wash and change, and continue to the head of the table, and sit complacently conversing with her guests while it is being enjoyed. She must know how to sweep and dust a room, and yet appear cheerful at luncheon as if she had not been employed like a charwoman all the forenoon. It is wonderful how splendidly she does it all

and will so maintain, bringing forth as proof diamonds and dresses, motors, horse equipages, and a household hospitality. Some affect brains and prattle Omar Khayyam and Browning; some display fingers, and twang the harp; some the light fan-tastic too, and Oh! I feel like Mr. And whether in reality, were there any reality about it, whether good, better, or best, each is sure she is it, the only perfect it, all the others, though well enough in their way, being inferior, which it were graceful in them to acknowledge.

"This in their own town or city, or

CLUSTER OF GIRLS FROM "PRINCE OF PILSEN," MACDONOUGH

#### MACDONOUGH.

Society, always on the qui vive when a genuine Henry W. Savage production is announced to visit the Macdonough theatre, is preparing itself to accord "The Prince of Pilsen" the best of receptions. The play will be seen tonight only. All ways the favorite among the lighter of the music-works that are brought to Oakland this tinsel musical comedy on its visit here, will be eagerly accepted once more.

Savage promises a cast of principals of surprising merit, and a chorus of remarkable beauty. None of the old cast remain, except Jess Dandy, the Hans Wagner, and the little blonde woman, who plays the nutty bell-boy, Jimmie. The company includes a quartette of fine voices, composed of Tina Faust, Lottie Kendall, Beverly Ferguson and Fred Lyon. A brilliant interpretation of the Fletch-Luders score and book may be expected. "The Prince of Pilsen" special orchestra will be a feature.

"Freckles," a dramatization of Gene Stratton-Porter's famous novel of the same title, which in point of sales has been the sensation of the literary world, is announced as the attraction at the Macdonough tomorrow night for three days including a special matinee Wednesday. This stage version is the work of Neil Twomey, and the cleverness of his adaptation will be realized especially by the readers of the story, because of the masterful manner in which he has evolved an interest-compelling and tensely dramatic play from a tale whose chief charm lies in its tender simplicity and unaffected naturalness.

Being at all times in sympathy with the author, Mr. Twomey has transferred the spirit of the wild-wood, visualized the delightful characters of the story and woven the incidents into a logical and entertaining play. Naturally, the pathetic element has been emphasized most strongly, but in relief of this there are frequent brilliant flashes of wit and a charming love interest for the two new famous characters Freckles and the Angel.

The play is illustriously mounted, particularly effective being the great limbermost scene painted by Crosbie Gill of Wallace's Broadway Theatre, New York, who has pictured the famous swamp and its environs with consummate skill.

Jules Velle will be seen here as the plucky little waltz Freckles, and Carrie Bellmore as the Angel. An exceptionally strong supporting company of Broadway players is promised.

**LITTLE MISS BROWN.** Local playgoers will have an opportunity to see the biggest farcical success of the season at the Macdonough Theatre on April 3, 4 and 5, p. "Little Miss Brown," "The Little Miss Brown" is typically American in its humor and its situations. Philip H. Bartholomew is responsible for it. Wm. A. Brady, the producer, has given it a remarkably clever cast of farceurs, with scenic effects comprising three acts and five scenes.

In addition to Miss Madge Kennedy, the original cast includes William Morris, Ned Sparks, Rae Bowden, Charles Stanley, Rodney Hickok, Sidney Macy, John Bowers, George Taunfort, Douglas Jones, Tom Lemonier, Elsie Hitz, Olive Harper, Thorne and Mattie Ferguson, who played for four months at the Forty-eighth Street Theatre, New York.

**CHAUNCEY GILCOTT.** Chauncey Gilcott, his new play, "The Tale of Dreams," will be the attraction at the Macdonough theatre for four nights and Wednesday matinee, commencing Sunday evening, April 6.

In the new play, Rida Johnson has written a romantic drama which stands on its own artistic merit, and she has well fitted her dramatic garment to the manly form of Chauncey Gilcott. Mr. Gilcott seems to have come into his own as an actor, and he makes the most of the many dramatic possibilities the play affords. As usual, Mr. Gilcott's play is handsomely staged. As one of those simple, childlike yet withal native shrewd young Irishmen, always on hand to thwart villainy or snatch a kiss from a pretty colleen, Mr. Gilcott is in his element in the new play, in which Mrs. Young has written him what he thinks is the best role of his entire professional career. With ex-

ceptional beauty, Miss Edith Browning combines dramatic talent, and adds to the charm and dramatic interest of Mr. Olcott's play. Mr. Henry Miller, under whose competent direction Mr. Olcott is appearing this season, spent several weeks of his summer vacation in rehearsing the play. Mr. Miller, who is conceded to be America's foremost stage director, has displayed great skill and thought in the production of the new piece, and has given it a most elaborate setting, the scenery being declared to be the most beautiful ever seen in an Olcott play.

#### PANTAGES

Playmate days will be pleasantly recalled at the Pantages theatre for the week commencing with the afternoon performance today, when Menlo Moore will present a merry musical extravaganza, in which will be featured his "Lads and Lassies," including the singing comedienne, Daisy M. Hart. The act is one that will appeal to all, thought to children it will hold a special charm.

The score was written for the act and numerous song hits of the day have been interpolated by Miss Harris, a delightful entertainer, whose success in musical comedy has followed her to the vaudeville stage. There are a dozen young folks in the act and a special stage setting shows a lawn of the Nesbit mansion on an afternoon in June.

The singing numbers include, "Come to Me, My Love," "Mandy Jane," "Mr. Moon, Please Hide Your Face," "Heinie," "Look Out for the Bogy Man," and "Swing." A pleasing novelty will be presented by a talented musician known as Karl, the wizard of the one string violin. With an original instrument made from a cigar box, pine stick and one string, Karl manages to evoke all sorts of pleasing rhythmic melodies.

Miss Dorothy Harris and her corps de ballet will present a series of beautiful spectacular and classic dances. In a whirl of filmy draperies, with limbs and body

undulating to music of an Oriental and Salomonic quality, Miss Merereau presents a pantomime production of an old Egyptian story called "Pharaoh's Temple."

Miss Ollie Eaton & Co. will offer "Man Proposes—Woman Disposes," a bit of farce that promises her returns in laughter and applause. The Three Savaros are pantomime gymnasts and acrobats with a lot of comedy intermingled with their sensational routine of feats. Department store life, with musical embellishments, is graphically depicted by John Magee and Frances Kerry, uncanny fun makers; The Blue Ribbon Four, a quartette of Minstrel Maids and new comedy motion pictures, make up the balance of the big Pantages vaudeville bill.

#### ORPHEUM.

Another of those great comedy bills that every now and then comes to the Oakland Orpheum will be on view this week. Every act from the headliner down has a good deal of bright humor, and some of the acts are built especially for laughing purposes. Topping the list is one of the big comedy successes of the last year, Digby Bell in "It Happened in Topkapi," by George V. Hober. Mr. Bell needs no introduction to playgoers for his work in "The Midnight Bell," Hober's great comedy, is remembered by all.

One of the most widely known players on the American stage is Mr. Bell, whose mellow and unctuous comedy, genial and magnetic personality, natural and unaffected humor, have endeared him both to the past and present generation of theatre-goers. He is in vaudeville at present playing the comedy by George V. Hober. The piece affords him ample opportunity for the display of his ability.

The Four Huntings by their own efforts, placed their names on the theatrical roll of honor. They occupy today very much the same position in the amusement world as did the Four Cohans and the illustrious George H. Springfield to the top rung of the ladder of fame.

**SINGS OWN SONGS.** Will Dillon until recently was considered a clever song writer but now he is considered a particularly clever entertainer. He displays a fine, comely song and excels in singing his own songs. He does a number of quick changes which amount to little more than changing hats but the effect is funny and adds materially in the delivery of his songs.

The Great Tornadoes are a recently imported European athletic company of five men and one attractive woman. Their gymnastic prowess is highly developed and their prouettes and double somersaults from shoulder to shoulder furnish an exciting gymnastic performance.

Silence Baxter, the young Scot who brings his clever slack-wire act here for the first time is really an Oakland boy, and numbers a host of friends in this city who will be glad to welcome him back to the Golden West. Baxter brings Miss Beatrice Southwick as his assistant. They come direct from the Empire theatre, Glasgow, Scotland.

Lawrence Johnston, the pantomime artist who emerged from obscurity to the very top of his profession, is undoubtedly the complete master of his art. The manipulation of his dummy figure is so lifelike that it is hard to believe the puppet is not actually alive. The speed with which his repertoire is delivered makes it appear as though they were both speaking at the same time.

Miss Dorothy Harris is a bright young singing comedienne who has been making a big hit on the Orpheum circuit, her recent appearance in San Francisco having been a marked success.

Thomas A. Edison's moving pictures will continue as a decided feature of the Orpheum show. With each week's showing the pictures show many new and new scenes will be offered with this program.

#### YE LIBERTY.

Next week's play at Ye Liberty will be "The Rose of the Rancho," the fascinating romance of early California mission life which the Bishop Players are to revive in response to popular demand.

Its presentation next week will be particularly interesting, for Miss Jane Urban is to appear for the first time in the role of Juanita, the fiery, hot-tempered little heroine of the play, and those who have watched Miss Urban's work with the company for the last eight months will readily realize how ideally she is suited to the part. Mr. Kernana Cripps will also be new to us in the role of Kearny, and Manager Bishop promises that in point of cast and production next week's presentation of the play will surpass any previous one seen in this city.

#### OAKLAND PHOTO

With the current public interest on the subject of war, the latest two-reel feature of the Selig Company, entitled "Pauline Cushman, the Federal Spy," should be especially popular upon its appearance today, tomorrow and Tuesday at the Oakland Photo Theatre. The life of the historic Pauline Cushman reads like a romance and her daring deeds as a Civil War spy gives the basis for what is said to be one of the most vivid picture plays of the day.

Pauline Cushman was born of French and Spanish parents in New Orleans in 1833. As she grew to womanhood the charms of her person, the versatility of her accomplishments and her rare temperamental gifts attracted her to a stage career, where she made a notable success and occupied a high position in public esteem. Although born in the South, she achieved her greatest stage triumph in the North, and was so impressed by the Federal war measures that she secretly took the oath of allegiance to the United States in Columbus, O., in 1862. She was inspired to take active part in the brewing trouble by the attentions of many Southern officers who, on account of her ancestry, were constantly urging her to do something for the "cause."

**A NEAR-RIO.** While playing in Camille at the Woods theatre in Louisville, she caught her opportunity to make a grandstand play that would firmly ingratiate her with the Southerners. During the banquet scene she came boldly forward and made the following toast: "Here's to Jeff Davis and the Southern Confederacy. May the South always maintain her home and her rights." The house was convulsed and the audacity of the toast precipitated a near-

riot. While the Southern sympathizers were delighted the loyalists in the audience denounced the action unreservedly. She was formally expelled from the company and went South to be lionized as a daring victim of Yankee tyranny. This story was just the opportunity for which she had been waiting. Within the Southern lines she became most daring and dangerous. Many times she was captured and as many times made good her escape. Twice she was condemned to death by hanging and each time she was saved in the nick of time by Federalists. During her war service she was twice severely wounded and was given the rank and title of major by General Garfield.

Every one knows the story of "The Babes in the Woods," a story which has stirred human sympathy as perhaps no other story ever has done. The Pantages players will present this little fantasy in addition to the above Selig feature, it be-

ing re-enacted amid a background of a beautiful woodland, all shown in the exquisite coloring of nature.

Ruth Roland will be seen in two splendid Kalem comedies entitled "The Cat

and the Bonnet" and "The Fired Cook." A Biograph will also be shown, entitled "The Sheriff's Baby."

#### IDORA PARK.

With sunshine and warmth today, all the Easter hats which were laid away with a sigh last Sunday because of the rain, may be brought out with assurance to the wearers that they will have many admirers if they go to Idora Park. Today really is the opening of the season at Oakland's beautiful amusement park, and cold weather having deterred the usual crowds from turning out to see the new features which have been assembled there for their entertainment.

Chief among these is the splendid Italian band under the leadership of Lamonaca, the young musical genius who has shown a real talent as a director as well as composer. His newest composition, "A Court Lost in Naples," is a novelty, cleverly combining the ever-popular "big" music hints of the Italian street ballad and the airs of the old masters.

The afternoon and evening concerts will be given in the amphitheater. This canopied amphitheater will protect the audiences from the glare of the sun in the afternoon and from the dampness and chill of the evenings.

**WONDERFUL DIVING HORSES.** Carver's wonderfully clever diving horses, "Little Powderface" and "Old Powderface," and the two daring young women who take the plunges with them into the little pool 45 feet below the platform, offer another high class free attraction, while the feat of "Little Bubbles," the dare-devil youth who drops straight down from a height of 165 feet into an eight-foot pool will thrill all those who go to Idora today.

A number of striking improvements have been made at the park. Beautiful during the past winter, and work is well under way on the giant racing coaster, the longest and highest west of Chicago, and which will cost when finished more than \$65,000.

Lamonaca has arranged an attractive program for both afternoon and evening concerts on Sunday, designed to meet the popular taste as well as the more critical music lovers. The playing of the big organization, under the leadership of Lamonaca, has made a great hit with all those who listened to the concerts. Notwithstanding the cold weather during the past week, goodly crowds have sat through the evening concerts wrapped in overcoats and furs. This is the best sort

# TRAINING LOVELY GIRLS

CORSETS ON GROWING GIRLS ARE AN EVIL THEY CONFINE AND RESTRAIN THE GROWTH OF ALL THE MUSCLES OF THE BACK AND OFTEN SERIOUSLY WEAKEN IT, PRODUCING CURVED SPINES, ROUND SHOULDERS AND WEAK BACKS. YOUNG GIRLS SHOULD WEAR CORSET WAISTS" SAYS

*Lillian Russell*

BY LILLIAN RUSSELL

(Copyright, 1913, By Lillian Russell)

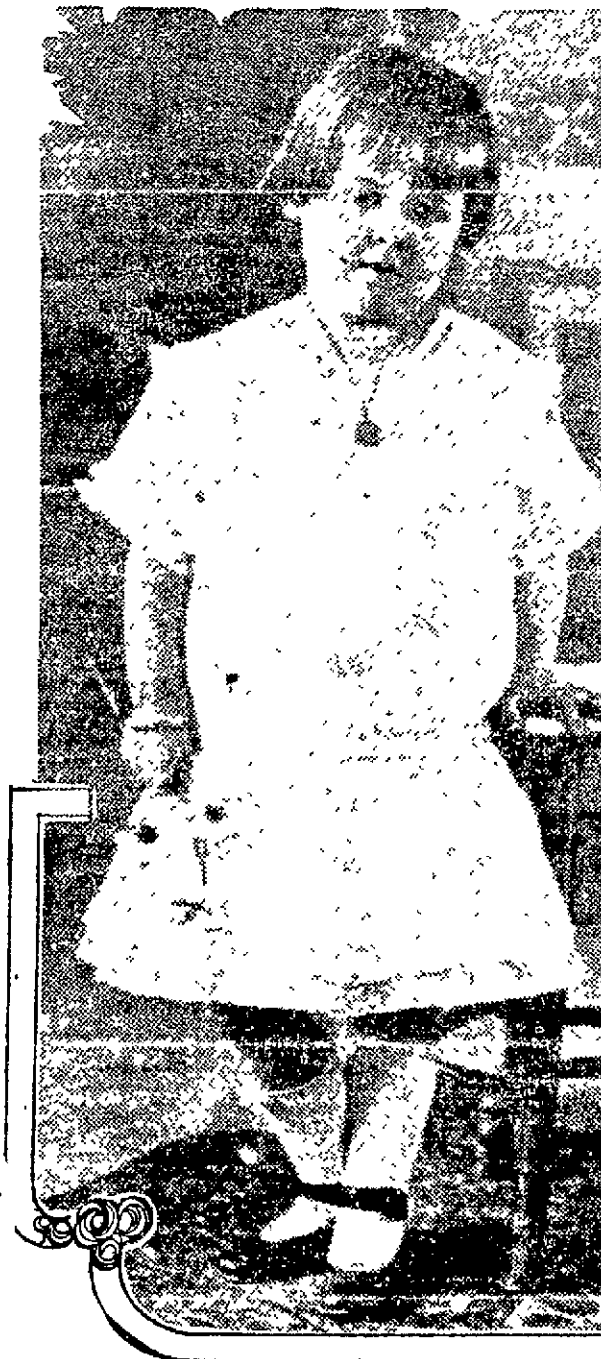

It is more important to train a girl to use a toothbrush five times a day, at night and morning and after each meal, to compel her to eat crusty bread, that she may learn to masticate slowly and thoroughly, to enforce charcoal and safe dentifrices, than to classify and dissect plants or insects for the microscope.

It is a great mistake to suppose the care of the milk teeth is of no importance. If they are lost early the jaws contract and when the permanent double teeth drive they are peculiarly liable to decay and should be examined early in all cases that they may be saved in time.

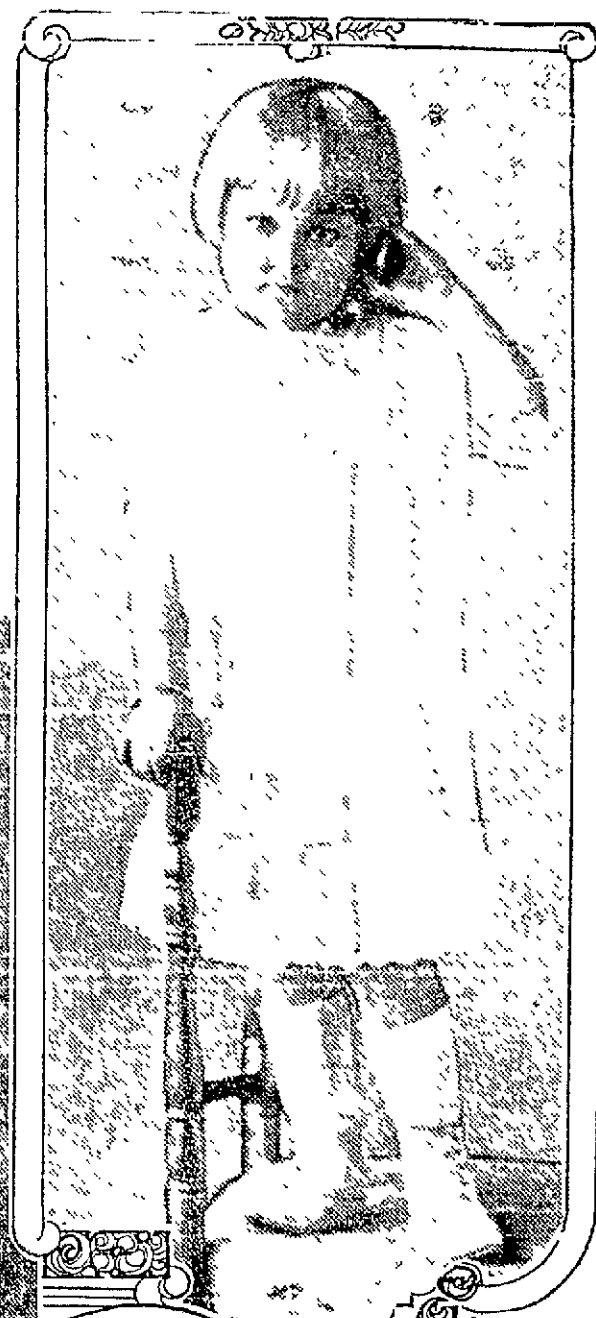

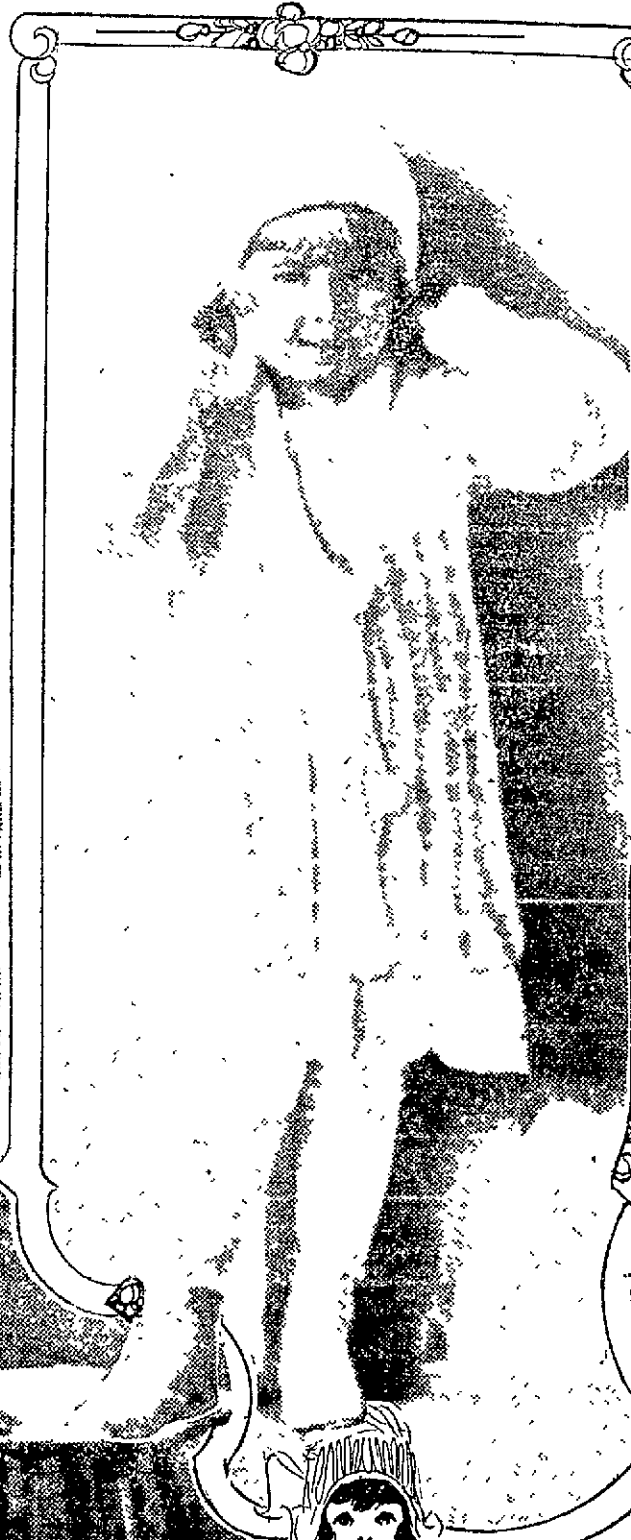

The indigestion from eating too fast or from reading while eating should be corrected by compulsory exercises.

Banish books and papers from the table at meals. Teach young people to be entertaining at the table and welcome jokes and fun there, and everywhere out and about. Check nothing but ill nature, and let even this relieve itself by a smart, snappy fit rather than

The clothing should be seasonable, loose and free enough to allow full use of all the muscles.

The hair should be kept short until the little girl is at least 12.

The true secret of a beautiful figure is in a strong spine and well developed muscles. This gives poise to the head and an easy carriage.

This is of the greatest importance not only in keeping the hair in good order but glossy, for constant brushing draws down the natural oil that is at the roots into the fiber of the hair and gives it a bright luster. If the hair is very crisp and harsh a little of the finest olive oil is the best pomade. Curl papers and curling tongs are both injurious to the hair, the latter being by far the more so. Long, heavy fringes are bad for the head, besides being ugly. As a girl grows up the hair is best kept in long, loose plaits down the back, and not twisted on the head till absolutely demanded by age or fashion.

One word about children's shoes. They should give full freedom to the growth of the ankle joint instead of restraining it in stiff leather so as to stop the circulation, forming, as it were, garters around the ankle.

Of course no child should ever wear a shoe that pinches him. See in the first place that his stockings are broad and long enough, and let the shoe be broad toed and long enough when he stands up to stamp in it. They should be flexible and always made to measure. The inner side of each shoe should form a straight line. The heels should not be high and should be carefully watched that they are not worn down on one side.

The clothing of all children should allow the freest motion of every limb and full action of the lungs. It should be of uniform warmth and not leave vital parts exposed. Unfortunately this is too often forgotten and children are dressed in a fashion that their parents would not endure for a moment if applied to themselves.

It is said that half the women have legs more or less crooked. I cannot believe the proportion can be so high as this.

Still most women do not know how to walk or sit gracefully, and to watch the parade of shoppers is still a most painful sight. The ungraceful, stiff, angular sort of movement that is called walking is, of course, partly due to the absurdly cut clothes the girl is forced to wear. Go to the west. See the Indians walk and watch the poetry of motion in those whose bodies and limbs are unfettered, and then look at one of our last products in a fashionable skirt.

It is difficult to say a story we know for a short time grace of movement or the poetry of repose, whether we look worse when we move or are still. We have no lack of schools to teach us how to sit, how to hold our hands and arms when they are not in use, yet there are so few women who will take the trouble to apply these helpful teachings.

It is not too much to say that every college woman has not this day made a success of even

The ears of children are a constant source of trouble. Keep the ears well protected in cold weather.

where most handicapped, as in the medical profession. She has displayed an unsuspected adaptability for business life and for callings once thought impossible for women, and the limit has not yet been reached. Why, then, will not the average woman try to improve her personal appearance? It can be done readily.

Now, one word about breathing. There is no reason why a woman should breathe differently than a man; what difference in breathing there is is the result of dress. Rigid waists usually force a woman to over-use her upper ribs in breathing and not to use the diaphragm. No singer can breathe thus and do herself justice. The waist measure must be yielding, and not fixed, so that the diaphragm can descend with inspiration, making the waist larger, and ascend in expiration. This also is very good for the health of the lungs, which are thus expanded at their bases and not overstrained at their apices, rendering the individual much less liable to consumption and pneumonia.

A real mother will have children that are a credit to her and her forbears. There is nothing more sad than a wandering mother. All our admirable actions can be traced to the mother influence.

Remember. Women's brains in relation to body weigh nearly an ounce more than men's.

## ANSWERS TO INQUIRIES.

H K: To have a graceful carriage in motion is the first place get rid of all stiffness. Relax the whole body. Exercise every joint in your body, beginning with the finger tips. Let the hands be as if lifeless, and then rapidly flex and straighten, one at a time, the finger joints; then flex and straighten the wrists, then the arms, and then the shoulders, at the same time swinging the arms. Next use the joints of the body one after another, the head upon the neck, the waist and hip joints, then the knee and ankle joints. You have no idea how flexible and limber this will make your body. Standing with the hands on the hips, gradually rise on the tiptoes and then settle gradually back; this will also relax the body. Walking with a book on the back will straighten the body and bring the right posture. Do not forget, as you walk, the rule given the West Point cadets: "Chin in, chest out, stomach in." There are many exercises which improve the carriage. You will find them in books on physical culture.

R R: To be well dressed a woman's hair must be

a suggestion of dandruff. Dandruff is either a disease of the scalp, which must be attended to by experts, or it is a result of lack of care and cleanliness. A woman may be beautifully dressed, shod and gloved perfectly, but if a few loose stray locks of hair are permitted to fall in the nape of her neck, or to straggle out from her coiffure, the entire impression of neatness is ruined. Nothing, to my mind, so spoils a woman's looks as badly arranged hair.

D L W: Half the stomach trouble we Americans are subject to may be laid to gulping down of ice water and ice cream sodas. They not only inflame the stomach too much, but they chill the delicate membranes and thereby retard digestion. A certain amount of water is beneficial when taken between meals, and when taken cool, but without the introduction of ice, is clearing and beautifying to the complexion, brightening to the eyes, and strengthening to the hair. So do not fear to drink water and use plenty of it on your body. Remember, the use of "aqua pura" is no acquired taste, it is the one beverage that equalizes all animals, human and otherwise.

L C: Almost everything that is used for the purpose of restraining stray hairs is either greasy or sticky, else such preparations would not serve their purpose. Many preparations are in the market, and if one uses them they should be applied very sparingly, and only at the places where the hair sticks out. The most efficacious way to restrain the hair, and especially in summer when at the resorts, is by the use of the hair nets. The larger sizes, sometimes called "golf nets," which cover the whole head, are the best, and do not show as much as those of smaller size and stay in place better. When they match the hair well they are invisible. They stay in place better if put on before the combs and ornamental hairpins are put in. Care should be taken not to draw them too tightly so that they press down the hair.

I shall mail you instructions for a fine set of deep breathing exercises. The breathing exercises are the greatest possible help to the girl with a small bust, for they help to expand the muscles and in time will surely enlarge the bust itself. If you will take the tonic and then practice deep breathing exercises I will warrant you will find a great improvement in two months. The trouble with most girls is that they want to accomplish cures in a week, and this, of course, cannot be done.

suppressed perversity for a day.

There are sound medical reasons, for allowing the nervous charge to pass off and a healthy reaction to take its place.

It ought to be a great cause of gratitude to know that most of the ill humor in the world is more physical than mental and that it passes off with rest if over-tired, or by reaction from sudden shock or stirring up when the nerves suffer from confinement.

Keep a girl from fretting by all means right and fair to others. But since life is strewn with daily discipline it is better for her health and good condition to keep her under direction to which she is bound to submit.

The "beauty schools" which sent out some of the most finely bred women of the last generation were Moravian schools, with their early hours, uneventful, placid routine, their gentle inevitable rule, unobtrusive reality of religion, and thorough grounding in the best parts of woman's education.

Corsets on growing girls are an evil. They confine and restrain the growth of all the muscles of the back and often seriously weaken it, producing curved spine, round shoulders, and weak backs. Young girls should wear corset waists.

Whether a girl will have the gifts of comeliness, whether she will have a fine smooth complexion, straight limbs, shapely figure, and good carriage, depends largely upon her mother's care from infancy. Whether she is to be plump and short or symmetrical, whether she is to be a gypsy or a creamy brunette, a freckled, thin faced girl or a delicately colored blonde,

is all under control. Her forbears must be taken into consideration in training; if her family are stocky, not over tall, train her for height and long contours, by sending her to a dry mountain region if possible, and accustom her early for suppleness, letting her live out of doors, but not setting her to close work or hard tramps.

She should dance and ride horseback. She should eat dry meats, that is, without rich dress gravies; she should eat no vegetables which grow beneath the ground. She should sleep alone in a very airy room, keeping the limbs straight, not going to sleep with the limbs curled up under her chin.

Puller exercises, swinging by the hands, long, smooth stroking by a masseuse, and gentle, firm pulling of the limbs daily tend to lengthen of limbs and increase of stature if kept up year after year.

The stroking with long, smooth sweeps and gentle pressure from neck down the length of the spine and from hip to heel nightly by the hand of mother or a trusty nurse is one of the greatest encouragements to growth and symmetry a young thing can know.

To keep down the growing flesh of a child a handful of rock salt to a basin of water as a sponge bath is safe and strengthening to the system. In fact, the growing child can be beautifully cultivated, or grow like a weed; it is all a question of motherhood.

The hair should be kept short. This is most important for cleanliness and for the consequent avoidance of the many troublesome diseases that are prone to affect the heads of children. The hairbrush should be soft and should be freely used.

# IN LODGEROOMS OF OAKLAND

What Is Being Done Among the Many Local Fraternities

Varied Activities Keep Members' Interest At High Pitch

Several hundred guests were bidden to attend the first annual dance given by Oakland Lodge No. 6, T. B. B. H., a social auxiliary to the local Moose lodge, last Tuesday evening in Hotel Oakland. It was one of the most successful fraternal events ever given by the Moose. Among those present were:

Mrs. W. J. L'Hercule, Mrs. W. F. Gilson, Miss Anita Worden, Miss Martha Johnson, Miss A. Moffitt, Mrs. Brown, Mrs. P. Kisch, Mrs. E. O. Meyers, Mrs. W. J. Hamilton, Mrs. Frank Barrett, Mrs. J. St. Sur, Mrs. A. E. Lorber, Mrs. George Samuels, Mrs. Byron Rutley, Mrs. M. Samuels, Mrs. W. J. Baccus, Mrs. Julia LeStrang, Miss M. Beck, Mrs. Ann Williamson, Mrs. Frank Donant, Mrs. Louise Anderson, Miss Grace Strom, Mrs. D. G. Gallier, Mrs. Grace McDavid, Mrs. Harry B. Andrews, Mrs. Louis Kuttner, Mrs. M. Goldwater, Mrs. May Goldwater, Mrs. (Conkey) Leonard, Mrs. Fozzo, Mrs. Johnston, Mrs. W. J. Willis, Miss A. J. Donovan, Mrs. Meli Tournier, Mrs. G. W. Wentworth, Miss E. Anderson, Miss Ralph, Mrs. Miss Adell B. Johnson, Mrs. J. Schwartz, Miss Chloe Holder, Mrs. L. Washburn, Miss Adele Hordas, Miss D. Brewster, Mrs. J. W. Piller, Miss Alice Sevan, Mrs. C. Sinclair, Mrs. W. Garner, Miss Anna Rums, Mrs. F. L. Rumer, Mrs. D. M. Baxter, Mrs. Leon Casano, Miss J. Cornhill, Mrs. C. Dampier, Mrs. R. L. Perry, Mrs. J. Berquist, Mrs. L. Frank, Miss Miss Blise Bushman, Mrs. W. J. Tennessee, Mrs. W. J. Storm, Mrs. W. J. Williams, Mrs. R. P. Daniels, Miss Florence W. Ibe, Mrs. Huntington, Miss Rosa Baker, Miss Ethel Baker, Mrs. R. Nield, Miss Helen Eide, Miss A. B. Kinsch, Mrs. Kathie Peters, Mrs. W. E. Watkins, Mrs. Nellie Leahy, Mrs. B. W. Lucas, Mrs. B. J. Perry, Miss Fleurette N. Levy, Mrs. P. J. Nichols, Miss Agnes Nichols, Miss M. Nichols, Mrs. A. F. Batters, Mrs. Mildred Kachlein, Miss M. Van Buschick, Miss Mable Gagen, Miss Nena Kachlein.

MRS. GRACE SABATIER IS THE NOBLE GRAND OF ABST IN-VIDIA REBEKAH LODGE, I. O. O. F.

LADIES OF THE G. A. R.  
Colonel John B. Wyman Circle met last Monday evening for their regular business meeting in Lincoln hall. President Carrie W. Davis presiding. A goodly number of the ladies were present; also three visiting ladies were in attendance. Two candidates were found waiting in the reception hall and escorted into the circle room and initiated. A social hour was enjoyed, during which time daily refreshments were served. Next Tuesday afternoon Mrs. Jannett Lott will entertain the "Efficient" her home, 527 Twenty-fourth street. A breakfast to be given at one of the hotels is a social event of the near future. The executive committee has the affair in charge.

## KNIGHTS OF SECURITY.

Ridgwick Council No. 3215 held its regular meeting Tuesday evening at Lincoln hall.  
At this meeting four candidates were obligated and five applications for membership were received.  
The drill team under the leadership of Captain C. L. Ward, put on the degree work for the first time since its organization two months ago and surprised all present by the manner in which they executed the drill. After the regular business was dispensed with Lady Porter delivered an address on "The Sun, Moon and Wind," which was very interesting and instructive.

## UNITED ARTISANS.

Golden Gate Assembly held a regular business session last Monday evening in Pythian Castle. Mrs. Ella Watt, supreme instructor, of Portland, Ore., was present and talked at some length about the "Artisan's" trip to Portland in June. Many Artisans of the state have signified their intentions to make the trip. Much time was devoted to drill practice last Monday evening. Many new features were introduced in the drill.  
Next Monday evening, March 31, the Assembly will entertain its friends. There will be a program and dancing.

## PYTHIAN SISTERS.

After the regular business session of Caliente Temple last Tuesday evening the regular drill dance was held. Cards also provided entertainment. On Tuesday evening, April 1, there will be election of delegates to the Grand Temple session to be held at San Diego in California.  
Caliente Temple will probably send five delegates. The theater party given by the Sunshine League will be held on Wednesday evening, April 4.

## LOYAL TEMPLE.

After an absence of two weeks, M. E. C. Bossie Littleman presided. There was large attendance and considerable business was transacted. The committee, Ella Rerat paid the temple an official visit. The initiatory work was performed and the degree staff in excellent work. Brother Temple, in behalf of Live Oak Lodge, Knights of Pythias, thanked the members for the courtesies shown them at their last meeting. Amanda Spennberg presented D. D. Ella Rerat, in behalf of the temple, with a small tablet of their appreciation of the courtesies. Sister responded in a very touching manner, stating her appreciation of the many courtesies extended in the district during her term of office.  
Wednesday evening, April 3, will be election of delegates to the Grand Temple.

## ODD FELLOWS.

North Oakland Lodge No. 401, I. O. O. F., had a busy evening last Wednesday, March 28. A. S. Rutter, P. G. and General J. K. Rutter, P. G., were elected to represent the lodge at the grand lodge session to be held in Los Angeles. Bro. A. S. Rutter was also elected to be district deputy grand master of District No. 64.  
Brother Louis Jensen, D. G. M., paid the lodge a visit and made interesting remarks.  
The initiatory degree was conferred in a very creditable manner by the degree team.  
Next Wednesday, April 2, the first degree will be conferred on three candidates.

## DRUIDS.

At the last meeting of Live Oak Grove No. 160, U. A. O. D., officers for the ensuing term were nominated and five applications for membership were received. There was a great deal of business transacted and a splendid attendance.  
Next Thursday, April 3, the semi-annual election of officers will take place.  
Live Oak Circle No. 57 will hold a social in Carpenter's building, Twelfth and Brush streets, which will be open to Druids.

## JUNIOR ORDER U. A. M.

There was a large attendance last Tuesday evening at the regular meeting of Junior Order U. A. M., in Custer Hall, 1117 Webster street. One of the features of the meeting was the report of officers and chapters of the various committees. According to these reports the council is now in a more prosperous condition than ever before. During the evening B. W. Dexter gave an interesting talk on the general uplift of the moral conditions in the various parts of the Union.  
On Friday night a fair-sized delegation

attended the competitive drill and degree work between Starr King and Garfield councils in San Francisco. National Representative S. Shannon of Custer being one of the judges.  
It is planned during the coming season to hold a number of picnics and outings for the benefit of the members of Custer Council and their families and friends.

## WOODMEN OF THE WORLD.

The convention committee in charge of the eleventh convention of the eleventh district, which will be held in Hayward on May 21, met in Forest Camp Monday night and arranged the preliminaries. Chairman Elmer Welch announced that Cypress Camp of Hayward was making extraordinary efforts to receive and entertain the delegates. Secretary Lowenberg has received letters from many camps in the district expressing their hearty co-operation with the camps in Alameda county, and everything looks favorable for a big class initiation at the close of the convention.  
The Alameda county executive committee, W. O. W., paid a regular monthly visit to Forest Camp Monday night. The camps in the executive district were greeted by the delegates. Woodmen Camp drill team was present and performed some new evolutions. Addresses were made by President Scudder, J. E. Welsh, R. H. McCurdy and several others. The next visit will probably be to Wadsworth Camp. It was decided to co-operate with Oakland Camp on the night of April 28, when a big theater party will occur at the Orpheum. The entire house will be devoted to the Oakland Camp drill team, which will contend in Colorado Springs for the exhibition prizes in connection with the head camp session next Wednesday evening, April 4.

## FOREST CAMP.

Forest Camp will give a dance April 11 at Alcatraz Hall for the benefit of its drill team. George Nelson is chairman of the committee, and is assisted by John Ferrel, Herbert B. Johnson, Lewis, Harry Monaghan and Neighbor Scholes.

## MACCABEES.

Oakland Tent No. 17 met in regular review Monday evening, March 24. Routine business was transacted and the committee reported progress. The disability list was quite lengthy. Sir Knight Henry Newman was reported critically ill. Sir Knight Geo. W. Green is confined in Meritt Hospital. Members of Oakland Tent are visiting him. He is a member of Yosemite Tent. Eight candidates were admitted to membership by the short form of initiation. After the review the lodgemen were given a social hour and refreshments, who danced until midnight.

## ROYAL ARCANUM.

Le Comte Council, Royal Arcanum, gave for its initial public function of the year a minstrel show at Native Sons Hall, which was packed by its members. The last game of whist in this series was due to the efforts of Herman S. Walsh, the present regent. A most successful year is anticipated if last night's entertainment is a sample. Those taking part were: P. S. Dickinson, Chas. H. Benton, W. T. Phipps, O. Brock, David Lees and J. A. Bond. The minstrel were succeeded by a first-class short business session, during which a powerful independent machine in charge of an experienced operator.

## BEN HUR.

The last meeting of Oakland Court No. 17 of Ben Hur to be held in Woodman Hall was that of last Thursday evening. Among the visiting members were Bro. and Sister Lippert of Seattle. The next meeting of the court will be held in Rice Institute, 1705 San Pablo avenue, Thursday evening, April 3. After a short business session the remainder of the evening will be devoted to a house warming and reunion.

## MODERN WOODMEN.

Last Thursday evening Porter Hall was the scene of a very enjoyable basket social and dance given by Greater Oakland Camp, Modern Woodmen, and Royal Neighbors. The evening was passed in dancing.  
Credit is due Mrs. Paria, Mrs. Brewster, Mrs. Davis and Ethel Neff, the members of the visiting members who helped in their work in arranging the affair. At 11 o'clock bidding on luncheon baskets was conducted by L. C. Johnson, who acted as auctioneer.

## FRATERNAL BROTHERHOOD.

Oakland Lodge No. 123, F. B. B. held its regular meeting on Friday at Pythian Castle. Brother J. W. Higgins presided. Two candidates by initiation were obligated upon favorably and declared elected.

to membership. They were Oka Laughlin and Harriet M. Clark.  
Next week there will be a "grab-bag" social.

One of the oldest members, Brother Loux, was accidentally hurt and is at present in Alameda sanitarium.

## PONTIAC TRIBE.

Pontiac Tribe No. 130, Improved Order of Redmen, has been having the time of the month for several sessions and open breaking up the rocks and hard material. Later the diamond drill and dynamite have been used to assist in the work. The investigating committee has had its hands full.  
Pontiac boasts of the finest degree team in the whole reservation of California, and they have several splendid orators in the persons of Brother Rerk and Brother Barney Nolan, both of whom are past sachems.

## ARGONAUT TENT TAKES IN FIVE MEMBERS.

Argonaut Tent, No. 33, K. O. T. M., had a most enjoyable review last Friday evening at Macabees Temple. Five applications for membership were received, and were duly elected to membership. On next Friday evening, April 4, the ladies of Argonaut have given a joint dance and social at the temple for the benefit of a worthy Sir Knight, who has been in the hospital and had a serious operation performed. All Macabees and their friends are invited to be present. The admission is free and an enjoyable evening is promised to all who attend. The ladies have volunteered to provide a basket lunch for the members.

## MACCABEES HOLD REGULAR REVIEW.

Oakland Hive No. 14, Lady Macabees, held its regular review in Macabees Temple, Thursday night. The last game of whist in this series was played, and the prizes will be awarded at the next review to the lucky winners. There will be another series started at the next meeting, and all members are urged to be present. The committee has been appointed to entertain the commanders and past commanders who will be entertained by Oakland Hive the latter part of April.

## DELEGATES SELECTED FOR REBEKAH ASSEMBLY.

The initiatory degree was conferred last Tuesday evening by the staff officers of Abist Inside Lodge. A number of visitors were present. Mrs. Fonda, Mrs. Worthy and Mrs. Foster were chosen as delegates to the Rebekah Assembly, to convene in Los Angeles May 13.  
Next Tuesday being April 2, a special attraction committee was appointed. Mrs. Grace Ford is chairman. A special committee was appointed for an entertainment to be given April 29. Sister Ethel Foster is chairman. It is planned to hold an international carnival, and as many nations as possible will be represented.

## BOY WANTS GIRL'S MAMMA TO RETURN WIFE TO HIM.

LA CROSSE, Wis., March 23.—In an effort to have his 18-year-old bride of a day returned to him, Roy W. Cary, aged 18, tonight, has begun habeas corpus proceedings against his young woman's mother, Mrs. John Cole of this city.  
The young couple eloped last December to Austin, Minn., where in spite of their youth, they were granted a license.  
Mrs. Cole learning of the runaway marriage, immediately followed the couple and located them at Clear Lake, Ia., where she forced the girl to return home with her.

## CAUGHT THEM ALL.

At 11 o'clock, March 23, a bellboy at the Hotel LaSalle, caused amusement to the guests in the lobby.  
The men wanted were Henry A. Fish, traveling for a wholesale and millinery house of New York; Clarence D. Worm, real estate dealer of St. Augustine, Fla.; and George Henry Hooker, steamship agent of San Francisco.  
The first two were in the county jail. Mr. Hooker was found in the buffet.

# Science and Nature

By PROF. J. C. GILSON.

We are living in a fast, automatic and mechanical age of civilization. Slow locomotion is giving way to swift; the auto and the electric car are displacing the horse; the calculating machine does the business; the typewriter takes down correspondence for the typist; the planograph and other mechanical devices supersede the amanuensis for learning music; we go up and down in our motor-study skyscrapers, and amuse our hours with our four by four pressing the button. In short, automation is more and more stereotyping every phase of our life. While we desire for short cuts and acceleration in every line of human activity seem to permeate the very air that we breathe.

It is no longer a matter of going to travel abroad in order to become acquainted with every part of the globe. Moving pictures and talking machines reproduce and bring to our eyes and ears not only the natural scenery but the climate and moving realities of every country. We observe the dunes and the exciting chase and capture of the lion, the polar bear, walrus and other wild animals, but observe the dunes and custom of the inhabitants of the desert and the great low fields and the heaving billows of the sea against the rock-bound coast. We see the life of the animals, the birds, visit their cliff dwellings and observe their habits.

## PACE IS RAPID.

So accustomed are we becoming to rapidly increasing marvelous inventions that when a new and startling device is introduced, it fits into our every day life so readily that we soon regard it as commonplace.

Will, mining and sanitary engineers are solving many of the intricate problems that are constantly arising in the complex and swiftly advancing utilitarian age.

In lessening distances, reducing grades, obtaining difficult bridge building over waterways, and providing means for the rapid and safe transportation of men and material, the modern civil engineer is equal to the exigencies.

The most striking achievements in this line are the Alpine, Hudson River, East River and Detroit Tunnels and the New York, New Haven and Boston Subways. Tunneling has become a most important engineering feat.

## BUILT DRAIN SYSTEMS.

The Assyrians constructed drainage passages and the kings of Upper Egypt constructed their tombs by tunnelling into the precipitous cliffs of the Theban Mountains. In the Roman Empire the greatest of all ancient tunnel builders, one of their tunnels being 3 1/2 miles in length. The Romans built the tunnel to the front of the face to be pierced and then when the rock had reached a high temperature to dash cold water against the face, and the heat was so great that the water would freeze and the fissures, after which chisel and mallet were called into requisition.

In more modern times holes were drilled and filled with gunpowder to aid in breaking up the rocks and hard material. Later the diamond drill and dynamite have been used to assist in the work. The investigating committee has had its hands full.  
Pontiac boasts of the finest degree team in the whole reservation of California, and they have several splendid orators in the persons of Brother Rerk and Brother Barney Nolan, both of whom are past sachems.

Pontiac meets every Friday evening at the Redmen's hall. The sessions are open to all. The investigating committee has had its hands full.  
Pontiac boasts of the finest degree team in the whole reservation of California, and they have several splendid orators in the persons of Brother Rerk and Brother Barney Nolan, both of whom are past sachems.

## ENCOUNTER GREAT HEAT.

In building the longest Alpine tunnels great heat was encountered. In the middle portions, the temperature sometimes exceeding 100 degrees Fahrenheit.  
"Hot water" issued from the crevices in the rocks and the very rocks themselves were so uncomfortably warm that drills had to be handled had to be wrapped in cloths. These conditions made the work very hot and the piping of cold water from the outside to reduce the heat.  
The Simpson tunnel road is diverting much traffic from the old route to Milan, Italy. It is a new route from Paris to Milan, Italy. It is a new route from Paris to Milan, Italy. It is a new route from Paris to Milan, Italy.

## WONDERFUL STUDY.

The gentleman's stepchildren, wherein Barnabas rides "terror," is a wonderful study in winning pictures.  
There is perhaps no chapter in history more indicative of spiritual action—the annals of the life of a man who, in the midst of the most desperate struggle, is able to find time to write a book, and a maiden rejoiced in his prowess.

## WONDERFUL STUDY.

## NEW YORK, March 22.—

The National Highway Protective Society conferred upon William A. McKnight, the Columbia student who rescued two children from a runaway at Amsterdam, a gold medal for his heroic deed. The medal of the society. After snatching the children from in front of a mad-dened horse he was thrown down and seriously injured under the overturned vehicle. He is still in J. Hood Wright hospital suffering from internal injuries.  
The society also announced that the gold medal had been voted to William Fitting, a cripple, for rescuing a woman at a railroad crossing at Hicksville, L. I., two weeks ago.  
Fitting lost both legs in an accident while working on a railroad. When he rescued the woman at the risk of his own life he was struck by the on-coming train and his legs were shattered.  
The society announced that F. Augustus Schermerhorn had given for the use of the society two plots of ground on East Sixty-sixth street to be used as a children's farm garden and another at Sixty-ninth street and Second avenue to be used as a children's playground.

Reviews of the Latest Books of Fiction, Travel and Science

Gossip About Makers of Books and Their Work

TWO VERY important books challenge the attention of thoughtful readers all over the nation, "Comrade Yeta" and "The Amateur Gentleman." The latter is the work of Jeffery Farnol, who scored so tremendously in "The Broad Highway," and who shows in this latest book that his literary fame is well assured. The new volume is from the press of Little, Brown & Co. of Boston.

In a foreword, the publishers give a brief outline of the story: "The Amateur Gentleman," the first story Mr. Farnol has written since the publication of "The Broad Highway," possesses the same qualities which gave that book its universal appeal—the charm of style, the fresh, unusual humor, the vigorous yet whimsical characterizations. The period is the early nineteenth century, the scene England, and you will read of country things and people, of gentlemen of fashion and the ladies, of romantic adventure, and hand-to-hand encounters, and most of all, of true love—the whole making an entrancing story rich in sentiment and enlivening with ennobling human nature.

"Barnabas Ratty, a country-bred youth, son of the retired champion pugilist of England, is left a fortune; he sets forth for London to 'become a gentleman.' He has many adventures, meets people of widely different types, and falls in love with a fascinating heroine. Many who have read the story as it appeared serially pronounce it an even greater work of fiction than 'The Broad Highway.' It is to be the most popular book of the year."

Barnabas has been brought up by his father and the latter's friend, both of whom are retired prize fighters, and when he announces his intention of going to London they call him "The Amateur Gentleman," from which the book takes its name. It is a wonderful book, its charm beginning with the first page, on which we read the inscription: "To my Father who has ever been the hands of which is a path that can be trodden only by the foot of a Man."

## BOOK IS UNIQUE.

The titles of the chapters are very original and in themselves indicate how unique the book is in many ways. Among the titles are:

"In Which Barnabas Knocks Down His Father, though as Dutifully as may be."  
"In Which the Patient Reader is Introduced to the Almost Human Duchess."  
"We are straightway led into a charming land—a land of adventure. One feels that it is well for the world that there is still for us all the Land of Romance, the land of Enchantment. Life is wonderful, and the man who has power to make us linger in it with Barnabas. And in this land, there is much wisdom, and we find brave deeds, and true ideals, and they are happy hearted people, and simple folk, and great ladies and gentlemen."

"It is a great book, big, and bright and frank—with the wide horizon of earth and sky as its measurements as the hero's faith in the power of the human mind. Bell, a bit of wisdom about his childhood, a bit of wisdom about his childhood, a bit of wisdom about his childhood."

"In the world of London, the perils of world, Barnabas, clothes ain't garments to keep a man warm—their works of art in the country a man puts 'em on, and corrects all about 'em—in the perils world he has 'em on put for him, and remembers 'em. In the country a man wears his clothes, in the perils world his clothes wear him, and he's often the poorest fellow about him too."

"We come across the definition of 'a gentleman' more than once. A captain in the army tells us:

"A gentleman is a fellow who goes to a university, but doesn't have to learn anything who goes into the world, but doesn't have to work at anything, and who has never been blackballed at any of the clubs."

A wandering preacher shows us the other side:

"A gentleman, young sir, is (I take it) one born with the Godlike capacity to think and feel for others, irrespective of their rank or condition; . . . one who possesses an ideal so lofty, a mind so delicate that it is like a bird above all the fables and base, yet strengthens his hands to raise those who are fallen—no matter how low. This, I think, to be truly a gentleman; and, of all gentlemen, Jesus of Nazareth was the first."

And where in the world can we find any heroism more charming than this? The lady of high degree. There is the exultation of youth for you—the exultation of womanly charms—there is love and romance. We are back in the nineteenth century—let us say part—when a young man, a student, and a maiden rejoiced in his prowess.

## WONDERFUL STUDY.

The gentleman's stepchildren, wherein Barnabas rides "terror," is a wonderful study in winning pictures.  
There is perhaps no chapter in history more indicative of spiritual action—the annals of the life of a man who, in the midst of the most desperate struggle, is able to find time to write a book, and a maiden rejoiced in his prowess.

## JEFFERY FARNOL.

Jeffery Farnol who wrote "The Amateur Gentleman," we read: "Jeffery Farnol, author of 'The Amateur Gentleman,' was born thirty-four years ago in Warwickshire, England. It was originally intended that he should become an engineer and he was sent to Germany for that purpose, but he became an artist and later studied art at the South Kensington Museum, London. After his marriage Mr. Farnol went to New York to make a literary work. His last book, 'The Amateur Gentleman,' was not a success and he is now in London, where he is working on a new book. He is a very successful artist and has painted many pictures. He is a very successful artist and has painted many pictures. He is a very successful artist and has painted many pictures."

ed its 15th printing—140th thousand. Mr. Farnol devoted the best part of two years to writing "The Amateur Gentleman." He is a night worker. With a pot of tea at his elbow he starts in writing in his den at the top of the house about midnight, and he is winding up a new chapter. If he is not satisfied with his labors the following night he rewrites.

## THE LOVERS OF SKYE.

An altogether charming, happy spry story is found in "The Lovers of Skye" (Doubleday-Merrill Company). A recent letter expresses some of its charm:

"Tucked away in sweet-scented lavender like a grand old first party dress, every bit as beautiful in the times and every bit as picturesque, too—play the little village of Skye on the Kentucky shore of the beautiful Ohio. There was no so-called scandal to roll its peaceful stream of life. The romance does not interrupt the spontaneity and rhythm with which affairs moved happily along.

"Convention and charm ruled in the community and convention and custom did not countenance love-affairs. But one day the heart of Hippolyte was revolted, and he dared to let all know of it. Whereupon the 'old beaux' with beards and moustaches with ringlets in the parish took to them, of courtships where they had been discontinued years before and denied the worth of their ancient elders by sitting arm in arm for tontines.

"The story of the romance renaissance in Skye is told by Frank Waller Allen in his charmingly idyllic novel called

## THE LOVERS OF SKYE.

It is an idyllic, joyous, open-air love story, a romance of the morning breeze as a J as bright as the sun's sun—a romance that will make you smile with happy satisfaction and feel the thrill of abiding pleasure. Its gentle humor, its fancy and charming play of thought, cause it to flow on so spontaneously as the beautiful river along whose shores the story developed.

## VILLAGE LIFE.

Cleverly the author draws a picture of old-fashioned southern village life in a little, almost isolated Kentucky hamlet (Skye) that had been laid away in lavender for almost half a century. Lives scarcely changed within its gates. Convention and custom, the hands of which long since had stamped love-making with a mark of disapproval and countenanced it only at that frivolous period in life when young men and inexperienced youth carried home from school a pretty girl's book.

The people of Skye were poor, yet theirs was an aristocratic poverty that was as proudly as every trace of a former day's prosperity. They were poor, yet theirs was an aristocratic poverty that was as proudly as every trace of a former day's prosperity.

"Your system certainly pays dividends," writes a firm believer in the system of bidding which Miss Irwin recommends. "For some months now I have won consistently. That of itself means nothing. But I have won with hands which have not averaged a bit better than those of my adversaries and that does mean something. For instance, the other day I played six rubbers, of which I lost four, and yet, without any advantage in partners, I was on the long side of the score on every rubber but one, and on that I lost only forty points. That, of course, was unusual, but it illustrates what can be done."

"Scientific Auction Bridge" is the name given by E. V. Shepard to the book on auction bridge which he has written. A. T. Robertson, vice-president Knickerbocker Club, writes of it:

"I have read all the books on auction bridge. E. V. Shepard's is the best of them all. I do not if a better one will ever be written. It is a book which will be of great value to all who play the game. It gives simple rules for bidding and playing and is a book which can be read over and over again. It is a book which can be read over and over again. It is a book which can be read over and over again."

But one day Hippolyte Pac, son of the most revolted family in the community revolted against the time-honored precedent of his country. He was young and strong and hearty. He had a lot of doors; had sported in the river. He was elemental and when he saw the pretty face and figure of Eve Mulligan, the hostess of the village, he fell in love with her. He was elemental and when he saw the pretty face and figure of Eve Mulligan, the hostess of the village, he fell in love with her.

He was elemental and when he saw the pretty face and figure of Eve Mulligan, the hostess of the village, he fell in love with her. He was elemental and when he saw the pretty face and figure of Eve Mulligan, the hostess of the village, he fell in love with her.

## WINDYRIDGE.

"Windyridge" (D. Appleton & Co.) is by W. R. R. who has given us in this book a delightful English study.  
Grace Holden, aged thirty-five, having spent three years in a Chelsea boarding-house, looked with pleasure on the Yorkman, his guest, who she chanced to see in the street. She fell a victim to the allurements of a quaint and picturesque cottage, and finally rented it for ten pounds a year. Here she could practice her vocation, which consisted of imitating the voice of a woman. Her neighbor, a motherly soul, becomes her best friend. The history of her days in the new environment pictures a charming life with which Miss Holden identified herself. The book has both atmosphere and charm—the charm of strength and simplicity.

## THE DARK FLOWER.

John Galsworthy's latest work, "The Dark Flower" (The Love-Life of a Man), Spring, summer, autumn, begins in the April of 1917. It is a story of sentiment, of idealism, of love, of passion, of an intimate appeal to all mankind, to all who have ever loved or known the influence of love. Readers will recall his play, "The Little Dream," that appeared in the same magazine. "The search of the soul for the ideal was its theme; the scene, a peasant cottage among the Dolomites. A young peasant girl, Seelchen (Little Soul), longing for the world beyond the mountains, falls asleep, and learns from the visions and voices of her dream the true values of life. As a result, she is a different person. The book is a story of sentiment, of idealism, of love, of passion, of an intimate appeal to all mankind, to all who have ever loved or known the influence of love. # WHO CAN'T TELL

## THE BARRETT GIRLS

**Grandma Mixed 'Em Up When They Were Wee Babies. Mother Is Puzzled Hourly, and as for Father, He Gives It Up Entirely.**

**At 5 They Were About the Same.**

O YES, you've seen persons as like as two peas. And you've heard of 'em as like as two pins. But here are two Chicago maids whose parents can't tell 'em apart. Their mother is never certain which is which and their father doesn't know who's who or why.

These girls look exactly alike, weigh exactly the same, and write enough like each other to deceive a handwriting expert. They are the same height, the same coloring, of the same voice—in short, Lucille is Camille and Camille is Lucille.

Of course, that last is metaphorical. But really and truly no one knows for sure that Camille isn't Lucille and Lucille isn't Camille.

It was this way: When they were little bits of things, each with the same number of fluffy yellow hairs on almost bald heads, both crying at the same time, they were taken to the church to be christened. Lucille was wrapped in a blue blanket and Camille in a pink blanket, and Mrs. Barrett, their mother, had it firmly fixed in her mind that Lucille was blue and Camille was pink—though, to tell the truth, they were both red.

Anyway, after the christening Grandma Barrett took both the little babies in her lap, carefully folded up the blankets, because it was a hot day and they didn't need them, and then took care of the babies until mamma should have time to take them. When mamma came, the first thing she said was: "Which is Lucille?"

"Why, this one," said grandmother, handing up one baby.

"How do you know?" persisted Mrs. Barrett. "Did she have the blue blanket?"

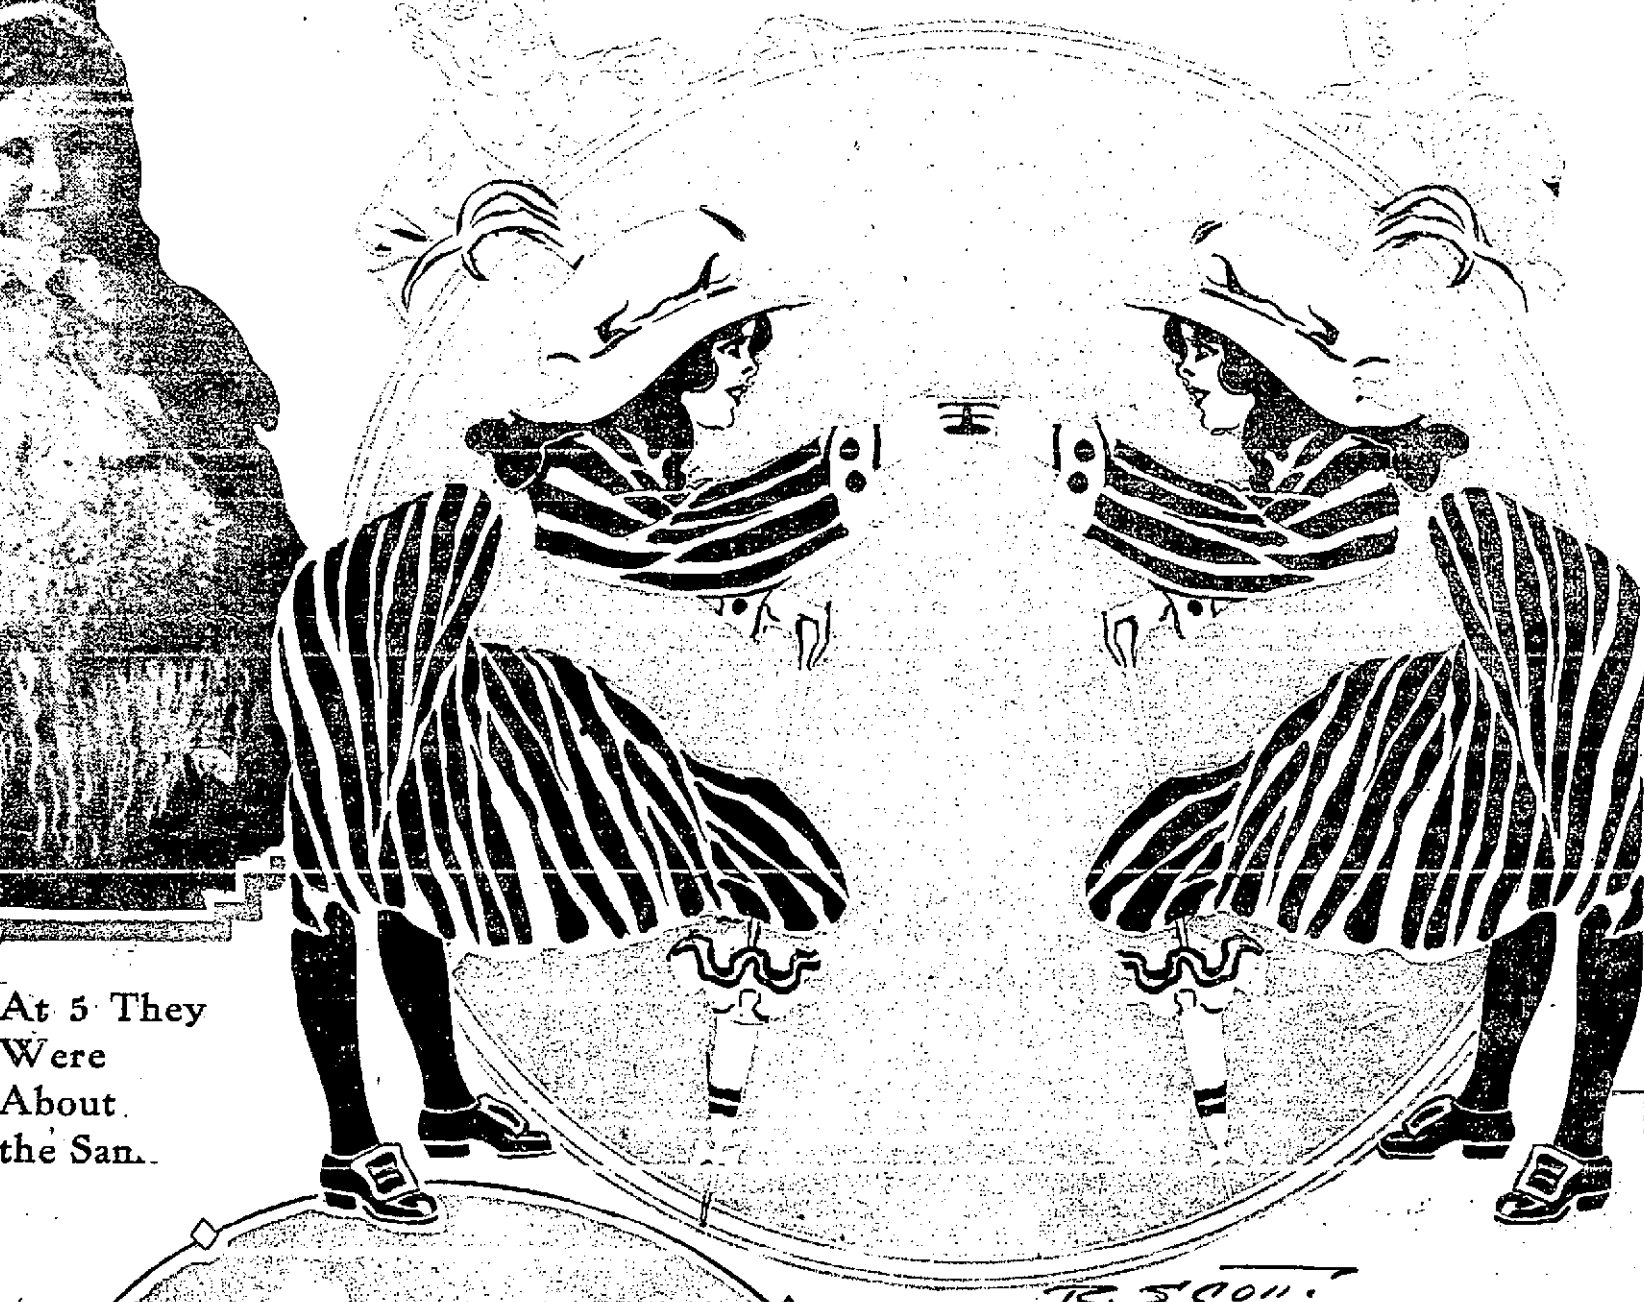

At first the grandmother felt sure she could tell them apart, and then she remembered she laid them on the bed for a minute and she couldn't remember which one she had picked up first.

### Mother Puzzled Again and Again.

The twins were born thirteen years ago and are the daughters of John T. Barrett, an inspector for an insurance firm on La Salle street. They are only two of a big family, for there are seven other children, but these are the pets, equally of the parents and of the brothers and sisters. They live at 2140 North Lawrence avenue and go to the parochial school of Our Lady of Grace at Ridgeway and Greenwood terrace.

And no one can positively tell them apart. Not any one in the world. Even their mother is puzzled again and again, although she insists with a mother's fond certainty that she does know which is which. The father frankly admits he never strikes it right save by chance, and all the family have taken to calling both of them "baby." It saves confusion and they are sure of getting some attention from one of the two.

Mother calls "Baby, run and make your bed, like a good girl, before you go to school," and half an hour afterwards she calls again, "There, why didn't you do as I told you?"

**Right at First They Looked Alike.**

Whereupon Lucille replies, "You told Camille to do it," and Camille retorts, "You never; it was Lucille."

But let father take a dime out of his pocket and say, "Here, baby, take this and go have a good time at the movies," and in a second both girls are insisting that they are both Lucille, and the joke of it is that father can't tell.

### They Have Lots of Fun at School.

It's the same way at school. There is a choice seat near the back of the room and Camille had been sitting there for some time, when one morning one of the sisters, coming unexpectedly into the room, heard Camille arguing with her sister:

"Well, I let you sit there all last week and once this week when Lucy had the seat opposite, and I don't think it's fair. I'll tell 'be sisters about it if you don't play fair."

The sister came up and asked what it meant and found that they had been trading seats without any one being any the wiser.

She ordered Lucille back to her original seat in the front of the room, but as the girls did a little dance around the desks she isn't sure yet which one went to the favorite seat. The girls are exact copies of each other. Two identical prints hanging side by side in a gallery would not be more difficult to distinguish. In fact, in the last picture which was taken of the twins, they are unable to tell which is which themselves. They forgot that the camera reversed objects and then, confused, couldn't remember how they stood, so that now they don't know whether Camille took a good picture of Lucille, or if Lucille is a good likeness of Camille.

**And at 2, Kept It Up.**

"If we could only count the curls," explained Lucille. "We could tell which was which, for I remember that morning, when mamma curled our hair she said she hadn't made me as many curls as usual, but you see you can't tell from the picture."

They duplicate each other so exactly that even the number of curls is the same every morning. The time they had the last picture taken was the one exception. Their mother always buys two of everything—two dresses, two hats, two pink hair ribbons.

### Handwriting Is Exactly Alike.

Probably the most remarkable and unusual thing about the twins is their handwriting.

*My name is Lucille, I am thirteen years old and am in the eighth grade. This is a specimen of my handwriting.*  
Lucille Barrett.

*My name is Camille, I am thirteen years old and am in the eighth grade. This is a specimen of my handwriting.*  
Camille Barrett.

**Experts Say No Two Persons Ever Write Alike. The Barrett Girls Seem to Have Proved the Exception.**

Scientists have said that although all physical attributes may be exactly duplicated between twins, the handwriting is never the same. This is due partly to the fact that no two characters are exactly the same, and writing is influenced by character, and partly to the different ways of holding pen or pencil.

In Clifford Howard's "Graphology" he says: "No two persons write exactly alike, notwithstanding that hundreds of thousands of us learned to write from the same copy-books."

And such authorities as Harris Godfrey and John Rexford say that it would be as difficult to find two handwritings that are

exactly similar as it would be to find two persons exactly alike.

So once again we see that these twins are remarkably alike, for they disprove even this rule of handwriting. It is impossible to distinguish the different writings of the two girls.

Specimens appear on this page and the casual observer can see no curve of difference, no twirl that is in one and not in the other, no distinguishing characteristic or stroke.

A short time ago they sent samples of their writing to an expert who thought a trick was being played on him and wrote back indignantly and superiorly that the hoax would not succeed, for he had recognized immediately that the two letters were written by the same person.

### They Like to Do the Same Things.

The tastes of the two girls are much the same. Both like swimming and skating and are proficient in these sports. Both are studying music and play and sing well. They both prefer the same songs, much to their mother's disappointment, for when she wants them to sing for company they both want to sing the same thing and the consequence is that there is only one song.

When the interviewer saw them they were having their music lesson—both sitting on the

**Now at 13, Who Can Tell Camille from Lucille?**

piano stool and practicing a duet. They wheeled simultaneously as the visitor entered and each brushed away a curly black lock from over her eyes with precisely the same gesture.

Their music teacher has known them for ten years and has been giving them lessons twice a week for three years. But she says she has no idea which is Lucille and which is Camille.

"And what do you want to be when you grow up?" they were asked.

"Dancers," they replied in one breath with the same intonation and inflection.

"Look!" cried Lucille.

"See!" echoed Camille—or maybe it was Lucille.

And they pirouetted across the room and then taking positions for the sword dance gave as spirited and graceful an exhibition as is seen on any stage.

"Now watch us," they cried.

And they did a buck and wing and then some double dances in which they moved as two parts of the same machine, so perfectly in time and rhythm were they, and so intuitively did they seem to fathom each other's thoughts and movements.

Although they play with other children, they keep mostly to themselves and are constant companions.

### One Fell Downstairs Because Other Did.

Their mother says that when they were little they wanted to have the same experiences, even to falling downstairs together. One time Lucille did fall downstairs and hurt herself and Camille felt so bad not to share her sister's pain that she calmly went up and fell down, too.

The twins have been separated only once since they were born. Then Lucille went to spend the night with her grandmother and both of the girls were so heart-broken and so really miserable that there was nothing to do but send Camille to her the next day.

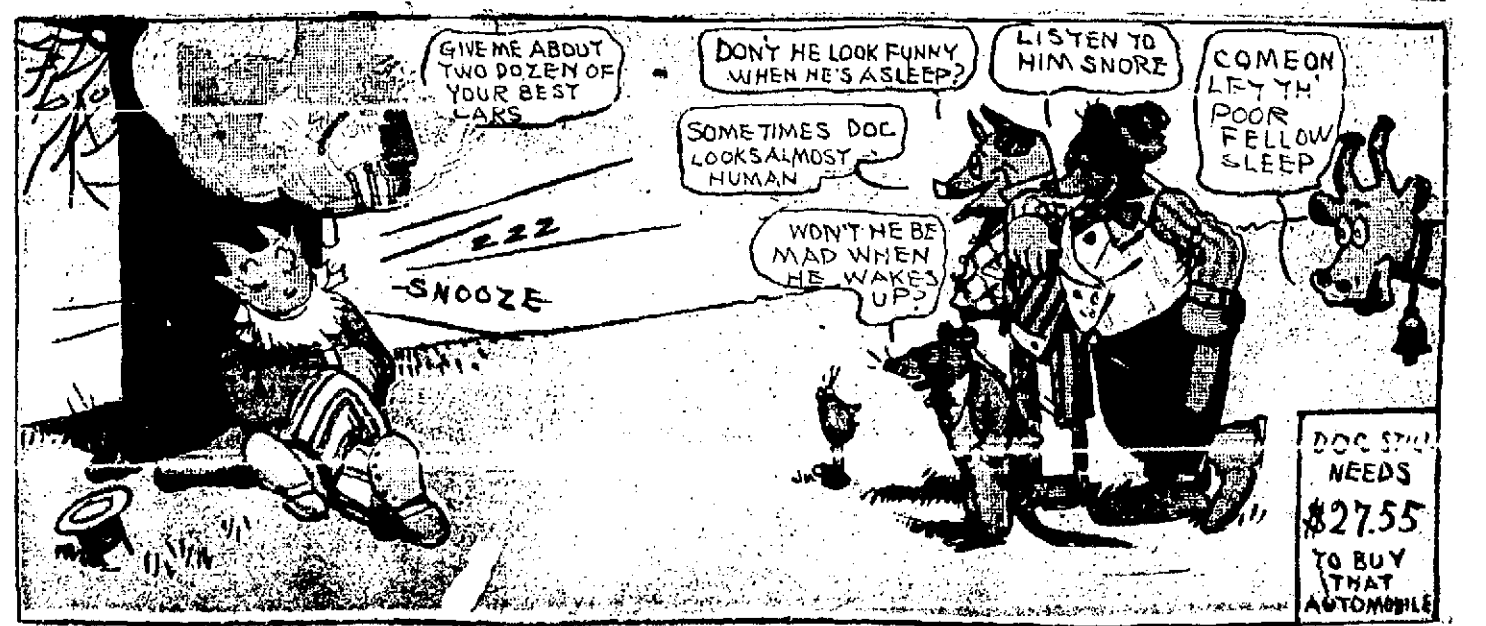

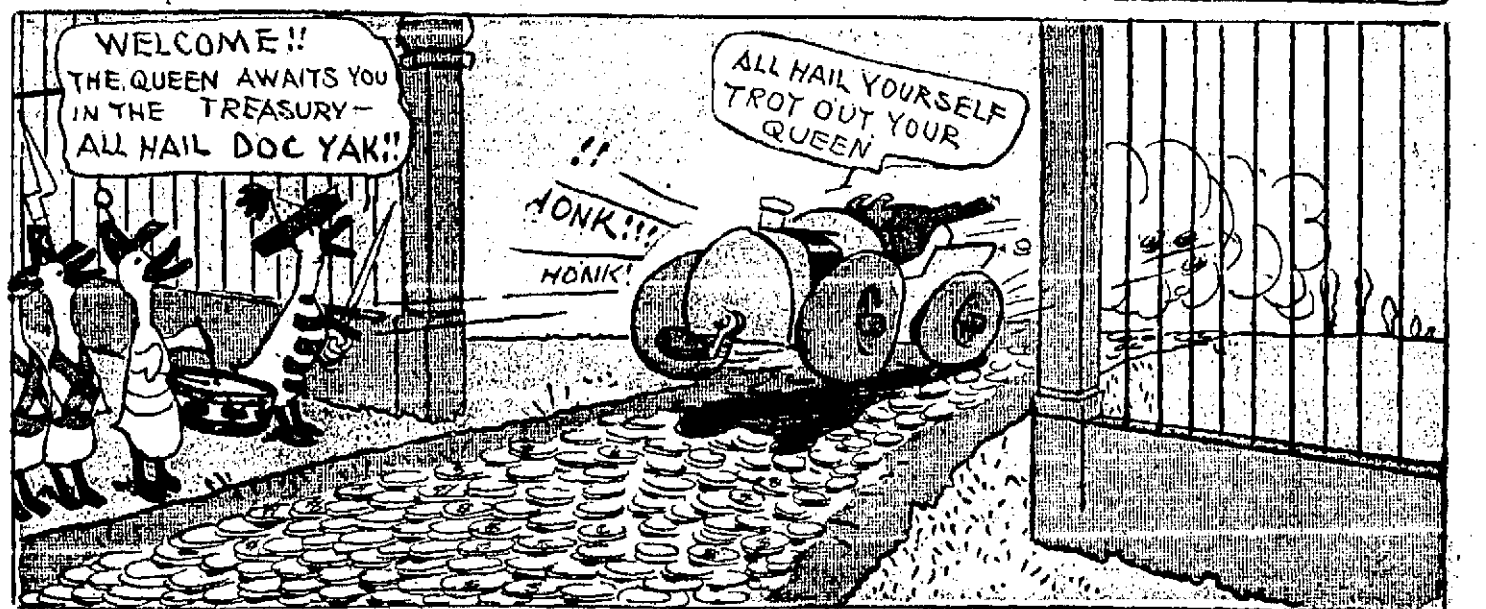

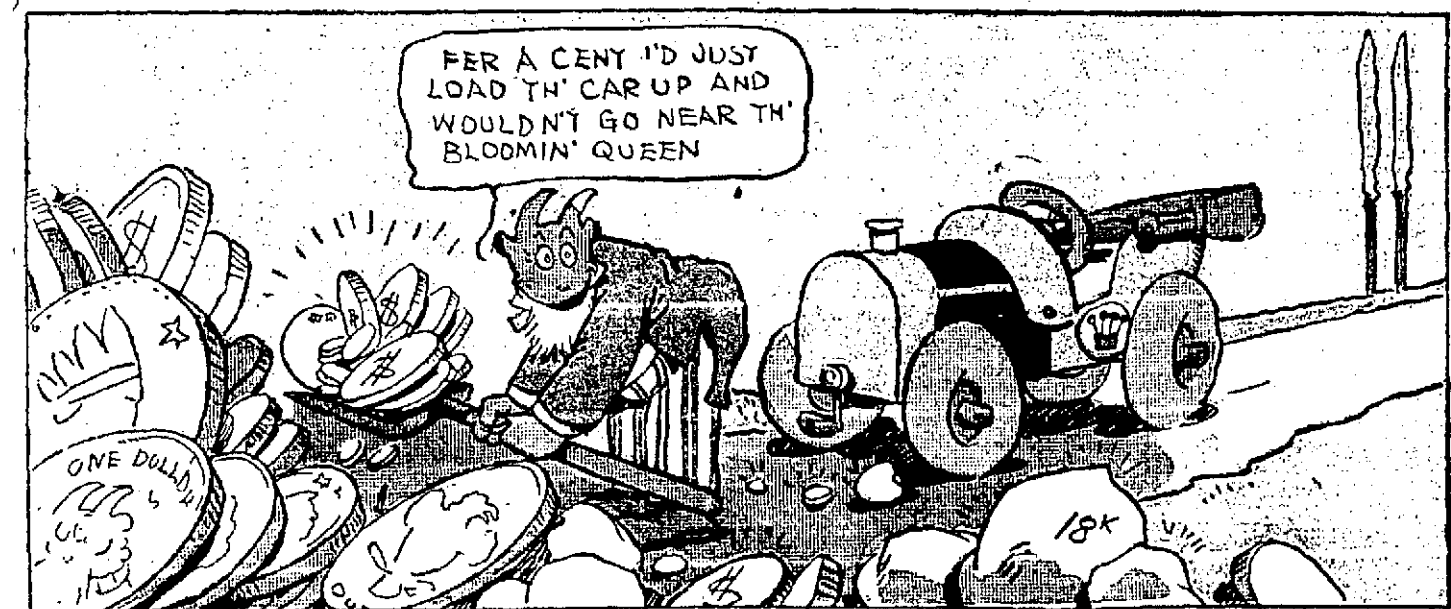

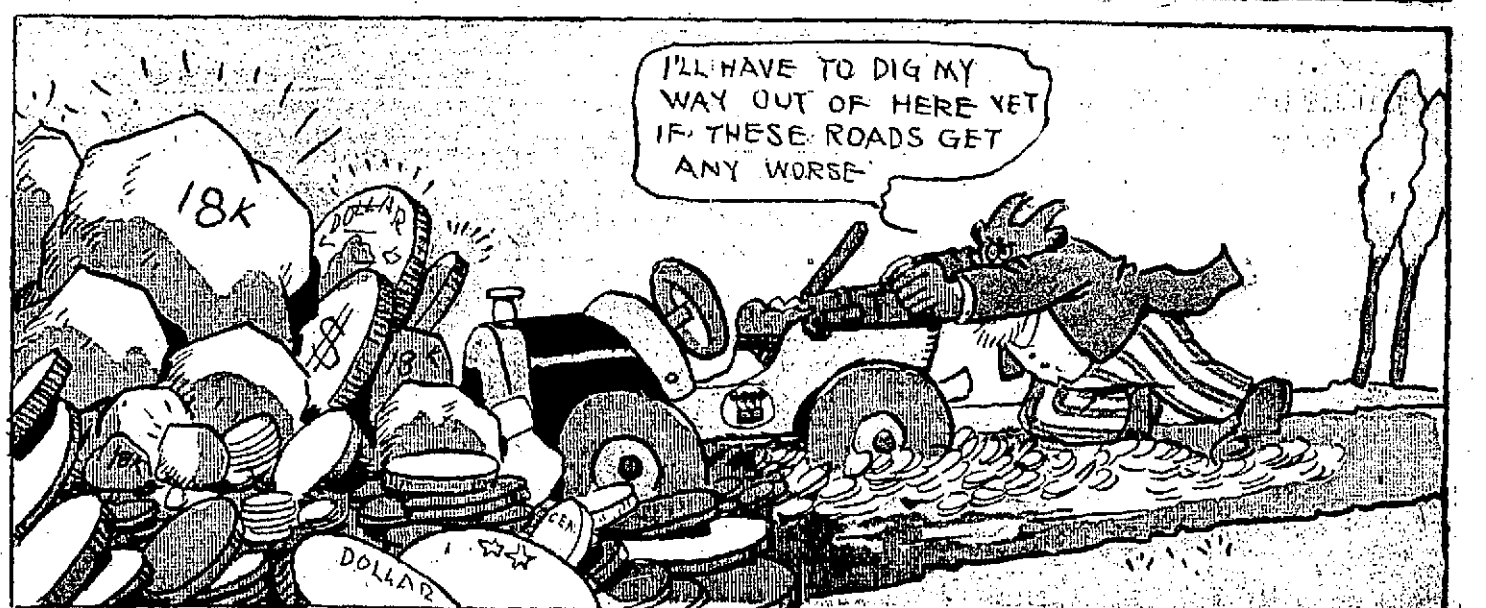

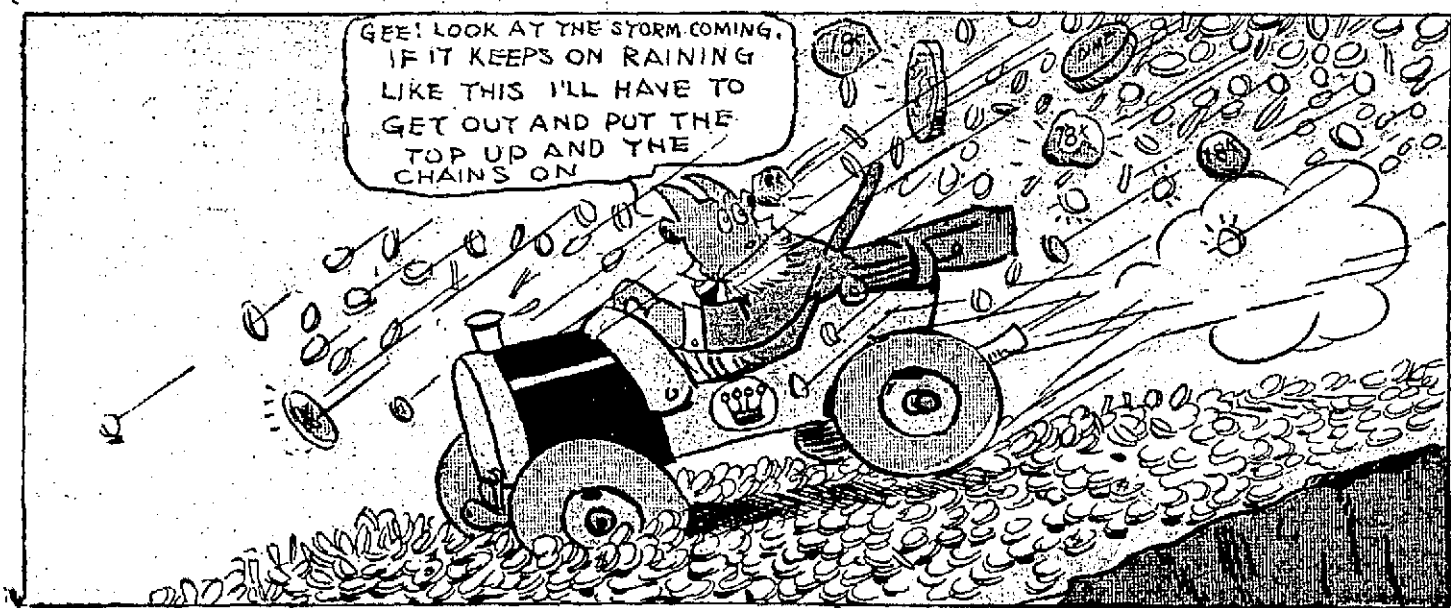

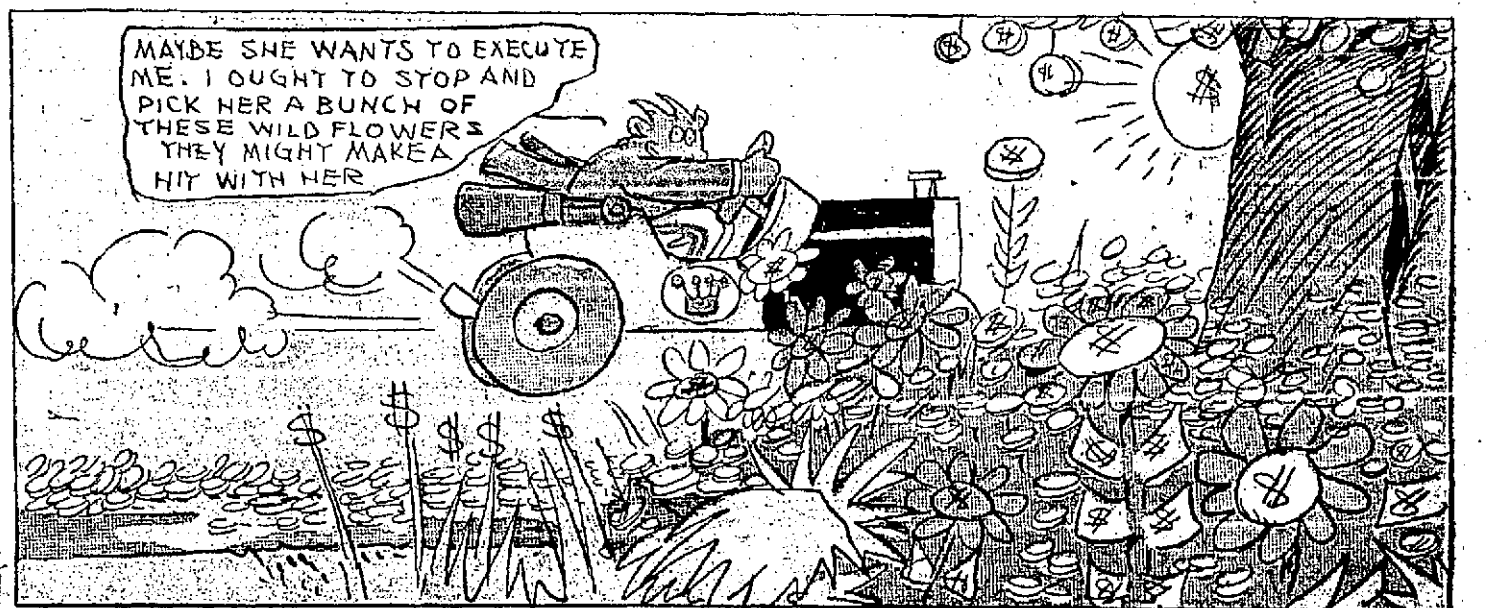

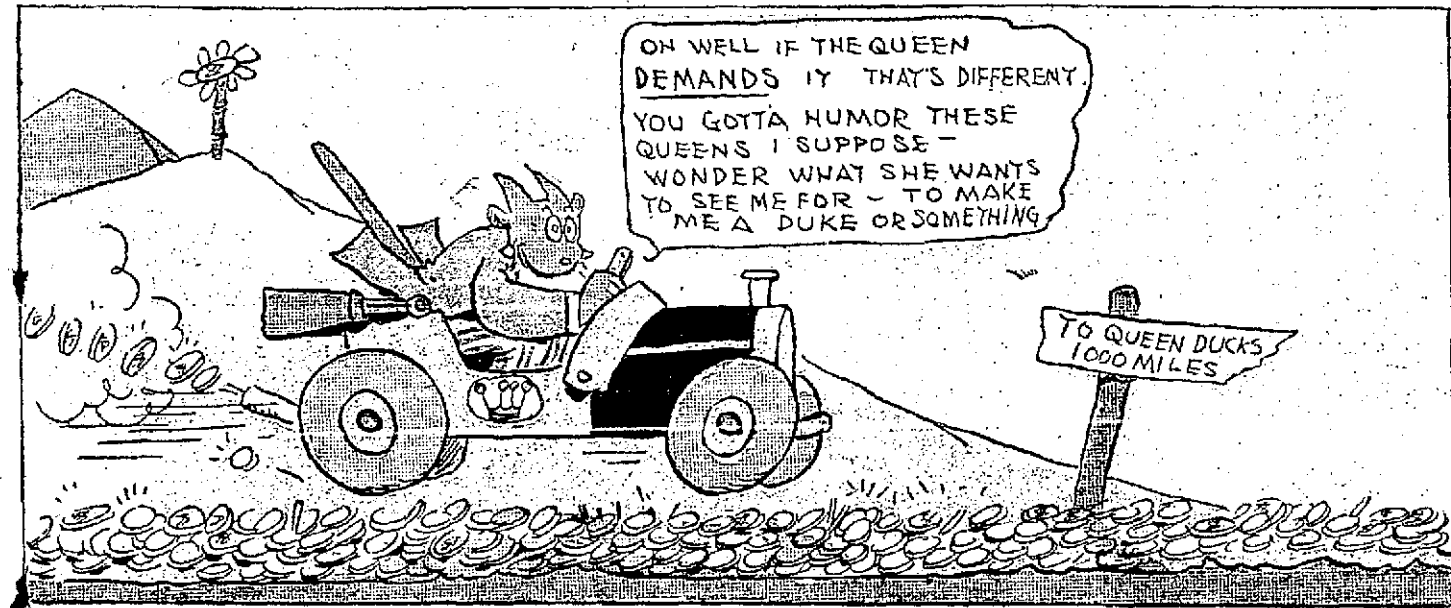

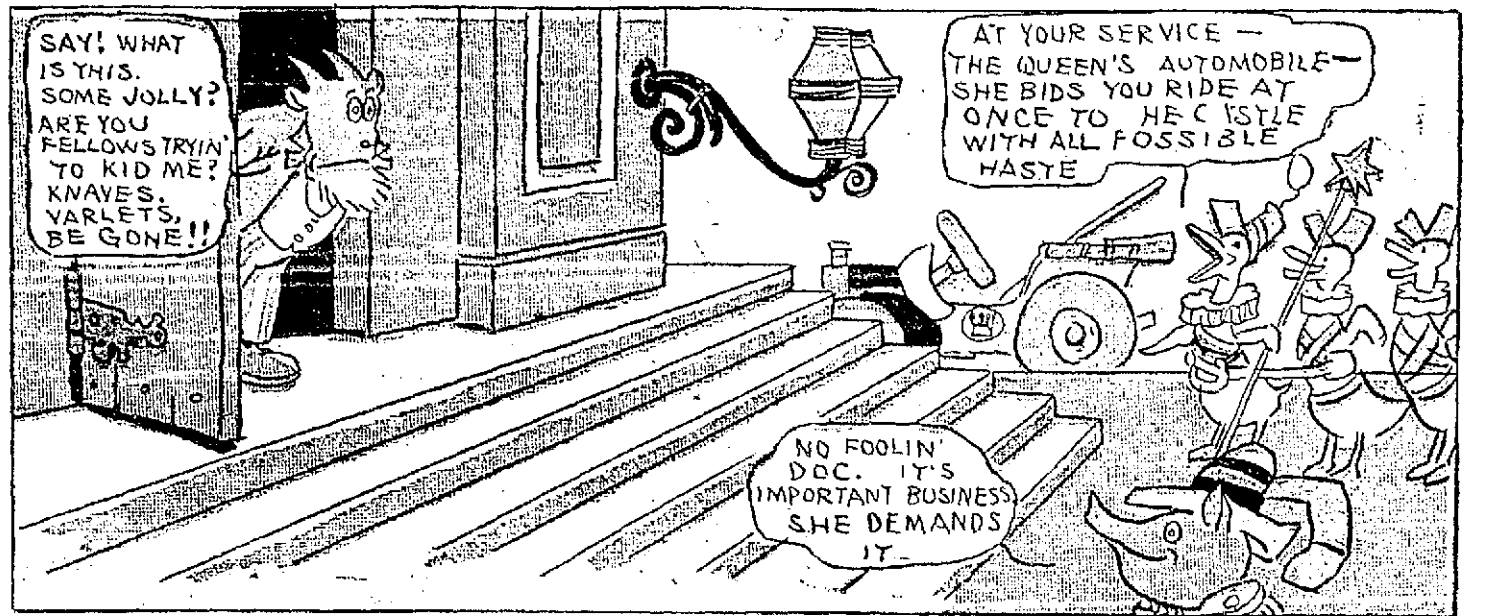

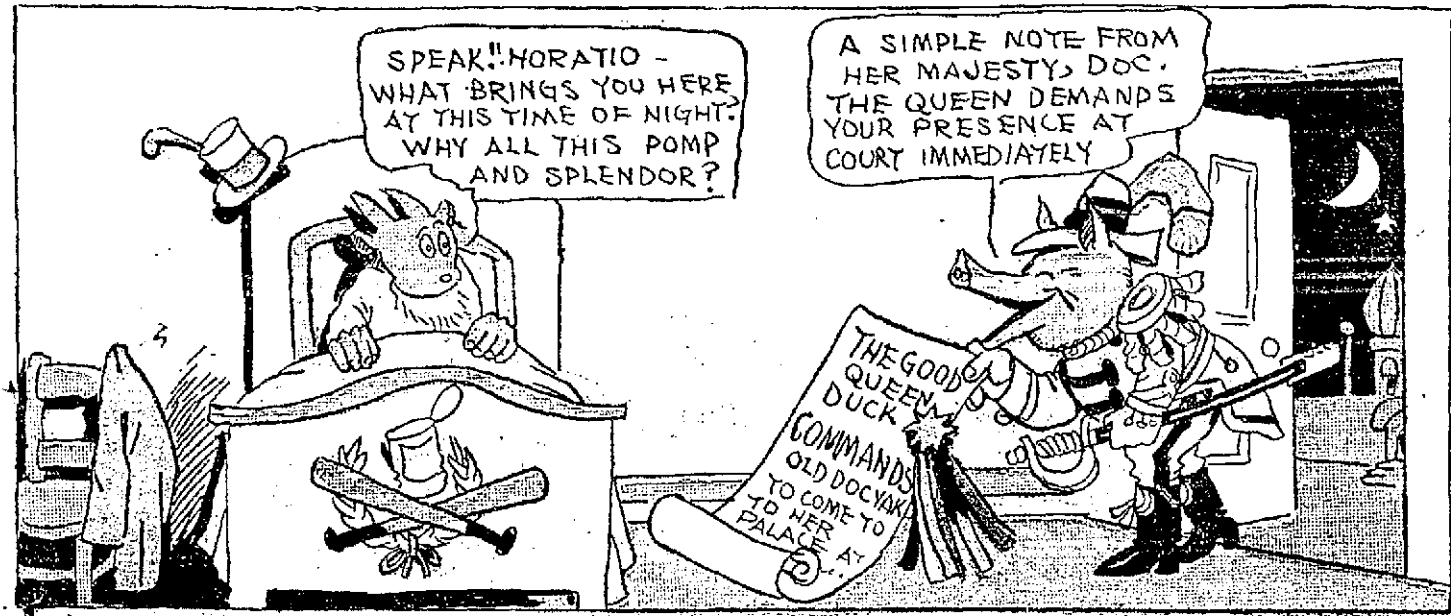

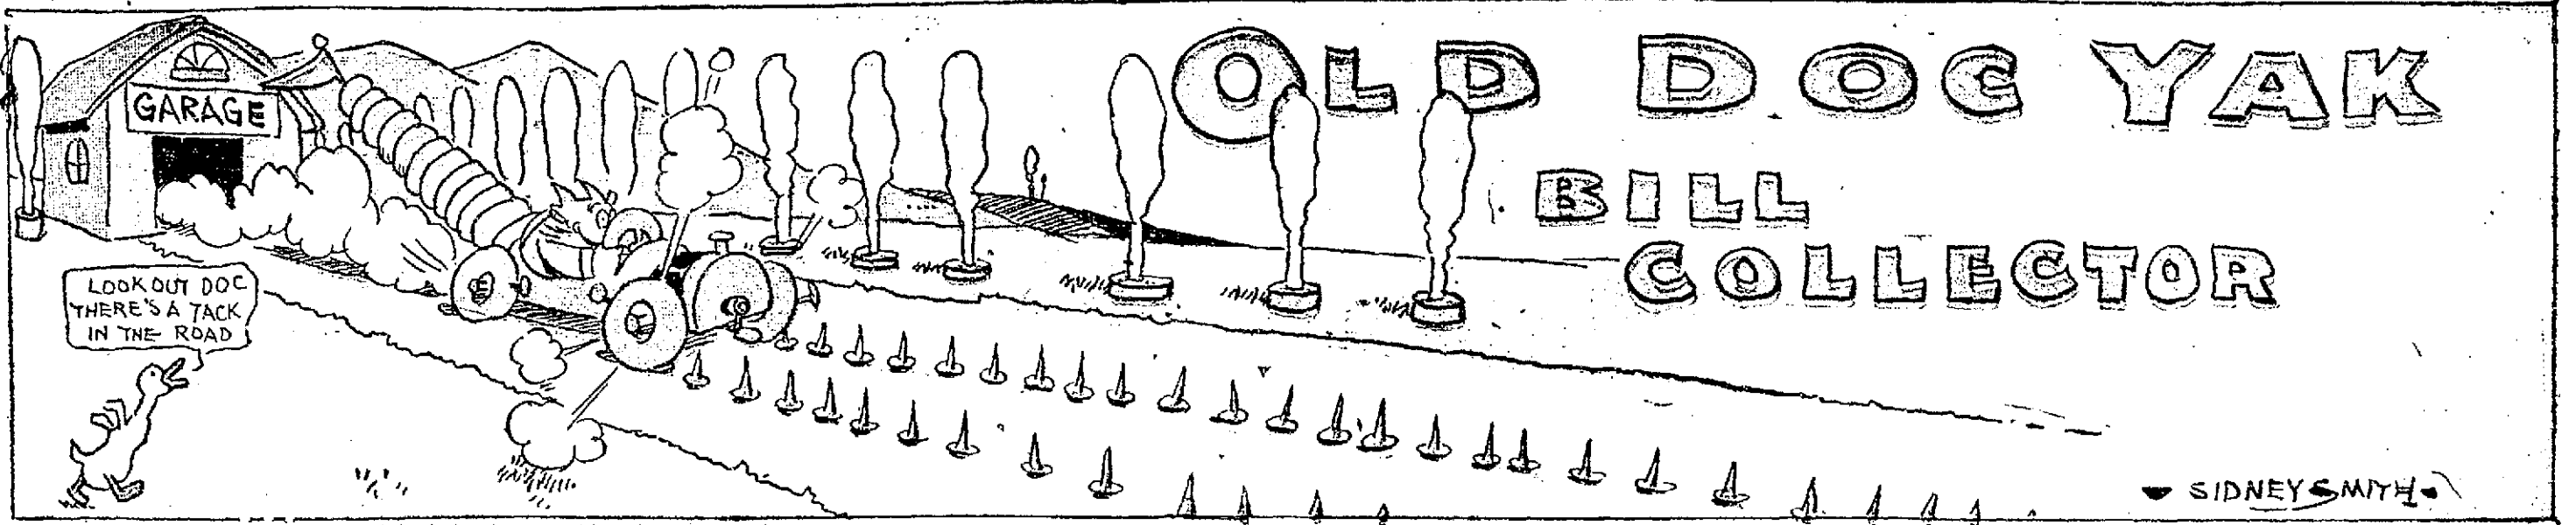

Since no one can distinguish the girls apart now, one wonders if the resemblance will be lengthened or weakened in the coming years, and looks forward to a series of communications when the reporter begins to visit the Barrett household.

If the girls enjoy fooling their parents and teachers, what rare fun they will have of a Sunday evening when Lucille pretends to Mr. Smith that she is Camille and Camille at the theater is answering Mr. Jones' questions directed at Lucille.

Wife of Salt Lake Banker Is Injured When Chauffeur Chases Bandit

Machine Strikes Bridge and Robber and Then Jumps Into River Bed

LOS ANGELES, March 29.—Mrs. C. A. Walker, wife of a millionaire banker of Salt Lake City, was perhaps fatally injured tonight when, in trying to run down a highwayman attempting to hold up an automobile party, the chauffeur, Robt. Smith, dashed his car into the end of the Tropic bridge on the Los Feliz road, hurling the woman twenty feet to the bottom of the river bed, at the same time that both bridge and machine were wrecked.

**BANDIT CAPTURED.**  
The bandit, grazed by the heavy car, picked himself up and tried to run away with a companion, but was soon overtaken by officers and sent to the Los Angeles city jail, where he gave the name of Charles Bell. Neither Walker nor Mr. and Mrs. R. E. Wells, who formed the remainder of the party, was injured in the least.

The machine was moving rapidly on approaching the Tropic bridge. When Smith, the chauffeur, saw the bandit step into the road, near the edge of the bridge, and brandish a revolver, he threw the throttle wide open and the automobile fairly leaped forward.

The bandit was hit and knocked down by the machine, which swerved and crashed into one end of the structure, tearing away thirty feet of the railing and coming to a stop only when it hung over the side of the bridge, apparently about to topple over with its occupants.

**WOMAN IS INJURED.**  
Mrs. Walker, who sat in the rear seat on the left side, was tossed clear over the heads of her companions to the bottom of the river bed. One of her arms and two of her ribs were broken and she sustained other injuries that make her recovery well nigh impossible.

She was conveyed to the Glendale sanitarium, where physicians are attending her.

**Hit by Train and Instantly Killed**

While on his way home last evening, G. Vercorini, a laborer in the Southern Pacific West Oakland yards, was struck by an eastbound local at Seventh and Cedar streets. He was hurled into the air and sustained injuries which caused his death almost instantly. The victim was unmarried and 35 years of age.

**'SON OF JIM' HILL JOINS POSTAL TELEGRAPH FIGHT**

Becomes Associated With Mackay and Bennett Against Western Union

SAN FRANCISCO, March 29.—Samuel Hill, millionaire telephone magnate and son-in-law of James F. Hill, has joined forces with the Mackay-Bennett cable and telephone people in their fight with Theodore Vail, president of the American Telephone and Telegraph Co., which controls the Western Union Telephone Co., and practically all of the Bell telephone system throughout the United States.

The vigorous attack made in the federal and state courts by the Mackay-Bennett forces against the Western Union and Bell Telephone are to be followed by a consolidation of the numerous independent telephone companies in the country with the Postal lines, similar to the recent consolidation of the American Telephone

and Telegraph Company with the Western Union. The plan of consolidation will extend as far west as Portland, where the independent concern, the Home Telephone company, is controlled by Samuel Hill. It will effect California also, but not so extensively as other sections of the West. For in San Francisco the southern part of the State the Bell people have anticipated such a move by absorbing the independent Home companies.

Samuel Hill, who makes no denial of his part in bringing on the present federal investigation of the Pacific Telephone and Telegraph Companies' business, after

## LAWMAKERS GUESTS OF OAKLAND

Party Will Inquire Into Liquor Situation Involving Claremont Motel

Legislators to View City From Top of New Municipal Building Today

A party of state legislators to the number of 108, will see Oakland from the top of the city hall this morning, and tour the city in automobiles as guests of Oakland.

Among the places they will visit is the site of the Claremont hotel, and the tourist of the caravan's position, both from a geographical standpoint with reference to the mile liquor limit of the University of California, and as a matter of justice, will be pointed out to them.

Many of the visitors have expressed a wish to visit the scene.

Sacramento has been flooded with literature which erroneously states that the request to sell liquor at the Claremont is nothing but an attempt to sell liquor within the university grounds and to the students, according to Wilbur Walker, secretary of the Merchants' Exchange, who returned from the capital yesterday.

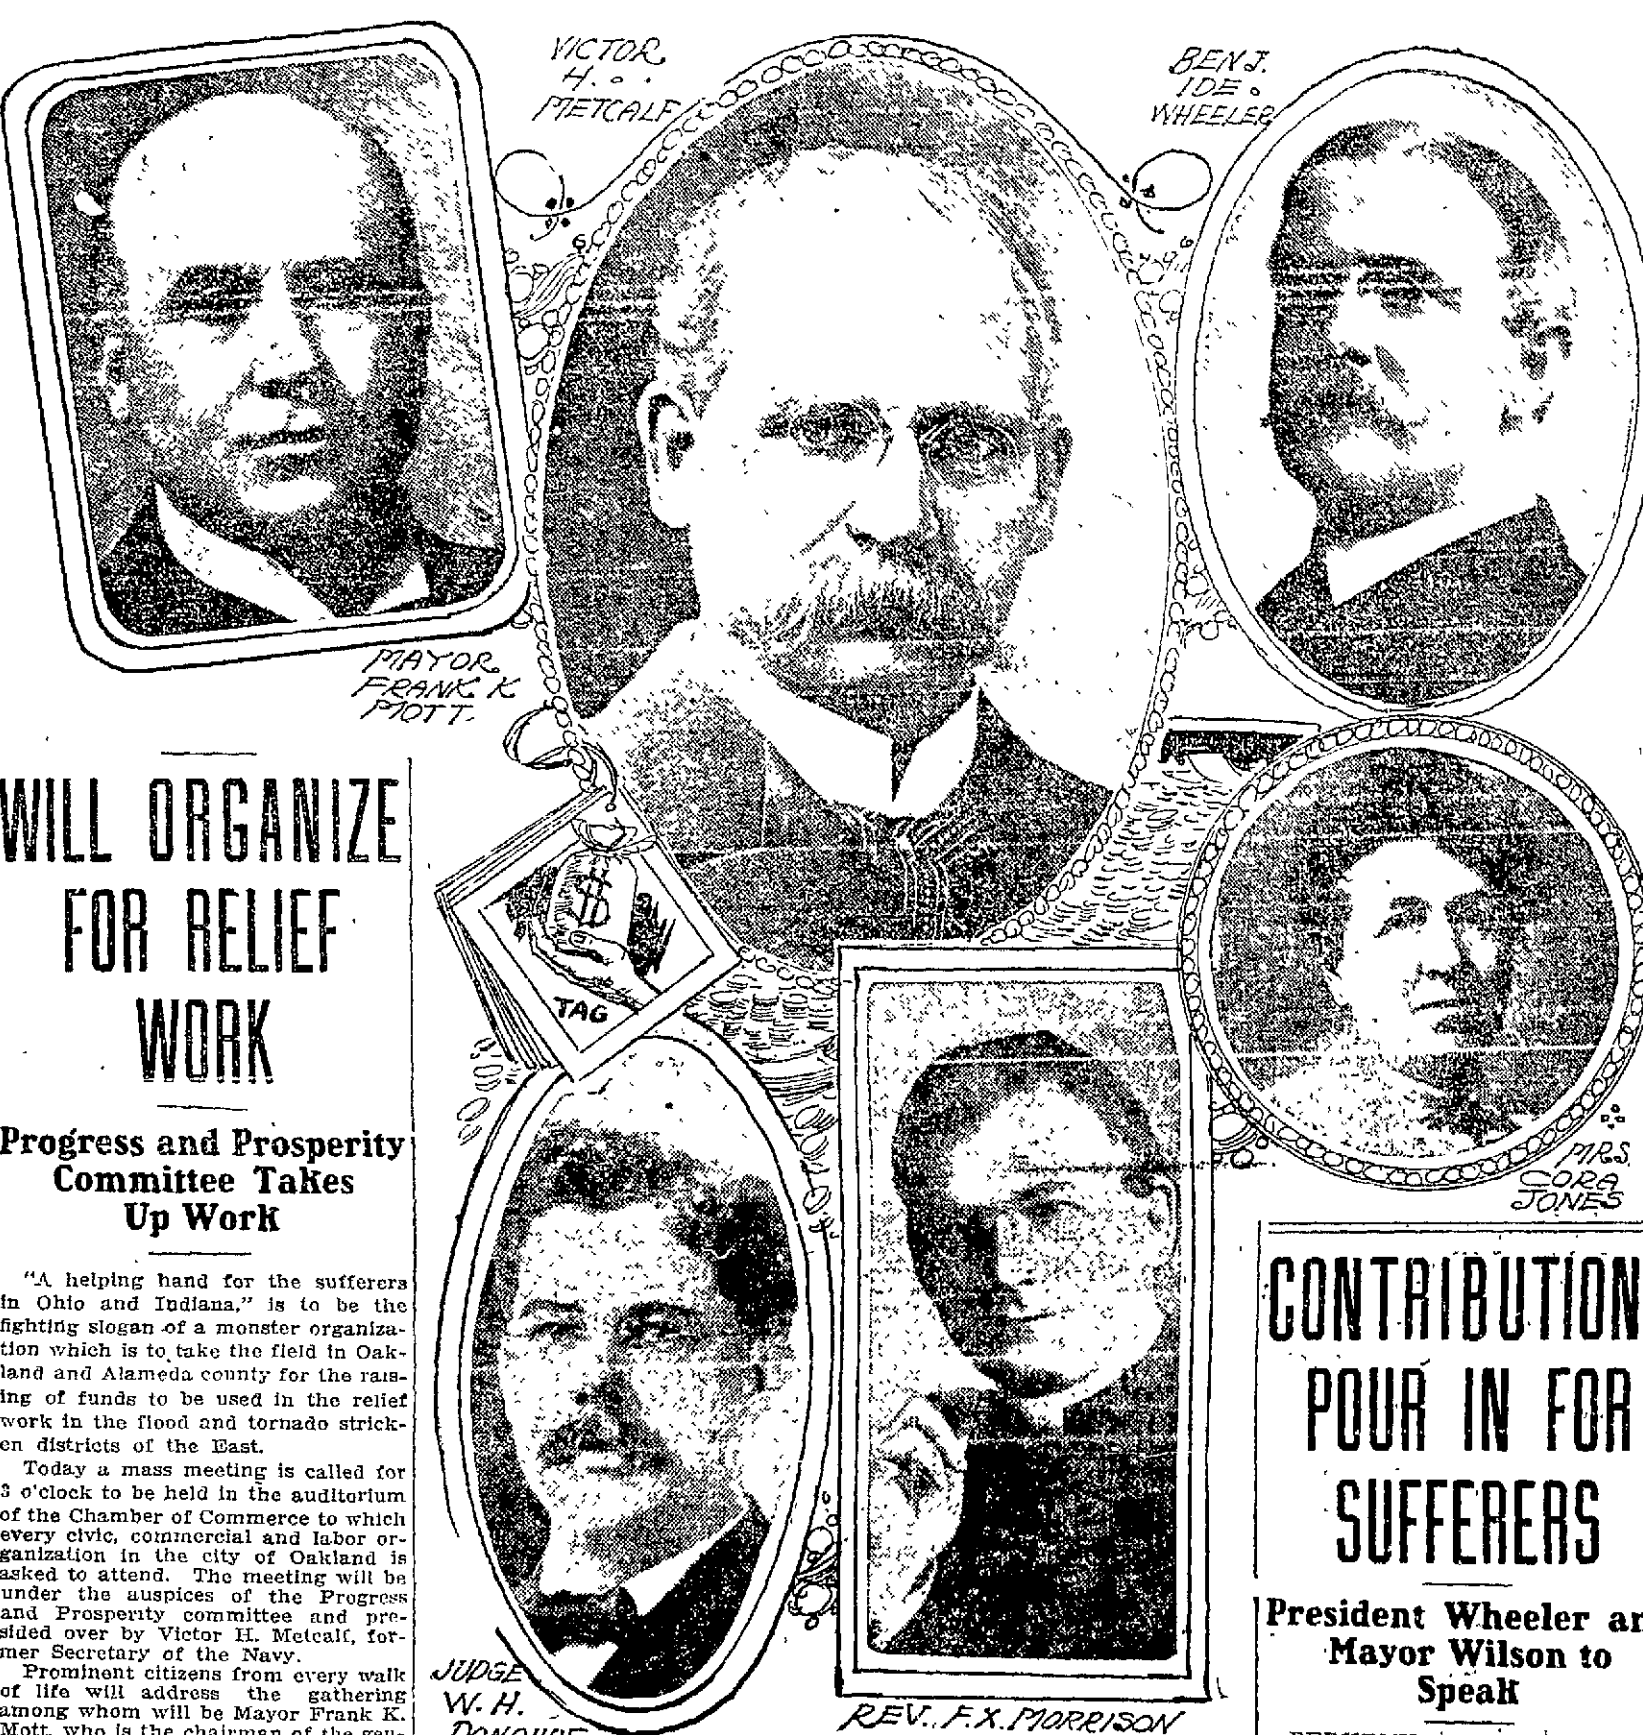

**TO SEE CITY FROM TOWER**

At 10:30 o'clock this morning the party will be taken first to the city hall in the twenty-five automobiles which have been placed at the disposal of the entertainment committee. The elevators will be kept running and Commissioner Harry S. Anderson will act as personal escort.

A return to the Hotel Oakland will be made at noon and in the afternoon Frank C. Haven will entertain the party at his Piedmont residence. Last night the legislative party was made to feel at home after having put in a strenuous day in San Francisco. They were welcomed by the committee made up of Edward F. Miller, A. A. Denison, Theodore Gies and Senators Hans and Breed of the Alameda county delegation.

Among the senators, assemblymen and attaches who are Oakland's guests are: Senator John L. Avey of Redlands, Assemblyman J. E. Cram, Assemblyman W. H. Wisco of Sacramento, T. J. King of Sacramento, Assemblyman R. B. Green of Sacramento, L. E. and Mrs. Mulroy of Los Gatos, Assemblyman and Mrs. J. W. Stuenkel of Acampo, Assemblyman J. A. Murray and wife of Woodland, J. F. Baker and wife, Newton M. Allen, Sacramento, J. E. Hallahan, Senator and Mrs. William R. Flint, Senator P. C. Cahn, Assemblyman and Mrs. E. O. Hinkle of San Diego, Assemblyman and Mrs. J. D. Nolan of San Francisco, Assemblyman William E. Gubler, wife and daughter, Assemblyman H. C. Bagby, Santa Maria, Assemblyman and Mrs. W. A. Roberts of Los Angeles, Assemblyman L. L. Bennett of San Jose, Assemblyman William E. Brown, Bert Hastings of Los Angeles, Assemblyman Alfred Morgenstern of Alameda, Los Angeles, Assemblyman and Mrs. George A. Clark, Assemblyman E. A. Emmons of Los Angeles, Assemblyman and Mrs. H. A. Pearls and wife of Los Angeles, Senator Pleasant D. Cogswell, Assemblyman and Mrs. H. A. Fisher, Assemblyman and Mrs. William H. Johnson of San Bernardino, Assemblyman and Mrs. William H. Johnson, Assemblyman and Mrs. William H. Johnson.

RELIEF WORKERS HOLD MASS-MEETING TODAY  
BERKELEYANS WILL MEET IN GREEK THEATER

Prominent persons who will take part in the Oakland and Berkeley relief meetings.

Bomb-Maker Confesses  
Awful Crimes on Deathbed

NEW YORK, March 29.—Henry Klotz, suspected of having made and sent several of the bombs that have mystified the metropolitan police for more than a year, died today in the Fordham hospital of injuries received in a work shop when a bomb on which he was working exploded. A few minutes before he died Klotz confessed that he had sent the bomb that killed Helen Taylor and Mrs. Madeline Herrera, February 3, 1912, and also the one that was delivered to Judge Rosinsky's apartment March 6, 1912. Klotz was taken to the hospital near a week ago, seriously wounded internally by fragments of a bomb of his own manufacture. It was found necessary to operate in order to clear his lungs, which were terribly mangled by the explosion. Although he knew that there was little chance of his recovery the man stolidly refused to confess to the crimes of which he was suspected until a few minutes before his death today. Then he told the police that he had mailed the bomb which Judge Rosinsky escaped only through his caution in having it examined by the fire department. A few moments later Klotz confessed to sending the other bomb. "I did send the bomb to Helen Taylor," he whispered, "but I didn't intend to kill her. I was after someone else."

## Operation for Kleptomania Proves to Be Unsuccessful

LOS ANGELES, March 29.—Mrs. Jean Thurnher, 23 years old, who, after serving a sentence in San Quentin for burglaries committed in San Francisco, Oakland and Berkeley, was operated on in Berkeley for kleptomania by Dr. H. N. Rowell in May, 1911, was pronounced cured, is again in the folds. The woman was taken from her sick husband's bedside at 215 West avenue today by detectives and placed in the city jail charged with stealing diamonds from three jewelry stores in Pasadena. Several months ago Mrs. Thurnher's husband lost his position with the Southern Pacific, became sick and the doctors told his young wife an expensive operation was necessary to save his life. The last of their savings were given and the operation proved unsuccessful. It was then, according to a statement made by the woman to the police, that the old mania to steal returned to her.

Mrs. Thurnher, before her marriage, led an adventurous life as a "tramp" and cowgirl.

Crawls Through Sewer  
And Escapes From Prison

LEAVENWORTH, Kas., March 29.—Clyde Stratton, serving a five-year sentence in the federal prison at Fort Leavenworth for the robbery of the McColton, Indiana, postoffice, escaped today by crawling a mile through the sewer system. The other prisoners who made the attempt with him were captured. The captured men were overcome by sewer gas and were pulled out of the sewer unconscious. When revived they declared Stratton had escaped. Stratton, a college graduate, was taken in a raid in Chicago following the murder of a banker there, but was not formally connected with that crime.

## GRIM LAW HOLDS AT DAYTON

Negro Caught With Woman's Hand Ablaze With Jewels in His Pocket

Magazine Writer Calls Recessional of Flood Waters a Gloria in Excelsis

(By SAM W. SMALL JR.)

DAYTON, Ohio, March 29.—The recession of the flood waters is a gloria in excelsis for deliverance from a long night of terror and a requiem for the unnumbered dead. The city has risen again from the angry sea of muddy waters that half buried it and threatened to overwhelm and obliterate it.

Starvation's grim spectre has vanished. Fire has been fought and conquered. The hideous hand of the ghoul has been stayed by the bullet. The fear of plague is diminishing behind the fighting force that has come into power. Dayton works mourning her dead.

Last night the dark and silent city slept for the first time since the tiny rivulets trickled over the levee Tuesday morning with the Judas kiss that betrayed the city into a scourging by the elements that brought into play every force of nature that could be directed against human life, wealth and happiness. The thousands of men, women and children, imprisoned in the upper floors of their homes, who had watched wide-eyed through stormy days and black nights the struggle of the currents and had waited the shock that would toss them to the mercy of the torrent, were lulled into sleep of exhaustion by the murmuring of the departing waters.

**CITY OF SHADOWS.**  
When I arrived in the night on a relief train that had fought its way through dangers and delays, I found a city of shadows and mysteries. A row of gasoline lamps flared like signal fires along the gulf of the town, lighting the posts and sentries peering with bayoneted and loaded rifles and throwing into the night a little city of tents that had sprung up like mushrooms on the lawns of darkened homes. Behind the lights the veil of night was so closely drawn that not a spark glowed through its meshes.

The wind seemed to carry the whispering of the waters still holding secret the crimes of the flood.

The military lines held up against who would enter and could not show a pass, the commanders and 800 men who had worked, fought and died for a place on the overburdened train hurried themselves vainly against the thin khaki line, pleading to risk a sentry's bullet. They plunged into the flood to still anxiety and learn at least the fate of wives, children and mothers at home. But orders prevailed and those in the city slept in their dark and silent houses while those who had come to them in doubt and prayer paced the night through at the sentry lines. With the morning they were allowed to pass.

**THE DARKENED HOUSES.**  
A pilot in a silent motor car wound his way through the streets which had cleared of water and past the long rows of darkened houses. Now and then a sliver of light cut the darkness of the slinky streets. A lamp in a window was set as a beacon light to cheer someone who would be coming in answer to the silent call.

Questions were useless. The waters had encompassed the city. And then the time came, followed by storm and flood to still anxiety and learn at least the fate of wives, children and mothers at home. But orders prevailed and those in the city slept in their dark and silent houses while those who had come to them in doubt and prayer paced the night through at the sentry lines. With the morning they were allowed to pass.

Among the schools and organizations that have already donated funds are the following: Chamber of Commerce, \$500; high school students, \$252.69; Oxford school children, \$25.19; Jefferson Mothers' Club, \$10; Longfellow Mothers' Club, \$10; O. O. F. Lodge No. 270, \$10; Carpenters' Union, local No. 1406, \$25; Berkeley parish, No. 210, N. S. G. W., \$25; Berkeley party of Eagles No. 1428, \$25.

(Con. on Page 18, Cols. 1-2)

# THOUSANDS FLEE FROM FLOODED VALLEYS

## FLOOD GHOULS SUMMARILY EXECUTED BY SOLDIERS

Work of Cleansing City Goes Forward and Valuables Protected by Biting Line

(Continued From Page 17)

path of light that capped the low hill at the south of the city. Here buildings that covered acres towered in the air, and showed thousands of windows aglow. It was the plant of the National Cash Register Company, and the heart in sympathy with the action of the veiled and silent city. It was untouched by flood and rain, suffering from fire. It had given to the outside world the only news from the helpless city and had quickened the city that brought an answer before the call had come out for help. Women and children who had been rescued from their homes were housed and fed. Every cry had been answered and all in their power had been done to bring relief. Nurses and doctors had established their quarters and were ready for all demands.

**PRESIDENT DIRECTS WORK.** John H. Patterson, president of the company, had directed the work and had brought through relief trains, counting only on the possibilities and not the proven need. When morning dawned today the toll of the flood in the city was measured. The count of the dead has not been made and may never be known. Ninety bodies have been recovered. The total of dead may not exceed 200. Four hundred is an estimate. That number should account for all of this city who perished.

There is no want. The injured and sick are not as many as the dead. There is food in plenty for all and supplies are coming. The necessities of the days and nights of dread are over or have given way to grief for the dead. The property loss is great and will fall hard upon thousands who have lost practically their all. Hundreds of small homes have been swept away or lie in ruins. Thousands of families have suffered the loss of furniture and effects. The loss is distributed in small lots, but the total is great. The fire and flood in the business section has cost millions of dollars, but this is not counted against the suffering and deprivations of the people of the small homes which find themselves facing a new start in life.

**MARTIAL LAW HOLDS.** Tonight the city is again under martial law. Again there is darkness, relieved only by the flares of lanterns and of military camps and lines. The curfew rang at 6 o'clock and persons without emergency passes issued under the strictest rules are not allowed on the streets. The crack of the rifle has been heard and the lesson has gone home. There are few prowlers upon the streets.

Seven men, judged on the instant as looters, have been shot down by the soldiers. Fifty, mostly negroes, have been caught as thieves and are in the county jail. Wealth in money, jewels and securities lies within reach but for the biting line of the sentry's bullet.

One negro was searched by a sentry. A woman's hand severed at the wrist was found in his pocket. The fingers on the hand were ablaze with jewels. The sentry stepped back a few paces and the negro dead. His body was tossed into the Miami canal.

Two other negroes were found to be wearing suits of stolen clothing. They were shot instantly. Four others caught as looters paid the same penalty for their crimes. One of the men held in the jail as a looter is Walter Bishop, an ex-policeman. He was beaten with rifles, but his life was spared.

Secretary of War Garrison. Major.

General Wood, Major-General Thomas Rhoades, military aide to President Wilson, and Surgeon-General Rupert Blue, reached Dayton today. They came by motor car from Cincinnati. They found conditions in much better shape than expected. The city will be divided into sanitary districts and given a thorough, scientific cleaning. It is believed that all danger of plague or epidemic will be averted.

There will be need of funds to rehabilitate the thousands of sufferers from the floods, not only in Dayton, but in other parts of the state where lives, homes and property were destroyed. The relief committee has been formed and will draw such funds as may be needed from money generously subscribed throughout the country.

### List of Identified Flood Victims Grows

The following is the additional list of identified dead in the Dayton flood:

GEORGE RICHARDSON of the State Employment Bureau.  
GEORGE SNYDER and wife.  
MRS. HAWKES and daughter.  
JOHN RITZ.  
MRS. ABEL.  
MRS. YOUTS.  
INEZ MASON, aged 4.  
B. F. QUINLAN.  
MRS. BIDDIE BRUELL.  
MRS. OLIVER KNEE.  
KENNETH LYNN, 10 years.  
MYRON LYNN, 8 years.  
MRS. BELLE.  
MRS. MARY GRIFFIN.  
MRS. LANNER (identity uncertain).

MRS. STRICKLER.  
SARAH SORELLA.  
JOHN ANDREW DEISS, 13 years.  
JAMES OROTHERS.  
MRS. SHIPLEY.  
MRS. THOMAS WRIGHT.  
MRS. MARY KEYES, died from exposure.  
MRS. MAMIE CRAMER.  
Identified at Peru, Ind.:  
CHARLES SAND, drowned in rescue work.

MRS. ROSE STEITLER and possibly her two daughters.  
FRANK E. MILLER.  
MELVINE STESKY.  
THOMAS MCGURDY.  
ORVILLE HAAGLAND.  
WILLIAM BUTLER.  
LEWIS HARTROAD.  
THOMAS P. PROPECK.  
ELBERT HILERS.  
CLINTON STEITLER.  
DANIEL VANDER.  
FRED W. BENDER.  
CHARLES E. DOUGLAS.  
REX MAYES.  
BESSIE LOVETT, daughter of Thomas Lovett.  
MRS. JAMES HOSMAN.  
KEILLOGG.  
FRIENDS.  
BERT SMITH, drowned in boat during rescue work.  
MRS. FRANCES STRUMM, wife of a physician.  
DELAUGHT FIELDS.  
ALBERT SMALL.

### Water Receding, Says Zanesville Operator

TOLEDO, O., March 29.—A telephone report from Mrs. Arline Barnett, a telephone operator of Zanesville, tonight says the water is falling.

## INDIANA GOVERNOR SAYS STATE LOST \$100,000,000

[By SAMUEL RALSTON, GOVERNOR OF INDIANA.]

INDIANAPOLIS, March 29.—It is impossible for me to give an approximate estimate of the property loss in this state. From present indications it may reach \$50,000,000 and might even go as high as \$100,000,000. We need all kinds of supplies and money. Transportation is paralyzed except on roads running out of Anderson and Richmond. The wind and intense cold are causing severe suffering and I fear the loss of life will be great.

The towns along the lower Wabash have not seen the crest of the flood. The worst conditions existing, in order, are in the following cities: Indianapolis, Peru, Terre Haute, Brookville, Kokomo, Richmond, Logansport, Marion, Anderson and Muncie.

## Human Interest Items From Ohio

Because they were caught overrunning a number of farmers and merchants at Zanesville today suffered the loss of their goods through confiscation by the militia.

### REFUSED TO FLEE, THREE WERE DROWNED.

Simultaneously with the identification of three flood victims, an aged woman and a married couple, at Columbus today, came the story of how Wilbur Morris, living at 381 Glenwood avenue, first fled from the house-sweeping waters to the hilltop, then waded back, waist-deep, through the swift current and unsuccessfully begged Mr. and Mrs. Walter C. Howland, and Miss Corolla Caragher, aged 74, to desert their home.

They stoutly insisted that they were provisioned for a siege and that they were not afraid. All three were drowned.

### AGED MAN FOUND IN A DYING CONDITION.

When a semi-conscious man, 70 years old, was found today dying from illness and exposure in a house on the flood-afflicted west side of Columbus. No one was found who could identify him and he was taken to an insane asylum.

### FIFTY-TWO PEOPLE RESCUED FROM STORE.

Fifty-two persons today were taken out of a west side drug store at Columbus, where they had been mar-

receding there and the death list likely will not reach 100.

"Things are much better in Zanesville," she said. "Relief has come to us from outside so that most of our troubles seem about over."

"The water has gone out so far that two more squares are clear. Many lives are reported lost in Putnam along the river since rescue almost like a holiday will today. The relief is so great. But these rejoice have lost only money and homes, not their lives or their children.

The fires are all out now. They did a lot of damage while they lasted."

According to a statement of a Toledo traveling man caught in the flood at Zanesville, who reached this city last night, the meagre stories regarding the devastation caused by the overflow of the Muskingum River have not been in the least exaggerated.

In fact not half the story of suffering, loss of life and property has been told, he said.

**CITY UNDER WATER.** The entire city, with the exception of the bluffs, where are located the homes of the wealthy, is under water. Water is from 8 to 12 feet deep all through the business section of the city and stores and houses of goods and all kinds of merchandise are floating away. Many of the merchants face financial ruin.

The first word from Youngstown, Ohio, since the flood, reached here tonight. It stated that the water is rapidly receding and that the city water works is expected to be in operation by Sunday night. No loss of life was recorded there, but the property damage will be close to a million.

A vast improvement in the flood situation in Northwestern Ohio was indicated on all sides this afternoon. The flood sufferers at Fremont, Tiffin, Napoleon, Defiance, Ottawa and surrounding points northward, where clothing and fuel and troops are on guard in all of the stricken cities to prevent looting and to rescue marooned flood victims.

Telegraph and telephone communication throughout the state was being rapidly restored. Railroads, which have been tied up by wash-outs and ruined bridges, are rapidly bringing their roads back to normal condition. Interurban electric lines are all running on scheduled time.

At Tiffin state troops have stopped all looting. The loss of life, Major Keppel of the Ohio National Guard said would not exceed thirty people. The water is receding slowly. Forty houses in Mechanicsville, a farming-man's suburb of Tiffin, were destroyed but no lives were lost.

From Mayor Staussmeyer of Fremont, came information that members of Company K, Sixth regiment, had been on duty since last Monday. Battery B, from Troy, arrived today and now is in control of the situation. The water is receding. The loss of life, the Mayor said, would probably not exceed six people.

The Mayor of Findlay telephoned that everything was well in hand, that no supplies were needed and only one life had been lost.

The Mayor of Napoleon telephoned that the water had receded. He said 100 houses had been flooded with the loss of \$100,000.

At Defiance the waters have receded. Company M, of the Sixth regiment has the situation well in hand and will remain on duty indefinitely.

From Ottawa, Major G. W. Smith telephoned that the situation was well in hand, that Company M, of the Second Infantry would be able to report for duty at any other point in Ohio some time today.

In all of these cities there was food clothing and fuel and the loss of the flood victims were suffering.

### 12 Bodies Recovered From Piqua Flood

PIQUA, O., March 29.—Three more bodies of flood victims were found here today, making a total of twelve recovered. The work is slow but it is thought that the death list will not reach the total of 50 which previous estimates had placed as the maximum.

General conditions improved materially as the water subsided.

## OAKLAND BEGINS RELIEF CAMPAIGN

### Big Mass Meeting Held Today to Launch Helping Hand Program.

(Continued From Page 17)

have the words, "A Helping Hand for the Sufferers in Ohio and Indiana."

This plan is believed to be the most plausible and efficient method of soliciting funds and has been enthusiastically endorsed by the members of the general committee which has its headquarters in the office of James P. Eddowes, room 508 of the Oakland Bank of Savings Building.

**HEADQUARTERS ESTABLISHED.** Headquarters of the Flood Day organization will be in the office of L. Richardson, general agent of the Southern Pacific, at the corner of Thirteenth and Broadway. Banners will be spread at the headquarters and the greatest publicity given the work.

Six choice boxes of the Macdonough theater were donated to the relief fund today by the "Little Miss Brown" company which is to appear there this week. The boxes represent six seats each and will be auctioned at the meeting today.

The committee on speakers appointed for today's meeting were L. A. Hearin and E. F. Garrison. On a telephone committee which endeavored in a short time to reach the societies and organizations of the city were: J. C. Cole, T. I. Casey, J. H. Chambers, J. C. McKillop and R. H. Adams.

**WOULD SHIP POTATOES.** J. H. Chambers, who is active on the committee, worked in Omaha during the raising of funds at the time of the 1908 disaster. He has a residence in Omaha which was completely ruined and which will be a total loss, having had it insured against everything except tornadoes.

It has been suggested by W. E. Stevens of Berkeley that a train of potatoes could be shipped East with a short time as that commodity is selling at 30 cents a bushel today. This, as well as other suggestions, will be given consideration by the meeting today.

**ADDITIONAL DONORS.** Additional donations received by Treasurer Eddowes at the office of the general committee today were from the following:

Teachers Intermediate School	\$20.00
Kahn Bros. Mutual Benefit Assn	25.00
John Aubrey Innes	5.00
Emp. of City Treasury Dept.	16.00
H. C. Brouther	5.00
S. T. Gage	20.00
C. H. Redington	20.00
J. M. Kane	5.00
H. A. Mosher	5.00
T. Adams	2.50
D. H. Howland	1.00
Cash	25.00
Mosbacher's	25.00
Moos Glove House	25.00
Brewers Protective Assn	250.00

## DISASTER IN OHIO TORNADO DEBRIS IS RAPIDLY BEING REMOVED

### Governor Cox Gives Summary of Fearful Week's Work by Raging Rivers.

Response to Call for Help Has Been Quick and Generous, Says State Executive.

(By JAMES M. COX, Governor of Ohio.)

COLUMBUS, O., March 29.—The end of the week finds the state dazed and numb in contemplation of the widespread destruction in almost every section. The situation today assumed a few novel angles. It is becoming now a problem of food within our borders—a condition which demonstrates how important even a great state is when communication is severed with the outside world.

Cincinnati in the fullness of her bounty, shipped trainloads of supplies into the lower Miami valley and the southeastern parts of Indiana as well. Philanthropy displaced prudence and tonight the queen city of the west appeals to the state for assistance.

Dayton and Zanesville, the two troublesome points far as extension of relief was concerned, are in pretty fair shape. The western food supply was tapped by way of Indianapolis. The Chicago chamber of commerce, at our request, established a base at Indianapolis as soon as the railroad traffic was resumed between Dayton and the Indiana capital.

**LIME IS NEEDED.** Ten carloads of lime, five car tanks of gasoline and a trainload consisting of bread, vegetables and clothing are on their way to Dayton now from that point. Lime is needed for food for the purposes of disinfection.

The West is also supplying medical supplies, particularly anti-toxin for the diphtheria outbreak. Dayton's last appeal was for automobile trucks. It was made to meet this than any previously made, but the appeal has gone by wire to Cleveland, Detroit, Toledo, Lima and Indianapolis.

If the wonderful responses that have come to every request up to this time, it is not too much to expect that 200 automobile trucks with drivers in Dayton Monday morning. These will be used for the purpose of distributing the food supplies.

**A GRUESOME REPORT.** The military organization has been of great service and the week closes tonight with some measure of consolation in the thought that every man that has been reported missing has been reported as dead.

Colonel Zimmerman, of the Eighth regiment, was sent at daylight from Dayton into Hamilton and this afternoon he sends his official report, which is indeed a gruesome tale. Ninety-one bodies will be interred tomorrow. Two hundred horses were burned in the streets. Two or three of the principal thoroughfares have been washed into ditches.

It is a real problem because we have reached it until now through Cincinnati. It has been impossible to get there from the north. With the Cincinnati supply diminishing down to the point of need and the Ohio situation cutting off communication from both the east and south, we doubtless face a crisis in dealing with the situation at Cincinnati and Hamilton.

**WAR SECRETARY ARRIVES.** Secretary of War Garrison reached Dayton this morning by automobile from Cincinnati. The sanitary conditions there are not as good as they are in this city. Dr. Rupert Blue, who was of such service at San Francisco, assumed personal supervision of the work.

The whole country is loud in its praise of Mr. D. Patterson. He was the prime mind at Dayton and through the remarkable organization of the National Cash Register Company, which stretches out over the whole United States, he was able to get the necessary supplies and materials and State governments in the first 48 hours of the flood famine. The power of the military finally broke into Zanesville. That situation developed the same degree of heroism exhibited elsewhere.

Deadly as the storm of the Ohio Court and now dean of the law school in the State University, reached his office at his home in Zanesville by horseback and on foot and brought back today the first report of the conditions in the Muskingum valley. Food expeditions from the north, east and west of Zanesville were successful, rendered so by the transportation of high-powered motor boats by train. Many of the Ohio manufacturers, the never until now appreciated the lurking danger of a congested foreign population. Youngstown and Zanesville were under great apprehension for a considerable time because of the ominous muttering from the foreign press. Marie entered the list of sorely stricken cities today. The water there has exceeded the 1884 stage and a goodly portion of the city is inundated. The relief commission for the time has provided for Marie.

**DISASTER REPORTED.** The wire chief operator of the Bell Telephone company, Ralph Jackson, reports tonight that an appeal has come from Portsmouth. Water in the Ohio is 68 feet high and still rising. Report is that the business buildings are on fire. In Cincinnati the water is still rising. A tide gauge is being set up.

The telephone building has been in and communication put out of commission.

All Ohio towns are wrapped in water tonight. Tuley, Fremont, Middleport, and Gallipolis are heavy sufferers. Richmond, Hightstown and seven little towns in Clermont county are in trouble. Arrangements were perfected tonight to tap the food supplies in the early part of the week. It is said there is not a bridge standing over either the Muskingum or Miami rivers.

**COLUMBUS' LOSS HEAVY.** The loss at Columbus will be about 100 lives. The maximum at Dayton, it appears now, will be 200. Hamilton will run about 150.

It is suggested today that the Legislature recess for a week. That body, as the result of labors in the flood districts, is in no condition to transact business.

Estimates have been made this afternoon with considerable care and it is believed that property loss in the state aggregate \$200,000,000.

### Injured in Omaha Are Reported to Be Showing Improvement.

More Companies of Militia Arrive to Guard Wrecked District.

(By JAMES M. COX, Governor of Ohio.)

Lives lost, 115; seriously wounded, 222; slightly wounded, not less than 1000. Amputations necessary, 18. Houses totally destroyed, 822; homes partly wrecked, 2100. Property loss, \$7,500,000. Dead in surrounding towns, 59; injured, 150. Property loss, \$1,000,000. Number families fed in Omaha today, 733.

OMAHA, Neb., March 29.—Work of clearing away the tornado debris is rapidly going forward and repairs are being made on hundreds of the less damaged buildings.

By Monday it is expected the reconstruction committee will have matured its plans and obtained sufficient funds to start general restoration work.

No bodies were found today in the wreckage handled and all the injured were reported improving. Tomorrow will see the last of the funerals of those killed Sunday.

Four hundred military tents arrived from the army supply depot at St. Louis and are being distributed among those who have not yet secured homes. Many of these have been set up in Berns park and that former pleasure ground today resembles a military camp. At night fires from the wrecks of homes burn brightly before the different doors. Major C. F. Hartmann, U. S. A., stationed at Fort Omaha, has been officially declared in charge of the work.

Today every public school teacher in the city was sent to the affected districts to seek out the families of their pupils and to see that all were supplied. Many cases were discovered in which families were too proud to ask relief but where it was greatly needed.

**DEBRIS CLEARED.** At dark tonight debris had been so far removed that the last street was pronounced open. At street cars and electric lights have not been yet turned on in the wrecked districts. No effort has been made to remove debris from lots and that in the streets has only been hauled to one side to clear the streets to open the streets to traffic.

In preparation for the immense crowds expected here Sunday three more companies of the state troops are being detailed to guard the wreckage from looters and too inquisitive sight-seers.

Labor is in demand and every man who can wield an implement of any kind is employed. Hundreds of workmen are flocking in from outside cities and towns, but there is work for all of them. There are 800 houses to be entirely reconstructed and 2000 need repairs of one kind or another. The building trades unions have passed resolutions that there will be no advance in union wages.

**REBUILDING PROBLEM.** The matter of furnishing funds for the rebuilding of the wrecked homes is a serious problem and one upon which a committee of business and financial men have been working several days. It has been decided to ask a popular subscription from the people as well as a bond issue of \$1,000,000 from the country. After the building and loan companies have made loans up to the point permitted by law, the funds derived from the bond issue, as well as from public subscriptions, will be utilized. These second mortgages will bear an extremely low rate of interest, if any at all, and will run for years.

Eleven churches were completely wrecked. Many of the homeless congregations have accepted invitations to use other churches until their own can be rebuilt, but others will tomorrow hold their services out in the streets before the wrecked edifices.

Deadly as the storm of the Omaha is so sorely stricken this city has sent financial relief as well as food and clothing to several of the small towns out in the state which were wrecked by the same storm which slashed its way through this city.

**Levee Break Relieves Flood at Cairo**

MEMPHIS, March 29.—Advices from Paducah, Mo., late today, report water passing over the levee at the same point where a break in the embankment occurred last February. The overflow will flood a large portion of Southeast Missouri and will reach Memphis in a few days. This will probably relieve the force of water at Cairo for the present.

**Loss Enormous in Pennsylvania Flood**

PITTSBURGH, March 29.—Western Pennsylvania began today to clean up after the flood. The property loss has been enormous. Hundreds of families in the Shango, Monong, Beaver and Ohio valleys the left destitute.

Homes have been swept away and with them went all the earthly possessions of many families. More than two score persons were drowned. Not all the bodies have been recovered.

Untold damage has been done to railroads and wire companies. Great manure piles are being washed away. Thousands will be idle for weeks until mills resume.

Railroad traffic expanded today and the mills began to operate. Hundreds of lines were cut off the devastated districts to get up telegraph and telephone wires.

resourcefulness characteristic of the race, and engineering projects are already discussed to change the course of rivers in several Ohio cities. Experience has taught a lesson.

Estimates have been made this afternoon with considerable care and it is believed that property loss in the state aggregate \$200,000,000.

## WILL BREAK OVER EMBANKMENT

Greatest Flood Since 1884 Is Feared by Residents of Towns and Cities.

Cincinnati, Lawrenceburg, Evansville, Covington and Cairo in Danger.

ST. LOUIS, Mo., March 29.—Thousands of residents along the Ohio river from Cincinnati to Cairo are in flight tonight because of the flood warnings issued by the weather officials. The towns situated on the river are threatened with one of the most disastrous floods since 1884.

In the southern parts of Indiana and Ohio the conditions are becoming much worse as they were further north in those states before the flood waters receded, but there has been no great loss of life, due largely to the warning that the floods to the north gave to the inhabitants of the southern parts of the states. Illinois and Missouri are feeling the effects of the floods, but the conditions in neither of these states compared with those in Ohio and Indiana.

Lawrenceburg, Ind., is in great peril, according to a telephone message. All of the inhabitants are leaving for the highlands.

**HIGH WATER AT CINCINNATI.** At Cincinnati the river has reached almost the 76-foot stage and is rising an inch and a half an hour. Twelve thousand persons are homeless in the neighborhood towns of Covington and Newport. Business houses in Front street, Cincinnati, are flooded and on Second street some of the places are being damaged. Sixty business houses in Newport and Covington are under water. The suspension bridge between Cincinnati and Covington, Ky., is under water and communication between the two places is cut off.

Evansville, Ind., fears a repetition of the disaster of 1884. The river already has reached the 49-foot stage. All of the people have left the lowlands.

At Cairo the river has reached 48.3 to night and 54 feet is predicted by the weather bureau. The city is making every preparation and taking every precaution to protect itself. Hundreds are at work strengthening the levees and it is believed now that a 57-foot stage can be held in check. The drainage district levees north of Cairo are being built.

**LEVEE BREAKS.** An old crevasse in the Drinkwater levee broke this afternoon and flooded the east half of Mississippi county, Mo. The railroad terminal at Bird's Point, opposite Cairo, has been abandoned. An Iron Mountain train was caught in the yards this afternoon and the passengers had to be rescued. The Cotton Belt railroad also is tied up at Bird's Point. Water is from two to three feet over the tracks of both railroads in places.

Sixteenth have been busy all day moving farmers and their livestock from Missouri to the hills in Kentucky. The wheat crop in the section around Cairo will be a total loss and much other property loss will result from the flood.

**NAVAL RESERVES OUT.** Illinois naval reserves have been ordered to Shawneetown, Ill., where the Ohio river is endangering the town. Two companies of the Fourth Infantry, L. N. G., already are on route to attempt to strengthen the levee. Shawneetown is fifteen miles below the junction of the Wabash and Ohio rivers, and is situated on low lands.

From Cairo north on the Mississippi river much concern is being shown by the residents, particularly at Belleville and New Athens.

South from Cairo the Mississippi is steadily rising. The stage at Memphis is expected to reach 38 feet by Monday. Twenty thousand empty sacks today were loaded on barges and will be rushed to Memphis to strengthen the St. Louis levee board district. Convicts will be brought from Little Rock to assist in the work. The crest of the flood is expected to reach Memphis in two weeks. Rivermen feel certain the stage will exceed all previous records. Presidents J. Q. Adams and Andrew Johnson are expected to be under water by Tuesday. All residents from there have been brought to Memphis.

A stage of 60 feet is expected at Helena, Ark., by the end of next week. The levees there can hold this stage, but in fear of a higher one, gangs are working to strengthen what is known as the north levee which slashed its way through this city.

Railroads have begun preparations for a flood. Fearing a repetition of last April's washouts all railroads and shippers have made arrangements to operate a daily boat between Memphis and Helena should a break occur.

**Lawrenceburg Levees Reported Breaking**

## Butterick Patterns—first for 50 years

WHEN you purchase a Butterick Pattern in this store, have you any idea of the time, experience and expense that have been put into perfecting this world-wide help to women? It is just 50 years since Mr. Ebenezer Butterick cut the first pattern in the world in a little Massachusetts town. Today the genius of the world's greatest fashion creators stands behind every Butterick Pattern. Having establishments in Paris, Berlin, London and New York, Butterick representatives are at the birth, so to speak, of every new creation in the World of Fashion. Butterick designers in Paris and New York then eliminate anything exaggerated or far-fetched and modify and adapt it to suit the requirements of the American woman. Its practicability as well as its smartness are the first considerations given a design before a pattern is made to be placed on the market. This is why, when you purchase a Butterick Pattern, you feel assured you are buying something that the best fashion experience and judgment have concluded is graceful in line, enduring in style and admissible of inexpensive production. 23 inches wide, stripes and figures.  
Yard Wide Blouse Linens, at 23c  
Natural color, good weight, sale.  
Two Gingham sets, aprons, yard, 10c  
Semi silk fabrics; plain or corded

## WOMAN HIKES FROM N. Y. TO OAKLAND

Mrs. Mitchell Claims She Has  
Proved Mental Telepathy  
and Self-poise.

As Mrs. Clara Mitchell, who arrived in Oakland last night after having walked from New York, approached this city she says that she knew by intuition that she was going to like Oakland; that it was a great and growing city with a wonderful future—perhaps the city of her destiny. At any rate, Mrs. Mitchell has decided to remain in Oakland because it "looks good" to her, and here she will write the story of her trip, assembling the many interesting experiences that she underwent in her long hike.

Mrs. Mitchell declares that she has proved mental telepathy and self-poise on this trip. She had written articles on these subjects and intended to write more. She desired, however, to prove her theories before giving them to the public. After walking 3200 miles, Mrs. Mitchell says it was a "beautiful, wonderful trip." She tells of her faith in God and confidence in humanity, two things that she put to a severe test on her long journey. She also claims to have proved co-operation, concentration and control in other words, true poise.

**WALKING BY INTUITION.**  
Many times, Mrs. Mitchell says, she would be on the wrong road or in need of a ride, and by her concentration and power of suggestion she would be directed in the right direction and a vehicle would approach the owner, who would tell her a "hint." Motor-traffic was another thing proved, says Mrs. Mitchell, in her long walk. She could get a certain stride, about three miles an hour, and 25 miles a day would be an easy task. But if she exceeded three miles an hour she could not cover as much territory as by the slower gait.

Mrs. Mitchell left New York June 20, 1912, with a letter from the mayor, and arrived in Chicago July 23, 1912. She walked 185 days and used 44 days in side trips. From Chicago Mrs. Mitchell walked to Denver, and then visited the pueblos in New Mexico, Arizona and Texas. She visited San Diego and Los Angeles, and on her way north she had inspected all the missions, which she will describe in her writings. Proposals were numerous along the route and in several instances Mrs. Mitchell had written experiences. Co-operation, concentration and control by the manner in which people met along the route welcomed her to their homes and gave her board and lodging and assisted her in every way they could.

There are about 400 to whom Mrs. Mitchell is indebted. All will be sent copies of her book, in which she will mention them.

## HUNTERS MAKE WONDER RECORD

Two Men Earn \$414 in Bounty  
Alone During Present  
Month.

**REDDING, March 29.**—Joe McGuffin and George Roberts, with three hounds, have made a wonder record in Tehama. During the present month they have killed twelve California lions, fourteen bob cats, three bears and two coyotes.

They will receive bounty from the county and state amounting to \$414. All the animals were killed in the mountains, on Deer Creek, after being treed by the hounds. The coyotes, however, were trapped.

The hounds were worth over \$100. Two of the lions were extremely large, measuring nine and one-half feet from tip to tip.

The month's hunting nets the trappers considerably over \$500.

## MAN WAS TOWN CLERK FOR 60 YEARS

**MILBURY, March 29.**—At the annual town meeting today, Ira N. Goddard completed the remarkable record of 60 consecutive years as town clerk and was re-elected without opposition.

As an expression of appreciation of his faithful service he was presented with a purse of gold and a number of votes of thanks by the meeting. William W. Windle, chairman of the selectmen, made the presentation, which also included a bouquet for Mrs. Goddard. Thomas H. Sullivan moved the vote of thanks.

## BUILDS NEW HOME.

**BRENTWOOD, March 29.**—The magnificent new home of William Shafter, pioneer citizen and business man, is rapidly nearing completion and the family expects to move in within the next few weeks. This home is one of the finest in this section of the county and will cost between \$7000 and \$8000 when completed.

## SHRINERS' BALL AT HOTEL OAKLAND TO BE ELABORATE.

MRS. J. LORAY PEAKE, MEMBER OF RECEPTION COMMITTEE FOR SHRINE TEMPLE BALL APRIL 9.

Word received by the committee in charge of the grand ball to be given by the Shrine Temple, Order of the Mystical Shrine, in the ivory ball room of the Hotel Oakland, on Wednesday, April 9, indicates that the affair is to be one of the best attended of its kind that has ever taken place in Oakland. From Stockton, San Jose, Vallejo, Fresno, Sacramento and San Francisco and other interior cities delegations have signified their intention of being present.

It will be one of the first social events of importance since Lent, and altogether it promises to be the most successful that has ever been given by the Shrine. The affairs are an annual attraction, but each year the Shrine endeavor to add some new

interest. This year the committee has prepared valuable souvenirs for the women and their distribution will be a feature of the evening. The committee that has been exhausting its ingenuity to bring the affair to a successful climax is composed of J. R. D. Mackenzie as chairman, Charles Chubb, Louis Aber, H. C. Steinbach and Otto Riehl. On the reception committee will be Noble and Mrs. G. S. Meredith, Noble and Mrs. Robert Greig, Noble and Mrs. B. A. Forster, Noble and Mrs. D. E. Perkins, Noble and Mrs. J. Loray Pease, Noble and Mrs. F. R. Woolsey, Noble and Mrs. Dudley Smith, Noble and Mrs. R. S. Kidd, Noble and Mrs. E. B. Phillips and Noble and Mrs. Harmon Bell.

## WIFE IS GRILLED BY JUDGE GRAHAM

Woman Gets Little Satisfaction in Seeking Divorce.

**SAN FRANCISCO, March 29.**—A sermon on the behavior of a wife, even though she be separated from her husband, was delivered by Superior Judge Graham today, when he denied a divorce decree to Mrs. Doris E. Erickson, who brought suit for divorce against Ernest Erickson, charging extreme cruelty. The treatment accorded to the wife and objected to by her occurred on one occasion when she was alone in the house and another man to a theater. She had been separated from her spouse for over a year, and she approached her on the street and said to her escort:

"Do you know you are walking with a married woman? Break away and leave her alone, any man who goes out with another man's wife is no good."

The court holds that this does not constitute cruelty, and, in sustaining the defendant's demurrer. "The tendency of courts reflecting advanced civilization at the present age is to view marriage from a different standpoint from that of a mere physical relation. It is now regarded as a union of the mental and spiritual as well as of the physical, and a relation designed to bring to the contracting parties the comfort and felicity of home life, and between husband and wife to such a degree that there should exist mutual evidence of love and respect. From the conduct of this plaintiff, who clandestinely kept another man's name, it is evident that she had no regard for the sacred obligations of her marriage vows."

The judge also said that he was not for any lawyer to advise, that having degraded with impunity her marriage vows by going to places of public amusement with other men without the knowledge and consent of her husband, she was not entitled to a divorce.

**TIME FOR BRAKES.**  
"The time has come, when courts should put the judicial brakes on cases of this kind and let those people who marry for convenience and flaunt their vicious conduct in public know that all courts do not view lightly the sanctity of the marriage relations, and that they will decline to entertain the petitions of husbands or wives who by their own voluntary conduct bring disgrace upon themselves and others, and then have the temerity to ask relief at the hands of a court of justice. The time has come when justice must come with clean hands."

Judge Graham also called attention to the fact that not only does Mrs. Erickson want a divorce, but she wants all of the community property of her spouse, who is an employee of the United Railroad, and \$40 a month alimony.

## NEW SAVINGS BANK IS STARTED AT PLEASANTON

**PLEASANTON, March 29.**—A savings institution, to be operated in connection with the First National Bank of this place has been organized. The new concern is composed of practically the same stockholders as the First National Bank, organized here two years ago. The directors of the First National and who will be identified with the savings department, are Henry Mohr, president; Dr. C. A. Case, vice president; Claude Smallwood, cashier; J. C. Mendonza, assistant cashier; A. P. Leach, attorney; W. J. Dakin, M. Koopman, D. Lowery, and A. B. Plekard.

The name of the new institution is the Amador Valley Bank.

**IMPROVEMENT CLUB TO MEET.**  
The 2nd Improvement Club, to be held in the Lincoln school next Monday evening, government by commission will be thoroughly discussed. The speakers will be W. C. Sharpe, one of the framers of the Tacoma charter; Harry Shermansky and Green Majors. The club announces that the ladies are especially invited.

## SCANDAL FOUND IN CZAR FAMILY

Grand-Duchess Olga's Engagement Broken by Her Sister Tatiana.

**BERLIN, March 29.**—A sensational report which comes from St. Petersburg and has been circulated in Berlin is that a great rupture has amazed and grieved the Russian imperial family.

As was announced semi-officially last summer, the official engagement of the Grand-Duchess Olga, the Czar's eldest daughter, to the young Grand Duke Dimitry Pavlovich, her cousin, was to be made during the recent Romanoff Tercentenary celebrations. Now it appears that at the eleventh hour all ceremonies linked with the engagement were canceled.

The reason, it is stated here, is to be found in the fact that the Grand-Duchess Tatiana, the second daughter of the Czar, has completely eclipsed her sister in the Grand Duke's affections, and the alleged attack of fever with which Tatiana is said to be suffering is in reality the result of the exposure of her duplicity. The Grand Duke has made a complete and dramatic confession to the Czar and will be exiled perpetually from Russia.

Count Zechi, who is considered a most intimate friend of the Austrian heir presumptive, writing to friends in Berlin, said:

"We all know we will have war some time in 1914, either with Serbia and Montenegro or with even Russia, and of course this will mean a general European struggle. The Archduke wants his way, and despite the Emperor, who wishes to finish his reign peacefully, he will get it."

**ARCHDUKE A FIREBRAND.**  
In Vienna and Buda Pest everybody knows that war was decided upon at a recent meeting of Austrian, and Hungarian military and naval officers, all those who enjoy the confidence of the future emperor naturally voting for war.

The Kaiser and his brother, Prince Henry, who is Grand Admiral of the fleet and commander of the second German squadron in case of war, are trying to use their influence on the Archduke in favor of a peaceful solution of all Oriental difficulties, but because they do not want Germany to be called to fight when the remnants under the coming military law are completed—about the end of the present year.

As far as one can see it seems most probable that there will be war in Europe immediately after the Balkan peace is arranged and the man responsible for that war will surely be Archduke Francis Ferdinand, for he and his military clique have never been so decided about war as now.

## PLEASANTON FIGHTING FOR DISTRICT FAIRS

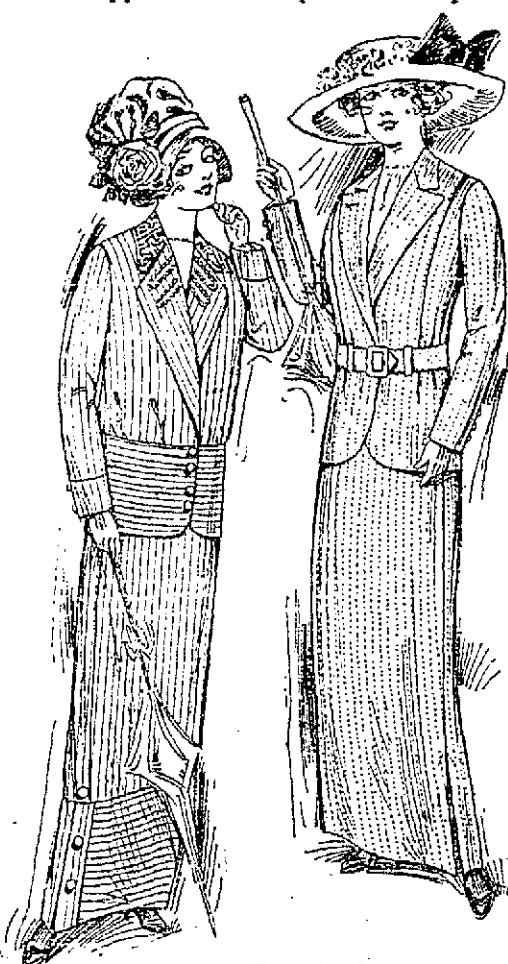

**PLEASANTON, March 29.**—President Hall of the Fair Association secured William Alsford to make a photograph of the Pleasanton fair grounds and race track this week, the same to be used in re-establishing the old-time district fairs, abolished some years ago. The photo is to prove that Pleasanton is able to provide ample room for an annual feature of this kind and was taken in four sections in order to encompass the entire tract.

Small district fairs again be established Pleasanton will without doubt be one of the few points to be selected as a logical location and this fact has been brought about by the organization of the Alameda County Fair, the first of which was held here last fall.

# Anniversary Sale

That the anniversary of our ninth year of business shall be memorable, we have prepared a special sale of such proportions and such remarkable value-giving as to make it worth remembering. We will share our profit with you during this sale, both in garments selected from our regular stock and those specially bought and more specially priced for this sale. We want our established policy of best values and square dealing to be indelibly stamped in the mind of every woman in Alameda county, and we take this profit-sharing way of doing it, and at the same time of showing our appreciation for your liberal support of these policies the past nine years.

Sketched by our artist from our own models

## DRESSES LIKE THESE

and a dozen other styles. Some of storm serge, two-tone Bedford Cords, fancy diagonals and wide wales, others of soft lustrous silk for afternoon and semi-dress wear—silk poplins, messaline, satin, charmeuse, pongees and embroidered marisettes. This is a truly choice collection of dresses in exactly the styles, seen now at the fashion centers of the world.

Where else can you secure dresses like these at \$9.75?

**Toggerly**  
CLOAK & SUIT HOUSE

568-572 Fourteenth Street, Between Clay and Jefferson

## FIRE DEPARTMENT TO HAVE NEW HOSE

Walnut Creek Boosters Aid the Fight for Fire Protection.

**WALNUT CREEK, March 29.**—Fire Chief J. E. Salturi and W. S. Burpee, who were appointed by the Walnut Creek Business Men's Association at the last meeting to circulate a subscription list to raise funds with which to buy fire hose, report the sum of \$306.50 subscribed. This will purchase the necessary hose. Bids have been received from two firms and the hose will be ordered within a few days.

Rev. N. J. Lowther, who was appointed at the last meeting of the Walnut Creek Business Men's Association as chairman of a committee to arrange an entertainment for the benefit of the Walnut Creek fire department, with power to choose its own committee, reports progress. He has been busy picking the members of the committee to act with him. Plans are being made for a benefit entertainment that will surpass anything of the kind ever attempted in Walnut Creek.

While the date of the "show" has not been definitely decided upon, it will be held at no distant day. It is rumored that at least part of the program will take the form so popular for benefit in the bay cities—the presentation of scenes from famous plays.

## YARD FIRE APPARATUS CALLED OUT BY BLAZE

**VALLEJO, March 29.**—The fire apparatus at the navy yard was called out to extinguish a fire which broke out in some rubbish and threatened building No. 51 for a few seconds. It was put out before it became serious.

## OFFICERS ARE CHOSEN BY LOAN ASSOCIATION

**PLEASANTON, March 29.**—The nineteenth annual meeting of the Pleasanton Mutual Building & Loan Association was held at the Bank of Pleasanton. The following directors were selected for the ensuing year: C. Latham, E. L. Benedict, H. A. Sinclair, T. W. Harris, Peter Rock, Henry Reimers and T. V. Grier.

C. Latham was selected president, H. A. Sinclair vice president, and T. H. Silver secretary.

## Defies Sentiment Of Public to Take Seat in Chamber

SIGNOR NUNZIO NASI.

**ROME, March 29.**—Signor Nunzio Nasi created a sensation at Rome recently by taking the seat to which he had been elected in the chamber of deputies. Signor Nasi was minister of instruction some years ago and was removed on a charge of defeatism. He was sentenced to three years imprisonment. His enthusiastic constituents at Trapani did not share in the popular judgement of the late minister, and promptly elected him to the Chamber of Deputies. They have continued to re-elect him ever since. Some time ago, in view particularly of his case, a law was passed declaring ineligible for office anyone who had been convicted as Nasi was. But this law does not go into effect till the next general election is over. Meantime Signor Nasi has defied public sentiment at Rome by taking his seat in the chamber.

## SANTA FE OFFICIAL BRAIN AILMENT VICTIM

**LOS ANGELES, March 29.**—George T. Nicholson of Chicago, vice-president of the Atchison, Topeka and Santa Fe railroad, in charge of passenger and freight traffic, is seriously ill at the California Hospital of inflammation of the brain. Dr. John J. Kyle who has Nicholson under his care, said this evening that the patient is in a critical condition, with the chances against his recovery. Mrs. Nicholson is constantly with her husband at the hospital.

## WEEK-END REPORT ADVANCES STOCKS

Greater Activity Shown in Today's Market; Broad Copper Speculation.

**NEW YORK, March 29.**—Greater activity was shown in today's short session of the stock market than at any other time during the week. The favorable character of week-end reports was a factor in the general advance. Fresh buying by speculators and investors also figured in the upturn. Relief over the flood conditions in the middle west was probably the most potent factor.

Union Pacific started up without urgent short covering, showing no sign of weakness in the Harriman segregation situation. Reading and Lehigh valley were also strong. Steel was not so active, account of the sliding down of many important mills in the flood districts. The copper stocks were in good demand, London being credited with having been a liberal buyer at these issues. Speculation in copper at Boston was broad and prices closed at the high range of the week.

The bank statement showed that the banks increased their actual surplus reserves by \$2,200,000. In this connection it may be said that the ascending manner in which the clearing-house banks have kept down their liabilities and built up their reserves despite the heavy drain of gold out of the country has gone a long way toward reassuring the most pessimistic as to the strength of basic conditions in this country. Actual losses increased \$14,815,000 during the past week and deposits expanded \$21,545,000, but a gain of \$9,997,000 in cash was the net result.

It will be another week before the losses in Bull and Indiana etc. be accurately measured. These may be \$100,000,000 or they may exceed those of the San Francisco fire. The tendency toward a recovery in the market is not a promising one from an agricultural standpoint, and has an enormous credit balance from the industrial products. Allowing 25 to 30 per cent of contraction in the value of the commodities of the United States and in which the compensation of new demands for materials for rebuilding the country is not a small item, it is already evident that the damage to railroad property will more than wipe out the gain of the past week.

Number of shares sold today, 203,454; year ago, 239,652. Par value of bonds sold today, \$1,414,000; year ago, \$2,142,000.

## LONDON PRICES LOWER.

**LONDON, March 29.**—Prices were a fraction lower on the stock exchange today on the hope of confirmation to yesterday's report that the Balkan allies had agreed on the principle of the powers' proposals for peace. But the market was not so much affected as had been expected. The market was not so much affected as had been expected. The market was not so much affected as had been expected.

## ANNOUNCE ENGAGEMENT.

**RICHMOND, March 29.**—Announcement has been made of the engagement of Miss Gladys Clutchester, daughter of a pioneer Contra Costa county family, and Arthur Davis, son of J. J. Davis, well-known contractor of this city. The wedding date has been set for next Tuesday evening, the ceremony to be performed at the Davis residence, Fifteenth and Nevin streets.

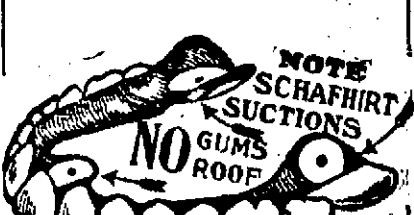

## ALAMEDA IS TAKING SCHOONER TO TAHITI

**ALAMEDA, March 29.**—Captain Louis T. Ward of this city, formerly member of the police and fire commission and commodore of the Aeolian Yacht Club, is on his way across the blue Pacific in an 80-ton schooner, the Commodore, which was built here for trading in the south seas. Ward's destination is Tahiti, where he will leave the little vessel for her inter-island work and return by steamer. The crew of the tiny schooner consists of Ward, and four other men. It is expected that the trip will require several months, even though favorable winds are experienced.

## TO FINISH VESSELS.

**VALLEJO, March 29.**—According to the present schedule the work on the two Chinese river gunboats Palao and Monocacy will be complete in six months. The engines are now well under way and the keels should be laid April 16.

Whether you have any teeth of your own or not, I can fill the vacancies with natural looking teeth without using a clumsy plate.

## WILL LECTURE ON THE MALAYSIANS

Professor Kroeber to Be Heard  
on March 30 in U. of C.  
Series.

SAN FRANCISCO, March 29.—The Malaysians and Their Civilization" is the title of the Sunday afternoon lecture at the University of California Museum to be given at 3 o'clock March 30 by Professor A. L. Kroeber. This lecture is the third of the series of eight to be delivered by various members of the University of California staff in connection with the Museum's new revolving exhibit on the peoples of the Pacific islands.

The remaining lectures of the series are as follows:  
April 6, E. W. Gifford "Brown Men and Women of the Pacific"  
April 13, D. P. Barrows, "Head Hunters of the Philippines"  
April 20, E. W. Gifford "Cannibal Black of the Pacific"  
April 27, A. L. Kroeber "The Most Primitive Race, the Aborigines of Australia"  
May 4, E. W. Gifford "Easter Island, the Mystery of the Pacific"

## MODISTES LAY ON BRIGHTEST COLORS

Blue and Yellow in Parisian  
Fashion Field for Pre-  
dominance.

(Special to THE TRIBUNE by International News Service)

LONDON, March 29.—On the palettes of the dress designers a multitude of bright colors have been disclosed. It is a question which will predominate when the usual sifting process has been accomplished—whether blue will win or yellow's triumph of last year continues this season.

A march of mauves in the sanctuary of a great dressmaker revealed a medley of colors. One coat and skirt was of a very brilliant magenta shade tempered by a black Russian blouse. A very pretty girl arrived in a mauve toilette as blue as a forget-me-not arm-in-arm with an older woman in a gown of that mysterious dark brown shade known as tete de negre.

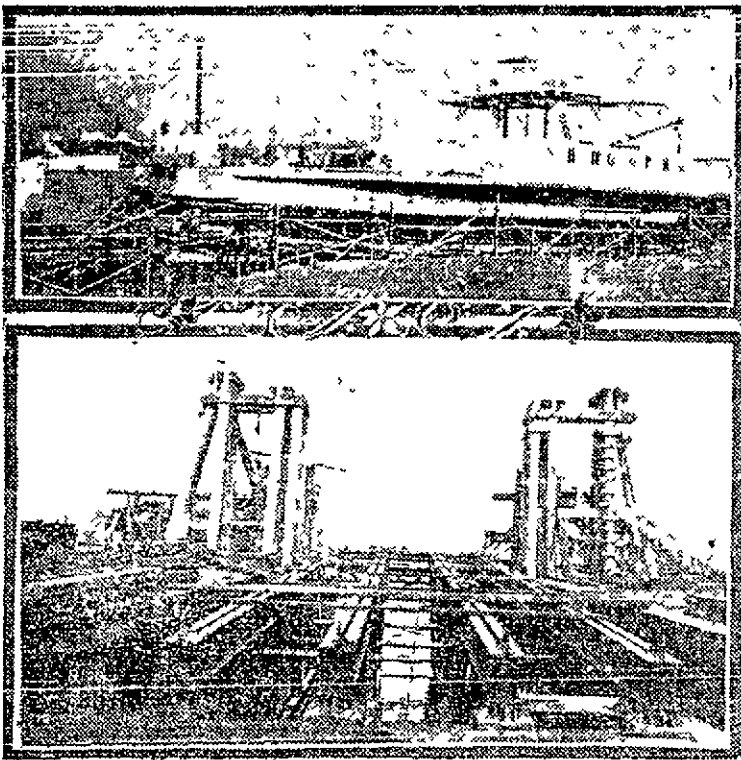

There were many manifestations of the appreciation shown already for mauve, parchment, beige, and the kindred shades scarcely a tone removed from white, and it was proved that a very dark shade of blue is to be worn and that cerise will be of a most appealing beauty.

Some of the new greens recall the aesthetic craze of 30 or 40 years ago, particularly the muddy shade known as sage and the sober olive. But there are very vivid rivals with the tang of anacardium in their violent quality of tint.

## WANTS DIVORCE FROM CONVICTED FORGER

SAN FRANCISCO, March 29.—Because her husband, Evan J. Eddards, was convicted of forgery and sentenced to San Quentin from Alameda county on July 16 last, Mrs. Sarah M. Eddards wants the law to free her from him. She filed an action for a divorce here today. The marriage of the couple occurred in Sacramento March 10, 1912.

## OAKLAND-ANTIOCH ROAD HAS TRIP OF INSPECTION

"THE BRIDGIT," FERRY BOAT OF THE OAKLAND-ANTIOCH AT CHIPP'S ISLAND, AND A VIEW OF THE FERRY SLIP AT THIS CROSSING

Winding through the beautiful Redwood canyon and over the historic Moraga rancho, one of the first trains of the Oakland, Antioch and Eastern railway yesterday traversed the new road from Oakland to Bay Point, bearing officials of the company and representatives of the newspapers of the bay region on a trip of inspection of the new roadbed. The train, under the management of Engineer Al Hook, made remarkably fast time, reaching Oakland from Walnut Creek on its return in 33 minutes. According to General Manager H. A. Mitchell, who was one of the hosts to the newspaper men, this time can be beaten, but the company expects, for the time, to be the regular schedule.

The party left the Fortieth and Shafter station, where the train stopped after picking up a delegation of newspaper men from the other side of the bay at the Key Route mole, and proceeded first to Walnut Creek, the trip showing to its best advantage the remarkable scenic features of the road. One of the most striking bits of landscape is seen on the Oakland side of the tunnel, where the train emerges from the cut, high in the hills, to show all of Oakland, spread out like a map many feet below. Through the redwood canyon past the beautiful picnic grounds, Pinetown, which the road will develop, the line runs along the Moraga valley, with wide spaces of fertile Contra Costa land on either side, and on to Bay Point.

At Walnut Creek the party stopped for luncheon at the Rogers Hotel. Here, during the luncheon, the railroad men told of the road and its aims. The guests tendered a rising vote of thanks to the officials for the jaunt.

### AIM IS EFFICIENCY.

"We are here to give the people what they want," said General Manager H. A. Mitchell. "We have a good road and will give the best service we know how. When we reach Stockton, which will be soon, we will be able to show Oakland one of the

greatest interurban systems in the world. Our motto will be 'please the people,' and on this ground we ask support."

We are going to grow and the country is going to grow with us," declared Traffic Manager L. H. Rodeburgh. "We will develop the country around us and as it grows we will give better service. We will start with five trains daily. Beginning a week from Monday we will open a big system and hope to make it still bigger."

Others who spoke were F. A. Miller, superintendent of power, J. H. Leary, superintendent of transportation, Irving Martin of Stockton, Geo. C. Radcliff of Merced and Charles P. Clement of Oakland.

ELABORATE SIGNALS.  
The road is unique in many ways. It is the only electric road having an elaborate system of block signals along its entire length. These are stationed about a mile apart. The tunnel, 3537 feet in length, is electrically lighted and braced with solid concrete. Although the roadbed is still being ballasted it is almost as smooth as glass. It is remarkable for the amount of straight track, considering the hilly route. This is one of the chief features of its engineering work.

The new road cost in the neighborhood of \$2,600,000 in its entirety. Practically all of its crossings are overhead, eliminating danger, and at Chipp's island the ferryboat Bridgit takes eight cars at a time across to the Stockton side. Automatic crossing alarms and all possible devices for safety have been installed. After the formal opening when the Contra Costa boosters will visit Oakland, the road will begin regular daily service as scheduled.

## MURDERER GETS LIFE SENTENCE

Judge Denies New Trial by  
Holding Wife Rightfully  
Testified in Case.

SAN FRANCISCO, March 29.—Superior Judge Bradley V. Sargent was forced to solve a rather knotty legal problem today before he sentenced Manuel Lopez to life imprisonment in San Quentin penitentiary for killing his mother-in-law. The attorney for the defendant claimed that Lopez had been wrongfully convicted, because the principal witness was his wife, who was also wounded at the time of the killing. The argument was made that a wife should not testify against her husband even though she herself and her own mother had been the sufferers. The court, after listening for nearly three hours to the speeches and legal points brought up by the attorneys on both sides, delivered himself of some law on his own account and denied Lopez a new trial. The crime was committed on November 5, Lopez claimed that his mother-in-law, Mrs. Kate Threlk, was trying to interfere in running his household and was paying too frequent visits. He fired upon her, and his wife, in endeavoring to shield her parent, got in the path of a bullet and was also laid low. She recovered and subsequently told her story in court.

## POLICE LOSE DICE, BUT GET BOOTY

Raid on Gambling Chauffeurs  
Nets Officers \$7, But  
Offenders escape.

SAN FRANCISCO, March 29.—Patrolmen Espartero, Morfe and Bonfield of Bush street station, made a raid on the sidewalk surrounding Casino, the auditorium where the charity ball was in progress at 2 o'clock this morning and they walked into the assembly room with their honor unscathed and a bribe of \$7 which they handed over to the property clerk. The patrolmen were assigned to look out for the exterior arrangement at the ball. At 2 a. m. a crowd of chauffeurs, some of them driving for San Francisco's aristocracy becoming tired of waiting, started a little car game on the curb. The policemen sighted it after evidence of their misdoings had been caught, taking the "buses" with them and leaving the "buses" on the sidewalk. There were seven great big iron men and "hose" officers connected with the game. The police took care to remove the evidence of their misdoings and had left the coin to impose the police. In making their report the patrolmen expressed the regret that they did not leave some dice so that they could have prosecuted the offenders. The \$7 was useless to them for bribery purposes and for that reason they desisted them.

# Women's Spring Suits and Dresses That Are Really Distinctive Suits Dresses

We are showing so many suits and in such varied styles and the

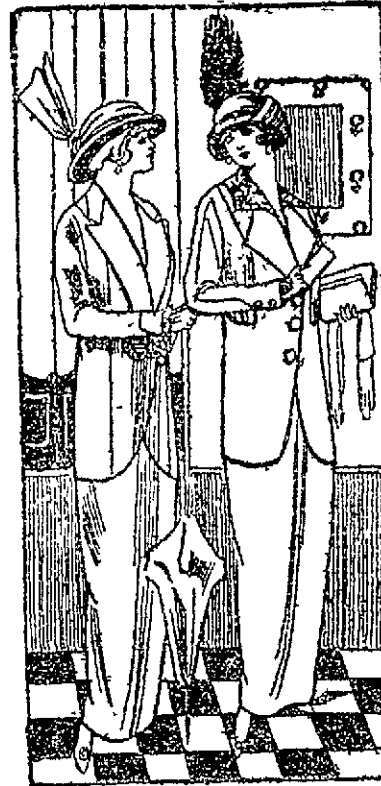

Touch of Individuality  
is so deftly imparted that selection is easy and satisfactory. Every model is superior in style and superior in tailoring. Also superior qualities of material—

Wool Poplin Silk Poplin  
Eponge Faille Cloth  
Serge Fancy Cords  
Novelty Worsteds

Superior color selection, for these suits are in the artistic and unusual shades of the most approved colors.

The suits of silk poplin made in the Bulgarian style at \$35 are especially "chic," as also are the draped skirt models.

All sizes from 32 to 51 bust measure.  
Misses' sizes 13 to 20. Prices—\$12.50 to \$55.00.

Of spring's lovely soft fabrics, in the new soft colors, and in the most exclusive of spring's best styles, including some choice new drapery arrangements and clever blouse effects.

### Silk Dresses at \$19.75 to \$65

Of charmeuse, crepes and poplins, trimmed with silks in contrasting colors, and with pretty laces, smart new girdles, adding to their attractiveness. Also a few Balkan styles.

Street and Afternoon Dresses of crepe de chine, charmeuse and poplins, trimmed with beautiful combinations of silks, laces and nets, some embroidered in colors that vary from the richest and deepest Bulgarian hues to the daintiest of spring's delicate tints.

### Wool Dresses \$14.75 to \$45

Of ratine, eponge, serges, basket weaves and Bedford cords in white, black, the favored spring shades, stripes and shepherd checks. Simple, stylish street frocks and the more elaborate afternoon and calling dresses.

# The Season's Best Millinery Scoop Fisk Hats

Worth from  
\$12 to \$20 for  
**\$8.75**

Three dozen in the lot and no two alike. The smartest spring styles from this house of millinery fashions notable for their originality and distinctive style.

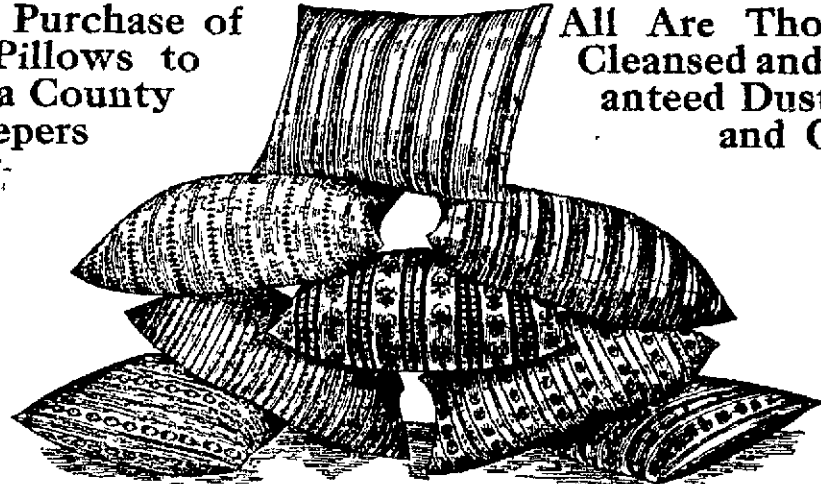

The counterpart of each and every one of these hats selected from these samples bears a price mark in the shops of the leading milliners of the country from one-third additional to more than double the remarkably low price we're asking—but it is the custom of wholesalers to sacrifice their sample lines to their leading retail dealers, and Capwell's was fortunate enough to secure the plum this season. The Hats are fresh and new, show no signs of handling and bear all the chic and charm that goes with a Fisk label.

The lot consists of tailored and semi-dress Hats, all hand-made. Fine millans, hemp, tagal and fancy braids, in white, black and colors, trimmed with exquisite ribbons, numidie and feather fantasies put on in that rare and exclusive manner possible only to these artist milliners.

# A March Sale of Feather Pillows

# Spring Cretonnes

Each home today is a separate problem and worthy of co-operation between furnisher and artist decorators. We are making a constant study of how to improve the decorative possibilities of your home—how to harmonize draperies and floor coverings with light and wall space—and to this end we've gathered many styles of Cretonnes, Chintz, Taffetas and Printed Linens—all distinct and different.

### FROM ENGLAND

From leading English printers we are showing wonderful pieces of chintz in Indian from blocks hundreds of years old—for Colonial and English casement windows—31 inches wide—at 35c, 50c, 65c, 75c, \$1 a yard.

### FROM FRANCE

Soft, rich colors, in shadow effects and heavy warp printing—copies of old museum pieces—studies from old needlework tapestries—delicate colorings, in cream, lavender, blue and green lines—31 inches to 50 inches wide.

### AMERICAN PRINTS

America gives us floral effects of artistic beauty—taffetas and cretonnes to harmonize with the latest wall papers—copies of expensive foreign prints—simple patterns for bedrooms and heavy effects for living rooms—31 inches wide—20c, 30c, 35c, 50c, 65c and 75c a yard.

Our experienced salesmen who make a study of decorative effects are here to assist and suggest. Decorative schemes will be suggested for you and estimates made without extra charge.

Half Clad  
Bitterly Poor  
Verdi  
Listened  
in the Dark

(Stirring Stories of  
Great Musicians. No. 2.)

HIGH olive trees and a palace, silhouetted against a silver moon.

Inside, a little girl touching a piano to the witchery of Beethoven.

Outside, a boy—meagre, half-clad, bitterly poor—a child crouching in the dark.

He had come there for many nights, a humble worshipper. He was lost to sight. Only in sound he lived, in the soft exaltation of high melody that floated from the window and transfused him.

Then a hand touched him. He felt himself led toward the palace, and to a room splendid and tapestried, but he hardly noticed it. The little girl still played, and the old man who had led him there curiously watched the boy who stood, half-naked, tragically poor, but quivering with joy, wrapped in a terrible ecstasy at the deep, charmed cadences of the master.

That boy was Verdi, who has given us Aida, Rigoletto, Traviata—who has thrilled us to exaltant joy even as he was thrilled. The old man, the owner of the palace, helped him to a musical education, gave him his chance.

Have you a boy who might have a genius for music? Have you given that boy a chance to prove himself?

Only lessons on a good piano can do that.

The poor sounds of a poor piano produce false quality which you can never unlearn. They bar you forever from the best music. They remind you of the boy who has learned to talk carelessly and who can never correct himself.

The brain cells which connect with the hearing centres by delicate nerves are permanently dulled by a bad instrument of sounds. The

## HALLET & DAVIS PIANO

is a standard. The makers have had 75 years to develop it. Its tones are an education to the ear—the first step to artistry. Franz Liszt, greatest of all pianists, exclaimed, "John Hallet, too—he of the Blue Danube." His Holiness Pope Pius X honored the Hallet & Davis with a Papal medal.

Send the attached coupon now, and we will arrange that you shall give your boy a chance. It is our business to show you how—and how to afford it besides.

NEWLANDS  
STEPS ON TOES  
OF J. ELLIS TUCKER

## THE KNAVE

EX-CONVICTS  
START TO REFORM  
PENITENTIARIES

SAN FRANCISCO, March 28.—The friendship of David and Jonathan is severely strained. Damon is beginning to doubt the loyalty and affection of his friend, Pythias. In other words, James D. Phelan has waked up and is grieved and shocked to find that his old comrade in arms, Rudolph Spreckels, has been giving him the glad hand with one flipper and the edge of Job's sword with the other.

While Spreckels was in Washington, Phelan rested here in the confident belief that he was urging the President to appoint Charlie Fay Collector of the Port. He has just discovered that Spreckels was legging it to beat the band for J. O. Davis. That is why there is a cloud over the face of the moon and a coolness in the relations between Phelan and Spreckels.

## Another Richmond in the Field

Judge Morrow has not altered his determination to retire from the bench when he reaches his seventieth year. He will not retire on the minute, however, but very soon thereafter—provided, however, that he has no reason to believe that either one of two, or three undesirables is likely to be appointed in his stead. Judge Morrow would rather die on the bench than to see Francis J. Heney have his place.

John Henry Miller, formerly of the firm of Langhorne & Miller, is a candidate to succeed Morrow. Great stress is laid upon the fact that Miller is a Virginian and a great grandson of Patrick Henry. Nevertheless, he is an able lawyer and a man of high character. He is handicapped, though, by the fact that he has a good practice. A good many of the Democratic politicians are imbued with the idea that a man should not seek a public office if he can make a living out of it. Miller is highly connected in the Old Dominion and is said to have appeared oftener before the United States Supreme Court than any lawyer in California. The judges of the Federal Supreme bench know him well and are said to regard him favorably. One point in his favor is his familiarity with Federal court practice.

But his support is weak among politicians. Spreckels and Phelan want a man named Monroe, who is at present attorney for the California Title Insurance Company, made Circuit Judge. At least two of the Democratic members of Congress are candidates for the position and the other claimants are too numerous to mention.

## Phelan and the Exposition Managers

Phelan has got himself in bad with the exposition managers. While President Moore and his colleagues have been working to get the Oriental-nations to make exhibits at the big fair, Mr. Phelan took it into his head to put his pen and both feet into the business. He wrote a letter to the Legislature urging the passage of the alien land bill, which is regarded as a direct slap at the Japanese. This may have the effect of deciding Japan not to make any exhibit at the exposition.

Hence the exposition managers are sore at the ex-mayor and are charging him with being a marplot and a busybody.

## Lawlor's Plan to Get Judge's Place

The town is laughing over the dinner that Judge Lawlor gave himself at the Family Club to boost his candidacy for Judge DeHavens' position on the Federal Bench.

The remains of the "Graft Prosecution" sat down to table. Phelan made a nice, prim little speech; Rudolph Spreckels was there, but Larry Harris, the chairman, did not ask him to speak, which has excited considerable ill-will. Francis Heney came, armed with a speech, loaded with adjectives and adverbs, exhorting everything and denouncing everybody except the "Bull Moose"; but Larry Harris, in the interest of the public welfare, refused to give him a chance, at which Heney is very sore.

Lawlor bases his chance for the Federal job on acquaintanceship with Senator Hughes of New Jersey, who comes from the neighborhood where Lawlor was raised.

Hughes consented to present his name to President Wilson, as Lawlor had not found anything nearer California than New Jersey to do so.

The little judge has devoted his attention to obtaining the endorsement of Rudolph Spreckels, as Rudolph is aiming to be the Federal boss for Wilson in California and distribute all the loaves and fishes.

Lawlor has spent a substantial part of this week in Rudolph Spreckels' office in the First National Bank building, having decided, for himself, that Rudolph will have the giving of the good things.

## Louis Hill's New Role

Louis W. Hill, son of that grand old man of the Northwest, the builder of the Great Northern Railroad, spent a good deal of his time during his recent visit to California sketching. He paints quite well—for a capitalist—and he goes about his brush work with the zeal and energy that characterizes his business operations.

One of the peculiar things about him is that he will paint with great energy and then bury his canvases in the ground without letting anybody see them. He says his reverence to art will not permit him to make a show of his work. He was asked

by an acquaintance why he interred his paintings as fast as he finished them, or before they were even finished.

"Well," he replied, "you see, I belong to a very extensive society that is spread all over this country. It is known as the Association of Spanish Champions. I am president of the organization. The members spend their time in trying to become expert at throwing the bull. I am just keeping my hand in when sketching."

## Spring Valley Again

The Supervisors have resumed their negotiations with Spring Valley. They have discovered that Hetch Hetchy is receding in the distance. Meantime the people must have water and they must have extensions of the distributing system which they cannot get as matters stand. While the Supervisors are fighting Spring Valley, even the wells may go dry and the people of San Francisco have no liking for even that kind of a dry town.

So the Supervisors have voted to have another chin-chin with Billy Bourn and his associates. Whether they will ever agree can only be conjectured, for Percy Long and the Spreckels group in the Board of Supervisors persist in trying to make the Spring Valley people agree absolutely to their terms. One of the interesting bits of news developed is that the Legislature was to be asked to pass an act that would take away from the courts jurisdiction of the Spring Valley dispute.

When the matter was referred to Attorney-General Webb, that official put a damper on the enterprise by saying that the Legislature had no power to pass an act that would deprive the Spring Valley of its right to a judicial review in case its property rights were invaded.

## Harry Flannery's Latest Break

Last week Harry Flannery, once Police Commissioner, and formerly a Nevada politician of the practical school, called a meeting of choice spirits and selected candidates for all the important local Federal offices. He and his coadjutors sent on to Washington a recommendation signed by the Democratic Central Committee of San Francisco and the State Democratic League of California.

Flannery and his bunch have nothing to do with the Democratic State Committee, of which J. O. Davis is chairman, nor do they represent Theodore Bell's Democratic League. The recommendation they forwarded attempts to use the name of the State Committee and Bell's league by a substitution of terms. While slightly different, the names are so nearly alike as to deceive one not acquainted with the facts.

Flannery's only mistake was in not giving his saloon as the postoffice address to which President Wilson was to send the commissions. He might at least, in that case, have sold a few drinks while his companions in arms were waiting for their meal tickets to arrive from Washington.

## More Disappointments

The appointment mill at Washington is working sadly for reform. Phelan is not likely to be appointed Minister to Austria-Hungary and Gus Spreckels is no more likely to get his son-in-law appointed Ambassador to Berlin. These are sorrowful times, indeed.

In all the lists of probabilities sent out from the capital, the names of Phelan and Spreckels' son-in-law are missing. Wilson seems to have his head screwed on straight.

## Newlands Butts In

Senator Newlands of Nevada has created some consternation among the local applicants for office by assuming to have a voice in the distribution of the custom house patronage. He demands a better job for Stephens, a subordinate of Fred Stratton's, than he now has. He insists that Stephens shall be appointed either Surveyor of the Port or Appraiser. He claims to have made the discovery that Stephens is a Democrat. Stephens himself didn't find that out until Wilson was elected.

It so happens that Newlands is treading on the corns of James Ellis Tucker, who is now in Washington asking to be appointed Appraiser. Tucker was Appraiser during Cleveland's last administration and made an excellent record. He also stands well with the Blingum ho! polloi. Tucker's qualifications for the office are that he is a Virginian and once held the job. He went to Washington to make a gumshoe campaign for the Collectorship, but speedily found that he had chipped in without any pair. The State Committee was not for him, being candidates for office themselves, and the Congressmen were not for him because each Congressman was looking for an appointment on his own account. So Tucker dropped down a few pegs and modestly asked for his old position.

When he was appointed in 1893, his brother, St. George Tucker, was an influential member of Congress. He also had the backing of Stephen M. White and the Democratic members from Congress from this State and the endorsement of the State Committee. He has none of these aids in the fight he is now making.

Still, the importers and customs brokers generally would like to see Jim Tucker in the office of Appraiser. He was always courteous, fair and as straight as a string. In fact, if general good wishes could get him his appointment, he would win hands down.

## The Patronage Row

Members of the Democratic State Committee are

exercised and indignant that the Democratic Congressmen should protest at the White House against recommendations being received from the State Committee which do not come through them.

"The Congressmen propose to dish out the patronage to suit themselves," said a member of the committee, who, by the way, is not a candidate for office himself. "They want to pick the best plums out for themselves before they pass the pudding and they don't want any application to be heard or received that does not come through them with their endorsement. What gell! Who are these Congressmen who are claiming to be the whole Democratic party? Not one of them can be said to be important in the broad sense of the term. Every one of them comes under the head of drut! Raker was a cow county judge, a cross-roads politician. Church has more ability, but he never had anything more than a local prominence in Fresno County until a political tidal wave landed him in Congress. Nobody outside of San Diego County ever heard of Kettner until he was nominated for Congress. He was elected because the regular Republicans revolted against the Johnson-Rovell-Lissner machine. Half the Democrats in his district voted for the Progressive candidate and the two-thirds of the votes he received were cast by Republicans.

"Now these three chaps have resolved themselves into the whole thing. They have told the State Committee to go way back and sit down and keep quiet. They don't want anybody to have a voice as who is appointed to the most important offices on the Pacific Coast. The only thing that is worthy of admiration about it is the stupendous cheek exhibited."

But if my information from Washington is correct, no patronage will be distributed in this State until Congress is well into the special session. Wilson is not going to make the mistake Cleveland made of giving away the jobs until he finds out how the Congressmen are going to behave. Raker and his colleagues will have to jump through the hoop in the ring before they will be allowed to say much about the distribution of patronage.

Wilson has a program and the Democratic members in Congress will have to take that program if they expect to get patronage favors from the White House. Wilson will not give away the jobs and then take his chance on getting the legislation he desires. He will demand the legislation first and attend to passing out the pie afterwards.

Nor is he going to turn a deaf ear to anybody who offers him a suggestion worth listening to. He is not going to hand over to anybody the distribution of the Federal patronage in this State. In other words, he is not going to appoint any deputy Presidents.

## Senator Works and the President

While on this subject, I may add that Senator Works is on very favorable terms with the President. His position is an independent one and the President is disposed to defer to him particularly in regard to judicial appointments. Works was once a District Judge in Indiana, afterward Superior Judge in California and latterly a Justice of the Supreme Court in this State. He has a wide acquaintance among the members of the California bar, and the President thinks that his knowledge of the qualifications of the various candidates who are applying for judicial positions can be relied on. Which does not mean, however, that Works will be allowed to nominate the judicial appointees. I understand he is not trying to do anything like that and only offers his opinion when it is asked.

Wilson likes him for the independent stand he has taken. He does not want a man coming and begging offices for himself or his friends, but he does like a man who will give him freely and frankly advice when he asks it. Works disclaims having any influence with the President, but, nevertheless, the President listens to him with respectful attention and consults him on matters that he thinks need enlightening.

All this talk about Works being appointed to succeed either De Haven or Morrow is rubbish. It comes from Works' enemies. It was started by men who are anxious that Works should resign from the Senate in order that some member of the goo goo faction might get his place. Works has no intention of resigning and has no desire to be appointed judge. By trying to thrust him forward as an applicant for appointment, Works' enemies have made him stronger with the President.

## Railroad Building Suspended

Not a single hot air railroad has been built in San Francisco during the past week. The Bazoo brothers, the two Gallaghers, have suspended operations for the present. For a month or more the building and planning of railroads on paper went ahead with wonderful rapidity, but, strange to say, not a dollar was spent, not a man was put to work and not a foot of new railroad was actually built on the earth.

It was all in the air. If the exposition is to be a financial success, more railroads will have to be built to the fair grounds. After all the talk, we are just where we started. Joe Dwyer's waterfront railroad has vanished into thin air and every other railroad scheme launched in newspaper offices and the Board of Supervisors has gone to the boncombe scrap heap. Our transportation problem remains unsolved. The Mayor has endorsed a scheme to build a municipal system which will touch the fair grounds at several points, but nobody has offered to furnish the money and nobody has suggested a way to get it.

The Mayor himself has now got into a jaw fight with the San Francisco chapter of the American In-

stitute of Architects. I asked one of the city hall officials what he thought would come of it. "Nothing," he replied. I asked, "Who will get hurt?" "Nobody," he said. "It's a bull fight, more wind than blood. It is only a little aviation politics and will end like most of the wordy wars that are being waged about the civic center and the exposition."

The list of casualties will be short, I judge, and the results equal to the spoils of Don Quixote in his tilt against the windmills.

## Artists Going to Arizona

Francis McComas and Xavier Martinez are planning a sketching expedition to Arizona in the early summer. They expect to spend some months limning scenes and life on the desert. They will present their subjects from the different standpoints of pictorial art—water color and oil.

McComas has an international reputation as a water colorist. He has studied and sketched in various lands and his work everywhere holds a high place among art connoisseurs for draftsmanship and tinting. The art colony in this city look for him to bring back some fine canvases from Arizona.

Martinez paints in oil. He is an impressionist of the moderate school and at his best his work catches the appreciative attention of people with educated eyes. He and McComas will make a good team and doubtless they will contribute something worth while to the art of the Pacific Coast during their absence on the desert.

## Convicts As Prison Reformers

One can imagine the sardonic smile that will overspread the face of old Chris Evans when he hears that prison reform in California is under the direction of two hardened criminals, one of them an old pal of his.

The legislative committee now engaged in investigating prison management are not listening to the testimony of the Prison Directors and the prison officials; they are taking their cue from Edward Morrell and Donald Lowrie and appear to regard those leaders of advanced thought as safe counsellors in dealing with prison matters. Both are ex-convicts and prison reformers. Both are ardent advocates of the theory that convicts are a persecuted class and that prison officials are brutes as a rule.

The experiment of cranks following crooks in dealing with the prisons will be watched with interest.

Ed. Morrell has had a varied criminal career. He has served two terms in State Prison. He planted the arms on the Folsom prison grounds which George Sontag, the two Wilsons and several other desperate convicts used in the attempted break of 1894. Chris Evans furnished the munitions.

Afterward Morrell aided Evans to escape from the Fresno jail. While serving his sentence he was a turbulent and rebellious prisoner. He is convinced that no prisoner should be punished for violating prison rules.

Donald Lowrie has also served two terms in prison, and is now engaged in reforming the prison officials. It is his belief that our prison system is entirely wrong, and that judges, sheriffs, policemen and prison officials constitute the really criminal class. He has so worked on Warden Hoyle of San Quentin that Hoyle is almost sorry not to have Lowrie's claim to martyrdom at prison, sentence recorded against him. Hoyle is so imbued with the spirit of humanity and a sense of his own unworthiness that he seems willing to take a thief for his guide, philosopher and friend.

## The Rise of Market Street

Market street is a much finer thoroughfare than it was before the fire. With the exception of three vacant lots it is built up solidly from the ferry to Seventh street, and the new buildings as a rule are far superior to the ones destroyed.

This is notably the case with regard to the Hearst building, the Phelan building, the Palace Hotel and the building on the Jennie Flood block, corner of Fourth and Market streets. Among the notable new structures on the great central artery are the Humboldt Bank building, the Union Trust Company's building, the David Hewes building, Hale Brothers' department store and the building occupied by Roos Brothers.

The truth is that Market street never came fully into its own till after the fire. It is now a splendid modern thoroughfare because the fire cleaned the ground of the old wooden shacks and squat antiquated structures which continued to exist because they brought in big rents.

The gap below the Wells Fargo Nevada Bank will shortly be filled by the erection of a fine twelve-story building. This choice property belongs to the Hobart estate, and it is a matter of surprise that it has not been built on before.

When the group of buildings at the civic center are completed and John D. Spreckels has reared his twenty-five-story skyscraper on Market street, no city in the country will have a more imposing central thoroughfare.

There is nothing comparable to the change that has taken place on Market street save the rebuilding of the district around Union Square. Montgomery street is still in a backward, dilapidated condition, owing to the neglect of property owners to rebuild. For the same reason the wholesale business has largely shifted to the south side of Market street, where the streets are wider and access to the waterfront more convenient. But Market street is now the Broadway of San Francisco—the street of the city.

THE KNAVE.

## LOVESICK DAUGHTERS FORGET FAMILY DUTIES

By LAURA JEAN LIBBEY

(Copyright, 1913, by Laura Jean Libbey.)

LOVE is supposed to bring only joy into homes. But there are some domestic fires in which peace flies out of the window when love enters the door. There are many under love's magic spell who actually home topsy-turvy without realizing it. The family is shut out from the parlor when he comes a-courting. They have to exercise patience on the evenings he is not there. Instead of enjoying the society of the daughter of the house, she is in her room writing letters to him.

When father opens the paper of an evening he finds the page of the paper he most wanted to read cut here and there. "She only clipped a love poem," exclaimed the mother. "Mary was anxious to send it to John." Father's sigh resembles a long drawn out groan. A very timid girl is Mary, but she does not hesitate to slip out of the house and around to the mail box with his letter, though the clock in the belfry is tolling near the midnight hour. Neither does she storm at her father. When father sets his foot down that she shall not go out to mail the letter, that it won't do her lover a particle of harm if he misses it once in a while, rather than have him do without it, Mary will use a messenger boy, to which the tender missive is entrusted. There's nothing but love songs sung or played upon the piano.

Days that were once spent in darning or in helping mother wash the house are now spent by Mary in making sonnets, or in making trips to the stationery shops, for renewed boxes of correspondence paper.

To father's expositions mother replies timorously: "Mary doesn't expect to be courted but once. Let her have her fling while she is young, my dear."

At night if father stays out at a business meeting he has to grope his way through the dark hallway. The light is turned down to a point so dim that he can scarcely see the stairway. Mary and John don't care for useless waste of gas. Spooning never do. When John would take her out of an evening for an entertainment the tension on the family's nerves would not be so great. When it comes to spend six evenings a week spooning, father decides that it is high time to marry.

When they get a lover there are daughters who forget that there are obligations which they owe to their home folks. They may add many a care to shoulders already bent to burden carrying. Those in love should remember that they will not be with their home folks for long. They should leave only pleasant recollections behind them. A girl should not strain the old loved home ties for the sake of the new affection.

At the father's home everything is different. His spooning does not inconvenience the family. He steps out after dinner and lets himself in with his latchkey. And as for the letters, he can dash off a reply at no time in the office.

O these irrational, lovable, spooning couples! They're a bit troublesome, but what would that matter? When all is said and done spooning is the happiest time of their lives. When a girl comes to a spooning to her side every evening in the week to spoon she may feel tolerably safe in the belief that his love will last forever.

### A FEW QUERIES.

"Dear Miss Libbey: What is the duty of a young woman when courted by a young man for the first time? Should she wait for the gentleman to mention his going home before she goes in the house, or should she invite him in? When he comes at a place and the young lady's company comes, who should go to the door when he arrives, the mistress of the house or the boarder? At church, when sitting in the same seat with others and you have occasion to leave the seat and have to go to the front of the occupants of the seat is it proper to say 'Please excuse me?' I have heard it is not proper to congratulate a bride. What should be said? IGNORANT."

Unless it is very early in the morning she should invite him in. The young man should know enough not to keep her standing out in front of her home for any length of time. It is optional who opens the door in such a case. It is entirely proper to say "Excuse me" under such conditions.

### NEVER TAKES HER ANYWHERE.

"Dear Miss Libbey: I am 19 and desperately in love with a young fellow of about the same age. He seems to be very devoted to me, but he only comes to see me on Sunday evenings. Now, there are good many pleasures through the week that I would love to go to, but he doesn't seem to think of that, and as we go together steady ones to the other fellows seem to care to ask me. Now, would you advise me to keep on going with him or would it be wiser to give him up and find some one else? I will try and abide by your advice. BETTY."

If the fellow is calling on you every Sunday evening, nonstop, you time, he ought to make it his business to take you somewhere once in a while. I don't much approve of young men who call

LAURA JEAN LIBBEY.

steadily on a girl without ever showing the slightest appreciation of the girl's hospitality. Suggest to him that you would like to go about a bit. If he still prefers to call on you Sundays without making any returns just let him go. There is nothing to be gained by encouraging such a selfish fellow.

### HAS HIS LOVE GROWN COLD?

"Dear Miss Libbey: I have been going with a gentleman for about fifteen months, and now I fear his love for me has grown cold. Sometimes he comes to see me three or four times a week for several weeks at a time, then he does not come about for several months. He tells me that he loves me as much as ever, but I am doubtful about this declaration. Shall I remain true to this friend (I think he intends to ask me to marry him) or shall I treat him cool?"

I don't think you had better count much on such a fickle fellow. However, I don't believe he is deeply interested in you or he would not let several months go by without seeing you.

### STILL LOVES HER.

"Dear Miss Libbey: For almost two years I have kept company with a young man of excellent habits. I thought I did not care for him at the time, and, therefore, broke up friendship without giving him any reason. Now, this young man still loves me and would like to take me out once in a while, but he thinks I am keeping company with another young man and does not want to get into trouble. Last week he took me to a party. He wants to call on me today, but he is too bashful to ask. Do you think it was my part to ask him to call?"

It is the girl's privilege to invite the young man to call.

### IS A TEACHER.

"Dear Miss Libbey: I am a pretty little thing of 23, but nobody could know, since I look much younger. I teach in a rural school and the pupils all seem to love me, as I am so good to them. My oldest pupil is a youth of considerable wealth and standing, as his father owns many acres of good land. The obstacle which keeps me from becoming better acquainted with him, as I love him very much, is he has a sweetheart. (She isn't dear as pretty nor as nice as I am, but still she knows how to keep the men. What shall I do to get him? Please help me. Would it be proper to keep him in and talk to him during recess?"

LOVEY.

I can't understand how such a silly, young girl can be so sure of her position. You better try to imitate the other girls' virtues. Until you have acquired some sense I am afraid you will not be much of a success with men. You had better get a fellow of your own kind, instead of trying to steal away the affections of one of your pupils from his sweetheart. You will only make a laughing stock of yourself.

### DOG GIVEN MEDAL FOR SAVING MAN FROM BULL.

(Special to THE TRIBUNE by International News Service.)

LONDON, March 29.—For saving his master's life from a bull, a collie owned by James Wilson Jr., Berwickshire, has been awarded the medal of the National Canine Defense League.

Mr. Wilson was attacked by a bull, which had thrown him and was about to gore him, when Glen seized it by the head, and by thus diverting its attention enabled the farmer to throw it over the infatuated animal's horns.

### CORONADO ISLANDS LEASED BY MEXICO.

SAN DIEGO, March 29.—The Coronado Islands, a small group about 20 miles off the Mexican coast, have been leased by the Mexican government for five years to Jose L. Carrasco. The latter will turn the concession over to a group of American capitalists, who purpose to establish quarries on the islands.

### CHINESE MERCHANT SUES FOR DIVORCE.

SAN FRANCISCO, March 29.—Mar Chee, a Chinese merchant, filed suit for divorce today against Lo Chee, whom he says deserted him in 1909. At that time Mrs. Lo took with her their only child, aged 15.

## Have You a Piano in Your Home?

If not you have probably failed to take advantage of the unheard of price reductions we are making right now on account of the damage (which was very slight) to our high-grade stock of

## Have You Nasal Catarrh?

S. B. Hartman, M. D.  
Columbus, Ohio.

Can you breathe through your nose? I mean, can you breathe freely through each nostril? If not, do you know what the reason is? It is nasal catarrh.

It may not be a far advanced case. You may not have thought of catarrh, or given the matter much thought. But if you cannot breathe freely through each nostril, be sure there is something wrong. Nature intended you to breathe through the nostrils. Both nostrils.

Try first one, then the other. Every morning when you get up practice deep breathing through the nostrils. Put your finger on one nostril and hold it tight. Breathe through the other. Then the other. Backwards and forwards, do this.

At the same time you should take Peruana. The dose on the bottle is one tablespoonful. You had better make it three tablespoonfuls. The reason why I direct this is because I want you to take a tablespoonful of the Peruana and as you swallow it down breathe the fumes of it out through the nose. Then the next tablespoonful do the same thing, and so on until the three tablespoonfuls are taken. This, however, is after you have thoroughly cleansed your nose by deep breathing.

While you are practicing the deep breathing you may snuff up the nose a little salt water. A teaspoonful to the quart of warm water.

But after you have thoroughly cleansed your nose then take the Peruana as above directed. Do not put it off. Do it now. Do it before your nose gets bad. If only one nostril is partially stopped now it will not remain so long. It will stop up entirely. The other will be stopped, too. Begin now. No. 55.

## CANDIDATES FOR DIRECTOR SPEAK

Women Who Seek Places on Board of Education Tell of Ideals.

The first of a series of district meetings which are being planned for every neighborhood of Oakland, to introduce the women candidates for the School Board, was held at the Laurel School, Upper Fruitvale, last Wednesday, under the auspices of the Laurel Club. Dr. Minora Kibbe presided.

The rooms were crowded with interested voters of the district. The churches and clubs were represented.

Dr. Kibbe in her opening address gave the reasons why the women of Oakland want a just and fair proportion of the School Board to be women.

The three women candidates made excellent impressions. Mrs. Agnes Ray, Mrs. Harriet B. Hawes spoke of the ideals they hoped to live up to in case of election. Mrs. Ray brought out the point of women's wide spread interest in the schools as exemplified by the numerous Mothers' Clubs.

Mrs. Annie Florence Brown gave a splendid account of her two years' work on the School Board and mentioned two points of special interest to her hearers to their entire and enthusiastic satisfaction and approval.

Songs were charmingly rendered by Mrs. Camilla Buegermeister.

floor of the school building. They have a wonderful display of bulb flowers. The meeting was a complete success and eight similar meetings are already arranged for as follows:

Tuesday, April 2.—At 2:15, Women's Central Oakland Civic Club, Mrs. Williamson, president, 5302 Telegraph.

At 3:30, or as soon as you can get from other appointment, Mrs. Wm. C. Little, 2521 Broadway.

Thursday, April 4.—At 2:30, at school No. 1, Boston ave. and School St. (Mrs. Fern).

Monday, April 7, 4 o'clock—Park Boulevard Neighborhood Club, Newton ave. and Park Boulevard (4th Ave. Hill), Mrs. Stealy, president.

Tuesday, April 8, 2 o'clock—Mrs. E. B. McNamee, 1875 25th St. 3225 Colman City Center, California Hall, (Miss Symmons).

### PRIVATE DETECTIVE MOVES FOR NEW TRIAL

SAN FRANCISCO, March 29.—James Christy, the private detective who is alleged to have tried to influence Esther Minter against testifying in a Police Court case, appeared for sentence before Superior Judge Dunne today. His attorney, William Hoff Cook, entered a motion for a new trial and the case was continued until Wednesday. The trial in which Christy testified that he was the one responsible for the present movement to recall Police Judge Weller.

DUPLICATED ROUTED. SAN FRANCISCO, March 29.—An attempt was made to break into the home of Mrs. James Spiers, 1724 Valicello street, last night. A burglar tried to force a side window with a jimmy but was frightened off.

## MUCH WATER IN YOSEMITE FALLS

Abundant Snow Promises a Beautiful Volume for Prolonged Season.

Visitors and sightseers to Yosemite this season will find an abundance of water in the falls. Forest Ranger A. J. Gaylor has just made a trip from the falls to the Merced and Tuolumne groves of big trees, to El Portal, going via Glacier Point and Chinquapin station, and he reports much snow extending over a wide area of this park along the 5000 and 7000-foot levels. With these conditions at the points named, the snow in the high mountains above the 10,000-foot level must be exceptionally deep.

So much snow in the park at this time of the year, and a chance for more snow to fall yet, means a prolonged season for the waterfalls of Yosemite Valley, which, of course, will add much to the interest of the trip, for the waterfalls in Yosemite are marvelous for their beauty of setting as well as for their great height and volume. Foreign travelers travel far for a few hours' glance at the wonders of Yosemite and go away pronouncing them magnificent, superb. Yet the average resident of California is indifferent, not realizing that the trip of a life time is close at hand and may be enjoyed for about the cost of many a commonplace resort to which one people rush every summer.

However, this wonderful region is becoming more properly appreciated each season as a national scenic at-

traction and a vacation ground for California people. Every year thousands tour Yosemite and the big groves are a sightseeing trip. Other thousands of people spend their vacations there and live for weeks amid its grandeur. The park and valley belong to the people and they should make it more fully their own, individually by going there frequently.

## Y. M. I. LAYS PLANS FOR MINSTREL SHOW

The members of Oakland Council No. 6, Young Men's Institute, are completing arrangements for a minstrel show to be given on Wednesday evening, April 16, at St. Francis de Sales Hall at Jones and Grove streets. Rehearsals are being held twice a week in order that the chorus consisting of forty voices will be perfectly trained.

In addition to the chorus there will be six men and a like number of soloists on the stage. The affair is being held for the benefit of the council's new headquarters and the fund secured will be used in furnishings for the club rooms. President John Gallagher is chairman of the committee.

## LIE HELPS THIEF TO FIVE-YEAR SENTENCE

SAN FRANCISCO, March 29.—Because he told a lie and was found out, Edward Dickson, a young man still in his teens, was sentenced to five years in San Quentin by Superior Judge Dunne today. Dickson was caught sneaking rooms in the Hotel Turpin on January 11. He was well supplied with money and told a story of sudden temptation, saying that he had been wandering about the country on funds acquired from a dead father's estate. His story proved not to be a true one in several particulars and today he was sent to prison.

## CHAUFFEUR APPEARS IN POLICE COURT

SAN FRANCISCO, March 29.—Albert Mahan, a chauffeur of 1719 Oak street, appeared before Police Judge Weller today on a battery charge, in connection with the automobile accident early yesterday morning, resulting in the death of Frank J. Barry, a wealthy rancher and capitalist of Cottonwood. A manslaughter accusation was substituted for the lesser offense and the accused was instructed and arraigned, his case being continued until Monday.

George V. Myrick, a capitalist and farmer of Sacramento and Martinez, who was also injured in the wreck is recovering and was up and about today.

Edna Monroe, the woman who was thrown out of the machine, proved to be only slightly hurt and Mahan himself showed little effects of his experience.

## PASSED FICTITIOUS CHECK.

SAN FRANCISCO, March 29.—At the instance of Walter H. Levy, employed by Barney Frankel, a clothier of Eddy and Taylor streets, a warrant was issued by Judge Sullivan today for the arrest of C. B. Townsend. It claimed that Townsend, on March 21, passed a fictitious check on the firm for \$25.

## SESSION CLOSED BY FREE MASONS

Convocation of Order at Local Cathedral Most Successful Affair.

The convocation of the bodies of the Ancient Accepted Scottish Rite of Free Masonry, which has been in session in the Masonic Cathedral for the past three days was brought to a close with a dinner last night at 8:30 o'clock. A class of fifty new members has been put through the work of the order and the degree work put on by the out-of-town chapters has been carried out impressively and with the utmost success.

Among those high in the order and who have been in attendance at the present reunion are: William P. Fisher, sovereign grand inspector in the northern jurisdiction of California; James B. Merritt, Frank D. Moyer, G. Liderton, Carlos C. White, John A. Hill, Gifford H. McGraw, Benjamin D. Johnson and Nathaniel E. McDonald.

## BOY WINS LICENSE IN FOURTH TRY

He 19, She 15, Official Paper Is Thrice Refused Them.

FREDERICK, Md., March 28.—After being refused a license three times, Robert M. Anderson, 19 years old, and Sadie Martin, 15, both of Brunswick, Md., were married this week.

The first attempt to secure a marriage license at the Frederick courthouse was made by Mrs. Anderson, mother of the bridegroom. She was refused by the clerk because of the youth of the parties. The second refusal was because the signatures of the parents of both parties were not obtained. The third effort was the fault of Anderson himself, who lost one of the applications while on his way to the clerk's office.

Anderson was not discouraged, however, and this morning, with new applications, he appeared on the first train and went to the clerk's office where his much-sought-after license was smilingly given to him.

You are the one who must pay the dentist and the one who must care for your teeth, and you owe it to yourself to demand painless dentistry. Without pain a poor dentist can do better work and save time, which is saving you money, and, besides, you are not exhausted and a nervous wreck after every visit to the dentist.

—PAINLESS PARKER.

## Don't Let Others Do Your Thinking

About my dentistry, or about anything else. Whenever a man presumes to tell you what to do or not to do, it is an insult to your intelligence. I want you to think for yourself.

Get all the facts about Painless Parker dentistry and you will be just as wise as any of my imitators.

Any man who makes a success in this world is a shining mark for his envious imitators. Because I was the first to originate painless dentistry, and in a quarter of a century have built up the largest dental business in the world, I must be making good. Therefore you owe it to yourself to find out what so many others already know.

I make free street demonstrations so that you can find out without cost that I make good my claim of doing HIGH-CLASS PAINLESS DENTISTRY. You can also come to my office and get one dollar's worth of any kind of work done free to satisfy yourself. When I tell you I can do anything in dentistry WITHOUT PAIN I must make good or lose the big business I have spent a life-time to build up. You take no chance when you come to me. CONSULTATION AND EXAMINATION FREE.

HOURS—8:30 to 6. Closed Sundays.

Miss Gussie Mast, blind lyrie soprano  
(member of the faculty of Back-  
ley blind school)  
Piano, "Prelude," op. No. 2 Rachmoff  
Miss Hazel Lapham.  
Violin, "Zigeunerweisen" (Gypsy air)  
Thorvald Andersen.  
Male quartet "Silver Threads Among  
the Gold," Messers. Jackson, Manning,  
Latimer, Peterson.

## HARPIST BRIDE AT CHURCH WEDDING

Miss Zeala Cook Marries  
Raymond C. Smith in  
East Oakland.

The wedding of Miss Zeala Cook and Raymond Corbin Smith was solemnized last evening in the Church of the Advent, in East Oakland, Rev. William Wheeler officiating. The ceremony was attended by the relatives of the young couple only, and the bride was attended by her sister, Miss Doris Cook. The attractive bride was beautifully gowned in pink brocade draped in blue tulle and carried lilacs of the valley.

The young couple will spend their honeymoon in the south and upon their return will make their home here. A large number of handsome wedding presents attested the popularity of the bride and bridegroom. Mrs. Smith is the daughter of Mr. and Mrs. James Cook and is well known in this city as a pianist and harpist.

## AVOID DANGEROUS OPERA- TIONS FOR APPENDICITIS, GALL STONES AND STOM- ACH TROUBLE.

One Dose of Mayr's Wonderful Stomach Remedy Will Bring Quick Relief and Convince You of a Cure.

If you suffer with Stomach, Liver and intestinal ailments, indigestion, dyspepsia, Pressure of Gas around the Heart, Sour Stomach, Distress After Eating, Nervousness, Dizziness, Sick Headache, Fainting Spells, Constipation, Congested and Torpid Liver, Yellow Jaundice, Appendicitis, and Gall Stones obtain a bottle of the Wonderful Remedy and put it to a test at once.

## AWFUL STOMACH SUFFERING

One dose will positively prove its great power to cure. Over one hundred thousand sufferers have taken it; some had undergone dangerous surgical operations, but now state that Mayr's Wonderful Stomach Remedy completely cured them. It is the most widely known and successful remedy for all Stomach, Liver and intestinal ailments.

Ask for interesting literature and convincing testimonials regarding this remarkable Remedy. Give it a trial today. You will be convinced of its great curative power. Matter how skeptical you may be now. Send for FREE valuable Booklet on Stomach Ailments to Geo. H. Mayr, Mfr. Chemist, 154-156 Whiting St., Chicago.

## ST. MARY'S JUBILEE AUTO PARADE SET FOR MAY 3

Fund for College Celebration Is Fast Mounting Upward

The automobile parade which was scheduled for April 12 and the proceeds of which were to be used in connection with the fund being raised for the golden jubilee of St. Mary's College in June, has been changed to May 3. Announcement to this effect was made yesterday by Mrs. R. H. Hammond, chairman of the committee in charge of the affair.

Indications are that the jubilee fund will reach larger figures than even the most optimistic predicted. Catholic organizations on this side of the bay, in San Francisco and in other bay counties are responding to the request of the local society and a steady flood of silver is pouring into the fund being collected for the coming jubilee.

Among the events calendared for this side of the bay is a cullion, which will be given in the gymnasium of St. Mary's College by Miss May Tracey. The date for the affair has not yet been announced. The patronesses will include Mrs. W. J. Sweeney, Miss Mary Lambert, Mrs. E. F. Chapman and others. Other local as well as bay county Catholic organizations are preparing other similar events, the proceeds of each to be used for the St. Mary's general jubilee fund.

Coch Otero Rittler is arranging for a circus to be presented during the week of the jubilee celebration on the college stadium. The idea is a new one and many unique and interesting stunts are being planned. Among those who are assisting in building up the fund are Captain J. F. Lynch, M. R. Bronner, John F. Mullins and others.

## SURROGATE JUDGE HIDES SCANDAL

Jurist Admits Will to Probate Without Disclosing Name of Family.

NEW YORK, March 29.—In order to keep hidden from the public view an unpleasant incident in one of New York's oldest and most socially prominent families, Surrogate Judge Robert Ludlow Fowler, himself a representative of one of the city's most distinguished Knickerbocker families, today exercised the prerogatives of his office to an extent declared by attorneys to be almost unprecedented in the history of the courts of this county.

When it became necessary to hand down a decision constraining the will of the man in question, and to discuss the incident which the family greatly desires the cloak of secrecy to be thrown, the Surrogate went to the extent of entitling his decision:

"In the matter of proving the last will and testament of Anonymous, deceased."

Although decisions and other papers in probate matters are usually accessible to the public, the Surrogate has been requested by newspapermen to explain the mystery that enveloped his decision, he exclaimed:

"I will do no such thing. I would rather go down and out with this whole office than reveal the name of this man."

"Was the testator a poor man?" the Surrogate was asked.

"No, he was not," he replied, then added, hesitatingly. "That is, he was not too rich."

The story as given in the Surrogate's opinion is this: The testator bequeathed a portion of his estate in trust for the benefit of his natural son, and another portion in trust for the benefit of his daughter, the latter either a married woman or a widow—just which does not appear.

## CHILD WAS ABANDONED.

"It appears by the will that the unnatural mother of the infant son had abandoned the child to the care of a stranger, rendered or committed the child to his natural father, and that thereafter he had married some one other than the child's father and disappeared. The child was baptized and in due time had received the name of his natural father."

"In this situation, testator's daughter, without her father's knowledge or consent, formally adopted the infant as her own, and she gave him her husband's name. It is stated in the will that this adoption was pursuant to the laws of this state. Whether the daughter was moved by compassion, affection or religious scruples, to adopt the natural son of her father, does not appear. The such adoption was without her father's consent, and that he wishes the infant to bear his name, does not appear in the will."

"Testator's will nominates his daughter as the guardian of his infant son. In the separate clause of the will, quite distinct from the words of gift, testator provides, in substance, that such adoption of the infant son is to be undone within six months after testator's decease, unless, before that time, the testator's daughter fails to have rescinded and annulled and made void and of no force and effect the said adoption, or in any manner interfere or seeks to prevent the infant son's resumption of his baptismal name. It is stated in the will that the nomination of the daughter as the guardian of the infant."

## MURDERER WEDS WHEN PARDONED

Girl Lives in Shadow of Prison to Visit Sweetheart Often.

MOONSVILLE, W. Va., March 28.—Living in the shadow of the walls of the state penitentiary and remaining true to her sweetheart of girlhood days, sentenced to serve a life term in prison for killing a man, Miss Lucy Kimberly has been rewarded. Frank Pearson, her sweetheart, was released on a pardon and the two were married.

Pearson is the son of the president of the Penitentiary, who has been in the holdings in the southern part of this state, and is a brother of State Prison Attorney Pearson. His family is very wealthy.

Pearson met Miss Kimberly when about 17 years of age. Two years later, in Charleston a young man made an improper remark to his sister. Pearson shot and killed him. The Kimberly family moved to a house in the shadow of the penitentiary, and the girl visited her sweetheart frequently. The marriage was performed by the Rev. J. B. Smith, of the First Christian Church.

## VALUABLE POCKETBOOK LOST IN LOS ANGELES

LOS ANGELES, March 29.—W. J. Alexander, a recent arrival from Seattle, reported to the police today that he had either lost or had stolen from him a pocketbook containing \$160 in cash and other papers valued at \$950. This included a \$350 letter of credit and notes amounting to \$400, together with a railroad ticket to Seattle. Alexander said that he had been walking about the city today and had suddenly missed the purse, and the police are inclined to believe that the theft is the work of "pickpockets."

## STEEL COFFINS, AT TEN CENTS, BECOME TROUGHS

BOYERTON, Pa., March 29.—Farmers for miles around came here yesterday to attend the most unusual sale ever held in this section, and bought at bargain prices a lot of heavily rolled steel coffins at from 10 to 35 cents each.

A burial casket company purchased the coffins 15 years ago, but they were too much rusted and could not be disposed of. The coffins will be sold by the farmers for watering troughs for their stock.

## FRANCOIS DOES PIKE'S PEAK

Experiences the Superlative of Wonder and Admiration at Nature's Sublimity.

(Francois, the Troubadour, who is working in the hotel Oakland, Oakland, Cal., to the Waldorf Astoria, New York City, is writing his experiences in a correspondence to THE TRIBUNE.)

PUEBLO, Col., March 24.—Left Denver yesterday at 6 a. m., arriving Pueblo last evening just in time for the evening performance at the Grand Opera House. I enjoyed the trip from Denver to this city immensely. Visited enroute such famous landmarks as the famous Elephant Rock, Palmer Lake and Pike's Peak. And right here I wish to say a few words about Pike's Peak.

I have traveled extensively during my life, but never have I derived so much pleasure in visiting a landmark as I did whilst "doing" Pike's Peak.

I experienced the superlative of wonder and admiration at that has been revealed in the splendid expanses of mountain and plain culminating in the sublimity of this massive bulk.

After the performance at the opera house I was interviewed by a reporter from the Chieftain, after which I retired to the Hotel Congress, at which place the worthy and very capable manager, Mr. Oakes, extended to me the glad hand of fellowship and hospitality, and invited me to become the guest of the Hotel Congress during my stay in Pueblo. I was pleased to accept his invitation.

This morning I was visited by several reporters from the local papers.

Will remain in this city for a week, after which I proceed to Canon City, at which place I will appear at the Princess theater for a week. Will also try to get a good story for THE TRIBUNE while in Canon City.

I forgot to mention that the Daughters of the Revolution of this city will give "The Fire Flies" in the Grand Opera House on Friday and I will do the tenor roles.

## WEARS BOY'S GARB TO FIND WORK

Woman Declares It Only Way to Escape Evil Life.

BUTTE, Mont., March 29.—A woman who gave her name as Ella Lewis, her age as 33, her last home as Chicago, was arrested here for masquerading as a boy. In charge of a humane officer, she has been taken to the Florence Crittenton home at Helena, to prevent her from carrying out a determination to commit suicide because of her discovery and humiliation.

Her story is that she donned male attire as a last resort to maintain virtue and respectability in an effort to earn an honest living. She found she could not do it as a girl; that men and boys earned sufficient to live respectably, while girls starved and were driven to shame.

Ten days ago she came to Butte from Chicago, and since has maintained herself scantily by working extra as waitress in restaurants.

Yesterday she entered a second-hand clothing store and purchased a boy's outfit. The wife of the proprietor gave her \$1 for her hand.

PREFERS DIVORCE  
TO VOTELESS LIFE  
Women Will Seek Rights Despite Husband's Disqualification  
Portland, March 29.—To be an ardent suffragist, and yet to be prevented from registering and voting by the downright meanness of her husband, is the complaint brought to Deputy Held at the courthouse by a young wife this forenoon.  
"My husband is a Canadian and has taken out his first papers," she told the deputy. "That entitles him to vote under the laws of Oregon, but in my case it is different. The law regards the wife as of the same nationality as the husband, and until he is fully naturalized his wife continues to be a foreigner and not entitled to vote."  
"That is my fix. My husband can cast his own vote, and he takes delight in preventing me from doing the same. 'You can't vote,' said Held, 'unless you get a divorce and take out citizenship papers yourself.'"  
"That's just what I'll do," said she. The total registration of women voters is 8461. The number is disappointing to the deputies. It is estimated that there are 35,000 women eligible to vote in the city, but from all indications the registration will be only a small fraction of the total. There are still 22 days in which to register.

## The Facts Are Comforting, but the Need Is Urgent

As the news from the flooded district in Ohio and Indiana takes on the complexion of authenticity, it develops that the loss of life has been greatly exaggerated. The property loss is immense and the distress and suffering widespread and acute, but happily not nearly so many have perished as was first reported. Excitable and terrified people magnified the stories of calamity that passed from mouth to mouth, and added the terrors of their own imaginations to the actual horrors which environed them.

We had the same experience out here when San Francisco was destroyed by earthquake and fire. The life loss grew from hundreds into thousands, and for a week after the catastrophe the details increased in horror and the death roll mounted. It was sent out to the world that Santa Cruz had been overwhelmed in a tidal wave and that the larger part of Oakland had sunk and thousands of people swallowed up in the waters of the bay.

There was no tidal wave at Santa Cruz and there was no land sinking in Oakland or anywhere in the vicinity. The only people who lost their lives in Oakland were a family of actors who were surreptitiously occupying an old building that had been condemned as unsafe by the fire department.

In San Francisco the total death loss from earthquake and fire was less than five hundred. The stories of ghouls robbing the dead and looters being shot while the city burned and the earth shook were mere figments of imagination. They were invented to supply the lack of authentic details. But while imagination added fictitious horrors to the occasion, the catastrophe was none the less terrible and overwhelming. A great city destroyed and three hundred thousand people made homeless and practically destitute in a day is a calamity that taxes the mind to grasp and comprehend. In looking back to that time of stress, terror and excitement, one cannot but marvel that the people bore themselves so well; that they showed so much respect for law and order and the rights of property; displayed so much courage, humanity, self-denial and self-restraint; and that the spirit of fraternity and helpfulness should have been so universal and spontaneous. The acts of charity, sympathy and generosity were as a thousand to one exhibition of brutality, heartlessness, cowardice or inhumanity. San Francisco has no prouder boast than the behavior of her people during the fire and the weeks immediately following.

We have no doubt the inhabitants of the flooded districts in Ohio, Indiana and Illinois are displaying the same admirable spirit of humanity and fortitude. Ninety per cent of the stories of looting, crime and disorder can safely be set down as inventions or exaggerations. In San Francisco heroism and humanity were so general and conspicuous that the sporadic lapses into barbarism became more obnoxious by their rarity and exceptional character. Nevertheless the calamity was one to appall the stoutest heart, and the privation and distress it entailed appealed to every generous instinct of the human heart the world over.

That is the case in the Mississippi valley today. Business and transportation are paralyzed in a vast district comprising an area, approximately, of one hundred thousand square miles and a population of several millions. An immense number of people are homeless and destitute and exposed to the weather in an inclement season in a climate much severer than ours; they are cut off from supplies and deprived of the means of supplying their wants. Because fewer lives have been lost than the published reports have led us to believe does not diminish the need of the survivors nor the urgency of the appeal for help. Women and children are on the verge of starving and freezing amid the ruins of their dwellings and the wreck of an abounding prosperity. No doubt the people there are bearing themselves well. Let us who are ensconced in comfort under smiling skies, with the currents of business and life pulsating in their accustomed channels, bear ourselves equally well. The distance of calamity is apt to dull the edge of philanthropy. It should not be said of Californians that they have so soon forgotten their recent dreadful experience or that they are ungrateful for the sympathy and aid extended in their hour of need, or are unmindful of the sufferings of others and the call made upon them in the name of humanity.

## International Disarmament Proposed.

Great Britain has taken the first practical step toward international disarmament and paving the way for the establishment of international peace. This step has been taken by Winston Churchill, the First Lord of the Admiralty, in submitting the British naval estimates to the House of Commons. Churchill's plan is that all of the naval powers of the world cancel all of their programs of construction for next year. In his speech he made the proposal especially direct to Germany.

Churchill's argument against the folly of persistent naval expansion is invincible. The policy has annually increased the burdens of the people of all of the great naval powers, until the cost of naval construction and naval maintenance has reached enormous proportions and that without attaining the end sought when the rivalry of Germany, through the intense passion of the Kaiser to raise the standard of its fleet to the level of the British navy, was started. Germany's naval program was at once met by Great Britain to maintain its two-power standard, and "the wasteful, purposeless and futile folly," as Churchill describes the acute rivalry in armaments which has been fostered by both nations has accomplished nothing except to increase each nation's demands for a larger budget. Other nations, not directly a party to the rivalry, have been forced to increase their navies in self-defense of their own interests on the sea and to discourage the temptation which sometimes presents itself to a strong and aggressive nation to oppress a weaker neighbor. But the general result of the rivalry, as to the relative status of the fleets of the leading naval powers, is just where it was when the foolish ambition of the Kaiser was awakened.

If Churchill's proposal to the naval nations is accepted in the same spirit of sincerity with which he has evidently made it, the world at large will be immeasurably benefited by it. But it remains for Germany, the initiator of the program which has been carried on for several years past, to make the first friendly re-

## End of the Balkan War in Sight.

The fall of Adrianople, the ancient European capital of the Ottoman Empire, has changed the whole character of the war in the Balkan peninsula and the end of the bloody conflict and the dissolution of Turkey in Europe is close at hand. The great fortress was carried by storm by the Bulgarian and Serbian forces that have invested it and hammered it mercilessly for several weeks, led by their respective generals in person. The final capture of the fortress was clearly foreshadowed early in the week when the allies captured the eastern line of forts and concentrated their fire on the citadel. The city was, however, in flames when they finally entered yesterday. Shukri Pasha is represented to have applied the torch to the city before surrendering his sword, preferring to witness its destruction by fire than the triumphant entry of the victorious armies.

The great Turkish arsenal, powder magazines and barracks had been blown up previously by the concentrated fire of the siege guns of the allies.

Simultaneously with the capture of Adrianople comes the news that the center of the Turkish lines at Tchatalja had been forced by the Bulgarians and the way paved for entering Constantinople, that city being now practically defenseless. Adrianople was the key of the capital's outer defenses and the forts at Tchatalja constituted the inner and last line of defense.

The fall of Adrianople makes it possible now for the seasoned veterans of the Serbian and Bulgarian armies that have forced its surrender to be transferred to and aid in the reduction of Scutari, the only Turkish fortress of any consequence on the Balkan peninsula that is still holding out. Everything has indicated for the past two weeks that Scutari is on the verge of surrender. Austria's intervention in demanding that Montenegro release its starving non-combatant inhabitants has merely had the effect of postponing the final surrender of the garrison. Now that Adrianople has fallen into the hands of the allies and the Tchatalja lines have been broken, it is doubtful whether Austria will single-handed proceed any further in its diplomatic aggressions against Montenegro and Serbia.

The chancelleries of the European powers are, however, busy planning co-operative mediation between the belligerents, in order to minimize the disaster which has overtaken the Turkish government and save for it as much, at least, of its territory in Europe as will enable it to continue the control of the Dardanelles. But the triumph of the armies of the allied Balkan states is calculated to strengthen the assumption that they will not willingly surrender any of those demands as a condition of peace which they have previously made, or the fruits of conquest to which they are rightfully entitled.

## DREAM IN SCIENCE

Almost all scientific observers agree that the materials of which dreams are made are memories of past experiences of the individual. Curiously enough, the memories that occur most frequently are those of the previous day and those of early childhood.

In many cases where the incidents of a dream seem to be entirely unfamiliar, it has been shown by careful investigation that they correspond to actually experienced events that have escaped the memory of the waking self. Delboeuf records an interesting example of this.

In 1862 he dreamed that he found two lizards in the snow. He took them up, warmed them and placed them in a hole in a wall, together with a small fern, which he knew they liked to eat. The name of this fern seemed in his dream to be Asplenium ruta muralis.

On awakening he could not remember ever to have heard the name of the fern of his dream. Although he discovered that a fern called Asplenium ruta muralis really existed. Sixteen years later, however, he happened to be turning over the pages, and to his surprise came across the name of a friend's album of dried flowers, with the Latin name written underneath in his own handwriting.

## WITTY BITS

"Oleo" sounds not a bit like a Swiss model to a number of prominent Chicagoans.

Even in the plans for the city beautiful there are no specifications for self-shoveling sidewalks.

Turkey evidently intends to be carried out of Europe at the head of a slow and dignified procession.

Still, Illinois prefers to rest its claims to fame upon its annual corn crop, not on its annual deadlock.

From a literary point of view also the county board is unsatisfactory. It has plenty of action but no plot.

Young Alfred Noyes has well earned the title of the greatest English poet living. One can begin at either end of his

## Twenty Years Ago Today

A number of ladies are being entertained at luncheon at the residence of Mrs. F. H. McCormick, Alameda avenue and Union street, Alameda. Those present are Mrs. F. E. Rice of St. Paul, the guest of honor; Mrs. John Metcalf, Mrs. Samuel Haslett, Mrs. C. F. Shattuck, Mrs. F. W. Van Sickle, Mrs. W. W. Rank, Mrs. W. A. Bissell, Mrs. C. R. Dodson, Mrs. C. L. Tisdale, Mrs. L. H. Jacob and Mrs. E. J. Holt.

Mrs. S. C. Carpenter, now superintendent of the Woman's Exchange, is a niece and adopted daughter of the late Commodore W. Porter.

The announcement that Captain Percy Smith is to retire from the active management of the Palace Hotel in San Francisco is received with regret by a host of his friends.

The Alameda Bicycle and Athletic Club will hold a grand event on Memorial Day. A. H. Ward of Alameda has let the contract for a \$8668 residence on Paru street

## Events in the Musical World

Five pupils of Miss Caroline Holstead Little will be heard in recital at the Mann Club in Berkeley on Tuesday, April 15. The more advanced pupils who will take part in the recital are Miss M. Marie Gray, Miss Marjorie Slate, Miss Leslie Gompertz, Miss Alice Elliott and Miss Lucille Addison. The program will include operatic arias of both the old and the newer works of Italian and French composers, as well as German lieder and a group of modern American songs. The program as a whole follows:

- (a) Nussbaum.....Schumann
- (b) Ich Kanna Nicht Fassen, Schumann
- (c) Aria "Non so piu" from "Figaro".....Mozart
- (d) Miss M. Marie Gray.
- (a) Sento Nel Core.....Scarlatti
- (b) Verdi Bella.....Bassani
- (c) Bonjour Suzanne.....E. Pessard
- (d) Miss Marjorie Slate.
- (a) Du Bist Wie Eine Blume.....Rubenstein
- (b) Fruehlings Anzeichen.....Rubenstein
- (c) Der Traum.....Rubenstein
- (d) Aria "Depuis de Jour" from "L'oiseau".....Chapientier
- (e) Miss Leslie Gompertz.
- (a) A Fair Good Morn.....Nevin
- (b) Vites mol.....Chadwick
- (c) He Loves Me.....Chadwick
- (d) Gay Little Dandelion.....Chadwick
- (e) La Follette.....S. Marcher
- (f) Miss Alice Elliott.
- (a) The Lass With the Delicate Air.....Dr. Arne
- (b) Maedchen mit dem rothen Mundchen.....Franz
- (c) Liebeslied mit dem.....Franz
- (d) Aria from "Figaro," "Del Vizio".....Mozart
- (e) Miss Lucille Addison.

Miss Little will be assisting soloist at a piano and violin recital to be given in Hearst Hall Thursday evening, April 10. Professor Charles Louis Seeger and Mrs. Seeger, Professor Seeger has lately come to fill the chair of music at the university and this is the first of a series of four recitals to be given by him, with the assistance of well-known musical folk of the bay cities. Miss Little will sing a group of old English songs and another of old Italian songs.

## ORCHESTRAL CONCERTS.

A series of two orchestral concerts by the Stewart Orchestral Club is announced by the Men's League of the Plymouth Congregational Church. The concerts will be given at Plymouth Center on the evenings of April 3 and May 29. The Stewart Orchestral Club, which numbers 40 members, is under the direction of Alexander Stewart, whose work is too well known to need comment. Lowell Redfield, who is a favorite in the bay cities, will be the soloist for the concerts. One of the features of the program will be his singing of "Yosemite Legends" set to music by Dr. Stewart. He will also sing Frederick Stevenson's "Viennese Serenade." Among others the following numbers will be rendered by the club:

- Symphony No. 1.....Beethoven  
"Dornroeschen" (valse de ballet).....Tschickowsky  
Dance of the Saplings.....E. F. Scholander  
"Peer Gynt" suite.....Grieg

## BERKELEY TREBLE CLEF CONCERT.

The Treble Clef society gave a concert Wednesday evening in Hearst Hall in Berkeley which was fully up to the excellent standards which it has been maintained by the club since its organization. Under the direction of Paul Steindorf, an interesting program of musical value was given by the club and the soloists assisting. Franklin Carter, violinist, and Harold P. Williams, vocalist, were heard in solos, and the members of the society who took part included Miss Phyllis Maguire, Miss Margaret Keeny, Miss Fannie

MISS EDITH SELLERS, A MEMBER OF THE MANSFELDT CLUB WHO WILL BE HEARD IN RECITAL HERE.

—Kathryn Hopkins photo.

Laird, Miss Mildred Van Gulpen and Miss Constance Davis. The program follows:

1. "The Voice of Fate".....Berwald
2. Duet.....Selected
3. (a) "Ophelia With His Plute".....Manning
- (b) "Under a Toddler".....Cowan
4. Violin solo.....Sindig
- (a) Minuet.....Wienawsky
- (b) Mazurka.....Franklin Carter
5. "Connais Tu Le Pays".....Thomas
6. "The Snow".....Eliar
7. Solo.....Schubert
- (a) "Die Forelle".....Woodman
- (b) "A Birthday".....Miss Margaret Keeny
8. Solo.....H. P. Williams
9. "Song of the North".....Hoffmann
- Miss Phyllis Maguire.

## CHORAL CLUB CONCERT.

"The Death of Minnehaha," a cantata, by the brilliant negro composer, S. Coleridge Taylor, will be rendered at a concert to be given by the Cecilia Choral Club in the auditorium of the German

## ALUMNAE GATHERS AT MILLS COLLEGE

California Branch of Collegiate Association Guests of Dr. Luella C. Carson.

The members of the California branch of the Collegiate Alumnae association were the guests of Dr. Luella Carson at Mills College today. About two hundred gathered at the luncheon in the dining hall of the college. The president, Dr. Carson, gave a short address of welcome to the members, to which Dr. Isabel McCracken, the president of the California branch of the association, responded briefly, outlining the history and aims of the Alumnae and expressing their appreciation of the college as the guests of Dr. Carson in the academic atmosphere of Mills College.

After the luncheon an interesting program of talks, songs and stereopticon slides was given for the visitors. Graduates spoke for Vassar, Wellesley, Bryn Mawr, Michigan, and Smith College, telling of the distinctive features of college life at each and the progress and improvements of recent years in the institutions. At the close of the talks stereopticon views of each college were shown, and the college songs were sung by the Mills choral class under the direction of Miss Alice Coleman, a senior in the college.

Those who spoke for the different colleges were Mrs. Charles Spahr and Mrs. Watson for Smith College, Mrs. Caster Ornbaum for Michigan, Mrs. A. M. Smith for Wellesley, Miss Barker for Vassar and Miss Cora Smith for Bryn Mawr.

After the program the guests made a tour of the college grounds and buildings.

## ROYAL COUPLE TO MAKE CEREMONIOUS VISITS

LONDON, March 29.—The Standard today says: King George and Queen Mary will make ceremonious visits to Paris, Berlin and Vienna in May, to take the place of the coronation visits they had arranged for 1912, but which were postponed on account of the labor troubles.

vious 40 concerts having been invitational. This will give every one desirous of hearing fine choral work an opportunity to do so.

## MUSICAL PROGRAM THIS EVENING.

The musical program at Plymouth Congregational Church this evening will be devoted to French composers of the nineteenth century, including Cesar Franck, Camille Saint Saens and Charles Marie Widor. This is the sixth in a series of Sunday evening programs devoted to showing the development of church music from the earliest days of the Christian church until now. The program in full for tonight is as follows:

- Adagio from Symphonie No. 6.....Widor  
Organ.  
Angel Bands in Strains Confessing.....St. Saens  
Chorus.  
Agnus Dei—from Mass for Two Choirs.....Widor  
Chorus.  
Le Procession.....Franck  
Soprano solo.  
Pavane Anglaise.....Franck  
Strings and organ.  
Blessed Savior.....St. Saens  
Duet for soprano and contralto.  
Finale from Piece Symphonique.....Franck  
Organ.

## MILK RIVER PROJECT IS ALMOST READY

WASHINGTON, March 29.—Construction of 32 miles of canal in the Milk river irrigation project in Montana will begin soon, the reclamation service announcing today that bids for the work will be opened April 28. The canal is to be built under treaty with Canada, the Milk river flowing for 150 miles through that country before getting back into Montana.

## CLAIMS CONTROL OVER CHILD'S SEX

(Special to THE TRIBUNE by International News Service.)

PARIS, March 29.—A Parisian doctor claims that he has discovered a method by which parents can determine whether their children will be boys or girls.

The doctor's name is Robinson, a by no means uncommon name in France,

and he is to be awarded a prize by the Academy of Science for his biological research work. The discovery is the result of a lengthy series of laboratory experiments.

Dr. Robinson's theory is that an injection of lecithine destroys male elements, while an injection of adrenaline destroys female elements.

The destruction of one of these elements necessarily favors the development of the other.

One of the doctor's clients is a young American woman, who married a French widower. The husband has four daughters—two by the first and two by the present wife.

Dr. Robinson is hopeful that with the help of repeated injection of adrenaline, the next child will be a son.

## DIVIDENDS

United Home Builders stock advanced yesterday from \$1.00 to \$1.10 per share.

The advance was due to the accumulated earnings and surplus of the company. The assets show the stock to be more valuable than the present quotation. A higher advance is justified to take place very soon.

The first quarterly dividend will be declared within the next few weeks. If you subscribe for stock now, before the books close, you will receive this dividend.

Easy payments. Pay only ten cents down and five cents a month on each share purchased. Join this company even though your subscription be small.

United Home Builders is the company which accomplished the great success in so little time. Over \$50,000 already subscribed to its treasury.

Scores of shareholders throughout California are interested in this company.

Co-operation is the principle upon which it is founded. Our shareholders are working with the officers for greater success. Be one of them and share in the dividends.

Investigate. It costs you nothing to look into this. But act immediately to be in time for the dividend.

## SHRINERS AND WHITE OAKS TO APPEAR IN GORGEOUS UNIFORMS AT MILITARY BALL

THE WHITE OAKS (left to right): TOP ROW—D. A. SINCLAIR, J. B. CHOLLAR, J. O. CUNHA, T. A. BARDO, O. D. WHITNEY, J. N. BONHAM, M. M. MOFFITT, R. C. ENDRIS. SECOND ROW—W. C. MORAN, F. I. GONZALEZ, D. J. HALLAHAN, C. J. MANNING, LIEUTENANT W. A. NOFFSINGER, L. G. FITZSIMMONS, LIEUTENANT O. F. WHITNEY, J. E. CONE, R. H. HAMMOND, J. C. TRETHERWAY. THIRD ROW—P. L. JOHNSON, W. E. SWALLOW, F. A. HOOPER, COLONEL J. K. RITTER (commanding), E. SCHAEFER, A. B. MOFFITT. LOWER ROW—A. P. CURRIER, J. F. ANDERSON, AL. MULVANEY, GEORGE H. LEE JR., GEORGE N. HARRISS, J. B. RITTER.

Everything is in readiness for the military ball to be held at the Hotel Oakland under the auspices of the White Oaks drill team of Oakland Lodge of Elks. According to the large demand for tickets by the members, and their

friends, a large crowd will be present. The members of the Ashmun Temple of Oakland Lodge of Shriners have accepted and invitation from the "White Oaks" to be present in their dazzling new uniforms.

This will be the first strictly military ball that has been given at the new hotel and nothing has been left undone to make it one of the greatest events that has been held at the Hotel Oakland. The ball will take place on Tuesday evening, April 2, the grand march will start promptly at nine o'clock. An

orchestra of ten musicians will provide the music for the evening. The members of the White Oaks are: D. A. Sinclair, J. B. Chollar, J. O. Cunha, T. A. BarDO, O. D. Whitney, J. N. Bonham, M. M. Moffitt, R. C. Endriss, W. C. Moran, F. I. Gonzales, D. J. Hallahan, C. J. Manning, Lieut. W. A. Noffsinger, L. G. Fitzsimmons, Lieut. O. F. Whitney, J. E. Cone, R. H. Hammond, J. C. Tretterway, P. L. Johnson, W. E. Swallow, F. A. Hooper, J. K. Ritter (commanding), E. Schaefer, A. B. Moffitt, A. P. Currier, J. F. Anderson, Al. Mulvaney, George H. Lee Jr., George N. Harriss and J. B. Ritter.

## LARGER MINERAL OUTPUT SHOWN

Chrome, Coal and Pyrite Have Big Gains for the Year 1912.

In 1912 chrome production to the amount of 1220 tons, having a spot value of \$10,810, was reported from Shasta and Siskiyou counties, according to F. McN. Hamilton, state mineralogist. The 1911 output was 835 tons, valued at \$14,197, showing a gain in amount for 1912 of 385 tons and a loss in value of \$3387. The decrease in price was due to the production of an inferior grade of ore as compared with that of the previous year. Chrome, or more correctly, chromite iron ore, is used principally as the refractory ingredient in refractory and other furnace linings. The quantity of this ore in California, which is the sole source of domestic supply, far exceeds the demand, large deposits being known in Sonoma, Tehama and Tuolumne counties, and others, as well as those mentioned above.

Twenty-five out of the 58 counties of California contain coal deposits, many of them undeveloped and almost all of an inferior quality. Coal was first commercially produced in the state in 1881 and for many years previous to the introduction of petroleum as a fuel was an important factor in the mineral industry of the state. At the present time the output is small and the price received relatively low and fluctuating. During 1912 the total coal production amounted to 14,848 tons, valued at \$39,092, an average of \$2.63 per ton, as compared with 11,047 tons produced in 1911, having a spot value of \$18,297, or \$1.65 per ton. This is an increase of 3801 tons in amount, and \$20,795 in value, the excessive increase in price being due to the production of a better grade of coal than was mined during the preceding year, as well as to a noticeable strengthening in the local demand.

Pyrite production in California during 1912 amounted to 69,872 tons, the value of the crude ore at the property being \$208,470, or an average of \$2.91 per ton. This shows an increase of 15,647 tons, and \$20,516 in value over the 1911 output of 54,225 tons valued at \$182,954, although the average value per ton decreased 46 cents. The pyrite has been found that actually used in the manufacture of sulphuric acid, many thousands of tons being annually treated for other than their sulphur content.

## MINNE-OTA COUNCIL WILL GIVE DANCE

Minne-Ota Council, No. 126, Degree of Pochontas, will give a social dance on Monday evening, March 31. Refreshments will be served and a good time is anticipated, as the committee in charge is working hard to make this function as successful.

GOFFERS AT PASO ROBLES. PASO ROBLES, March 29.—Mr. and Mrs. Charles C. Moore, of San Francisco, are at Paso Robles Hot Springs for a two weeks' stay for rest and recreation. Mr. and Mrs. Moore are great golf enthusiasts, spending each morning on the links. Victor and Mrs. Langley Porter, also of San Francisco, joined Mr. and Mrs. Moore today.

## M. J. KELLY AS A LEADER

(From the Oakland Review.)

So there is to be no city campaign this spring. There is to be no waste of money on political hysteria. There is to be no mud-slinging and no disturbing of the satisfactory conditions that prevail at the City Hall. The lions and the lambs, the goats and the sheep, the foxes and the geese have all decided to "get together" and keep the present municipal happy family intact. This means that there will probably be nothing more than a primary election because it is pretty certain that the candidates who are put forward at the primary will secure more than a majority of all the votes cast. This will represent a big saving and will prevent an unnecessary "row."

This is the direct result of purity and progress dominating politics. Instead of programs and pie-chasers. Maybe this near-approach to Arcady is the result of a little conference held last week at which one of the commanding geniuses was Honorable Mike J. Kelly, county treasurer, otherwise more or less reverently or irreverently known as a political "boss."

Somewhat or other the word boss is distinctly out of place when applied to "Mike" Kelly. Mike is a boss and he is not a boss. By one of the most consistent and upright programs of living Mike Kelly has surrounded himself with thousands of friends who have such implicit confidence in him that they will accept his advice in pretty nearly everything. Some of the younger element consult him about their marriage ventures, although Mike is a confirmed middle-aged bachelor; mothers consult him about their more or less wayward sons, possibly because Mike is a lifelong abstainer from anything stronger than black coffee and the product of Peoples Water Company; priests, ministers, reformers and public welfare advocates generally, frequently seek Mike's counsel and activities. Mike's specialty is humanitarianism, tinged with enough philanthropy to insure a practical result, his hand is always in his pocket and never in anybody else's pocket, nobody fears him but thousands have an affection for him, he doesn't rule by fear but by force of character, common sense and kindness. Mike chews tobacco and that being his very worst fault, is sufficient explanation as to why Mike Kelly is Mike Kelly.

Mike Kelly could name two men to succeed Commissioners Anderson and Bacous if he wished to. The Review could mention at least half a dozen suggestions backed by strong influence that have been made to Mr. Kelly within the last two months to "get behind" opposing candidates to Anderson and Bacous. But Kelly is not a rubber man. He knows that a sufficient number of votes await his beckoning finger to turn the tide of any municipal battle in Oakland and perhaps the entire county. He recognizes this power not as a personal prerequisite to be used for present ends but as a potential responsibility. Feeling thus, Mike decided, as he always has decided, that the interests

## CLEARING HOUSE BANKS REPORT

Increase of \$2,206,400 Over Last Week Is Noted.

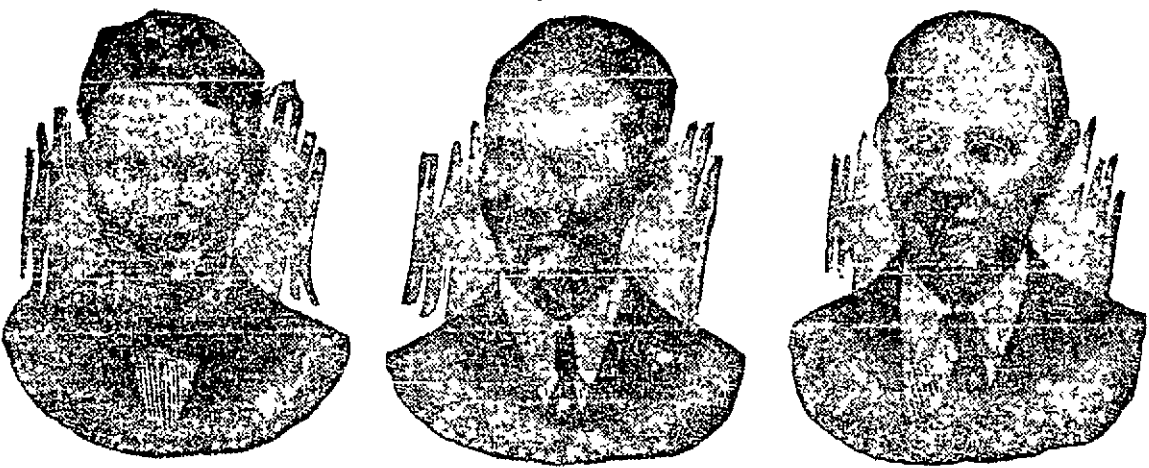

NEW YORK, March 29.—The state of actual condition of clearing house banks and trust companies for the week shows that they held \$15,702,600 reserve in excess of legal requirements. This is an increase of \$2,206,400 over last week. The statement follows:

ACTUAL CONDITION.	
Loans, \$1,912,218,000, increase, \$14,518,000.	
Specie, \$320,464,000, increase, \$7,808,000.	
Legal tenders, \$1,817,000, decrease, \$961,000.	
Net deposits, \$1,750,135,000, increase, \$21,648,000.	
Circulation, \$40,840,000, increase, \$15,000.	
Bank's cash reserve in vault, \$14,934,000.	
Trust companies' cash reserve in vault, \$90,287,000.	
Aggregate cash reserve, \$111,841,000.	
Excess of cash reserve, \$15,702,600, increase, \$2,206,400.	
Trust companies' reserve with clearing houses carrying 25 per cent cash reserve, \$52,329,000.	
Summary of state banks and trust companies in Greater New York not included in clearing house statement.	
Loans, \$368,775,000, decrease, \$2,307,800.	
Specie, \$25,514,200, increase, \$488,700.	
Legal tenders, \$2,231,600, increase, \$28,200.	
Net deposits, \$623,914,100, decrease, \$2,630,200.	

## RESCUES PET DOG BUT LOSES OWN LIFE

CINCINNATI, Ohio, March 29.—Charles Wilkinson, a prominent retired business man living in Hartwell, Ohio, was killed by a passenger train here while trying to save his pet dog. Mr. Wilkinson was out for a walk and a train coming around a curve and at the same moment noticed his pet on the rails. He rushed after the animal and tossed it to safety, but was caught himself and crushed to death under the wheels of the Cincinnati, Hamilton and Dayton passenger train.

## These 2 men should use HERPICIDE it saves the hair

Look at those three portraits again. They illustrate better than words can possibly do the principle of hair preservation, the principle upon which NEWBRO'S HERPICIDE is based and acts. This is the principle: "You can do your hair more good while the hair is there than you can ever do after the hair is gone."

Ninety-nine per cent of the hair losses, with both men and women, are due to the working of the dandruff germ. If you are troubled with dandruff depend upon it the germ is there, always working, digging, destroying the life of the hair follicle and pushing out the hair. And unless drastic and vigorous measures are adopted to eradicate it, the germ is going to stay and will keep up the hair-destroying activity until every hair is gone.

The great mistake that many people make is that they never take any particular interest in their hair until it is gone and their heads are bare. Instead of using NEWBRO'S HERPICIDE while they have an abundance of hair capable of saving, they wait until the damage is done, until it is too late. Then realizing their condition they begin to appreciate the blessings of a nice head of hair. A bottle of so-called hair restorer is procured and much time and energy expended in an endeavor to accomplish the impossible—misspent money, misdirected energy.

By starting in time, the intelligent and systematic use of NEWBRO'S HERPICIDE would have prevented all of this trouble, all this anxiety. HERPICIDE positively eradicates dandruff and prevents the hair from falling out. It gives to the hair life, luster and luxuriance. It prevents baldness. It stops itching.

## MAN CONSUMES 25 CIGARS DAILY; ENDS LIFE

NEW YORK, March 29.—Joseph E. Benson, a retired marine engineer who is said to have

smoked 25 cigars a day, committed suicide by cutting his throat with a razor in the cellar of his home at 81 Fifty-seventh street, Brooklyn.

When he had finished playing games with his six-year-old grandson in the dining room he threw away his cigar and went down into the

cellar "to get some more toys." After an unusual lapse of time his wife went the grandson down to find him. The boy a few minutes later came hurrying in with the news that "somebody" dreadful had happened to grandpa. A surgeon from the Norwegian hospital found that Benson was dead. His wife said too much smoking had wrecked his nerves.

# IN BROOK-WOOD ACRES

MT DIABLO

## IN THE HEART OF THE BEAUTIFUL Mount Diablo Country

### WITH ITS UNSURPASSED CLIMATE

Far enough from the interior to escape its excessive heat, yet shielded by the Berkeley hills from the fogs and ocean winds. The choicest and most desirable tract of suburban farming land or villa homesite acreage that has been opened for subdivision. **THE OPPORTUNITY IS NOW OFFERED** to the buying public who are interested in 3, 5 and 10-acre tracts where climate, soil, water and transportation conditions are of the best, to secure their country home. **IN BROOK-WOOD ACRES**, located within seven miles of Oakland and Berkeley, near the Oakland & Antioch Railway, and only twelve miles over the famous inter-country Tunnel Road now being reconstructed with oiled macadam in its entire length. **ON THE MARKET FOR THE FIRST TIME THE COMING WEEK.**

## Climate---Water

Elevation 550 feet above sea level. Freedom from frosts of the lower lying valleys. Protected both on the North and West by high ranges of hills. Citrus fruits and the olive are grown successfully on adjacent properties. Well watered in the driest season. Numerous large flowing springs. Shallow wells yield an abundance of good water.

## Soil, Etc.

Soil is uniformly rich, loamy and very deep, deep. Is free from the objectionable clays and adobe. Adapted to truck gardening and the raising of all kinds of fruits, nuts and berries. Alfalfa can be grown and without irrigation. General exposures are to the southeast. There is sedimentary creek bottom land. Slightly rolling, lighter land where the grape and almond thrive. Beautifully wooded hillsides for ideal country homes.

## Ideal Transportation

Near two stations on the Oakland & Antioch Electric Railway, now giving regular service. Close to a Southern Pacific depot on the San Ramon Valley Branch. Only a 12-mile drive to Oakland or Berkeley over one of the best oiled macadam roadways in the state. "The Southern Pacific now has engineering crews in the field laying out a short line to Oakland that will cut the running time to 20 minutes."

## NAVAL GUNS KILL UNHATCHED CHICKS

**Question of Damage Confronts  
Secretary Daniels; Woman  
Enters Complaint.**

WASHINGTON, March 29.—Whether the concussion from the fire of the great naval guns kills chickens and geese in the eggs is a question of fact Secretary Daniels of the navy department has been called upon to answer. He received a letter today from a woman on the Virginia coast near Cape Henry, charging that the target practice of the battleship fleet in Chesapeake bay, and even in the open ocean outside, was destructive to all poultry life in egg form. Even as she wrote, she declared, the heavy guns were booming and she estimated that she had lost \$76 in eggs. The inspector of ordnance at Indian Head already has reported that the heavy gun fire daily at the proving grounds apparently did not in the slightest degree affect the fowls which were hatched and raised in great numbers as close as 400 yards from the muzzle of the guns.

## SAYS SHE LIVES ON CHARITY; HUSBAND RICH

SAN FRANCISCO, March 29.—Mrs. Emma Backeberg filed an action for divorce today against C. W. Backeberg, charging desertion and failure to provide. The couple were wedded April 14, 1908, and the wife declares she had been forced to live on the charity of friends and relatives notwithstanding the fact that her husband is in receipt of \$150 monthly and is worth, approximately, \$10,000. She wants to resume her maiden name, Emma Walpert.

## EX-PRIZE FIGHTER CHARGED WITH MURDER

SAN FRANCISCO, March 29.—Frank Jackson, known as Young Papke, a former prize fighter, was arrested and arraigned on a charge of murder in Police Judge Shortall's court today and his case continued until April 6. He is accused of having shot and stabbed to death Polin Divencenzi on the night of March 14. Divencenzi died yesterday at the St. Francis hospital.

## BLOODED CANINES WILL BE SEEN AT BIG KENNEL SHOW

Browndale Model, Owned by Mrs. E. F. Brown, (top) and Browndale Hydegrade, Owned by E. Sprague.

SAN FRANCISCO, March 29.—About two hundred thousand dollars' worth of dog will be displayed at the show to be given by the Golden Gate Kennel club at the Auditorium, San Francisco, April 9 and 10. All sorts of pedigreed animals are represented in the entries and many of the little canines have been nurtured with the care given to babies. Society is to display her choicest pets and they form a most cultured and aristocratic aggregation. Some of these kings and queens of dogdom are more precious than gold, and many are valued at considerable over the thousand dollar mark. Hanging in size from the sturdy and graceful St. Bernard to the precious but minute Pomeranian whose weight is but a little over three pounds, the bow-wows form an ever interesting exhibit and the members of the smart set will be on hand to lay trophies at their feet. The judge of all breeds will be George S. Thomas of Hamilton, Mass., who has acted in like capacity at the Crystal Palace, London, where the largest dog show in the world was held. Thomas has a reputation for fairness and it is expected that his selection will be generally approved. American kennel rules will prevail during the exhibition and the prizes will be awarded with due regard to the rights

## 'BOOST CULT' STARS TO MEET

**Oakland Advertising Association  
to Do Homage to  
Outside Talent.**

The program to be presented by the Oakland Advertising Association at their weekly luncheon next Tuesday at 12:15 at the Hotel Oakland is one of unusual mention. The program committee has been able to secure as speakers two men well known throughout the country in their respective lines. They are Judge Davis S. Rose of Clayburg & Rose, attorneys-at-law of Milwaukee, the mayor that made Milwaukee famous; formerly a judge of the Wisconsin bench, and for ten years mayor of Milwaukee. Judge Rose is a man of international reputation and an eloquent speaker. He is one of the pillars in the foundation of the Democratic party and the only man who was strong enough to secure election over the candidate of the Socialist party in Milwaukee. He is a corporation lawyer of great prominence and will have a message under the subject of "Advertising and Law" with something on the side worth traveling a great distance to hear. The Oakland Advertising Association feels honored in inviting to have him as its guest; and Arthur Lane, the "Biggest Advertising Man in America," will address us on "Advertising Experience and Results." Mr. Lane has handled some of the largest publicity campaigns of the past ten years as he daily from New York, where he was sales and publicity manager of the National Tobacco Company, general manager of the National Oil Reporter, special representative of the New York Daily Commercial, director of publicity for some of the largest banking and investment houses in the nation. Mr. Lane is president of the Agent Company, an agency company for lawyers, corporations and all classes of business men, and since January, 1912, has been director of publicity of the "Pishshacker Interest." He will talk on practical things and has some mighty interesting campaigns to draw from. The attendance at the Oakland Advertising Association's luncheon has been growing steadily each week. Local merchants are beginning to realize the work that the organization is doing in aiding them to get the biggest and most profitable returns on any investment in publicity space and informing them of advertising conditions enables them to apply greater intelligence in the placing of their advertising. A large number have signified their intention of being present by reservations. All business men who are anxious to increase their business and build up their city are welcome at these luncheons. During the past week a large number of trophies have been added to the collection of the prizes are well worth competing for. The entries for the show closed yesterday and the directors of the club have expressed themselves as well satisfied with the showing. Arrangements will now be made for the accommodation of the canine, and all will be listed in a comprehensive program which will contain the records of the various champions competing. Among the dogs to be entered from Oakland will be "Browndale Model" owned by Mrs. E. F. Brown, and several

## BETTER INDIAN TEACHERS NEEDED

**Acting Commissioner Begins  
Work to Improve Force  
of Farming Lore.**

WASHINGTON, March 29.—An effort to improve the instructions in farming which the Indians are receiving has been started by Acting Commissioner of Indian Affairs, Abbott, who has begun an investigation to ascertain just what results the various Indian farm teachers have been getting. The reservation supervisors are asked to recommend donation for incompetent teachers. The efficiency of the teaching force hereafter is to be measured by the production of the school farms and their ability to teach the Indian boy how to raise first class crops. To get experienced farmers for the teaching staff the commissioner has had the civil service commission divide the country into districts for Indian farmer examinations to be held next month.

## GOVERNMENT TO SELL TIMBER IN THE WEST

WASHINGTON, March 29.—Secretary Houston of the Department of Agriculture has approved the advertising for sale of two billion feet of timber in national forests in Alaska, California, Idaho and Montana. The largest of these is for 750,000,000 feet in Idaho and the successful bidder will be allowed 22 years in which to get out the timber.

**THIEVES STEAL CIGARS.**  
SAN FRANCISCO, March 29.—The wholesale tobacco establishment of J. L. Jerichau, 220 Market street, was broken into by a thief at an early hour this morning, and cigarettes and cigars to the amount of \$20 were stolen.

## Lillian Russell's Warning Sore Feet; Bad Health

Lillian Russell is a physical wonder. Now in mature years, but having preserved the fresh beauty of youth, in the Chicago Tribune says: "Care of the feet, hardest worked members of the body, is absolutely essential to health. Irritation from sore feet often causes serious nervous disorders, and nothing brings face wrinkles quicker. Here is the best treatment known to me for all foot troubles. Dissolve two tablespoonfuls of Calocle compound in a basin of warm water. Soak the feet in this for full fifteen minutes, gently rubbing the sore parts." The effect is magical. All soreness disappears instantly. Corns and calluses can be peeled right off. It gives instant relief for bunions, aching and swelling, smelly feet. Any druggist has Calocle in stock or will quickly get it from his wholesale house. A twenty-five cent box usually cures the worst feet. Calocle is not a "miraculous" cure, it is a waste of money on uncertain remedies. Insist on getting what you want from the druggist.

# RICHMOND WILL BE A BIG CITY

# NEWS OF ALAMEDA AND CONTRA COSTA COUNTIES

## BLOSSOM FESTIVAL IS VISITED BY THOUSANDS

Great Event Brings Crowds to See Glorious Panorama of Early Blooms

HAYWARD, March 29.—The people of Hayward extended an open welcome to thousands of visitors from all parts of the county today to celebrate the crowning day of the Blossom Festival. Under the auspices of the festival committee, headed by I. J. Parsons, the different events were conducted without a hitch and to general satisfaction. The morning session of the festival was devoted to the opening of the grounds, and the afternoon session to the parade. The parade was a most successful one, and the people of Hayward were very proud to have so many visitors from all parts of the county.

From early morning onward the huge thirty-seater touring auto bore crowds of sightseers through the beautiful orchard lands in and around Hayward. Street cars, automobiles and trains poured fresh contingents of visitors as the morning wore on, and by noon the streets were almost impassable. Indeed the members of Company II of the National Guard, under Captain J. J. Borree, were kept busy clearing the streets for traffic and for the various parades.

**LONG BABY PARADE.** Over one hundred cars, including autos, floats and horse vehicles, took part in the big parade, even Mission San Jose sending a representative, a tastefully decorated auto driven by Henry Lachmann. The first division of the parade was in charge of J. E. Welsh, the parade grand marshal. Jack Stanton had charge of the second division of the parade, assisted by Howard Reamer and Sydney Jones. Dr. Corwin had charge of the third division, assisted by George Onks. The parade of the babies formed one of the most interesting and attractive events of the day. Several ingenious and exceedingly picturesque designs were embodied in the decoration work of the go-carts. The baby parade, which extended for nearly a mile, ended at the Native Sons Hall, where the prizes were awarded.

**70 IN ROAD RACE.** Seventy athletes entered for the six and a half-mile road race, and fifty finished. The winner was C. Willard of the Olympic Club, who finished quite fresh in 27 minutes 1-5 seconds. The baseball match in the morning between Bonnes and the Hayward team resulted in a win for the academy by 8 to 4. Addresses of welcome were delivered in the grammar school by Mayor Charles Hayer, Senator E. K. Strong and J. B. Fausch. The committee in charge of the festival so early in the year was something to be proud of. The catering arrangements in the hands of Mrs. R. Mastick and other prominent

### PLEASANTON NEWS

PLEASANTON, March 29.—Dr. Van Noy is registered at the Ross hotel. W. A. Roeding of San Francisco was a visitor in town on Tuesday. Mrs. Ada Cleary is enjoying a few days with friends in San Francisco. Mrs. Millard Sanders has joined her husband at Ross for several days. J. Arguello and wife of San Jose are visiting relatives here this week. Tony Baroni and wife were in San Jose last Friday on a business trip. Frank Dillie returned yesterday from a day's stay with relatives in Oakland. Mrs. Butler of Sunol Glen spent Tuesday at the guest of her sister, Mrs. Thomas. Mr. and Mrs. L. O. German and Miss Lila Giesler were visitors in San Francisco on Friday. Tony Alameda and wife of Richmond were Easter day visitors with relatives. J. Sullivan is enjoying a short stay in San Francisco as guest of friends there. The horse owned by Captain McCann will be shipped to Forest Grove, Ore., the early part of April. Alfred Arendt of San Francisco spent Easter with the Arendt family here in town. J. R. Crubbs and wife of San Francisco spent several days in town in Turlock and vicinity. Miss Jane Carr, who is attending the State Normal school at San Jose, is enjoying this week home on vacation. William Hoffstadt, a business man of Sacramento, accompanied by his wife, were visitors in town several days this week. A force of carpenters has been busy along the Southern Pacific depot and making the necessary improvements about the place. Cards received from J. W. Wells of Contra Costa state that he is enjoying the sights of China from that country his trip continues to India where many of the smart set attend the season's ball given Wednesday evening in the Gold room at the St. Francis hotel.

At Monday's meeting of Pleasanton, Rebekah Lodge, Mrs. Peter Ross and Miss Mildred Withington elected delegates to the grand assembly which meets in Los Angeles in May. A number of the Pleasanton smart set were guests at the Hacienda on Tuesday, attending the luncheon given by Mrs. Pineda. Several of the Pleasanton smart set were guests at the luncheon given by Mrs. Pineda. Several of the Pleasanton smart set were guests at the luncheon given by Mrs. Pineda.

Miss Helen Albrechtman will leave next month for an extended trip through Europe, which will last several months. She goes as the guest of her mother, Mrs. Albrechtman. Miss Helen Albrechtman will leave next month for an extended trip through Europe, which will last several months. She goes as the guest of her mother, Mrs. Albrechtman.

Mr. Frank Anderson and wife of Portland registered at the Ross hotel this week. Mr. Anderson, who has horses at the Driving Park, will remain here for a month. Mrs. Anderson returned to the northern home on Wednesday. Owing to the rain last Sunday the baseball game between the married and the single men of Pleasanton was postponed until tomorrow. The grounds have been leveled and the grandstand has been moved from the old grounds and has been rebuilt on the new grounds and everything is in condition for the game Sunday. Manager Percy Johnson is at Centerville today attending a meeting of the Washington town club league, which he will try and make arrangements to join.

F. D. Madison and sons are erecting a six room bungalow on their home property on lower St. Mary street. When completed it will be occupied by the family. Cards have been received from Mrs. Bertina Cope, who is enjoying a round the world trip, stating that she is passing through Constantinople. Before coming to Japan she spent some time in Japan. Philip Kohl is having the old barn on his property on Main street, which was partially burned down, torn down.

Mrs. J. Fraser, William and Louis Ferguson of San Francisco, Mrs. and Mrs. Byrne and daughter of Berkeley, were visitors at the St. Francis hotel on Tuesday. Mr. Martin home over the weekend on Monday and Tuesday. Mr. Martin is now employed in San Francisco with the California Automobile company. James and Mrs. Gill spent Tuesday in San Francisco attending to business matters.

### VALLEJO WOMAN DIES; FUNERAL AT FRESNO

VALLEJO, March 29.—Mrs. Barbara Olds, aged mother of Mrs. Gertrude Robinson, died at her home in Sacramento street. She was 77 years of age and came here from Fresno. The remains have been removed to San Francisco under-taking parlors, where they will be prepared for shipment to Fresno where the funeral services will be held.

## 'NATURE QUEENS,' PICTURESQUE PLAYLET, TO BE GIVEN BY DAINY HAYWARD CHILDREN

GROUP OF HAYWARD BOYS AND GIRLS WHO WILL TAKE PART IN THE PLAY "NATURE QUEENS," TO BE GIVEN APRIL 8.

HAYWARD, March 29.—Daintily dressed little Hayward boys and girls will give a playlet, "Nature Queens," April 8, under the direction of Mrs. C. B. Kelly, chairman of the juvenile section of the Hill and Valley Club. Mrs. Kelly, who takes a great interest

in children, has brought her youthful charges up to quite a high standard in elocution, and the playlet should prove an enjoyable entertainment. The following cast is rehearsing for the event: Queen of Spring, Alice Ferguson; Queen of Dawn, George Van Dyke; Princess of Spring, Rose Ama-

ral; Queen of Dew Drops, Gladys Matto; Queen of Sunbeams, Margaret Galle; Queen's maid, Gladys Amaral; Queen of Blossoms, Selma Viera; Queen of Wildflowers, Hortense Argue; Queen of Moonbeams, Norma Leslie; Queen of Evening, Lulu Matto; Sandman, Buddy Amaral; Fairy,

Gertie Rogers; Daisies, Jean Dummer; Violet, Jean Cassino; Rose, Edna Rosenberg; Carnation, Mamie Perry; Lily, Stella Peterson; Buttercup, Alice Arlett; Poppy, Ruth Jorgensen; Dew Drops, Chas. Oswell; Lettuce, Hauschildt; Betty Rosenberg; and Helen Nunes.

### CLERK RESIGNS FOR PROMOTION

Ira R. Vaughn Is Elevated in City's Service and Faris May Take Vacancy.

RICHMOND, March 29.—Ira R. Vaughn, who for the past two years has been clerk of the council, last night tendered his resignation to the council, and was immediately appointed to the position of clerk of the council. The resignation was accepted by the council, and the appointment was made by the council. The council is composed of the mayor and the council members.

### BROTHERHOOD WILL HOLD M. E. CHURCH SERVICES

RICHMOND, March 29.—The Brotherhood of Wesley Methodist Church will have charge of tomorrow evening's service. Something out of the ordinary is scheduled. The choir from Shattuck-avenue Berkeley M. E. Church will be here and render their Easter cantata, which proved such a success in their home church last Sunday evening. The church is led by Professor G. N. Calfee, son of the local pastor. He is assisted by his wife as organist.

### CONTRACTOR WORKING ON FUSE FACTORY

PLASANTON, March 29.—A contract aggregating \$20,000 and perhaps totaling much more before all the plans are carried out, was secured this week by C. A. Bruce, a local contractor, from a new powder and fuse works about to locate in Livermore. Bruce is already at work and will probably employ a large number of men during the coming weeks in handling the work. The location of the factory is some distance out of Livermore and the company is planning also to erect about forty cottages for the use of labor to be employed.

### WALNUT CREEK COUPLE WED IN SAN FRANCISCO

WALNUT CREEK, March 29.—Friends of Miss Flora Lincoln Dewing and Cyril Randolph Hook of Walnut Creek were surprised to learn of the marriage of the couple in San Francisco on Saturday. The ceremony was performed by the Rev. A. R. Willis of San Francisco, a friend of the families and formerly pastor of the Presbyterian church of Walnut Creek. Mrs. Hook is the youngest daughter of Mr. and Mrs. Stephen Dewing and Hook in a son of Mr. and Mrs. James Hook and brother of Theodore Frank, who manages the business of the family. The wedding was announced last week. Theodore Hook will soon erect a bungalow for his bride-to-be on the other side of the Hook home place, from which his brother built.

### Silk Petticoats \$1.95

In a lot of stores millinery is treated like high art and bears a very fancy price. We invite your inspection tomorrow of smart new Hats—\$4.95, \$5.95, \$7.50. Also Untrimmed Shapes at \$1.45, \$1.95, \$2.95.

New Panama Shapes, untrimmed, genuine Panama braids in large and small styles—\$2.75 TO \$8.50.

## WALL'S HARBOR CENTER POPULAR

Sales of Lots Sold During the Last Twenty Days Total \$350,000.

RICHMOND, March 29.—The sales to Richmond of lots in Wall's Harbor Center, in which the council has accepted a block of 36 lots as a city hall site, has reached the large sum of \$350,000 in the last 20 days. The citizens of Richmond have always considered this tract one of the best investment opportunities about the bay and have waited for its opening. It is close to the inner harbor and lies on Cutting boulevard, over which the Southern Pacific electric line is now being built. There is a throng of buyers from many places daily in the office of the New Richmond Land company in San Francisco, the concern which has put Wall's Harbor Center on the market. The company will spend \$250,000 in making high class improvements.

### EARLY MORNING WEDDING FOR MARTINEZ COUPLE

MARTINEZ, March 29.—On Wednesday morning at 5:30 o'clock in the parish house of St. Catherine's church at Martinez Miss Ethel R. Kistner, daughter of Mr. and Mrs. William Kistner of Martinez, became the bride of Raymond Clays, a business man of the county seat. The ceremony was performed by the Rev. Father Joseph Barrikan and the couple were attended by Miss Malina Clays, sister of the groom, and Percy Kistner, brother of the bride.

### CLAYTON PERSONALS

CLAYTON, March 29.—C. C. Burdett is improving his place of business by a concrete sidewalk on Main and Merila streets. Frank S. Mendon, who was laid up for the past four weeks with fever, is again at home, where he will remain for a couple of weeks. William Blacking has decided to resign, enlarge and rebuild the saloon building, of late (Baker) B. Nunez, Jr. Mrs. C. H. Kellie was a visitor in San Francisco Wednesday. Mr. R. Nunez and Bradt T. Nunez are at the county seat Saturday on legal business. Mrs. J. Ferguson, Miss Mary Anita Ferguson, Mrs. J. Ferguson and Bradt T. Nunez are making an indefinite stay with Mrs. J. V. Atchinson, home from Berkeley the day after this week.

### TASSAJARA NOTES

TASSAJARA, March 29.—Frank Maguire of Morgan Quarry, was a visitor in the valley on Tuesday. Mrs. E. Dejes of Missouri spent a few days in the valley with her niece, Mrs. C. E. McNeill. F. Rein, son, A. Boyer and E. R. Williams are at the San Joaquin valley in the latter's automobile. Mr. and Mrs. S. S. Dronnan of Hayward spent several days of the past week visiting their grandchildren, Mr. and Mrs. Thomas Fogala returned to the home in Los Angeles this week after a month's visit with the former's sister, Mrs. J. Amante.

Don't Let Them Experiment On You!

In every large city there are dozens of so-called "dental companies" who employ inexperienced operators just out of college. These "dental companies" are generally run by men of questionable reputation, who are afraid to come out in the open and advertise their own names.

They hire students to do the actual work, because students are cheap, and when the patient has a "kick" coming it does no good to complain, for he never knows where to place the responsibility. Just remember this, my friend: The "dental company" is merely a sort of protection for the man who wants to harrass you out of your money.

Now, I don't claim to be the only dentist in the world who does first-class work. There are lots of good dentists everywhere, but they can't give you what I offer my patrons—absolutely painless dentistry.

It took me fifteen years to discover a safe and sure method of preventing pain in dental operations. My marvelous "Tetrasthesia" positively does away with the torture in every case, no matter how sensitive the teeth may be. Tetrasthesia is not the least bit injurious, and the use of it produces no after-effects of any kind.

You can find "painless dentistry" signs along nearly every street, but you won't get real painless dentistry unless you come to me. My name is Dr. Terry, and I am known to dental science, and all my work is guaranteed to give satisfaction. As for my prices, there are no higher than those of ordinary dentists, and I make no extra charges for painless work, although it is worth more.

I restore missing teeth by the Rex Alveolar System without resorting to partial plates or bridgework. One tooth or more can be replaced by this system. The only requirements is that you have at least two sound, natural teeth left in either of your jaws—the rest is easy.

Rex Alveolar teeth are put in the mouth to stay, just like real teeth. They can't work loose or fall out, and the wearer is never conscious of the fact that he has artificial teeth. They are almost comfortable and durable as nature's teeth.

Don't take my word for anything, but come and make me prove to you that I can do what I claim. If I fail to live up to my promises I know that I won't get your patronage. I am ready to show you, if you are willing to be shown.

Call at once for free examination and estimate. No charge for consultation. Hours: 8:30 to 5:30; Sunday: 10 to 12.

Those who cannot call should write for the free book explaining my Tetrasthesia and Alveolar Methods.

**MASHER SPOONED BY TELEPHONE**  
Trapped by Woman, Keeping Appointment While Detectives Wait.

CHICAGO, March 29.—Detective Sergeant William Egan and John Dempsey were aided by a Hyde Park woman in the capture of a "telephone masher" who has been annoying women by calling their homes.

The woman who made a "date" and trapped the man is Mrs. W. P. Coons of 6424 East View Park, wife of a physician with an office at 177 North State street.

The man she led into the trap and arrested is Frank Andrews, 3339 Ellis avenue, a painter's helper. Upon the advice of acting Captain John H. Tobin, Mrs. Coons made an appointment with the masher at East Thirtieth street and Ellis avenue. She went to the place followed by the detectives. Andrews greeted her and was arrested.

EMPLOYEE RISES TO SECRETARY OF CORPORATION

CAPTAIN H. F. HUBER. Photo by Stewart.

Harry F. Huber, an employee of the Metropolitan Furniture Company, 567 Fourteenth street, became a partner in the firm today and will hold the office of secretary in the new corporation which is being formed to conduct the business of the company.

It is the intention of the heads of the furniture house to enlarge the business and put it on an ultra-modern basis, rebuilding the large stock and otherwise improving the same. A. E. Noffsinger is president and J. N. Bostwick vice-president of the corporation with W. A. Noffsinger, former vice-president as treasurer. All are well known in the business circles of the state and the utmost confidence is placed in them by their associates.

Huber, the new secretary, is commanding officer of Battery B, and department junior vice-commander of the Spanish War Veterans, and in business has held the secretaryship of the Klean Crown Oil Company for the past ten years, in addition to the position with the Metropolitan Furniture Company, which he has held for twelve years.

During the Philippine insurrections Huber was captured and held prisoner by Aguinaldo for months during which time he was forced to undergo untold hardships, marching barefoot from one end of the island to the other until finally rescued by 100 picked men who had been on the trail for months.

CLARA BUTT TO SING MANY SONGS

English Contralto's Program Ranges From Handel to Sullivan.

The coming concert next Friday at Ye Liberty Playhouse by Clara Butt and Kennerley Rumford, will introduce to Oakland the most noted singer of the British dominions for throughout the United Kingdom the name of Clara Butt is regarded as a symbol of song in its finest development. This is her first visit to America where, already, she has compelled attention by her marvelous voice. Clara Butt is of a most unusual quality, having a range that is phenomenal. She can sing with equal beauty the tones of the contralto or the soprano. Her voice is a rich, mellow and inspiring contralto. Here also is a commanding presence, for she is over 6 feet tall, and a handsome woman. Her husband, Kennerley Rumford, is one of England's foremost baritone, and both constitute a duo of singing stars on the concert stage. Their concert numbers are all rendered with fine distinction.

At their concert at Ye Liberty next Friday afternoon an ably selected and arranged program, which follows in full, will be heard:

Verborghenheit.....Hugo Wolf  
Der Gaetner.....Hugo Wolf  
Traum durch die Daeemerkung.....Richard Strauss  
Mit einer Primula verlor.....Grieg  
Mit einer Vaseille.....Grieg  
Mr. Kennerley Rumford  
Rendli aereo (Soprano).....Handel  
Lushighe plu care (Alessandro).....Schubert  
Der Wanderer.....Schubert  
Mme. Clara Butt  
The Beaming Eyes.....Macdowell  
Why so pale and wan?.....Hubert Parry  
The Gentle Maid (Old Irish air).....Mollen Oge  
Mollen Oge (Old Irish air).....Mollen Oge  
King Charles (Cavalier Song).....V. White  
Duet, "Night Hymn at Sea".....Goring Thomas  
"Non coeur s'ouvre la voix".....Saint-Saens  
Three Songs.....Graham Peck  
The Early Morning.....F. Leoni  
The Leaves of the Wind.....F. Leoni  
The Lost Child (The request).....Sullivan  
Mme. Clara Butt  
Tickets for this important event will be on sale at the box office of Ye Liberty Playhouse next Monday morning.

PIONEER WOMAN DIES AT HOME IN FRUITVALE

Mrs. Saveria Antonuccio, for thirty years a resident of this city, died Friday night at her home, 3345 Arkansas street. Mrs. Antonuccio was a native of Messina and 55 years of age. Deceased was the wife of Joseph Antonuccio, a merchant of Fruitvale, and mother of Peter, Charles J., Joseph, John J., George, Reno, Ernest and Salvatore Antonuccio. Mrs. Sarah H. Rubino and Mrs. Mary Brunerke. The funeral will be held Monday morning at nine o'clock from the late residence, thence to St. Jarlith's church, Fruitvale and Chicago avenues, where a requiem mass will be celebrated at 10 o'clock.

AGED INVALID DROWNED IN SLEEP IN CISTERN

HAGERSTOWN, Md., March 29.—That Mrs. James Delaney, an aged invalid, of Shingler, arose when asleep, went out of the house and stumbled into a cistern is believed to have been the cause of her drowning early today.

The woman's son, Charles, had administered chloroform only an hour before the tragedy, and had gone back to bed. The son awoke to find his mother gone, and search revealed her body in the cistern.

MANUFACTURERS PREPARE EXHIBITS

Preliminaries Indicate Exceptional Interest in the Exhibition.

The manufacturers' exhibit which is to take place in the basement of the Kahn Building commencing April 19 is rapidly gaining headway. With a few days an augmented committee in automobiles will visit the different factory heads of the about-the-bay region with diagrams of the remaining space and at the end of another week it is believed that the entire floor space will be reserved.

On the night of April 13, before the formal opening of the exhibit, it will be given over exclusively to the Knight Templars obsequies which is scheduled to meet there at that time.

It has been found that the catapillar engine which was to have been a part of the mechanical division is much too large to be lowered into the basement of the building even when taken apart. The wheels were far too big to be taken down the elevators.

A feature of the fair is to be a reproduction of the new city hall by a local soap company. Expert modelers who have been busy on the miniature have found that the soap of which it will be made yields readily to their manipulations and it is believed that the result will be a revelation.

It has been a question with the committee as to whether to select brass or string instruments to furnish music. Brass bands are to be used in the parade but the acoustic properties of the basement of the Kahn building are so great that it is thought that an orchestra will be sufficient to use in the exhibit rooms.

LONDON'S SOCIAL SEASON TO BE GAY

Death of King of Greece Will Not Seriously Affect Activities.

LONDON, March 29.—The death of the King of Greece will not seriously affect the London season, which promises to be a brilliant season, which court will go out of mourning on April 16. Queen Alexandra, who was prostrated with her grief over her husband's death, is being constantly visited by Queen Amelie of Portugal, who feels deeply sympathetic. The two queen mothers have always been the best of friends.

Although the early race meetings will not be attended by royalty, it is expected that both the king and queen will be present at the Derby, which is to be run on June 4, and also at Ascot a week or two later.

The grand opera season opens on April 21. Originally it was intended to give "The Rheingold" on the opening night, but there was a great outcry from the smart set, owing to the fact that the opera house is plunged in darkness the whole time for the Wagnerian production and the peeresses and untitled leaders would not have the chance of displaying their gowns and tiaras.

The international horse show, which has become the most fashionable function of the season, opens on June 20, and it is assured of great success. A number of new English hostesses will give dances in May and June, while among the aristocratic hostesses the Duchess of Marlborough will entertain on a much larger scale than usual.

SURPRISE PARTY GIVEN ON 70TH BIRTHDAY

A surprise party was given to James Cahill, of the firm of James Cahill & Co., at his residence, 2331 Myrtle street, Friday evening, March 28, in honor of his seventieth birthday. A great many were present, including comrades of Lyon Post, No. 8, G. A. R., members of Lyon Relief Corps, No. 6, and other friends. The hours flew swiftly with games, music and social intercourse. An elegant supper was served by Mrs. Cahill, and afterwards there were songs by Mrs. Cahill, Mrs. Carrie Muller and others. Miss Ella Loewen treated the guests to sweet music all evening. Mr. Cahill made some appropriate remarks and expressed his pleasure at having so many of his friends remember him on this occasion. A comrade responded in a pleasant, happy manner. At midnight the company dispersed after the games, "music," which all joined, and wishing Mr. Cahill many happy returns of the day and thanking him and Mrs. Cahill for the pleasant evening. Those present were: Mr. and Mrs. Barnstacher, Mr. and Mrs. Cahill, Mr. and Mrs. Cannon, Mr. and Mrs. Colquhoun, Mr. and Mrs. Crowe, Mrs. Creighton, Mrs. Decker, Mrs. Farner, Mr. and Mrs. Fidler, Mrs. Florence Fidler, Mrs. Flinders and granddaughter, Mrs. M. Gehring, Mrs. Hamilton, Mrs. Harkeheim, Mr. Hukill, Mr. and Mrs. Hayes, Mr. and Mrs. Hood, Mrs. Jorgensen, Mrs. Lutner, Mrs. C. Muller, Mrs. Mette, Mr. and Mrs. Nalmsmith, Mr. Ondon, Mrs. Schultz, Mr. and Mrs. Spellman, Wilbur, Miss Ella Loewen and Miss Alice Gehring.

How to Brown Hair Without Detection

Mrs. Potter's Walnut-Tint Hair Stain Can Be Applied in a Few Minutes Every Month.

There is a way of staining gray, faded or bleached hair and changing it to a beautiful rich brown to almost black, so that it is difficult, if not impossible, for any expert to detect the hair has been treated in any way. This preparation has the tremendous advantage over hair dyes of containing no silver, sulphur, lead, or other poisonous which invariably cause hair-falling. It has no odor, no oil, no sediment and no grease, and does not rub off on the clothing. It makes the hair grow out fluffy and luxuriant.

A liberal amount as a laboratory tint package of this Walnut-Tint Hair Stain together with a booklet on hair, is sent by Mrs. Potter's Hygienic Supply Co., 147 Grosvenor Building, Chicago, Ill., in plain, sealed wrapper. If you will send 25 cents in stamps or coin, and if it is desired to confine the treatment, full-size packages may be obtained from our department stores for one dollar a package.

CARD PARTY HELD AT HOME CLUB

Franklin School Mothers' Club Gives a Successful Benefit.

The benefit card party held yesterday afternoon at the Home Club by the Franklin School Mothers' Club was one of the most successful benefit affairs of the season. About 300 well-known women enjoyed the pleasant hour about the card table and the tea served after the games.

Bridge, five hundred and whilst were played, and trophies of dainty boxes filled with candy were awarded to the winner at each table. A delightful program was given after the games. Among the numbers were a "Norwegian Love Song," sung by Mrs. A. W. Leman, who also contributed "Long Ago in Egypt," and two interpretive dances by Leigh O'Brien Wallbridge, "Moonlight on the Ocean," and "Will o' the Wisp."

All the articles used during the afternoon, the programs, tables, tea, cakes, playing cards, punch materials, and prizes, were donated by various downtown merchants. The proceeds of the card party, which will total several hundred dollars, will be used toward establishing a cafeteria in the school. The committee, to whose untiring efforts the brilliant success of the affair was due, included Mrs. S. E. Rutten, Mrs. A. M. Beebe, Mrs. Edgar Constant Robinson, Mrs. J. R. Ross, Mrs. F. E. Porter, Mrs. J. A.

I. O. F. HAS A BIG INITIATION NIGHT

Court Oakland Will Next Receive Visit From Chief Ranger.

The members of the I. O. F. held a meeting at their hall Thursday evening. It being initiation night, the following were initiated into the order: Foster M. Martin, C. J. Stephens, M. J. Chaves, J. A. Marshall, J. B. O'Reilly, William G. Fogarty, W. P. Briscoe and H. R. Rosenberg. The latter received the full initiation work.

Withdrawal cards were received from A. J. Johnson, Seal Rock Court, No. 3441, and R. C. Porter, Union Court, Iaquia, No. 1886, and were elected by acclamation into Court Oakland. Six applications for membership were acted upon favorably. The sick committee reported that all the sick brothers were improving, with the exception of the court physician, Dr. J. W. Legault, who was in such poor health that he went back to the hospital, and upon regaining his health, will go to the mountains for a couple of months.

It was unanimously voted that Dr. J. E. Clark act as court physician during the illness of Dr. Legault.

MODERN 'DASH' IN OAKLAND SHOPS

Shafran Showing Styles That Are Practically "Up to the Minute."

The stores and shops in this city are acquiring an up-to-dateness and dash that was once to be found only in San Francisco. No more stunning and up-to-the-minute styles are to be found anywhere than are on display at the luxuriously-appointed shop of Shafran's. All of the really new and nobby styles are there in abundance. Their variety is bewildering. But with such a clientele as theirs, only the newest and smartest garments are acceptable.

The range of color in suits and gowns is very wide, including the Nell Rosa, Oriental and Kitty Gordon Green, Bishop's Purple, Taupe and the vivid Bulgarian shades with an almost unlimited choice of fabric and style.

LIGHTNING AT SEA SPLIT HIS LEG

But It Was of Wood and Ship Carpenter Made a New One.

BOSTON, March 29.—Proudly pointing to a new wooden leg, Boat-swain Rose, of the clipper ship Aryan, explained when the vessel slipped into her berth at Point House wharf, that his old one was shot off by lightning.

It was during an electrical storm that played havoc with the sails and mast of the Aryan, that a powerful bolt "hit" on his wooden leg, tore it off and split one of the huge pine logs constituting the cargo of the ship. The carpenter, he said, made him a new leg, and he's proud of it.

The Aryan, the last wooden ship built in an American shipyard, brought one of the largest cargoes of Oregon pine ever shipped around the Horn.

For the first time in three years Stanford yesterday triumphed over California on the baseball diamond. The initial game in the 1913 series between the two universities, which took place on California field, went to the Cardinal by the score of 9 to 4.

Heavy hitting on the part of the winners and loose fielding by the Californians contributed equally to the result of the game. Six errors were chalked up against the Blue and Gold fielders and many of these were costly.

Maple, the Stanford twirler, out-

Pitcher Maple of Stanford, who twirled the Cardinal team to victory in the first game of the 1913 intercollegiate series at Berkeley yesterday afternoon; Workman sliding past Catcher Sebastian of California with Stanford's first run in the opening inning, and Borgstrom of the University of Southern California, winning pole vault at 12 feet, during the field and track meet with the State University freshmen.

PAGES, TODAY'S TRIBUNE.

pitched both Conklin and Webb of the Berkeley team, but even at that he would not have been able to lay claim to a large share in the victory of his team had it not been for the good support which the Cardinal fielders offered behind their pitcher.

The Blue and Gold team had all the better of the first four innings of the game and at the close of the fourth period was leading at 4 to 1. The Californians were working well at this time. Conklin was in good form, though he had one or two narrow escapes, and when the fifth inning opened the prospects for another California victory were bright.

In the fifth, however, the heavy-hitting Palo Alto team began to solve Conklin's delivery and before the inning was half over Conklin was in a bad hole, with three men on bases and only one down. Here Coach Schaeffer called Conklin to the bench and sent in Webb. The latter started at a tremendous disadvantage, of course, but the batting streak of the winners was not stopped by Webb's introduction. Before the frame was over California's lead had been over-

come and Stanford was one run to the good. Then the Cardinal batters put on a further burst of speed in the sixth, took four more runs, and had the game safely tucked away. At the outset both teams were over-anxious and suffered considerably from the strain of the contest, with the result that the play of both was very ragged in the opening frame. Each nine took a run in the first on its opponents' errors. This stage fright wore off as the contest progressed, but neither team, particularly the Californians, played the game of which it is capable under less trying conditions.

In the last inning two auxiliary batters were sent in by the Californians in a vain attempt to turn the tide of battle, but the effort was useless. Price, a utility man, who has been a very valuable member of the Blue and Gold force all through the season, and Stephens, the captain and star of the freshman team in yesterday morning's contest with U. S. C., were each given a chance to rap out the ball. These two men, in addition to Adair, Sebastian and Webb, have now joined the ranks of the Big-C players at Berkeley. Adair, center fielder, played a flawless game for the team, and considering that he is serving his first year on the team and is a freshman in the university, was not far from being the star of the contest. If a star could be picked from the team yesterday.

In the opening frame Stanford

came to bat first and Terry singled to the outfield. Argabrite followed by poking the ball to second, forcing Terry. Workman was safe on Rubke's error, Argabrite taking third on the play. Dent was safe on a fielder's choice, which forced Argabrite at the plate. Cass then singled, scoring Workman.

In California's half of the first, Adair, with one down, waited coolly for a free pass, went to second on a passed ball, to third on Maple's error, and scored California's first run on Goodwin's single.

In the third Adair led off with a single to right for California, advanced on Coane's sacrifice and came home once more on a hit by Goodwin. Goodwin stole second and went to third on Shepherd's walk and tallied on Dodson's squeeze. Conklin knocked a long fly to Beeger and Dodson came home after the catch. This made the tally 4 to 1, with the Blue and Gold in the lead.

STANFORD OPENS UP. In the fifth Stanford commenced to get under way, and a single by Argabrite and a double by Workman brought the score to 4 to 2. Even then the Blue and Gold had all the advantage.

The sixth was the beginning of the end. Adair opened with a single to left and McCluskey sacrificed him along. Maple singled and Terry walked, killing the bases. Here Schaeffer pulled out Conklin and sent in Webb. From the events which followed this was evidently a mistake, for Webb, with only a sideline warming up, was unable to do anything at all with the ball. Had Conklin remained there is a chance that he might have forced his opponents to hit into a double. This would have

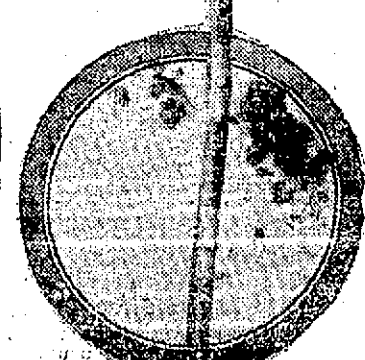

## Senators Prefer to Go to Game Rather Than Attend Church

SACRAMENTO, March 29.—Church service and Sunday baseball came into conflict before the judiciary committee of the Senate today, and Sunday baseball won. The lawyers of the Senate who did not go to San Francisco for the hot railroad celebration spent the morning and afternoon in sitting bills. At the end of the long day's work, Senator Gates of Los Angeles, chairman of the committee, announced: "Well, we'll have another Sunday session tomorrow. If we meet in the afternoon we can attend church. If we convene in the morning we can go to the baseball game. Which will it be?" "Oh, we've been working pretty hard; let's go to the ball game," said Wright of San Diego. Cammerford endorsed the suggestion, the others agreed, and the order for a morning meeting and adjournment at noon to attend the great American sport was made by Gates.

been the only way out of the difficulty and Conklin had a much better chance of executing the trick than had Webb.

At any rate Webb's start was the signal for a bombardment by the Stanford batters, and before the opening had subsided Terry, Hahn and Maple had crossed the pan.

Four more in the seventh, Beeger, Hahn, McCluskey and Terry scoring, gave Stanford her total.

## Women Will Appeal to Wilson for Suffrage

Feminine Voters Representing  
Nine States to Form a  
Delegation.

WASHINGTON, March 29.—Nine women voters, representing the nine suffrage states, will appeal to President Wilson on Monday morning for suffrage, despite his announcement that he wishes Congress to originate the movement for an amendment to the constitution.

Mrs. Annie H. Pitzer of Colorado, sister-in-law of Speaker Champ Clark, will be among the party, which will include Mrs. Charles Morton of Washington and Mrs. John E. Baker of California.

## Government Tests Tubercular Vaccine

The Van Ruck Method of Vaccination as a Preventive  
to Be Tried Out.

WASHINGTON, March 29.—The von Ruck method of vaccination as a preventative of tuberculosis will be thoroughly investigated by the government. Secretary of the Navy Daniels, who has been impressed with the possibilities of the method, has instructed Surgeon General Stokes of the Navy to make extensive experiments and report the results. About 700 adults and children have been treated by Dr. von Ruck and Dr. C. A. Julian, Thomasville, N. C. The reports of the latter show marvelous in the way of improvements and cures and the 340 children in the Baptist Orphanage of North Carolina have been inoculated with the vaccine.

## J. P. Morgan's Health Cause of Anxiety

Financier's Son Confirms Dis-  
patches Reporting Less  
Favorable Condition.

NEW YORK, March 29.—J. P. Morgan Jr., who was asked tonight at his home for some comment in regard to the dispatches from Rome and London that his father's recovery was not progressing favorably, said: "I received a cable message this afternoon, which, while it gave no details, indicated that my father's condition has been less favorable for the past three days, and in view of his years, is such as to give rise to considerable anxiety."

I. W. W. TO PROTEST. The I. W. W. will hold a meeting tonight at 8 o'clock at I. W. W. hall, Eighth and Broadway, to protest against the alleged ill treatment of the West Virginia miners. J. Edward Morgan, formerly organizer of the Western Federation of Miners, will speak.

## SOUTHERNERS WIN TRACK MEET

University of Southern California Victors Over U. C. Freshmen.

Take 12 First Places Out of  
14 Events on Berkeley  
Oval.

[By E. N. COBBLEDEICK JR.]

By virtue of winning twelve first places out of fourteen events and tying for first in another, the University of Southern California's varsity track team defeated the strong track team of the freshman class of the University of California by the score of 78 2-5 to 45 3-5 yesterday afternoon in the annual meet on the University of California oval at Berkeley. A balmy spring day and a fast track resulted in very fast time in every event.

Living up to his past performances Freshman Kelly of the University of Southern California captured first place in the hundred-yard dash, the 120-yard high hurdles, and the shot put, or, in other words, made fifteen points alone for the southern. Kelly made his debut in the 100-yard dash here by easily defeating Wadsworth, the crack Berkeley freshman, by at least three yards, but Carrigan defeated Stonewall Jackson, the speedy colorado sprinter of the University of Southern California, for third place. This event was won in the good time of ten and a fifth seconds.

WINS HURDLES HANDILY. Kelly took his time in the 120-yard high hurdles, but won with a substantial lead over Frank Fisher of the University of California in 15 4-5. His teammate, Leard, in the 220-yard low hurdles, defeated Frank Fisher of California by a small distance in the good time of 36 2-5. The 220-yard dash was bitterly fought out between Hodge of the south, who won, and Wadsworth. The finish was close, with Scott of the University of California taking a good third.

DISTANCES ARE GOOD. The mile race, which was the curtain raiser of the afternoon, was won easily by Torrence of the University of Southern California in 4 minutes, 41 4-5 seconds.

Taking the lead in the second lap he held throughout the race, winning by about fifteen yards. Vedder of the University of California ran a good second, but could not gain the lead. Hodge of the same team took third. Swiggart of the University of Southern California ran an elegant race in the two-mile event, taking an elegant lead and holding it throughout. He sprinted in the last lap and finished more than eighty yards ahead of Mills of the University of California in the fast time of 10:08 3-5. The latter made a good finish, defeating Wallbridge of the University of Southern California in the last twenty yards for second place.

Tipton, also of the southern university, ran a heady race in the half-mile event, holding to the rear until the end of the last lap, then sprinting and winning by several yards in 2:08 2-5.

CLARK OF U. C. WINS 440. The quarter-mile was probably the prettiest race of the day and was the only event won by the U. C. freshmen besides the 100-yard dash. Clark of the U. C. team took the lead at the outset by the U. S. C. men, but by a spectacular dash on the south turn of the oval got out of the "box" and ran third until 20 yards from the finish, when he passed his opponent, Leard.

The relay race was won by the visitors in the last lap, when Stonewall Jackson overcame a three-yard lead and defeated Cochrans by ten yards. The time was 2:22 2-5.

The Borstrom won the pole vault at 12 feet for U. S. C. with Bettinger of the

Alameda County Is Motor-  
Car Owners' Paradise

### MOLINE CAR TO ENTER LOCAL FIELD

Direct Representation of  
the Factory for  
Oakland.

(By EDMUND CRINNION.)

Of particular interest to the motorists of Alameda county is the information given yesterday by C. C. Eichelberger, one of the best known automobile men of Oakland, to the effect that he had completed arrangements with the Moline Automobile Company to represent the factory in the territory of Northern California, maintaining headquarters in Oakland.

For the purpose of conducting the factory representation, a local company has been formed which will be incorporated probably under the firm name of the Moline Automobile Company. Associated with the company, besides Eichelberger, is W. F. Bryan, a well known retired capitalist of Sacramento county, and H. D. Bean, a mechanical engineer, well known in the local automobile row. Bryan will be president of the company and Eichelberger will be vice-president and general manager.

The Moline factory, makers of the famous "Dreadnought" Moline car, will maintain direct headquarters here with the local company. C. F. Root, one of the principal owners of the Moline factory, who resides in Southern California, will also have offices here.

This deal brings to light the importance Oakland is assuming with the big factories in the East and proves the assertions frequently made that this city is a logical distributing point for the automobile factories. The Moline factory will carry a large supply of parts for the cars here in Oakland and will make immediate adjustments should any be necessary. The first car was received by the local company yesterday and, according to Eichelberger, far exceeds the expectations raised by the conservative statements made by the factory.

MORE CARS EN ROUTE.

Other shipments are already en route to Oakland and are expected here this week. The Moline car is a "40" horsepower, five passenger, touring car, with the 820000 horse power, is fully equipped and has the Ward Leonard electric starter and lighting system. Eichelberger intends to develop the car's interests in Alameda county first before extending the business to the other cities. He states that in his estimation Alameda county is one of the most important and best automobile centers in the state. Eichelberger's connection with the motor car industry dates back to its inception. He was for years coast manager for the Firestone factory and later following his convictions as to the importance of this field took the representation of another car, which he has lately dropped to take the present connections with the Moline factory.

RELIABLE FACTORY.

Discussing the Moline car, Eichelberger says: "Before making arrangements for a car for this territory, I believed would be the best of the present business arrangement, I considered many things that I believe the public has a right to know when considering the purchase of a car, namely: the members of the organization, the capital, reputation and standing of the factory making the car. Cars of the 'Dreadnought' Moline class are not one season cars.

In taking on the Moline car I am dealing directly with the firm of the highest financial standing, a concern with the strongest possible commercial reputation.

The Root and VanDergrift Engineering Company was established in 1899 and since then has been extensively engaged in the production of high-powered gasoline engines. The men and machinery that made the engine famous were available when the Moline Automobile Company was organized, so that when the 'Moline' 'Dreadnought' is entering upon its tenth year it was built upon the foundation of four successful previous years of the parent company, which is still a leader in its field.

The Moline car was named the 'Dreadnought' on account of its apparent fearlessness in active competition with the best of the world could produce and, from the victory it wrested from its competitors in road races and reliability and economy runs.

The Moline 'Dreadnought' won the following events: Perfect road score in 1910; victory in the 1910 Chicago trophy; Golden tour, won the 1910 team trophy; Chicago Reliability, won the Fort Worth six-day endurance run in 1910; won the touring trophy annual economy run in 1911; won team, tied for touring trophy in the 1911 Chicago trophy; won roadster trophy in the Chicago Reliability in 1911; won perfect score in the St. Louis run of 1910; won perfect score in the Washington Post run of 1910; victory in contact between in 1911, and in 1912 capped its long list of victories by winning both Chicago reliability roadster and team trophy.

"Considered from every angle, I believe that I have secured a car for this territory that measures up 100 per cent from every angle. The factory is strong, and reliable. I am meeting directly with the factory. The car has all of the requirements and mechanical qualifications to be found. And in case of any accident above the average in actual hard road work. I believe it will prove a very popular machine with the trade in Northern California."

ANOTHER PRECEDENT SMASHED. Among the many precedents shattered by President Wilson, is that under which former Presidents have carried with them, in the Presidential automobile, a uniform old.

President Wilson has substituted two motorcycles officers and will be guarded by them hereafter in his drives about.

The new President made the change the day after his inauguration. Greater safety in this assured the President, for the motorcycle officers can watch both sides of the street, whereas the uniformed guard who rode in the automobile could not be found. And in case of any accident it is necessary, the motorcycle men do not have to depend on the automobile.

C. C. EICHELBERGER.

### PUBLIC EXPECTS FOOL-PROOF CAR

Many Drivers Cannot Change  
as Much as Spark Plug  
on Motor.

"The automobile buyer is expecting more and more of a machine each year," says G. H. McCutcheon, head of the Howard Automobile Company's Oakland house, "and the factory that expects to survive the present readjustment period must continue to improve its product to keep pace with this demand in the future even more than in the past. It has only been a few short years since the owner of even the highest priced machine was more than pleased if he succeeded in making a 100-mile run in one day without trouble while a trip of 400 or 500 miles was an event which was of general interest to the public, and for that reason was given considerable space in the columns of the press.

"One ever thought of taking a machine out in the rain even in the city, while a trip over country roads in a storm was unheard of and there was a large percentage of the cars in use stored for the winter as soon as the first fall rains had softened the roads. The troubles of the owner of a car in those days were many. The machine had not yet been perfected and he was forced to rely on storage batteries for his electric energy. The early carburetors were very crude affairs, as compared to the carburetor supplied today even on the cheapest cars.

"Tires were another part of the equipment which were sure to give a great deal of trouble to the early owner. In contrast to the troubles of a few years ago note the demands of the present day owner of even the cheapest popular priced car. In the first place his car must be good to look at. It must have good lines, good paint, good upholstery and good equipment, and above all things it must be reliable and give uninterrupted service.

"While the owner of one of the older cars was perfectly willing, and, in fact, expected to put in a lot of time on his car while on the road the modern owner complains if he even has to change a spark plug while on a 500 or 600 mile trip. I know of one of the small 1912 Buick touring cars being driven from Reno to San Francisco early last year by an inexperienced driver who did not have even an extra spark plug in the car, and there are a great many people driving cars today who know absolutely nothing about the mechanical construction of their machines. They know where to put water, oil and gasoline and there isn't knowledge and I am sure the owner of that one Buick owner in fifty knows anything about adjusting either his carburetor or magneto; in fact, this knowledge is unnecessary as the modern automobile of standard make is practically trouble proof in every respect, and it should run for a great many years. In fact, it is impossible to wear a properly constructed automobile that is properly lubricated out."

### MAXWELL AUTOS ARE SOLD ON TIME

The Maxwell Sales Agency of Oakland has made arrangements to take care of all buyers wishing to purchase Maxwell cars on terms. Commencing with the coming Tuesday, Manager Arthur C. Hull will sell any model of the famous cars from the small roadster type to the big Maxwell six cylinder "50," on time payments to suit the buyer.

This move on the part of Hull comes as a huge surprise to the trade. Hull stated yesterday that this is the first time that motorists have been able to secure Maxwell cars on this basis and that he made the arrangement simply because he believed the automobile had become a business proposition and that many who could not afford to dig up the initial investment heretofore necessary should have cars and could make them pay for themselves in a short period of time. "The new arrangement will enable them to avail themselves of a substantial car," he says.

THIS HAPPENED IN INDIA.

P. C. Sawarant, a native of India, a soldier, was three hours ahead of the Bombay-Calcutta road in India when their car was charged by a buffalo. In the collision the driver lost control of the car which went over a cliff into a nullah. Nobody was killed and the car was gotten back to the road and driven to the next town. The trial was postponed, however. The buffalo was a total loss.

### ANTI-SKID IDEA DUE TO JANITOR

Window Washer Suggests Idea  
of Diamond "Squeeze"  
Treads.

Tire users are indebted to an unknown negro window washer for the discovery of one of the most popular safety treads used on motor tires—and the window washer doesn't know it. If he did he might be claiming a reward of some sort as the discoverer of the safety tread.

According to a story that has become popular around the plant of the Diamond Rubber Company in Akron, the expert tire engineers of that company had been working for several months on a safety tread, but had found nothing satisfactory. They had worked out several plans, but after exhaustive tests under every possible road conditions all of the plans had been pronounced lacking in one or more particulars.

Some of the engineers were about ready to give up. One in particular who was noted for his ability to stick to a proposition until he had solved it, confessed that even the mention of a safety tread made his head hurt.

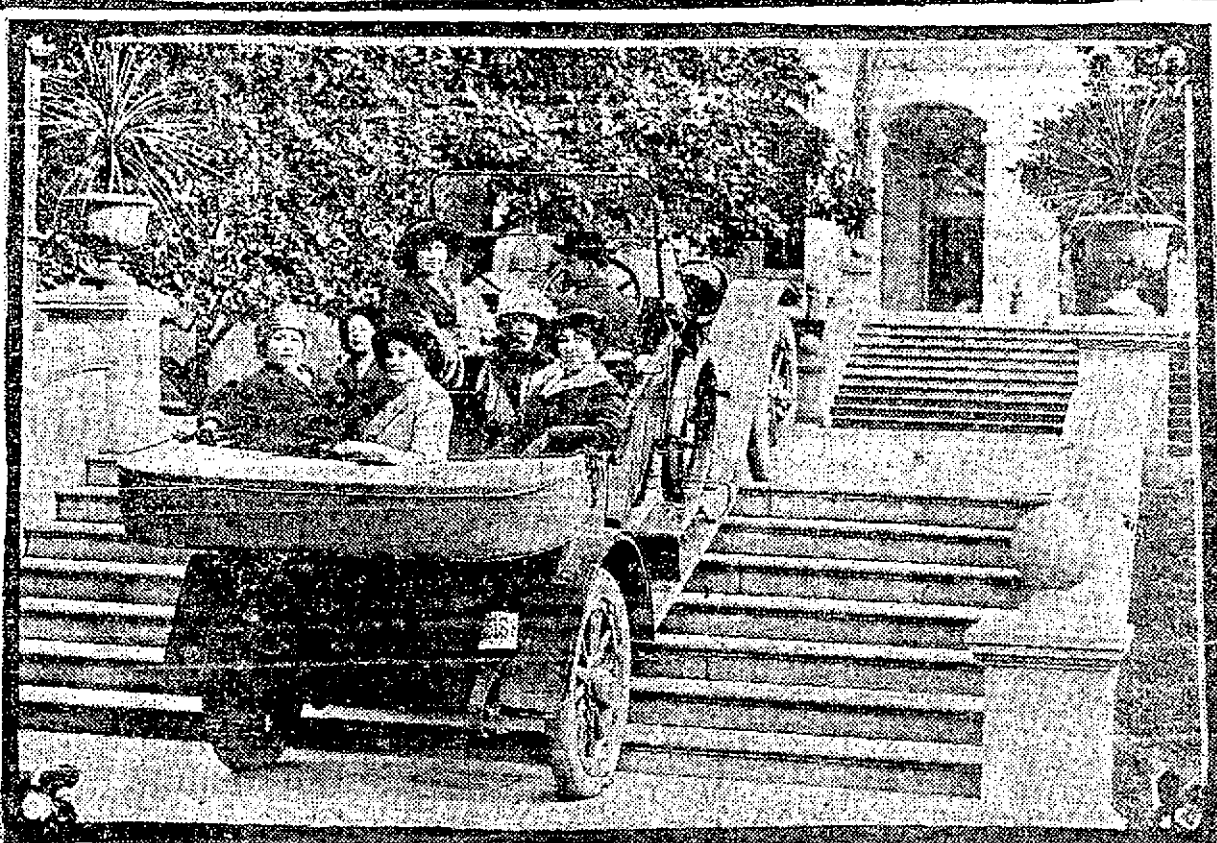

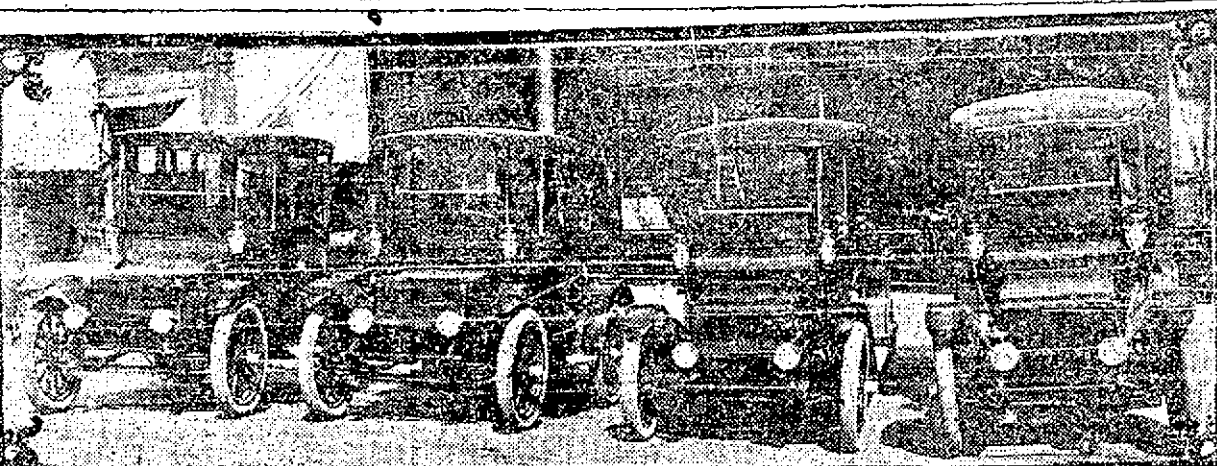

One morning shortly after this particular engineer had arrived at his office his attention was attracted to a negro porter washing windows. Not that the engineer had any particular fancy for window washing, but he half wished that morning that he had nothing more than dirty windows to worry him. They couldn't cause anyone to think hard enough to get a headache.

Swish, swish, swish, went the water as the porter drew the squeegee rubber cleaner across the window to remove the water. Then the porter did something that solved the problem of the safety tread and gave the Diamond safety tread the name squeegee. He started to pull the squeegee cleaner over a dirty portion of the window, but nothing doing. It stuck fast—it gripped the surface of the glass. There was the solution of the safety tread problem.

"That engineer lost no time in making experiments of his own with a squeegee window cleaner," said C. E. Mathewson of the Diamond Rubber Company. "He at once designed some safety tread tires with the safety tread devices working on the same principle as the squeegee window cleaner. These new tires were given every possible test over the most slippery streets and treacherous roads. The squeegee treads never failed once. They stuck every time. They were built on the right principle. You know a successful safety tread tire must have the safety tread devices so arranged that they will clean away the slick coating from between the road and the tire and give the tire a gripping hold on the firm road surface—stopping the skid before it gets underway."

Four new 1913 motorcycles are to be added to the Indianapolis police department.

SHIPMENT OF "CLEAR VISION" DETROIT ELECTRIC CARS, RECEIVED IN OAKLAND THIS WEEK BY THE UNITED ELECTRIC VEHICLE COMPANY.

H. W. SMITH OF SACRAMENTO, CLIMBING THE CAPITOL STEPS WITH A PARTY OF FRIENDS IN HIS SIX-CYLINDER CHALMERS TOURING CAR.

### MOTORCYCLE NOTES

It is impossible for the naval officers to take a spin over the "restless deep," but with a keen anticipation of motor-cycling possibilities while in port, several of the officers of the U. S. S. "Wyoming" carry "two-wheelers" aboard ship.

When they are in port, the officers have the motorcycles taken from the special compartment in which they are stored.

Miss La Pearl E. Wills, an enthusiastic motorcyclist, of Canal Dover, Ohio, has added a sidecar to her motorcycle, and now takes her girl friends with her on her trips.

## TIRE EXPENSE REDUCED

An Absolute Guarantee of 2000 Miles  
on All Our Heavy Relined Retreads

A new tire is guaranteed to give 3500 miles' wear. For about one-third of the price of a new tire we will retread and reline your old tire and guarantee you 2000 miles' wear. This means that the amount of money you would invest in a new tire—invested in our retreads, gives you 6000 guaranteed miles against 3500 miles guaranteed on a new tire. You save money if we live up to our guarantee.

### Here Is the Guarantee

Every casing retreaded and relined by us is guaranteed to give two thousand (2000) miles' wear if used in one year from date of repair. By accepting casing for repair we agree that guarantee covers defective workmanship and defective material used in construction of casing. Refund will be made in cash for all mileage not delivered less than 2000 miles.

### Here Are the Prices Retread and Heavy Reline

Round Tread.	Non-Skid Tread.	Round Tread.	Non-Skid Tread.

### HOW CAN WE DO IT?

We have repaired tires in Oakland for over five years. We know how. We use "Firestone," the best repair material obtainable. It is the same stock you get in Firestone tires. While it costs us more than other repair materials, we don't have dissatisfied customers returning defective work for refund. That is why we can do it.

## MOTOR BUILDER TALKS ABOUT BUSINESS

### Kenosha Dean Compiles Optimistic Outlook Statement

An extraordinary statement to the automobile trade, full of optimism, and of great importance to the manufacturing, agricultural and mercantile people of the country was made at Kenosha, Wisconsin, yesterday by President Charles T. Jeffery, of The Thomas B. Jeffery Company.

This announcement contains predictions regarding the political future of the country, prophesying great growing wealth to the American farmer and a vast prosperity that is coming to the mercantile interests.

"You can't buy a pig today for less than eight dollars," said Mr. Jeffery, "and hogs sold in the Chicago market on March 18 at the record price of \$9.06."

Horses are selling out of sight in spite of the fact that you can get a serviceably sound team for less than \$400 and they are asking \$125 for plows. "Gittie are scarce. Swift and Company, in their annual report, give figures that are appalling regarding the falling off in the general average weights for the year and the decrease in the receipts is counted in the hundreds of thousands. This means big money for stock men."

"The Iowa farmer is beaming because he knows thirty-five cents in corn is worth a dollar a bushel in his pocket. He was lousy last week with three inches of snow on the ground which means fields of golden corn in August."

"The Jeffery Company finds itself on the first day of spring with twice as many unfilled orders to date as it had one year ago."

"The car sales for the 1912 calendar year increased eighty percent over the year 1911. For the eight months of the 1912 fiscal year, which closes June 30, there was an increase of ninety per cent over the same period in 1912. These figures cover actual sales of cars delivered and paid for."

Three hundred and thirty-six more dealers are selling the Green Country today than sold this car one year ago.

"Sales at the New York Branch have increased 150 per cent. The Milwaukee Branch shows a 120-per cent increase. Thirty-five orders were taken three weeks ago at the Kansas City show. Fifty-one orders at the Omaha show. Twenty-one at the Sioux City show and twenty-eight at the Boston show."

"The Wisconsin farmer is getting thirty cents for butter and we are paying forty-one in the market."

"The Michigan fruit crop is going to be a dandy after an open winter. A great improvement in mercantile affairs is shown especially through the great central areas of the country. Ohio, Iowa, Minnesota and the Pacific coast sections are booming. Canada business is just 'burning up the roads' in the great northwest and they are taking all the jills on high."

"The rate of loans to deposits at the banks is decreasing every day. Business is improving through New York, Pennsylvania, Indiana and Illinois. The mining situation in the Rocky mountain states has improved. Fine roads make New England a great motor car market and business conditions are stable there. It's an ill wind that blows nobody good, so western Pennsylvania is booming with oil at the top of the plumbable and climbing higher."

"Southeastern Texas is a fertile field for sales just now. That's a marvelous country. Austin, Fort Worth and Houston are livelier than ever, while Florida towns and Los Angeles and San Diego, California, are getting ready for the big 1913 business-building everywhere."

"The steel corporation paid twenty-five million dollars more for wages this year than last. Politics are not worrying the man with the giant tractor and the broad acres that stretch from sun to sun. He is the backbone of this country and he is spending his money today."

"True, the manufacturer and merchant are powerful factors in this great prosperity, but prosperity starts with the soil and the farmer passes it around."

"A pessimist today hasn't as much chance as a snowball in Death Valley."

"Uncle Sam is like the stable companies in this business. He is independent. He is fresh and vigorous and youth always wins. Like Uncle Sam, the industry is here to stay."

"The great progress of the century has been made during the last forty years—just the life of the older concerns. This country has more reasons for success than any other country. It is better balanced from the standpoint of natural resources. It stands alone—free from any foreign alliances. It does not belong to any trust."

"We raise all of our own foodstuffs. We mine our precious metals and we make our own clothes."

"In other words, Uncle Sam and the most permanent motor car companies make all parts and their credit is good."

"The mining camp days of the automobile business are gone. The care-free days of Colorado and Virginia City are no more."

"The industry is squeezing out the blue sky. It's men and machinery and money now."

"They will win."

**GASOLINE "DEFEATS" ELECTRICITY.**  
A motorcycle with a sidecar has just won a race over a "trolley" at Ware-house Point, Connecticut.

John McDowell had just missed the trolley, and there would not be another for an hour. He meant that he would miss his train in the city and be delayed there for many hours. F. H. Blodgett came to his rescue and offered to catch the trolley with his motorcycle. McDowell had much faith in the ability of his friend to do it, but accepted the offer in just one minute and ten seconds and the sidecar was caught at the garage and ready for the start.

It was a dark night but the roads were good and the light from the motorcycle permitted the riders to reach a speed of about 46 miles with safety. At first there was nothing but darkness ahead of them but after a few minutes' ride they saw the light of the trolley on which they steadily gained until finally they came alongside the car. The motorman accepted the sudden appearance of the flying motorcycle as a challenge and turned on full power. But he was unable to cope with the two-wheeler, who, with wide-open throttle, sped past him to the next stop where McDowell climbed from the side-car in time to board the trolley.

The first parade of the motorcycle band of the Salt Lake City Motorcycle Club was held March 18, and met with great success.

Mr. and Mrs. Sam Sadler, of Sour Lake, Texas, have just returned from a motorcycle wedding tour extending over the last three months.

## ENGINE RECEIVES FIRST ATTENTION

### Paige Car Dealer Claims the Motor Is Heart of All Automobiles.

To the question "what is the most important part of a motor car" there can be but one answer, says C. L. Hebrank, of the Osen & Hunter Auto Company. "The Engine. It is the very heart of the vehicle and as such it will always be the part that will receive the closest attention and study of engineers and designers with a view toward its constant improvement."

"Two features of engine design have been the subjects of experiment and improvement to such a great extent that their influence on cars offered for 1913 is plainly apparent. They are 'Block cast cylinders' and 'Long Stroke'."

"Both features possess so many undoubted advantages that they have taken strong hold on those manufacturers who stand for the best in motor car design and construction, and who couple progress with conservatism which takes only improvements which have proved their superiority over old methods."

"Cylinders cast en bloc possess very much greater rigidity than when cast singly or in pairs. They also always are in positive alignment which insures freedom from binding of the pistons in the cylinders when the engine is subjected to twisting strains on rough roads. This binding not only causes loss of power but causes all the bearings in the engine to wear fast, necessitating its being taken down frequently for adjustment, and shortening its life."

"Other advantages of the en bloc style of cylinder casting are, clean appearance of the motor, accessibility and simplified construction. All of which are secured at the additional advantage of reduced cost of production."

"This is especially true of the Paige '55'. The en bloc cylinders have a bore of four inches and a stroke of five inches, conservatively rated at thirty-six horsepower. All four cylinders are bored in one operation and in perfect alignment, which is possible only with an en bloc casting."

## SMALL TIRE-CUTS PROVE EXPENSIVE

### Destructive Inroads on the Tire Casings Made by Small Stones.

"In the main it may be said that sixty per cent of tire repair bills are caused primarily through the carelessness of the owner. And half of the remainder are caused as a result, generally of small tire-cuts," says Manager B. H. Pratt of the Pisk Tire and Rubber Company in speaking of the care of tires. He says:

"The cuts appear in any tire that is run over dirt roads. In almost every case they are caused by sharp stones or ruts. They first manifest themselves as cuts apparently an inch or so long which seem to extend into the tread a short distance. If these cuts are allowed to go uncaused for, they quickly fill with sand and dust from the road."

"The weight of the car spreads the tire and this opens the cut when it is touching the road. At the moment the cut leaves the road it closes in an atmosphere of flying sand and dust, sucking in flying dust and sand. The foreign matter accumulates and forms what is known as a sand-blisters."

"Tires used while in this condition invariably work the sand through the rubber to the fabric, which is gradually cut through by the sharp edges of the sand. A blowout is certain to result."

"The proper insurance against such blowouts of this kind is to have the tires washed out thoroughly with gasoline before they are allowed to grow. They should then be filled with some good tire filler."

## STARTS ON SPARK AFTER TEN WEEKS

### Winnipeg Man Claims Record With His Cadillac Engine.

Recently comment was made that while the Cadillac was the first motor car to be equipped with an automatic electric starting device, it was generally regarded as the car that least frequently started by the spark. In this connection a typical incident was narrated in which a Cadillac started on the spark after being five weeks in storage on its way from Detroit to Vancouver, B. C., the charge of gas having been retained in the cylinder all that time.

Now comes the Cadillac dealer at Winnipeg with a similar incident, which puts the Vancouver story completely in the shade.

Joseph McDonald of Winnipeg, about to depart for England, decided to take his Cadillac with him and gave instructions for shipment. The car was drained and loaded December 10, its destination being St. John's, where it was to be transferred to a steamer for the old country. Transportation was so slow, however, that before it arrived three boats had sailed from St. John's. Mr. McDonald cabled, therefore, to have it sent back to Winnipeg, as there would not be time enough for him to get any use out of the car while abroad. The Cadillac was the sidecar was caught at the garage and removed from the freight car and was returned to Winnipeg without being touched.

It arrived home and was unloaded February 29. Therefore, during 10 weeks of the cold season it had remained in the freight car. Yet, after unloading, it started on the spark, and the Winnipeg dealer feels that he is therefore justified in claiming the record for this particular kind of Cadillac performance.

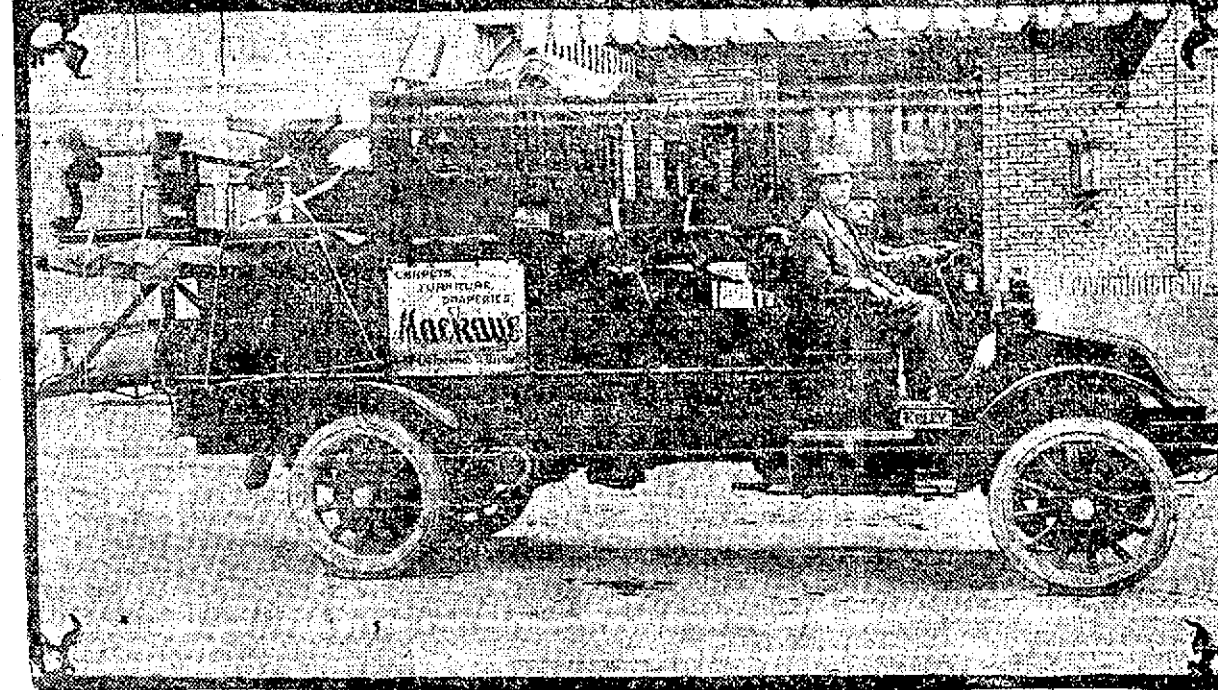

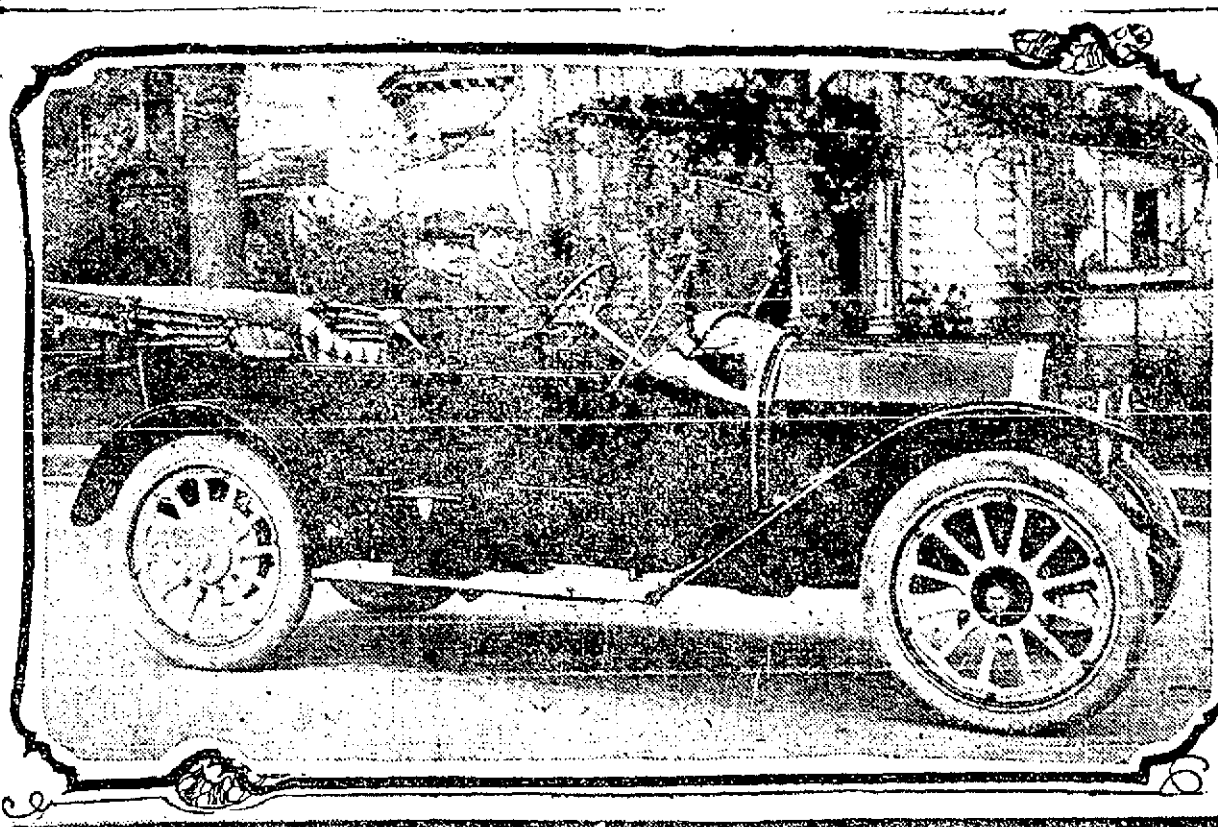

## MOTHER MUST PAY TOWARD CHILD'S SUPPORT

MILWAUKEE, March 29.—"Any Milwaukee girl or woman who earns \$5 a week as a domestic, whether she is married or not," declared Judge O. T. Williams in the circuit court Saturday morning.

The court had granted its intervention in ordering a woman divorced to pay \$2 weekly toward the support of children in the care of a grandmother. And the woman's attorney had objected that the amount was rather high, as the woman was earning but \$2.50 per week as a servant.

"I can get her a place at any time where she will get \$5 for each week," said the judge. "That waitress and servant girls make their own money."

M. T. HAMILTON, SALES MANAGER FOR THE PATHFINDER AGENCY IN OAKLAND, AT THE WHEEL OF THE NEW PATHFINDER TOURING CAR, REMINDS A. WAGNER, THE HEAD OF THE LOCAL COMPANY.

MACKEY'S NEW DELIVERY TRUCK, THE KELLY SPRINGFIELD, READY TO START ON ITS ROUNDS DELIVERING FURNITURE.

### TOUR HALF COMPLETED.

Practically one-half of the transcontinental tour of J. Leo Sauer, in behalf of the Federation of American Motorcyclists has been completed. And from the enthusiasm of the meetings held in the various cities so far visited, his trip promises to prove of even greater benefit to the F. A. M. and motorcycling in general than was anticipated.

In his talks Mr. Sauer is urging upon the different clubs that advantages to be derived from state organizations. He says that it is of course impossible for large numbers from each district to attend the annual convention of the national body. But if state associations are

formed and state conventions held each year it will serve to keep the riders in touch with the work being done by the F. A. M. and also keep up enthusiasm in the local clubs.

The close of the week of March 17 completes Mr. Sauer's stay in California. His itinerary for the week of March 24 includes Portland, Seattle, Spokane and Salt Lake City. He will then start back East.

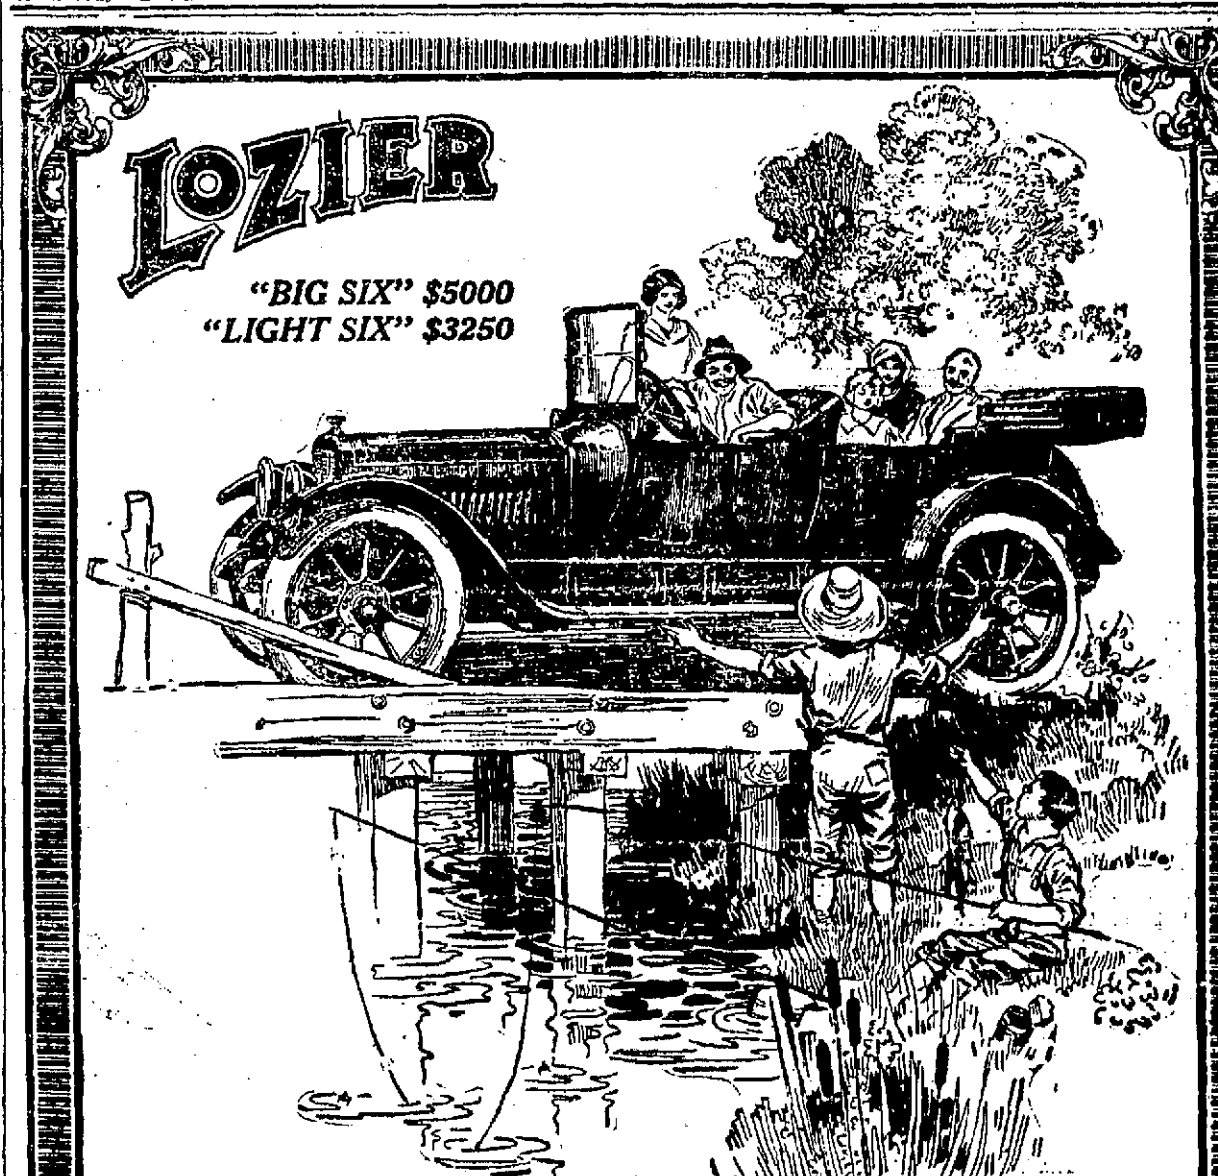

The last meeting of the tour will be held in Newark, N. J., April 29.

Nelson Foust, a landscape photographer of St. Petersburg, Pa., uses a motorcycle in his work.

### NOTHING COULD STOP HIM.

Ira J. Stockwell, of Lawrence, Kansas, has just completed a 1400-mile motorcycle trip through Kansas, Oklahoma and Texas, which was a severe test of his two-wheeler. Most of the distance from Wichita, Kas., he traveled through mud and sand. The sand was so bad that it got into the mechanism of his camera and put it out of commission. But the motorcycle ploughed right through without a scratch, and Mr. Stockwell says it runs as nice today as the day it came out of the crate.

Hard luck is often due to an effort to avoid hard work.

**Don't Let the Big One Get Away**

THE Lozier "LIGHT SIX"—a true Lozier—is the first six-cylinder car of highest grade construction offered at a medium price. This beautiful, powerful, luxurious car at \$3250 is too good to miss if you want a car in the Lozier class. It's too big an opportunity to let get away.

The demand for this Lozier at less than deliveries on all orders received within \$5000 has been a factory-capacity demand, but our allotment, secured by early contract, enables us to guarantee body designs. Prices \$3250 to \$4450.

## GOODYEAR AGAIN BREAKS RECORDS

### Count of Autos on Exhibition at Shows Gives Lead to Goodyears.

BOSTON, Mass., March 29.—The tire count on show cars again was a Goodyear victory at Boston, thus adding that show to a long list of decisive victories.

After the officials in charge of the count made a careful examination of the cars on display at the Mechanics' Building it was found that 120 of the 210 cars exhibited were equipped with Goodyear tires.

The tire contest has become the most interesting bout staged during an automobile show. The interest held in the tire equipment is largely due to the fact that automobile shows indicate to a large extent the sentiment of the industry, consequently keen rivalry exists among the tire makers to make a conspicuous showing as possible.

According to A. F. Osterloh, assistant secretary of the Goodyear Tire and Rubber Company, the average Goodyear lead has been 74% at the shows held up to this time. In New York the lead was 100%. In Chicago 118 show cars were equipped with Goodyears, which broke every Chicago record on any make of tire.

For three years Goodyear tires have led on cars equipped for exhibit, but their 1913 record breaks by a large margin their 1912 record.

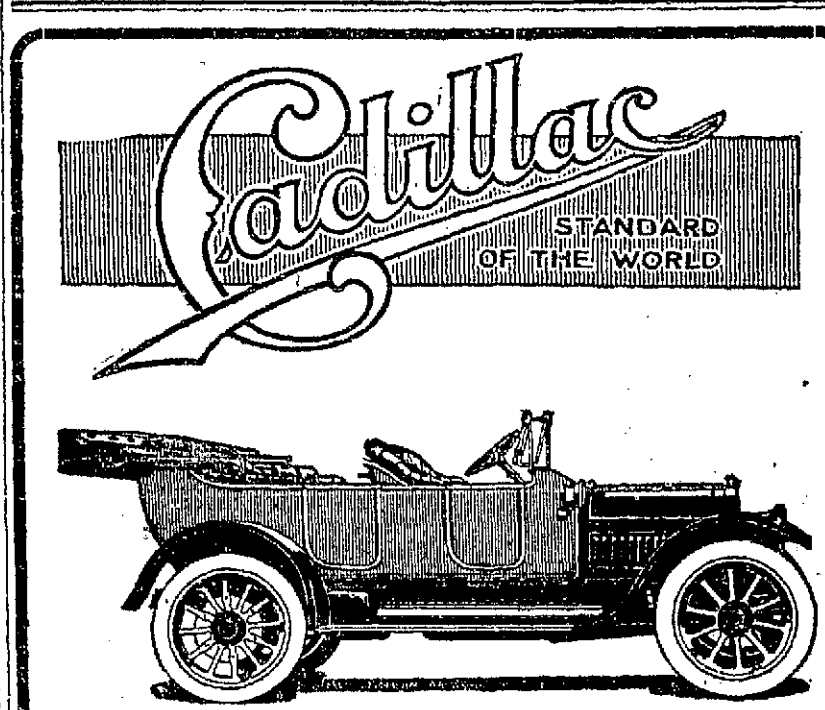

## DIAMOND FACTORY MAKES REDUCTION

### Secret Process From Chemist Cause of Saving to Autoists.

"The reduction in tires as announced in this morning's TRIBUNE, means a big saving to motorists," according to Manager E. L. Hileman of the Oakland Diamond Tire branch house, Hileman says.

"The reason the Diamond factory is able to make this big saving possible for the motorists who equip their cars with the Diamond tires are: The present supply of crude rubber, improved methods of manufacturing, and particularly the economy resulting from the discovery made by Diamond chemists of a new process of toughening pure gum that has resulted in vitrified rubber. This discovery is a secret method of toughening pure rubber that insures more road resisting wear in the tire. At the same time materially economizing in the cost of tire production. The recent floods in Akron have in no way interfered with the Diamond factory or production, although other factories have had to suspend operations."

Miss Flora Robertson has been added to the sales force of a Warrensburg, Mo. motorcycle concern, and has already convinced a number of girls of the pleasure to be derived from motorcycling.

## The Car That Creates Its Own Class

The Cadillac is identified with no "class" excepting its own—a distinctive class. It finds its sale not especially among purchasers whose limit of investment is the Cadillac price. It appeals alike to the discriminating motorist who demands a dollar's worth for every dollar of investment, and to the motorist who places dependability, service and luxury above all price consideration.

## The Cadillac Car Is Different—If You Knew the Difference You Would Buy a Cadillac

So also are our methods of doing business different. You will like them, too. You would show poor judgment to buy a motor car without investigating the Cadillac.

## ELWOOD HAYNES MAY TOUR TO COAST

### Motor Car Men Working Hard for Big Tour in July

Receptions which have been rampant with enthusiasm of the most convincing nature have been accorded Charles N. Warren, general manager of the Haynes Automobile Company and president of the Indiana Automobile Manufacturers' Association ever since his arrival on this coast. It has been enthusiasm which has shown clearly the attitude of the citizenry of the Pacific Coast towards the ocean-to-ocean highway scheme and the determination of the day elites to make this point the terminus of the transcontinental highway, the pathfinding tour for which will take place next July when more than fifty machines will cross the continent with the San Francisco Bay region as the objective point.

Before leaving Yokohama to come west, Warren entered two Haynes cars in the big coast tour. One is entered in the name of the Haynes Automobile Company and the other in his own name, to be a personal car for his own party on the trip.

Other entrants to the tour are particularly gratified by the action of the Haynes in joining them, because of the fact that the general manager of the Haynes concern, who will probably make the tour as official representative of his firm, is at the same time president of the I. A. M. A. The man highest in authority in the association will, therefore, constantly be with the tour to help smooth out any tangles which may arise, and fittingly to represent the tourists on occasions of importance.

As an additional feature of its entry the Haynes company is thinking of sending Elwood Haynes, builder of the first American automobile, on the tour. If the veteran can be induced to go, he would prove a drawing card second to none. The story of the manner in which he struggled to piece together America's first car is still sufficiently interesting, though often told, to make people want to see him. Besides there is a difference between the inventor and the cold type which relates of his exploits. Men who are versed in touring claim he would be one of the biggest attractions of all.

Warren states that sentiment throughout the coast favors the so-called midland trail as the route to be followed by the tourists, but that owing to a pending decision it is up to the various local organizations to furnish the Indian Automobile Manufacturers' Association with such data as will aid in the final selection of the midland trail, which will naturally bring the travelers direct to San Francisco and Oakland. Accessibility, general road conditions and possibilities plus a consideration of the territory that is to be traversed are features which will of necessity enter into the final selection of the route that the tourists will cover.

The entries to date are as follows: American, American Motors Company; American, D. S. Menasco; Henderson, Henderson Motor Car Co.; Henderson, R. F. Henderson; Stutz, Ideal Motor Car Company; Stutz, Harry Stutz; Marion, Marion Motor Car Company; Marion, J. I. Handley; Premier, Premier Motor Manufacturing Co.; Premier, H. O. Smith; Haynes, Haynes Automobile Co.; Haynes, C. B. Warren.

While the motorcycle is becoming well known for its usefulness in the United States Army, it has also made some "headway" in the Navy.

CHARLES N. WARREN, GENERAL MANAGER OF THE HAYNES AUTOMOBILE COMPANY AND PRESIDENT OF THE INDIANA AUTOMOBILE MANUFACTURERS' ASSOCIATION, WHO WAS IN OAKLAND THIS WEEK IN THE INTERESTS OF THE COMING COAST TOUR OF THE INDIANA MADE MOTOR CARS, TO BE HELD IN JULY.

## FRANKLIN AGENT GOES TRAVELING

Heat of Jamaica Harmless as Canada's Cold to Air-Cooled Car.

A 125-mile ride with the thermometer fifteen degrees below zero and then in the next three weeks taking an afternoon's drive under the blazing sun up a nine-mile hill, is the winter's motor experience of A. Renault of Prince Albert, Sask., Canada. Late in January Renault, who is the Franklin dealer at Prince Albert, went from Prince Albert to Saskatoon, a distance of 125 miles, with the thermometer fifteen degrees below zero. He reported that he did not mind the trip and the direct air-cooled Franklin seemed to ignore the weather, bowling along as if the conditions were ideal.

Soon after taking this long cold trip, Renault left for the West Indies, and while at Kingston, Jamaica, saw a Franklin Little Six touring car, which he secured for the day. He picked out the longest, hardest climb near Kingston and went up a steep nine-mile mountain grade. The Little Six went up the hill with full load and the heat of Jamaica did not seem to affect it any more than did the cold of Saskatchewan affect Renault's own car.

## BRITISH AIM IS SAFETY FOR CARS

Overland Man States America Should Study English Road Plans.

English motorists have recently undertaken a task in which they might well be imitated by their American brethren, is the opinion of G. W. Bennett, vice-president of the Willys-Overland Co., Toledo, Ohio. This is the law of making roads throughout the British Isles which are frequented by motorists more safe for travel, not only in bettering the roadbed, but in removing obstacles which prevent clear view at railroad crossings, curves and turns. Bennett points out that road betterment means not only the providing for a smooth and hard traveling surface but the elimination of everything that might in any way cause an accident.

"The English have shown a commendable spirit of progressiveness in clearing the turns and curves of their roads of objects that prevent a clear view," he says. "British motoring publications recently have called attention to the good being done along this line. In two instances I have noted, very dangerous curves have been made perfectly safe by cutting down hedges and undergrowth which have prevented a view of the curve. Where heretofore tall hedges, growing inside the curve, have made it impossible to tell what may be approaching from the opposite direction, an unobstructed vision has been obtained merely by eliminating the obstruction. In one case the hedge was cut down and a white-painted picket fence, in direct contrast to the surrounding vegetation colors, was built. With these precautions motorists approaching the curve from both directions are enabled to tell at a glance whether the road is clear beyond."

"In our own country there are numerous opportunities for this excellent work. Many of our country roads are crossed at various angles by railroads and more often than not it is impossible to tell whether a train or car is approaching because of the growth of brush or other obstructions. In the cities, too, there are scores of dangerous places, where billboards and other unsightly objects are erected close to the crossing or curve. I am confident that in the near future our great automobile clubs will see the need for these preventative measures. An when the work is taken up, the number of automobile accidents will be greatly decreased."

## SMALL MOTOR CAR VERY ECONOMICAL

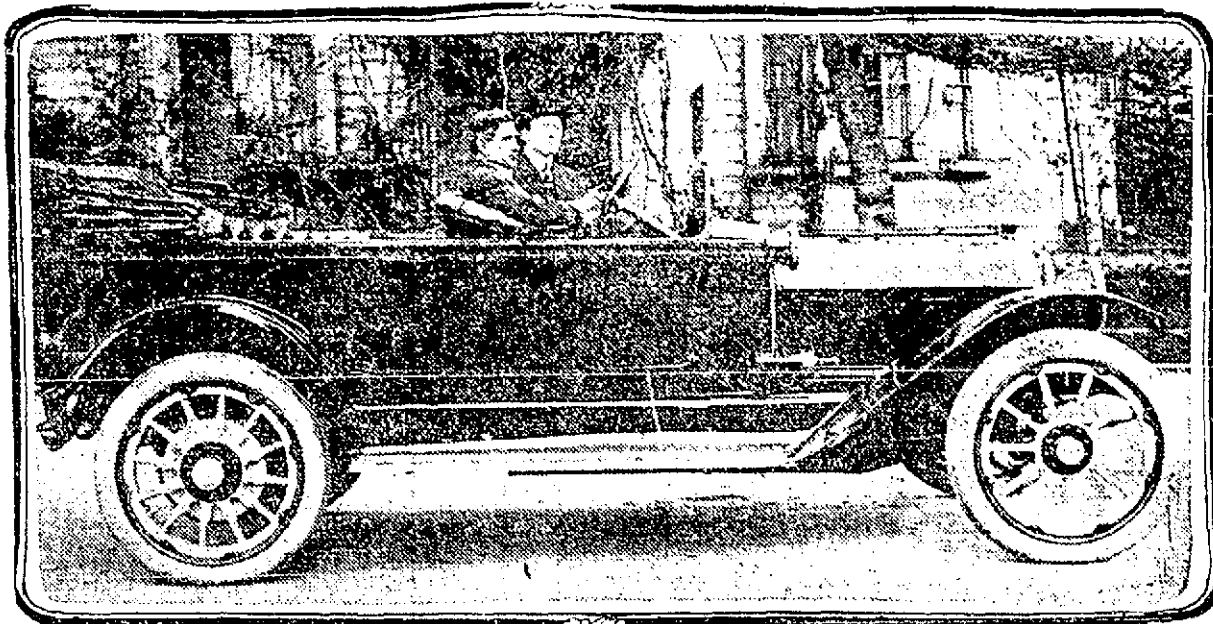

Seventy-five Hupmobiles Are Sold on Showing Made by One.

Sales managers and salesmen are realizing the necessity of having a motor car for both city and country use. Much more territory can be covered by automobile than by train, especially if the salesman has to visit several towns, at a distance of about fifteen miles apart. A great deal of time is wasted by having to wait for the train. If he hires a horse and buggy it would take him several hours, but by the use of the motor car not only will a great deal of time be saved but also more work accomplished.

"One of the many companies to realize this situation," says S. G. Chapman, distributor for the Hup Mobile Car Company, "is the Pillsbury Flour Mill Company, who purchased a Hupmobile runabout over a year ago. It was tried out on the roads through western Minnesota and North Dakota by C. C. Reiger, district manager for the Pillsbury Company in that territory, and at the end of the last season a report was received from him on the great ability of the car. After the favorable report reached the company it at once placed an order with us for seventy-five Hupmobiles, and from the last statement received they were giving very satisfactory service."

"At the end of last season, after the Hupmobile had been driven 7000 miles, Reiger handed in a repair expense bill of less than \$10 for the total mileage—with the original set of tires still on the car. 250 gallons of gasoline had been used at a cost of \$42 and 40 gallons of lubricating oil at \$24. Including the initial cost of \$750 for the machine the total expenditure equaled \$526, which, with a depreciation cost of \$150 on the machine is a total expense for 7000 miles of a little less than sixty cents per mile."

ARTHUR C. HULL, HEAD OF THE MAXWELL SALES AGENCY OF OAKLAND, AT THE WHEEL OF THE NEW MAXWELL "50" SIX-CYLINDER TOURING CAR.

## SIX SHORTAGE IS HULL'S PROPHECY

Maxwell Auto Dealer Asserts 1913 Shows Tendency for Sixes.

As the automobile selling season develops, it becomes more and more apparent that the demand for six-cylinder cars is going to exceed the possible supply, especially for the type of car selling for \$2500 or less.

While many of the manufacturers of four-cylinder cars are working night and day to supply the demand for what now looks like a record year's business, the manufacturers of "Sixes," who are in a position to make deliveries, and the agents who are selling them are evidently about to enjoy a real harvest.

Commenting on the agency contracts being written by the Maxwell Motor Company for its six-cylinder 50-horsepower car, Arthur C. Hull, local Maxwell agent, says:

"In this advanced stage of the industry, with so many good cars, backed by responsible companies, it requires unusual value and worth for any particular car to leap into public favor and the fact that we have been receiving in every mail for the past week more agency applications and inquiries than it has been possible for us to take care of, proves conclusively that the agents and prospective buyers are interested in 'Sixes' particularly and that this year the motorists of the country are demanding that type of car. It also affords a very convincing illustration of the efficacy of newspaper advertising."

A motorcycle dealer of Dallas, Tex., rode his motorcycle to Milford, 63 miles distant to see a prospective customer in preference to taking the train. He says that although he made three stops on the way, he arrived in Milford in advance of the train.

## PROSPECTS GOOD SAYS WHELOCK

Selden Trucks to Be Popular Vehicles Here, Is His Claim.

"From the inquiry that we have had since opening the Oakland branch, stated, A. C. Wheelock it is evident that the sales in Alameda county for 1913 will be nearly double that of last year in every price class with the exception of trucks. Trucks will be sold here in quantities that will triple and possibly quadruple sales of former years. Alameda county is geographically the best place in the state to operate motor hauling. The level streets and fine pavements reduce the cost of upkeep to less than half of what it is across the bay and the merchants have found it out. Our Selden one-ton will probably be our best seller here this season as the size is the one most generally sought and the time payment plan under which it is sold makes it possible for a firm to pay for it out of the saving effected."

"H. O. Harrison who has just returned from a trip south as far as San Diego says that there is every reason to believe that the next three months will be the busiest of the past year in the motor industry."

"The number of sales have increased steadily throughout the state during the past few weeks and we have never been flooded with so many agency inquiries as at present. Since taking the R. C. H. line we have found that the demand for this size of car is tremendous. Every rancher now owns or is planning to own a motor car. The day of going to town in a buggy is past, it is far too slow. At first the man in the country was against the dust raising speed demons but after they began seeing their neighbors shoot by in motor cars, saving hours of time and accomplish so much more they realized the important need of the motor car."

Fair Lillian's lecture on how to live a hundred years should carry the weight of final authority.

## TABLER TELLS OF HARD TRUCK TRIP

Pulls Through Mud Hub-Deep in the City of San Francisco.

One of the hardest and most interesting motor truck demonstrations that has been made in San Francisco and which has resulted in a most complimentary order was given last week by the Pioneer Motor Truck Corporation, agents for the G. M. C. trucks. P. D. Tabler of the company in speaking of the demonstration says:

"We were called upon by John Rapp and Sons to give a demonstration of our two-ton truck. We loaded it with toys and pig iron to take the place of a body and the load. The demonstrator was instructed to call at the headquarters of the company and take out its representative and go wherever he directed. The result was that the car traveled over 40 miles over the San Francisco hills, way down the city roads and over certain sections that are hardly used. In fact, the driver, who is quite familiar with the city, found places that were unknown to him."

"From the smooth asphalt pavement of the city boulevards to some sections where the highway was indescribable, the car was taken. Some places the truck was almost hub deep in mud. From the description of what the truck went through and from the way it acted on the report of the driver, we were more than pleased and felt that if a sale was not made, we had the satisfaction of knowing of its ability."

"Little over 48 hours we received a call from John Rapp and Sons' representative who bought the truck to replace part of the present equipment."

**FLEMING JOINS STUDEBAKER.**  
Treasurer A. R. Drisking of the Studebaker corporation announces the appointment of Charles D. Fleming as assistant to the treasurer.

## CALIFORNIA RACE COMMITTEE NAMED

July 4, 1913, Is Date Set for Proposed Speed Classic.

The first trip of the officials of the Los Angeles to San Francisco road race over one of the proposed courses will be made next week.

Assistant Manager Harold Ostrom, publicity Director Frederic Pabst, Chief Pathfinder William LA Casse, the Los Angeles newspapermen and members of the committee will comprise the advance guard that will travel over the valley route, interviewing the commercial bodies of the large and small cities and securing their views of the race.

It has already been definitely decided that this race will be held. Already the motor world is alive to the spectacular possibilities of such an event and no race in the history of the motor car has ever attracted the preliminary attention.

The exact route of the race is a matter that will not be decided for several weeks but the executive committee hopes to see very part of California supporting the event.

"This is not a Los Angeles event, it is not a San Francisco race," said Chairman Leon Shettler. "It is a California race and we look to every loyal Californian to lend his most enthusiastic support. It is not being conducted for financial gain. Every member of the committee is serving without salary and we appeal to the civic pride of the people."

"We want to make this the most wonderful race the motor world has ever dreamed of. We will look to the citizens of California for the prize money and naturally we will expect more money from the cities through which the racers will pass than from those off the course."

"The Western Automobile Association is standing sponsor because it was absolutely necessary for some organization to do this to keep the race out of the hands of private promoters. This will be a California race in every sense of the word and from start to finish will be conducted by California men."

"The question of what road will be selected should not keep every city and town from co-operating with us in a very substantial manner."

"The business men of San Francisco will not with us and all we need is the assurance of the other California cities that they are for the race and will help in all ways."

July 4th is the date decided upon and the entry blanks will be issued within the next couple of weeks.

The executive committee is meeting daily and the members of the general board of control in the different cities will be announced within the next week.

**HAS RIDDEN 70,000 MILES.**  
John M. Schmidt, of Wauwatosa, Wis., has made an interesting record of 70,000 miles on his motorcycle. Schmidt has ridden his machine since 1905 and says it is good for many more years of service. He says that he has traveled 70,000 miles during that time, riding winter and summer. He says he never obtains less than 75 miles per gallon of gasoline and frequently runs as high as 125 miles.

Bert Adams, a rural mail carrier of Genoa, Wis., uses a motorcycle to cover his route. He says that he delivers mail to 32 boxes, and handles 6000 pieces of mail per month. Although his route is over hills most of the way, he says it takes just four hours to make the trip, at a cost of 25 cents.

## No-Rim-Cut Tires 10% Oversize

### What Will It Cost to Know?

What will it cost to know—and forever—what Goodyear tires mean to you?

Surely nothing at all. A No-Rim-Cut tire—the leading tire of the world—will surely serve at least as well as others. And a test may save you half your tire upkeep.

#### Judge by Meter

Let actual mileage tell you which tire to adopt. There is no need for guesswork. And remember that legions and legions of men have made this test on Goodyears. Men have used them for 14 years—used two millions of them.

As a result, these tires now outlast every other tire in existence.

As another result, last year alone our sales increased by 125 per cent.

#### No Petty Saving

Don't look for petty savings. Look for something decisive.

Statistics show that rim-cut tires cost 23 per cent of all old-type tires.

And our 10 per cent oversize with the average car, adds 25 per cent to the tire mileage.

**THE GOODYEAR TIRE & RUBBER CO., Akron, Ohio**  
This Company has no connection whatever with any other rubber concern which uses the Goodyear name.  
**Oakland Branch, 1776 Broadway**  
Phone Oakland 2336.

These are savings big enough to see.

#### None Like Them

Experience has proved that we control the only satisfactory way to make tires of this type. And countless men now know it.

That is why the demand for tires that can't rim-cut centers on Goodyear No-Rim-Cut tires. Then the Goodyear tire is a dozen ways is better than other tires. Our book will explain them to you.

Be fair to yourself, and fair to us, by giving a test to these wonderful tires. They have won, perhaps, 300,000 users. See if they can't win you.

Write for the Goodyear Tire Book—14th year edition. It tells all known ways to economize on tires.

## ARSENAL OF TOOLS IN THIEF'S HOME

### Offensive Methods of Burglars Outstrip Defense of Jewelers.

(Special to THE TRIBUNE by International News Service.)

LONDON, March 29.—"A perfect arsenal of burglary tools," was found in the house of a man who was sentenced to 18 months' hard labor for burglary. The outfit included several giant cutters (made on the lines of a sardine tin opener and used for safe cutting after a hole has been drilled), blow-pipes, drills and gim-bals, and cutters of all sorts.

"The fact is," said a high detective chief, in commenting on the matter, "that the offensive tactics of scientific burglars have far outstripped many of the defensive methods adopted by jewelers, their chief prey. A burglar recently sentenced said in a burst of confidence that it would have been a fine investment for the jewelers of London if they had retained him at a fee of \$5000 a year to go the round of establishments and point out the weak spots in their methods."

Before attacking a jeweler's shop members of the gang, posing as news-vendors or hawkers, watch, day after day, the methods of locking up at night and the opening in the morning. In one case in the West End the shop was protected by a roller shutter, secured by a bolt three feet long. A member of the gang, after patient and cautious watching, learned where this bolt was kept during the day. One day he secured it. The end close to the bolt head was filed nearly through, the section hidden by grease and black lead and the bolt replaced from where it had been abstracted. For four days, night and morning, a watch was kept to see if the tampering with it had been detected. Then one night the bolt head was swiftly forced off with a jimmy and as swiftly put down and by the morning the gang were the possessors of jewels worth \$15,000.

## Daughter of Congressman Is Leader in Society

MISS LELIA MAE HENRY, DAUGHTER OF SOLON AND A SOCIETY LEADER.

WASHINGTON, D. C., March 29.—Miss Lelia Mae Henry is the daughter of Congressman Robert L. Henry of Texas. Most of her life has been spent in Washington where her father has been a member of Congress for 16 years. Her home is in Waco. It was believed at one time that Miss Henry would join the cabinet.

## SOLVES MILITANT PROBLEM EASILY

### Persian, Under Guidance of All-Wise, Finds Truly Oriental Solution.

(Special to THE TRIBUNE by International News Service.)

LONDON, March 29.—In the course of a letter to a friend in London a Persian gentleman, a native of Tabriz, but at present staying in Paris, offers a novel suggestion as to the fitting treatment of the militant suffragist. Its spirit betrays the strict eastern standpoint, its quaint and expressive diction makes it desirable to give the passage in full, and without alteration.

"I am moved," he says, "under, I think, the guidance of All-Wise, to tell you that you have overlooked the one best way to cease this problem. It is true that in my Persia we are not much troubled with your suffragettes, though at one time an regrettable old wife was received into my home in Tabriz who in rages broke many things, scratch my favorite and talk and talk and talk. But that with one wink of the sword was easily ceased, which with your law is not, I think, possible.

"So, it would be impossible for same reason, I think, to take next best way to stop such women as you have—viz., to mount them with all speed upon assback, face to tail, with poster inscribing overhead, 'See the deserving punishment of female chatterbox'; and through all the city, staying only in a street for three strokes of stout stick upon bare flesh, administered by guard-attendant. Well so."

## FINDS MARQUISE RING AFTER TWENTY YEARS

(Special to THE TRIBUNE by International News Service.)

PARIS, March 29.—While walking along the beach at Trouville a girl found a wedding ring on which was engraved, "F. de Beaumont and Charlotte Laboulaye, 24th March, 1892."

The ring belongs to the Marquise de Beaumont, who lost it at Trouville over 20 years ago while bathing. The ring was forwarded to the marquise, who was delighted to recover it.

## HAIR AND SKIN BEAUTY

## PRESERVED BY CUTICURA SOAP

Assisted by occasional use of Cuticura Ointment.

Cuticura Soap and Cuticura Ointment are sold throughout the world. Beware of cheap imitations. The genuine Cuticura Soap is made in the U. S. A. and is the only one that is "Preserved by Cuticura Soap."

## FIND LOVING PAIR CLASPED IN DEATH

### Boy and Girl Bind Hands and Seek Death, Leaving Letter.

(Special to THE TRIBUNE by International News Service.)

LONDON, March 29.—With their hands bound and their mouths gagged, boy and girl lovers, clasped each other in a last pathetic embrace of death, have been found drowned in a canal at Monton, near here.

They were William Knight, a clerk, aged 17, and Maud Parker, a cotton-spinner, aged 16.

The discovery of the bodies was revealed in a dramatic manner when, after an all night search, the parents of the boy and girl received letters bidding an affectionate farewell.

The canal was searched and the bodies of the lovers were found bound together at the wrist with cord. Over the girl's mouth and nose was a motor-scarf bound round, her head three times and a handkerchief was tied over the lad's mouth.

In a farewell letter to a friend Knight, who was a Sunday school teacher and disappeared on his seventeenth birthday, wrote saying: "We shall go down like those on the Titanic, singing 'Nearer, My God, to Thee.' We are flushed with this world."

On the very night they disappeared the couple, it is stated, visited a picture theater. The dead girl is described by her fellow mill-workers as having been bright and bonny.

## DOG STRUGGLES WITH CHEETAH

### Leopard Type of Animal First Attacks Man; Killed With Stick.

(Special to THE TRIBUNE by International News Service.)

LONDON, March 29.—A Dublin custom-house officer, Mr. Cecil Graves, was attacked in Rathmines, one of the suburbs, by a cheetah, an animal of the leopard type found in India and Africa, which had escaped from its captors. He had his dog and a thick stick with him and he succeeded in killing the animal.

"I was taking a walk near Grosvenor square," said Mr. Graves, "when a strange looking animal, somewhat larger than an Irish terrier, suddenly sprang at me out of a hedge near some gardens. With hoarse bark it gripped my trousers leg near the knee, tearing the cloth. I shook the animal off, and a fierce struggle then took place between it and my dog. Seizing the animal's throat, the cheetah dragged him to the hedge and I caught the cheetah a heavy blow behind the ear with my stick which killed him. I took the dead body home to my house where it awaits identification."

The surmise is that the animal was brought from abroad by some resident with the object of making it a pet.

## INSULT FOR ONE IS HONOR FOR ANOTHER

(Special to THE TRIBUNE by International News Service.)

PARIS, March 29.—The most deadly insult one can offer to a French policeman is to say to him "Death to the cow!"

A few days ago in the Rennes appeal court M. de Savignol-Laromblere, the judge, explained to a policeman that a cow was "a noble and beautiful animal" and therefore its name could not be considered a term of opprobrium. Later a vagabond who came before M. de Savignol-Laromblere had his original term of imprisonment doubled. On hearing the sentence the prisoner called the judge an "old cow!"

Immediately the judge, forgetting his philosophic defense of a few days before, ordered the vagabond's term of imprisonment to be further increased by five years for insulting him.

## SPAIN'S PRINCES TOO YOUNG FOR BOY SCOUTS

(Special to THE TRIBUNE by International News Service.)

MADRID, March 29.—King Alfonso has written to the Duke of Tamarit, the founder of the Boy Scout movement in Spain, expressing his regret that owing to the tender age of his sons—the prince of the Asturias, who is 5, and the Infante Don Jaime, who is 4—they are not eligible, at present, for enrollment as Boy Scouts.

To show his sympathy with the movement, his majesty promises an annual subscription of \$1000 to the corps.

## Greatest Nerve Vitalizer Known

A 50-CENT BOX FREE

A Recent Discovery, Kellogg's Sanitone Wafers, the Most Effective Nerve Strengtheners for Men and Women Ever Found by Science.

This is the world's newest, safest, most reliable and effective nerve invigorator, restorer, brain awakener, body strengthener without equal in the world's history of medicine. It brings about a change from that awful, dull, weak, lazy, don't-give-a-hang feeling that betrays a brain which is clear-headedness and courage which is remarkable.

Kellogg's Sanitone Wafers Make You Feel Fine All the Time.

FOR MEN.—Nerve force gone! You are what your nerves are, nothing else. If you feel all run down from overwork or other causes, if you suffer from insomnia, "caved-in" feeling, brain-fag, extreme nervousness, peevishness, gloominess, worry, cloudy brain, loss of ambition, energy and vitality, loss of weight and digestion, constipation, headaches, neuritis or the debilitating effects of alcohol, tobacco or drink, send for a 50c free trial box of Kellogg's Sanitone Wafers, and soon you will be well, strong and happy.

FOR WOMEN.—If you suffer from nervous breakdown, extreme nervousness, "blue" spells, desire to cry, worry, neuritis, back pains, loss of weight or appetite, sleeplessness, headaches and constipation, and are all out-of-sorts, Kellogg's Sanitone Wafers will make you feel that there is more to life than you ever realized before. Send today for the 50c free trial box.

No more need of dieting, alteration, laxatives, electricity, massage or anything else—Kellogg's Sanitone Wafers do the work for each and all, give you nerve-force and make you love to live.

All first-class druggists have Kellogg's Sanitone Wafers in stock, at \$1.00 a box, or they will be mailed direct upon receipt of price by P. J. Kellogg, 1307 Hoffmaster Block, Battle Creek, Mich. No free trial boxes from druggists.

A 50-cent box of this great discovery will prove that they do the work. They are guaranteed—every wafer. Send coupon below today for free 50c trial box of Kellogg's Sanitone Wafers.

Chair \$25

Duofold sofa bed \$60

Rocker \$27.50

## One of the new 3-piece living room suits \$112.50 chair, rocker and Duofold sofa beds \$15 cash, \$10 month

### Chair

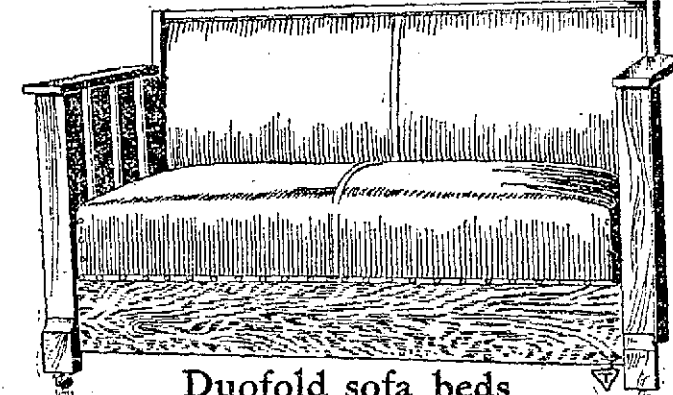

is a big roomy, comfortable piece, with plain seat and tufted back. Upholstered all over in genuine Spanish fabricoid and is exactly as illustrated.

### Sofa bed includes mattress

Also a steel spring. It folds twice, is easily adjusted and makes a comfortable bed, and when closed no one would think it was a bed. Makes a handsome sofa, as illustrated. Upholstered all over in genuine Spanish fabricoid; tufted back and plain seat.

### Rocker

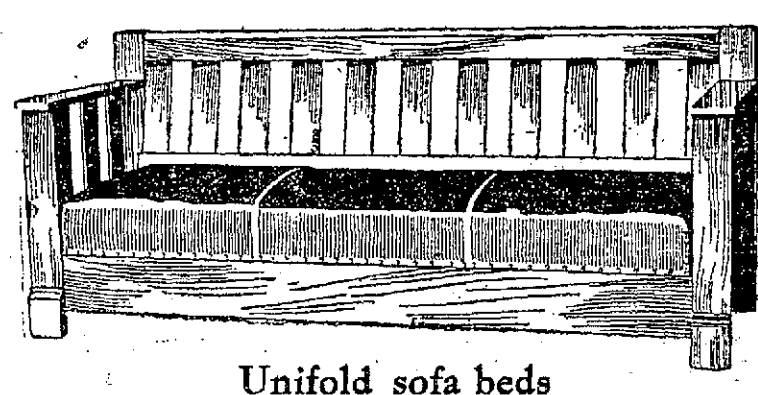

Matches the sofa and chair. Very heavy rockers, plain seat, tufted back, high scroll arms. A handsome piece. Upholstered all over in genuine Spanish fabricoid.

Duofold sofa beds

Can't be beat for small apartments or for the small flat. Makes a useful piece of furniture when closed as a settee and when open gives you an extra bed complete with spring and mattress. We are showing many new styles of these popular Sofa Beds, ranging in price from \$48.00

Sold on easy terms

Unifold sofa beds

Are very popular also. Also have the spring and mattress as illustrated below. We are showing probably forty styles of these. This one is in solid oak, golden, upholstered in Spanish fabricoid and includes mattress and spring \$40.00

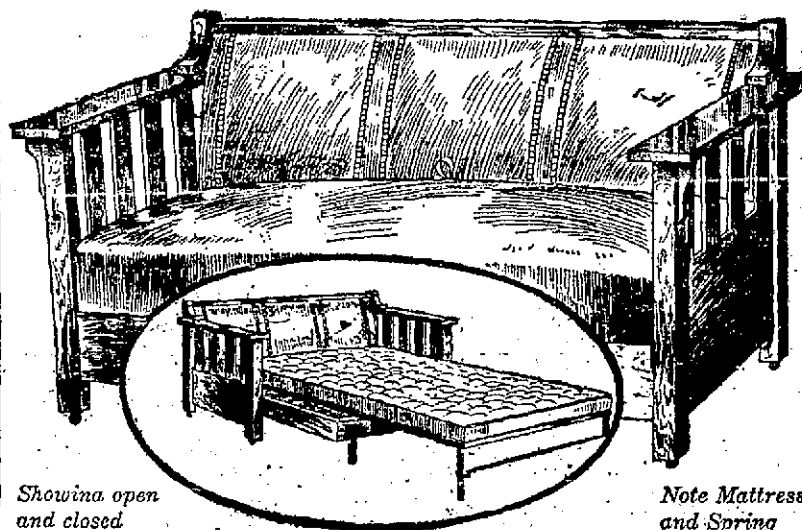

Terms \$5.00 cash, \$1.00 a week

## Axminster Carpet

Beautiful new patterns with or without the border designs, suitable for every room or hall, and there is no better value for the money than this extra quality Axminster carpet. It wears better, looks better and holds its color better than anything you can buy for a dollar and a half.

Saved, lined and laid per yard

\$1.50

Showing open and closed

Note Mattress and Spring

## Linoleum 4 yds. wide

Twelve feet covers your room. Without a seam. Wears better and looks better. We are showing some delightful patterns in these twelve-foot goods. Small patterns, light colors.

Measure taken and put down on your floor per square yard

\$1.00

## A car of fine parlor furniture from Karpen just received

Artistic odd pieces, Chairs and Rockers. Also many 3-piece suits in the tapestry and the shades of brown and green in solid colors. Many with loose cushions over upholstered seats, beautiful mahogany frames. Karpen upholstered furniture is known everywhere to be of superior make. We are showing a big line of it.

All sold on Jackson's regular easy terms

# BUILDING COST FOR THREE MONTHS, \$2,000,000

## RUSH OF CONSTRUCTION MARKS FIRST QUARTER

Permits for One Week Represent Contracts Totalling \$254,549

Building cost to March 29, 1913	\$895,734
For entire month, 1912	759,858
Gain	\$135,876

Building for the first three months of this year will total more than two million dollars in cost and greatly exceed the record for January, February and March of last year, \$1,602,183. The total for the present month will be approximately \$900,000, which is in excess of the showing for March, 1912. If the activity displayed so far this year continues, the value of buildings erected during 1913 will be ahead of the nine-million mark of last year. It is almost certain that there will be no abatement, as several skyscrapers are planned for erection this year. The cost of building for the week ending last Wednesday totaled \$254,549.

Work began last week on the steel construction of two additional stories on the Y. M. C. A. building at Twenty-first street and Telegraph avenue, which will make the structure a more conspicuous feature of the skyline in that part of the city. The building, when completed, will be six stories in height, above the high basement. The additional stories are made possible through a donation by Wallace M. Alexander.

At San Pablo avenue and Twentieth street, almost the same distance from the heart of the business district, work is progressing on the foundation of the seven-story Moody estate building, which is to be a hotel rather than an office structure, as first planned. This and the Y. M. C. A. building will mark the northern limits of tall structures for a time, but if high buildings do not go up rapidly to the northward of them, it is certain construction of the modern and imposing type will soon fill in the available sites on San Pablo and Telegraph avenues and Broadway, between Sixteenth and Twentieth streets. Clay street, if extended, and it is likely that it will be, will claim some of these new buildings, and will aid in the development of the other three arteries running out from the Fourteenth and Broadway center.

Another modern business building is to be erected at the northwest corner of Nineteenth street and San Pablo avenue by Richard B. Ayer and Charles D. Bates Jr., who have just purchased the old Hamilton property from Havens and Lelmer for \$130,000. The sellers realized a substantial advance over the price at which they were for the property several months ago. The size of the lot is 100 by 100 feet. Property along San Pablo avenue is steadily increasing in value.

Work is to be commenced on the \$300,000 eleven-story First National bank building at the southeast corner of San Pablo street and San Pablo avenue in August, and this imposing home of finance and other businesses will assist in carrying construction further out toward Twentieth. The twelve-story Carlton and Snyder building at the Broadway, Telegraph avenue and Sixteenth street corner will also play its part.

The wooden frame of the building at Sixteenth and Jefferson street is nearing completion, and will form one of the architectural monuments in the west-of-Clay district. The steel framework is completed for the seven-story Durst hotel building at the northeast corner of Tenth and Clay streets, which will be the tallest building in that part of the city. Work of constructing the framework of the R. W. Kliney hotel at the southeast corner of Tenth and Washington streets is also progressing rapidly. Oakland is to be well supplied with hotels and will be prepared to handle many guests during the world's fair year.

Cost of building in Oakland during the week ending Wednesday, March 27, was \$254,549. A permit was issued for a three-story brick apartment house at the northeast corner of Grand and Staten avenues, two blocks from Lake Merritt. The building is being erected for the Colt Investment Company at a cost of \$20,000. Another building in the same vicinity, the three-story brick Perry school building at the northwest corner of Perry street and Grand avenue, is provided for in the list of building permits. The structure is to cost \$65,468.

The weekly summary of building permits follows:

Class of Building	No. of Permits	Cost
1-story dwellings	32	\$56,414
2-story dwellings	1	2,500
3-story dwellings	1	7,539
4-story dwellings	1	10,000
5-story dwellings	1	55,000
6-story dwellings	1	20,000
7-story dwellings	1	68,468
8-story dwellings	1	2,200
9-story dwellings	1	15,000
10-story dwellings	1	4,800
11-story dwellings	1	575
12-story dwellings	1	575
13-story dwellings	1	490
14-story dwellings	1	300
Alterations, additions and repairs	33	12,618
Total	85	\$254,549

The detailed list of permits follows: John McLean, alterations, 1701 Twenty-first street, \$550.

Bowman Drug Co., alterations, north-

east corner of Third and Broadway, \$250.

Sadie Wilcox, 154-story 8-room dwelling, southeast side of Thirtieth street, 325 feet south of Santa Rita, \$2070.

Mrs. Vincent, alterations, 2321 Grove street, \$105.

Oakland Brewing and Malting Co., alterations, \$105.

(Continued on Next Page.)

east corner Thirtieth and Broadway, \$250.

Sadie Wilcox, 154-story 8-room dwelling, southeast side of Thirtieth street, 325 feet south of Santa Rita, \$2070.

Mrs. Vincent, alterations, 2321 Grove street, \$105.

At San Pablo avenue and Twentieth street, almost the same distance from the heart of the business district, work is progressing on the foundation of the seven-story Moody estate building, which is to be a hotel rather than an office structure, as first planned. This and the Y. M. C. A. building will mark the northern limits of tall structures for a time, but if high buildings do not go up rapidly to the northward of them, it is certain construction of the modern and imposing type will soon fill in the available sites on San Pablo and Telegraph avenues and Broadway, between Sixteenth and Twentieth streets. Clay street, if extended, and it is likely that it will be, will claim some of these new buildings, and will aid in the development of the other three arteries running out from the Fourteenth and Broadway center.

Another modern business building is to be erected at the northwest corner of Nineteenth street and San Pablo avenue by Richard B. Ayer and Charles D. Bates Jr., who have just purchased the old Hamilton property from Havens and Lelmer for \$130,000. The sellers realized a substantial advance over the price at which they were for the property several months ago. The size of the lot is 100 by 100 feet. Property along San Pablo avenue is steadily increasing in value.

Work is to be commenced on the \$300,000 eleven-story First National bank building at the southeast corner of San Pablo street and San Pablo avenue in August, and this imposing home of finance and other businesses will assist in carrying construction further out toward Twentieth. The twelve-story Carlton and Snyder building at the Broadway, Telegraph avenue and Sixteenth street corner will also play its part.

The wooden frame of the building at Sixteenth and Jefferson street is nearing completion, and will form one of the architectural monuments in the west-of-Clay district. The steel framework is completed for the seven-story Durst hotel building at the northeast corner of Tenth and Clay streets, which will be the tallest building in that part of the city. Work of constructing the framework of the R. W. Kliney hotel at the southeast corner of Tenth and Washington streets is also progressing rapidly. Oakland is to be well supplied with hotels and will be prepared to handle many guests during the world's fair year.

Cost of building in Oakland during the week ending Wednesday, March 27, was \$254,549. A permit was issued for a three-story brick apartment house at the northeast corner of Grand and Staten avenues, two blocks from Lake Merritt. The building is being erected for the Colt Investment Company at a cost of \$20,000. Another building in the same vicinity, the three-story brick Perry school building at the northwest corner of Perry street and Grand avenue, is provided for in the list of building permits. The structure is to cost \$65,468.

The weekly summary of building permits follows:

Class of Building	No. of Permits	Cost
1-story dwellings	32	\$56,414
2-story dwellings	1	2,500
3-story dwellings	1	7,539
4-story dwellings	1	10,000
5-story dwellings	1	55,000
6-story dwellings	1	20,000
7-story dwellings	1	68,468
8-story dwellings	1	2,200
9-story dwellings	1	15,000
10-story dwellings	1	4,800
11-story dwellings	1	575
12-story dwellings	1	575
13-story dwellings	1	490
14-story dwellings	1	300
Alterations, additions and repairs	33	12,618
Total	85	\$254,549

The detailed list of permits follows: John McLean, alterations, 1701 Twenty-first street, \$550.

Bowman Drug Co., alterations, north-

east corner of Third and Broadway, \$250.

Sadie Wilcox, 154-story 8-room dwelling, southeast side of Thirtieth street, 325 feet south of Santa Rita, \$2070.

Mrs. Vincent, alterations, 2321 Grove street, \$105.

Oakland Brewing and Malting Co., alterations, \$105.

(Continued on Next Page.)

Building for the first three months of this year will total more than two million dollars in cost and greatly exceed the record for January, February and March of last year, \$1,602,183. The total for the present month will be approximately \$900,000, which is in excess of the showing for March, 1912. If the activity displayed so far this year continues, the value of buildings erected during 1913 will be ahead of the nine-million mark of last year. It is almost certain that there will be no abatement, as several skyscrapers are planned for erection this year. The cost of building for the week ending last Wednesday totaled \$254,549.

Work began last week on the steel construction of two additional stories on the Y. M. C. A. building at Twenty-first street and Telegraph avenue, which will make the structure a more conspicuous feature of the skyline in that part of the city. The building, when completed, will be six stories in height, above the high basement. The additional stories are made possible through a donation by Wallace M. Alexander.

At San Pablo avenue and Twentieth street, almost the same distance from the heart of the business district, work is progressing on the foundation of the seven-story Moody estate building, which is to be a hotel rather than an office structure, as first planned. This and the Y. M. C. A. building will mark the northern limits of tall structures for a time, but if high buildings do not go up rapidly to the northward of them, it is certain construction of the modern and imposing type will soon fill in the available sites on San Pablo and Telegraph avenues and Broadway, between Sixteenth and Twentieth streets. Clay street, if extended, and it is likely that it will be, will claim some of these new buildings, and will aid in the development of the other three arteries running out from the Fourteenth and Broadway center.

Carlton and Snyder Building, at Broadway and Telegraph (left), and Heeseman and Hoffman Building, Fifteenth and San Pablo. The Carlton and Snyder structure will follow the design illustrated, with the exception that it will be 12 stories in height.

## CHOICE LOCATIONS IN RETAIL CENTER IN DEMAND

Other long leases than those announced by THE TRIBUNE last week are about to be closed, and it is understood that one or more of them will be of great importance in the upbuilding of the business section.

Leases which assure building enterprises of magnitude are the kind which will be of most benefit to Oakland. Several of these, involving construction projects totalling more than a million dollars, have been completed, and others are in process of negotiation.

The general development of the city, and particularly its industrial growth, has caused an influx of merchants from other coast cities. The newcomer in Oakland's business world, as well as the outside investor who has taken a keen interest in the city, has been a large factor in mercantile expansion here.

The demand for locations in the busy traffic centers of the city has not only raised rents, but has caused the expansion of the retail district in all directions. This demand is greater than at any period in the history of Oakland and a signal indication of the faith of merchants in the continued growth of the city is seen in their desire to secure unusually long leases. Business has taken a pronounced northward movement and many of the new firms are locating on San Pablo avenue and Fourteenth street in the new retail centers, attracted there by the big new department stores and office buildings.

Another sale of an apartment house site in the district east of Broadway was that of the Emily Dean Allen residence property on the west side of Jackson street, 800 feet north of Fourteenth, which has been sold to William M. Story, a capitalist of Fresno. The lot has a frontage of 100 feet on Jackson street and a depth of 150 feet. The purchase price was \$25,000. The sale was made through the agency of McHenry & Kaiser.

Last week was a period of brisk business in leasing and selling. The mortgages amounted to \$234,930 and the deeds of trust to \$276,688, making a total of \$511,618. There were 343 deeds recorded.

Transfer of a 35-year lease of city tide lands fronting on Sessions basin at the foot of Fourteenth avenue, held by Frank G. Drum, was the subject of a notification to the city council Friday and carried the news of the projected erection of a \$30,000 plant by the Crowley Launch and Tug Boat Company on the East Oakland estuary. The plant is to be started as soon as some preliminary negotiations have been attended to by the Crowley company and the present holder of the municipal lease.

The lease was granted for this site on the estuary in June, 1911, by the old municipal board of public works. It was for 25 years and was granted on reasonable terms. This is one of the first transfers that has been made of the tideland leases.

The negotiations have been handled by McLaren & Early, bond and investment brokers. According to De Ver McLaren, arrangements have been made for the immediate investment of \$30,000 on this waterfront lease.

The Crowley Launch and Tug Boat Company is one of the best known concerns handling the building of launches and tugboats on San Pablo and San Francisco bays. The transfer of the lease means the introduction of a new industry in Oakland.

More than that, this Idaho country lies in the border-land where on one hand it is cheaper to send the products of the country by way of the Gulf port, and just to the other side it is cheaper to send by way of the Pacific coast, which means Oakland.

It is incumbent on the cities around San Francisco bay to see that the trade of this territory is secured for this port. Just at present the transportation lines and facilities are such that it entails a large additional expense and much more time to make shipments by way of Oakland than it does by way of Portland or even Los Angeles. This, in spite of the fact that with proper facilities, a large saving in time and money could be made by the shippers to this port.

The people of this Twin Falls country feel acutely the want of proper shipping facilities for their natural seaport. A company has been organized at Twin Falls for the purpose of constructing a railroad from that point to a connection with the Southern Pacific and Western Pacific at Wells, Nevada. The interest and co-operation of the business interests of the bay cities is being asked in this project on the ground that it will be of mutual benefit, both to the farmers of Southern Idaho and the business men of Oakland. Such a railroad as is planned would reduce the travel time to Oakland one half and cut off nearly five hundred miles of rail haul for freight.

If the road is not constructed, the chances are that there will be provided a route for carrying this trade either to Portland or to Los Angeles, and that once fixed in either of these trade channels, the business will hereafter go either north or south of this section, to reach the deep water.

Geo. D. Alken, a business man of Twin Falls, has been in Oakland and San Francisco for several days, in conference with the leading business men and financiers of the region, with a view to putting the matter before them in such light that they will be convinced that it is proper to co-operate with the Idaho people in the project to build the railroad.

Last summer on the presentation of the situation by a committee from Twin Falls, the Oakland Chamber of Commerce commissioned D. H. Bradley, assistant secretary of that body, to visit the southern Idaho region and on his return he reported.

## TO START WORK ON TWO FINE BUILDINGS

Preparations are being made for beginning work this spring on two tall buildings, one of twelve stories and the other of eight, two blocks from each other in the northern edge of the new retail district.

The taller structure is that to be erected by Joseph F. Carlton and A. J. Snyder on the corner at Broadway, Telegraph avenue and Sixteenth street. The building, which will be

tower-like in appearance, will be an attractive ornament of flat-iron appearance on this prominent corner of the rapidly expanding business district. It will be of steel cage class A construction. The basement is to be occupied by a restaurant occupying the entire area of the lot. The first floor will contain stores having entrances from both Telegraph avenue and Broadway. Above the first floor will be modernly equipped offices. The

exterior of the building will be of stone and will be designed in Gothic style. Benjamin Geer McDougall is the architect.

The lot is eight and a half feet in width at the point, 37 1/2 feet at the opposite end and extends 100 feet on Broadway and 104 feet on Telegraph avenue.

Bids are to be asked at once for excavation and for the steel construction on the twelve-story building and work is to begin about the middle of

May. The structure is to cost \$300,000.

Charles L. Hoffman and Charles J. Heeseman have secured a 30-year lease on the lot at the northwest corner of Fifteenth and Washington streets and San Pablo avenue and will erect a seven-story class A office building to cost \$75,000.

The extension of Washington street through to San Pablo avenue makes this one of the most desirable locations in the Oakland business section.

O'Brien & Werner, architects, have been commissioned to draw plans for the building. The five upper floors will be divided into offices or lofts as desired to suit tenants and the two lower stories will be divided into stores. The owners are awaiting tenants' applications before deciding on the divisions of the various stores.

The offices will be planned for every modern convenience. The building will be started at once and rushed to early completion.

## BUILDING SHOWS STEADY GROWTH

Forty-three Per Cent Is Berkeley's Growth for Month in a Year.

BERKELEY, March 29.—Despite the unwonted absence of big deals or important new buildings commenced, the week has shown a steady development in the real estate and building market toward outstanding figures reached in this city last year for March. The early part of the month shows a decided advance over the corresponding two weeks of a year ago, and it seems likely that this lead will be easily maintained.

On some of the more important structures in the city work is progressing favorably. Concrete work on the supporting stanchions for the new addition to the Hotel Shattuck will be commenced early next week, the excavation and reinforcement having been finished. The Benton apartments on University avenue have nearly all the exterior work completed. E. Bertin has commenced the reconstruction of destroyed portions of his works on Milvia street.

The Constructive News of Chicago gives Berkeley a prominent place in its latest review of building throughout the country. With a gain of 43 per cent in February over the figures of last year for February this city is well in the lead of American municipalities. Among the permits that have been granted in the past week have been the following:

One and one-half-story dwelling, south side of Prince street, 275 feet east of California street, Harmon tract, Charles B. Keith, owner and builder, \$2000.

Two-story 6-room dwelling, north side of Francisco street, 180 feet south of Milvia street, James tract, Jacob M. Brand, owner; W. B. Montgomery, builder, \$2485.

One-story 5-room dwelling, east side of Holly street, 105 feet south of Buena avenue, Buena Vista tract, Mary E. Jones, owner; Belvid & Jones, builders, \$2000.

One-story 5-room dwelling, southeast corner of Liliadin and McGowan streets, George Haanca, owner, \$1800.

One-story 5-room dwelling, south side of Blackstone street, 158 feet west of Baker street, Santa Fe tract, E. King owner and builder, \$1000.

One and one-half-story 5-room dwelling, northwest corner of Grant and Delaware streets, State University Homestead tract No. 45 S. L. Walworth, owner and builder, \$500.

One-story 6-room cottage west side of Broadway, 125 feet south of Grand street, San Pablo tract, Chas. A. Werner, owner and builder, \$1500.

One-story 6-room dwelling, west side of Tenth street, 110 feet north of Dwight way, Haft tract, P. Lazarek, owner and builder, \$400.

One and one-half-story 6-room dwelling, north side of Parker street, 240 feet west of McGee street, H. Carlson, owner and builder, \$1600.

## OPEN NEW TRACTS IN MT. DIABLO REGION

With the opening of the Oakland and Antioch railroad several new tracts of land are being offered to the public in the Mount Diablo country. During the past three years the R. N. Burgess Company, which is the biggest land owner in this section, has marketed several subdivisions of its home farms. However, with the opening of the railroad new close-in properties will be opened by this concern. Lafayette home sites, situated at Lafayette, was recently opened and the Carpenter ranch will be put on the market in a short time. The Carpenter ranch is a part of the Moraga grant, and in the scheme of the subdivision of this property a model town will be planned. This town will be known as Moraga and will be ideally located on the beautiful slopes just over the first range of hills from Oakland.

## TITLE INSURANCE INTERESTS BROKER

Investment of Eastern Money Here Makes Guarantee Necessity.

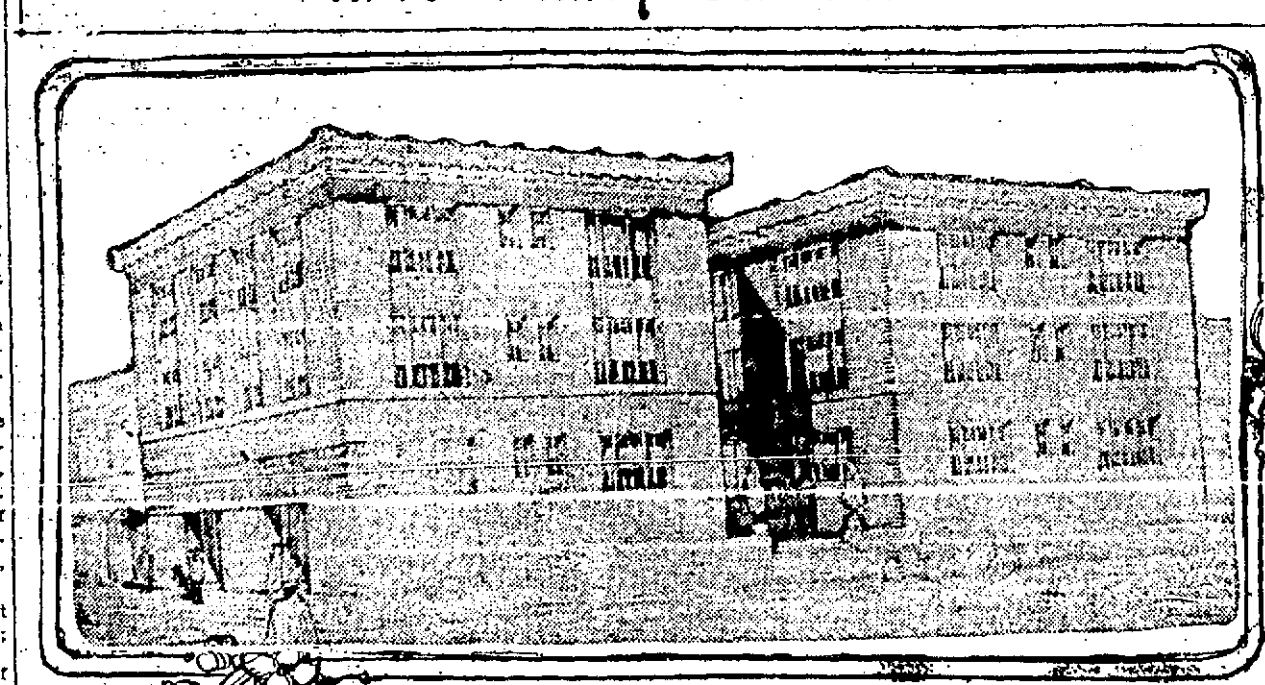

An address by Iru Abraham, secretary of the Oakland Title Insurance and Guaranty Company, on title insurance, was the principal feature at a meeting of the executive committee of the Oakland Real Estate Association. Abraham explained at length and in detail what he claimed to be the advantages of title insurance over the customary certificates of title and abstracts being heretofore in use in Oakland.

## LEASING SHOWS GREAT ACTIVITY

Stores in New Buildings Obtained by Numerous Dealers.

Unusual activity in the leasing business is shown by the following transactions, which are some of the larger deals recently negotiated by Herman Rittgenstein, leasing manager of the Layman Real Estate Co.: Store, 529 Fourteenth street, from Walter H. Lelmer and Wickham Havens to the Oakland Shirt Waist Shop—Five-year lease at a gross rental of about \$30,000. Offices in Woodward building from F. J. Woodward to Wenham & Paul, general real estate business—Five-year lease at a gross rental of about \$3000. Store, 1522 San Pablo avenue, from E. L. Dow to the Oakland trunk factory for five years at a gross rental of about \$19,000. Loft, corner Fourteenth and Clay streets, from Walter H. Lelmer and Wickham Havens to A. J. Simmonds for cloak and suit business; five years at a gross rental of \$15,000. Offices in the Woodward building from F. J. Woodward to Muller & Raas, wholesale millinery display rooms, for five years at a gross rental of \$12,000. Lease of store, 1526 San Pablo avenue, from E. L. Dow to L. J. Yess for ladies wearing apparel; five years at a gross rental of \$14,000. Store, 1431 San Pablo avenue, in the Woodward building from F. J. Woodward to the Rose Millinery Co., which operates a chain of millinery stores in San Francisco; ten years at a gross rental of about \$60,000. Store, 533 Fourteenth street, from Walter H. Lelmer and Wickham Havens to D. Purcell, ladies' tailor, for a period of five years at a gross rental of about \$20,000. Lease of lot 511 Thirtieth street from H. Marymont to C. J. Heeseman Co., Inc., for cloak and suit dept., ten years at a gross rental of about \$22,000. Lease of store, 1111 Washington street, from the M. K. Blake Estate Co., to the City of Canton for women's and children's wearing apparel; five years at a gross rental of \$30,000.

## New Apartments to Be Erected Will Have Many Attractive Features

NEW APARTMENT HOUSE, SOON TO BE ERRECTED AT TWENTY-FIFTH AND TELEGRAPH, BY JOHN SPELMAN.

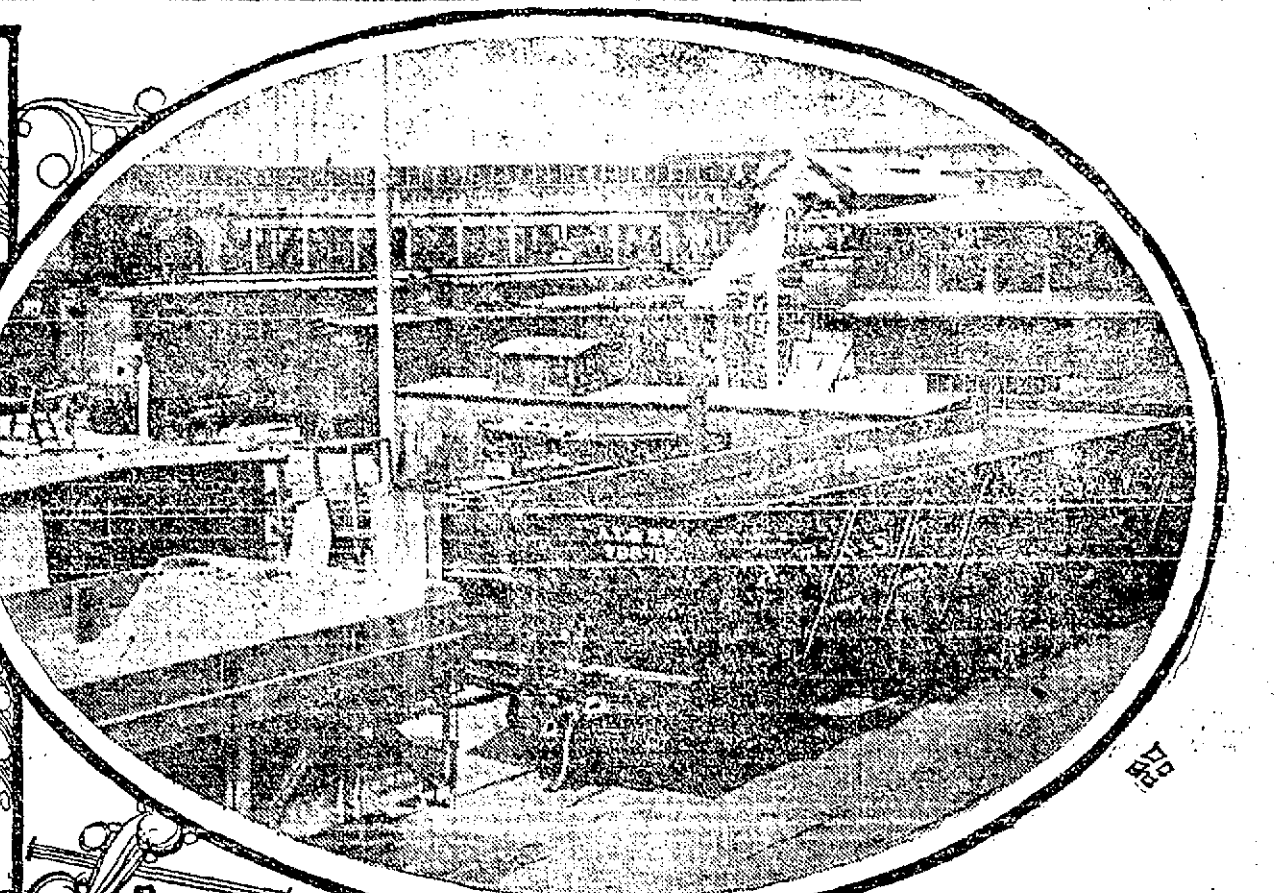

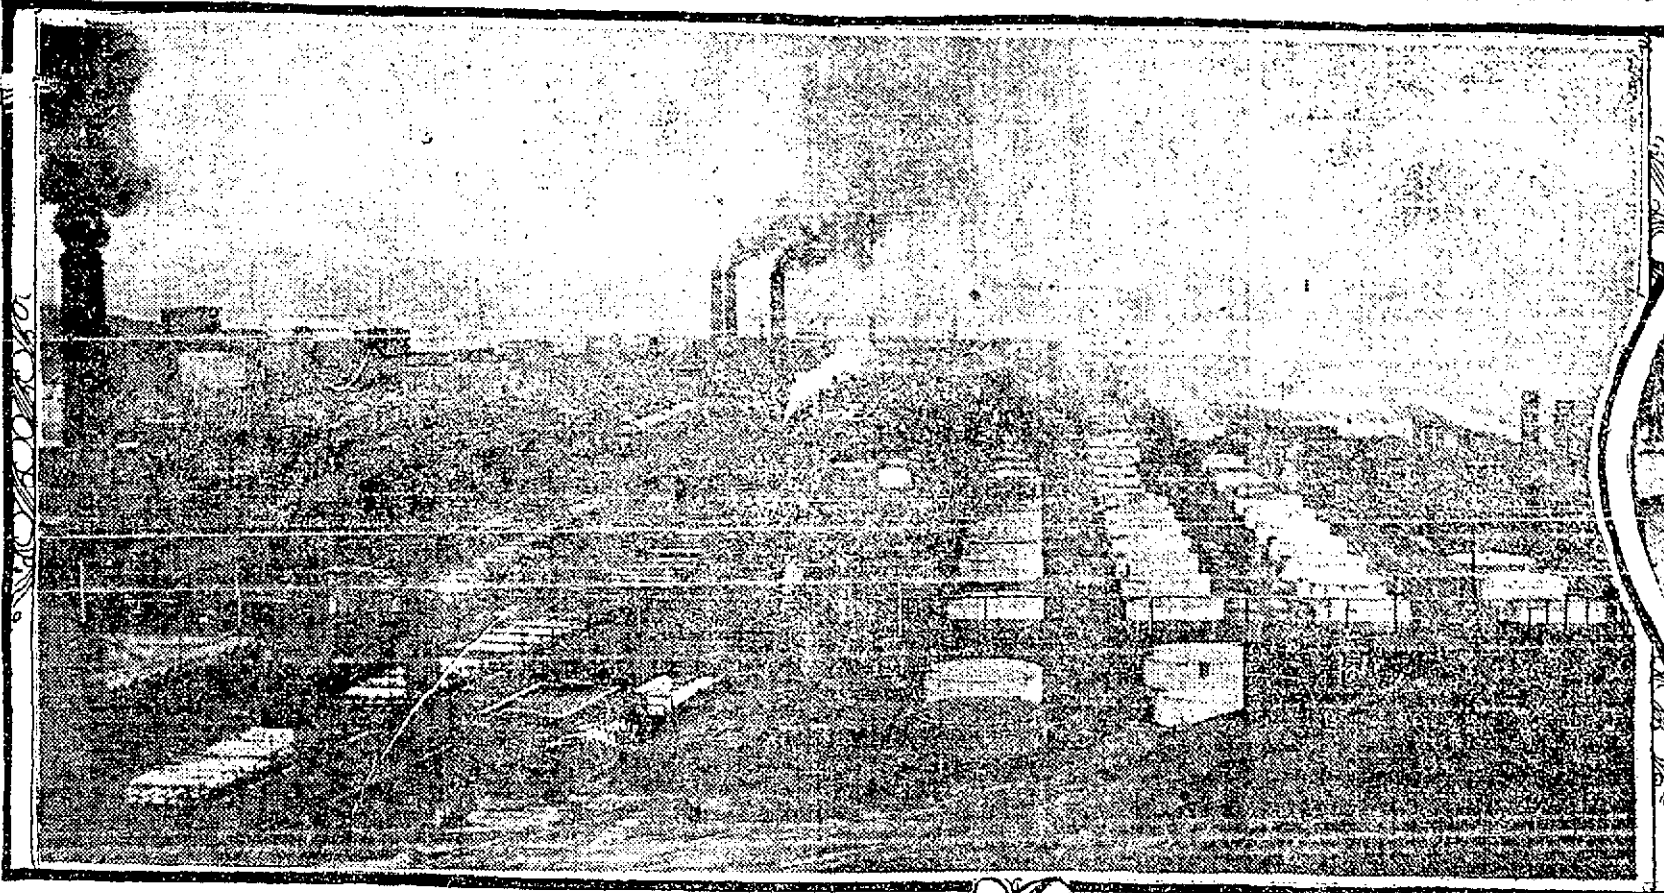

Working drawings are now in preparation for a fine apartment house to be erected by John Spelman on the northeast corner of Twenty-fifth street and Telegraph avenue.

The floor plan is arranged to take the greatest advantage of the site. All the suites are outside apartments and have an unrestricted view. The arrangement is one which admits of all day sunshine, as the corridors are confined to the north side of the building.

The entrance hall and lounge room will be Caen stone effect designed in the French Renaissance. Each floor will contain six two-room and two three-room apartments. Each apartment will be fully equipped, containing

# RICHMOND, "CITY OF DESTINY": THERE'S A REASON

## TO OPEN RICHMOND CITY CENTER TODAY

Tract Is in Rapidly Growing Part of Industrial City.

RICHMOND, March 28.—There will be opened in this city to-morrow a tract on San Pablo and Desmond avenues that has long been recognized as one of the most magnificent places of property in Richmond. It is what was formerly known as the Levison tract, but has been platted as Richmond City Center. It is in the center of the San Pablo avenue and Twenty-third street district, one of the fastest developing in Richmond.

Bouquet & Moran, with offices at 410-11 First National Bank Building, Oakland, are opening this tract to the investing public. John E. Bouquet is a pioneer of this city. John J. Moran, the other member of the firm has been an active factor in Richmond's development for several years, bringing investors here from all parts of the state.

The Levison tract has buildings all around it now and is in the zone of construction that is expanding the city. Richmond City Center will receive the highest class improvements in keeping with its location. The streets will be paved with oil macadam, concrete sidewalks will be laid and water and sewer systems installed.

Bouquet & Moran want the investing public to see this property. Any person calling at their office or communicating with them will be taken to the tract, its central location in the area of big values where it lies gives a certainty of big increases over the selling prices shortly.

Bouquet & Moran will place this property on easy terms with small payments covering a long period. It gives everybody an opportunity to acquire some of the valuable Richmond property that is advancing rapidly.

## GREAT ENTERPRISES THRIVE AT YOUNGEST OF BAY PORTS

There is very little sentiment nowadays in the building of cities. What the average man wants to know is what is there in it, what is the rate of interest on the investment, and what is the prospect of future gain or loss. It is a cold-blooded matter of dollars and cents, and while the building of homes is always attended by sentiment it is an individual matter and does not apply when it comes to erecting skyscrapers, dredging deep harbors, dealing with transcontinental lines of railways or showing manufacturing concerns where the dividends are coming from.

The realization of these homey facts is one of the secrets of the phenomenal success being achieved by Richmond. The people of Richmond, while appreciating their splendid climate, beautiful parks, lawns, flower gardens, schools and other necessities and comforts of modern life, have persistently put forth the proof to the investing public that Richmond is a good place in which to plant dollars and see them grow, and from the amount of the planting and abundance of the harvest it would seem that the argument advanced has been in the main sound and substantial.

Richmond is a city of destiny, because it is located where the bay of San Francisco and the bay of San Pablo mix their waters, giving to the city over six miles of natural deep harbor for the ships of the world to rest in safety from wind or wave while loading and unloading their cargoes.

Deep harbors build great cities the world over and there is no good reason why Richmond should be an exception to the rule, especially now that it has \$1,750,000 in cash on hand as a commencement of the immense improvements of these harbors and feels reasonably sure of a federal appropriation of a like sum or more for the same purpose.

"THERE'S A REASON."

Richmond asks the prospective investor a few questions like these, which set him to thinking:

Why did the great Standard Oil company come here with its plant, now being enlarged into the largest oil refinery in the world, and expend \$15,000,000?

Why did the Pullman Palace Car company do likewise?

Why was the greatest winery in the world located here?

Why have fifty other manufacturing concerns located their plants here, at an expenditure of over \$50,000,000 and the maintenance of payrolls of half a million of money?

Why did the War Department of the United States decide that Richmond was the place for a great deep water inner harbor, and report favorably on a federal appropriation?

Why did 15,000 people come here in less than ten years and build a city of that many inhabitants out of what was marsh lands and wheat fields less than ten years ago?

The answer is that all these people and great industrial activities came here to make money, that they knew what they were doing and that the world would not have remained and continued to enlarge and improve unless they had made the money. They did make it, and are making more and more every day, and the city and its great industrial activities are only in their infancy as yet.

**TONNAGE SHIPMENTS HEAVY.**

Richmond is the second port in the matter of tonnage shipments in the State of California. Richmond's death rate is less than that of any city of similar population in the State of California. The tax rate in Richmond is but 32 cents on the \$100. The big corporations pay 50 per cent of that and non-

profits pay 25 per cent, leaving only 25 per cent for everybody else.

Richmond spent \$150,000 last year in new schools for the increasing school population, and is arranging now to spend more than that this year. Realty is constantly on the upgrade in price and all real estate shows substantial increase and profits. From 100 to 200 dwellings are in progress of erection all the time, and not a single "for rent" card is on display in the city.

**RAILROADS BUILD.**

The Southern Pacific is now building a system of fast electric trains and tracks and the Key Route is to do the same during the current year. Wages are high and labor prosperous. More ferries are projected, while shipping both by rail and water is going forward at an unprecedented rate.

Cheap fuel oil and ideal transportation facilities both by rail and water, coupled with energy, enterprise and a spirit of stick-togetherness and boost, is what is building up Richmond.

terations, Twenty-fifth and Chestnut streets; \$500.

J. Hayes, repairs 419 Jackson street; \$50.

W. C. King, 1-story 5-room dwelling, north side Ramona avenue, 307 feet east of Piedmont avenue; \$2000.

## OAKLAND CAPITAL IN RICHMOND BUSINESS BLOCK

RICHMOND, March 28.—Another class A business block will be erected in Richmond immediately, this time by Oakland capital. M. Yager of the Yager sheet Metal Works of that city having closed a deal last evening through B. B. Farley and Wright Brothers of this city for property on the southwest corner of Seventeenth street and Macdonald avenue, and the plans for the erection of a business block thereon are already in the hands of architects. Yager has been buying a number of lots in Richmond this year and finally concluded to build a business property. He has not yet decided whether to establish a business in the block when completed or use it for rental and income purposes. It is understood that work on the block will be commenced as soon as the plans are completed.

**BIG DOUBLE BLOCK.**

The plans for the new two-story brick block to be erected by R. Tabor are now completed and the contracts are to be let at once. It will be devoted to store rooms down stairs and a modern hotel upstairs and will be rushed to completion as soon as possible.

In addition to this Dr. Leffer of San Francisco has just decided to erect a similar business block adjoining the Tabor building to the north, and reaching through from Washington avenue to Park Place. The combined structure will be an immense improvement to the business section of the west side of the city.

Dr. C. R. Blake, city commissioner of health, has closed out the stock of goods formerly carried by the Atlantic Pharmacy, and has decided to erect a large, modern up-to-date residence on the site of the old drug store.

Two representatives of a large eastern soap manufacturing concern were in Richmond the first of the week and obtained options on twelve acres of land near Richmond for the purpose of erecting buildings and a plant for the manufacture of soap on the coast. The visitors were shown about the city by Secretary D. A. Knowles, of the board of trade, and they are to submit a proposition later.

**SANTA FE IMPROVING.**

Work on the various new improvements of the Santa Fe is progressing right along and is being cut out along lines which show that the big corporation is figuring on an immense increase in business at this point in the immediate future. New ferry mole, new freight sheds, extensions of terminals and widening of the roadbeds for double tracking are but a few of the improvements being made.

## BREAK GROUND FOR GREAT LABORATORY

Institution at Sacramento Will Benefit Farmers of the State.

SACRAMENTO, March 28.—Ground was broken today on the new \$25,000 Agricultural Laboratory at West Sacramento, situated on Jefferson boulevard, on the southeast corner of Lake Washington. The architects, Hobart & Cheney of San Francisco, designed the building in the style of the Spanish renaissance, with white cement exterior, red tile roof, with window boxes and large windows as open as possible, while yet preserving the serious character of the laboratory.

It will be a reinforced concrete frame structure with hollow tile walls. The air spaces in the terra cotta maintain an effective barrier against heat or cold from the exterior, and keep an even cool temperature in the whole interior.

To this building the farmers from the new agricultural district now growing up so rapidly at the lower end of District No. 900 can come with their samples of soil and the products of the earth and have them tested and analyzed by the experts to show how to better their condition.

This building is the gift of the West Sacramento Co. to the farmers and should be productive of much good to the cause of better agriculture. It is a striking monument to the thoughtfulness and the good will of the men behind this project. The building will be 50 by 70 feet, and will contain on the ground floor a large reception hall with exhibition cases for agricultural products, a physical laboratory and a good sized store room for chemical supplies.

On the second floor will be four bedrooms for the men employed by the agriculturalist in his experiments and laying out and recording and the large amount of work which is being done by the company around Lake Washington.

### Haywards Bargains

\$4000—2 1/2 acres on State Highway road, 1 mile from Hayward; house of 4 rooms, barn, well; all fenced; 200 apricot trees; chicken houses, etc.

\$3500—5 acres full-bearing apricot, peach, walnut and cherry, with well and large barn; less than 1/2 mile from Hayward; 2 miles this side of Hayward; also 5 acres adjoining can be had in terms, 1/2 down balance in 1, 2, 3 and 4-year payments.

Beautiful home place, 6 acres, 1/2 of a mile from Hayward and electric cars. This place is self-sustaining as well as having all city conveniences. Trees consist of apricots, almonds, walnuts and cherries; house of 3 rooms has gas, telephone; chicken houses, barn, fruit drying outfit, brooders for 1500 chickens, well, tank, car engine; also pig pens, etc. Good reason for selling.

GEORGE W. AUSTIN,  
1424 Broadway, Oakland, Cal.  
(Syndicate Building.)

### MARRIED WHILE STILL WIFE OF FIRST HUSBAND

SAN FRANCISCO, March 29.—Discovering nearly two years after her second marriage that she was still the wife of her first husband, Miss Margaret Moore filed suit for annulment of her wedding with D. J. Moore in the Superior Court here today. Mrs. Moore sets forth that when she mar-

ried her second spouse March 19, 1910, she believed that she had been legally separated from Albert Jennings, hubby No. 1, whereas she had, in fact, obtained only an interlocutory decree.

**WOMAN FINED \$200.**  
SAN FRANCISCO, March 29.—Kate Eddington was fined \$200 by Police Judge Shortall today for selling liquor without a license. The woman made a strenuous effort to escape conviction, but was unsuccessful.

## The Doctor's Advice

by Dr. Lewis Baker

The questions answered below are general in character; the symptoms or diseases are given and the answers will apply to any case of similar nature.

Those wishing further advice, free, may address Dr. Lewis Baker, College Bldg., College-Elliott Bldg., Dawson Ohio, including self-addressed stamped envelope for reply. Full name and address must be given, but only initials or portions same will be used in my answers. The prescriptions can be filled at any well-stocked drug store. Any druggist can order or dispense.

**"Anxious M."**—Give your children for bedwetting 10 to 15 drops in water before meals, the following: Fluorine, 1 dram; strychnine, 2 grains; cod liver oil, 1 oz. Mix with water. This should be given about one hour before meals in water.

**Doctor:** "I have a very severe case of catarrh of the head and throat. My blood is bad and my stomach and bowels are affected. I would like a cure, as I suffer greatly."

**Dr. Baker:** "I would advise the following local treatment: Obtain 2 oz. antiseptic saline powder, to a half teaspoonful add one pint of water, and from the palm of the hand sniff the water through the nostrils several times a day. Mix a level teaspoonful of the saline powder to one ounce of hard or vaseline and apply this to the nostrils as far up as possible. For internal treatment use the following: Obtain the following ingredients at any well-stocked drug store, mix by shaking well. Syrup Sarsaparilla, Comp. 4 oz.; cod liver oil, 1 oz.; fluid extract, 1 oz. Take one teaspoonful four times a day."

**"T. Y. E."** writes: "My hair is bare and dead looking and my scalp is covered with dandruff. Can you help me?"

**Dr. Baker:** "Get a box of plain yellow misol and use it regularly, and your hair will become soft and curly, and it will bring back the natural color to the hair; your dandruff will be cured and you will be rewarded with a healthy growth of hair."

**"Mrs. Q."** writes: "I want something to increase my weight about 10 or 20 pounds. My blood is thin, watery and I have a pale complexion. Doctors say I am anemic."

**Dr. Baker:** "Probably your assimilative functions are impaired and anemia is the result. I would advise that you begin taking three-grain hypophosphite-tablets at once and continue until your blood is re-established with red and white corpuscles. These tablets aid digestion and cause the body to assimilate the fatty elements in food, thus giving color, weight, and strength to the abnormally thin."

**"Tom K."** writes: "I have been unable to work for some weeks on account of rheumatism. What would you advise?"

**Dr. Baker:** "Take the following and I am sure you will soon be back at your work again: Mix the following at home and take a teaspoonful at meal times and at bedtime: Iodine of potassium, 2 drams; sodium salicylate, 1 oz.; extract of cod liver, 1/2 ounce; comp.

## WARM WELCOME AWAITS COMING KNIGHTS TEMPLAR

GRAND OFFICERS, KNIGHTS TEMPLAR, WHO WILL TAKE PART IN COMING CONCLAVE IN THIS CITY. TOP (left to right), GRAND SENIOR WARDEN SAMUEL A. CLARKE AND GRAND PRIOR REUBEN H. SINK. LOWER PICTURE IS THAT OF GRAND ORGANSIST SAMUEL D. MAYER.

Every day unfolds new developments in the preparations of the various committees of Oakland Commandery, No. 11, are making for the entertainment of visiting Sir Knights and ladies to the coming annual convocation of the Grand Commandery of California, which will be held in Oakland the middle of next month.

The entertainment committee has been specially active this week. Frank C. Havens has placed Piedmont Park and art gallery at the committee's disposal Friday and Saturday, April 13 and 14, when all Sir Knights and ladies will be admitted free, coupon books being furnished them by the committee for that purpose.

The management of Idora Park has volunteered free admission to that attractive resort to all Sir Knights and ladies during the convocation season. OSTRICH FARM OPEN.

The East Fourteenth-street ostrich farm will be open to them, also, each day of the convocation.

On Friday afternoon a theater party will be given to the Templar visitors, where they can enjoy a special entertainment.

On Thursday morning and Friday morning and afternoon automobiles will be at their disposal to take free rides through the romantic and picturesque east bay shore district, which will give them an opportunity of seeing wonderful urban developments that have taken place during the past few years and take in, also, a bird's-eye view of the bay cities, San Francisco bay and the Golden Gate, of mountain and plain and glimpses of half a dozen of the counties, all combining to make an observation of varied natural and artificial beauty, unsurpassed in its attractiveness in any other part of the continent.

**GRAND OFFICERS.**  
The group of grand officers whose portraits are presented today embrace Sir Reuben H. Sink, grand prior; Sir Samuel D. Mayer, one of the best known vocalists and organists on the Pacific coast, who has been grand organist of the Grand Commandery of California, for 30 years or more, and Sir Samuel A. Clarke, grand senior warden.

### SCHOOL CLUB OF '60 HAS ANNIVERSARY DAY

CHICAGO, March 28.—Members of "The Sumner Club," an organization of men who were formerly high school students on the West Side back in the '60s, celebrated the thirty-eighth anniversary of the society here tonight at banquet. About 25 of the original 117 attended.

The society was organized as a debating club during General Grant's time to discuss questions of public policy, and thrived until the question of retirement to be served at banquets split the organization into two factions.

At tonight's meeting speeches were delivered by men who had traveled hundreds of miles to attend. Of the original members, 23 are dead, 22 are missing, 31 reside in various parts of the country, while 41 live here.

## DRUGS RAVAGING LATIN QUARTER OF PARIS

(Special to THE TRIBUNE by International News Service.)

PARIS, March 28.—Opium and cocaine are reported to have been making ravages in the Latin quarter. The young students, not content with the natural narcotics contained in their text books, have been looking for more powerful stimulants. One of the students held frequent visits to the municipal laboratory not to secure books, but to procure quantities of cocaine, which he gave to his young woman to sell, and out of which they both made a good profit. This is what the police know.

On the other hand, those who know the Latin quarter are astonished at the sudden virtuous indignation of the police. For years opium and cocaine have been consumed in large quantities. The owner of a brasserie says that all the students held frequent visits to the municipal laboratory not to secure books, but to procure quantities of cocaine, which he gave to his young woman to sell, and out of which they both made a good profit. This is what the police know.

### RETIREMENT SOCIETY FAVORS NATIONAL PLAN

CHICAGO, March 29.—The Civil Service Retirement Society of Cook county will meet here Sunday preparatory to the National Civil Service Retirement Congress to be held April 4 and 5 in Washington, D. C. The national organization plans to submit a bill to Congress providing for retirement of superannuated government employees on a system in keeping with the merit and efficiency system of the civil service.

### ROBBED OF VALUABLES.

SAN FRANCISCO, March 29.—Clay Cook, who lives at the Globe Hotel, reported to the Central station today that his room had been robbed of \$34 worth of valuables during his absence last night. He gave the police the name and description of a man whom he suspects of being responsible.

### ANTIOCH FISHERMAN MISSING FOUR WEEKS

SAN FRANCISCO, March 29.—Lewis Larkin, a fisherman of Antioch, has been missing for four weeks. He left his home on March 1 to come to this city to obtain medical treatment and has not been seen or heard of since. He is 40 years old, 6 feet 1 inch, of medium build, dark complexion, with black hair and mustache.

### SWEARS TO WARRANTS.

SAN FRANCISCO, March 29.—Bernett Lebowitz, of 28 Lizzie street, swore to warrants in the Police Court this morning charging Sam Platz and John Doe Sam with obtaining money under false pretenses. Miss Lebowitz claims that recently she was led by the two men to give them \$100 on the representation that the money was needed to pay freight on a valuable consignment of furs. She says that they had no such shipment.

## GRANDMOTHER USED SAGE TEA TO DARKEN HER FADED OR GRAY HAIR

Mixed With Sulphur It Makes Hair Soft, Beautiful; Cures Dandruff.

The use of Sage and Sulphur for restoring faded, gray hair to its natural color dates back to grandmother's time. She kept her hair beautifully darkened, glossy and abundant with a brew of Sage Tea and Sulphur. Whenever her hair fell out or took on that dull, faded or streaked appearance this simple mixture was applied with wonderful effect.

Sage and Sulphur Hair Remedy—You will get a large bottle for about 60 cents. Some druggists make their own, which is usually too sticky, so insist upon getting Wyeth's, which can be depended upon to restore natural color and beauty to the hair and is splendid for dandruff, dry, feverish, itchy scalp and falling hair. A well-known downtown druggist says his customers insist on Wyeth's Sage and Sulphur, because they say it restores so naturally and evenly that nobody can tell it has been applied—it's so easy to use, too. You simply dampen a sponge or soft brush with it and draw it through your hair, taking one strand at a time. Do this at night and by morning the gray hair disappears; after another application or two, it is restored to its natural color and looks glossy, soft and abundant.
